DEMAND NOW EXCEEDING SUPPLY.

Ice Bills, Butchers Report, More Than Wipe Out Profits.

VEGETABLES SUFFEE FROM THE HEAT

OFFICE OF PITTERURG DISPATCH, TUESDAY, August 5, 1890.

Among the effects of the late spell of hot weather has been a threatened famine of milk. Daily receipts in this line by the different railroads entering the city are not far from 20,000 gallons. The nearby dairymen who bring their products to market by wagons very much swell this amount.

The main artery by which milk flows to Pittsburg is the Panhandle Railroad. All along this line for at least 40 miles beyond Steupenville the milk cans are gathered up at the various stations in the early morn, and furnish food for babes and children of a larger growth in our cities. Next to the Panhandle is the Ft. Wayne Raihoad in furnishing this important article of diet. Large numbers of farmers have discovered of late years that there is more ready cash in turning their there is more ready cash in turning their products into milk than in anything elso. The wholesale price of milk is 16c per gallon this summer, and retail price 5e per quart. In the past week or two receipts have declined fully 55 per cent, for the good and sufficient reason that pasture is burning up. Consumption is immusually large in hot weather at the expense of tea and coffee.

Demand Better Than Supply.

Said one of the leading dealers in milk, yesterday: "We find it very difficult of late to meet demands of our regular customers, and, if this hot weather holds up much longer, we will be compelled to advance prices 50 per cent. To-day's rains are likely to check the de-mand for milk, since consumers will go back to tea and coffee when weather gets cool. But it tea and coffee when weather gets cool. But it will take several days of rain to restore the parture lands to the condition favorable to a good crop of milk." A nearby dairyman who requires two warons to supply his customers here, said yesterday: "I cannot more than one-half meet demands the past few days, and have been forced to refuse many of my customers. My cans are not getting in half their usual work the past week or two, and, if this hot spell holds on a few weeks longer, my trade will be about wiped out. On Monday I was forced to drop about 40 of my regular custom-ers for the reason that I was unable to furnish the coods. Milkmen have not raised prices. the goods. Milkmen have not raised prices, but will be forced to do so soon if the drought

Butchers' Trinls.

Butchers' profits are very meager such weather as we have been experiencing the past month. What with high-priced ice and losses from spoiled ment there is little left to the trade. A Dramond Market butcher said yesterday: "My ice bill for July wiped out all profits. I would be happy if my gains for the month were equal to the amount I paid for ice. My bill was \$258 for July, and I only paid a little bill was #258 for July, and I only paid a little more than 3500 for the whole season last year. Then I paid I7 cents per hundred for ice and now I pay 50 cents per hun-dred. The increased cost of ice more than takes away all the profits of our business for the past month. The people who think the butcher has a soft snap on account of de-clining prices of cattl. full to take into account the heavy expenses and big losses necessarily incurred in suc ta hot season as we have had. When the mercury stays around the 90 mark When the mercury stays around the 90 mark for a week at a time, as has been the case for a for a week as a time, as has been therease for a week past, ice disappears very fast, and it re-quires but a short period of contact with the southide air to put a finish to the value of meat. The money unade by butchers this weather will be so small in amount as to be hardly worth continer, and in fact, I believe the majority are lowing money."

be small and in fact, I believe the majority are losing money." Another department of trade, namely country produce, is very much affected by the weather. Southern fruits and vegetables have been com-ing to our markets of late thoroughly cooked by Old Soi. Fruil. Inspector Kilgere con-demped yesterday to the garbage pile \$150 worth of as fine cantaloups as were ever grown, but a little overripe. Grapes and to-matoes from the far South have been reaching our markets the past week in the same cond-tion.

The same trouble is experienced by dealers in tropical fruit, particularly bar hot weather hastens the ripeniog of The and large quantities have of late been thrown on to market at nominal prices. The only quer-tion has been how much can be saved out of the wrock the wreck.

Worked by the Bulls. CHICAGO-Wheat-There was rather large trading again to-day, and after a weaker and lower opening, prices recovered and passed the highest figure reached yesterday by le. The bighest figure reached yesterday by le. The opening was $\frac{1}{3}$ lower, and prices further receded $\frac{1}{3}$ c, but after several fluctuations the market suddenly became stronger and ad-vanced about 2c above inside figures, then eased off some, and closed about $\frac{1}{3}$ C wigher than varianday

than yesterday. It is difficult to give reasons for the various changes which occur in the market while in its present condition. The early decline and weak-ness was attributed to a desire to realize by

local parties, and some selling orders from out-side points were received. Then buying orders became more numerous and up went prices, with shorts anxious to cover. The basis for bull speculation now is the condition of wheat in the Northwest, and the possible outcome of the grop there. The news

and convenience. A prominent builder spoken to yesterday Corn was fairly active and stronger. The gave it as his opinion that the season will strength was due largely to the firm feeling in wheat, but a good many outside orders were on the market to buy corn which also had show a list not much short of 5,000 new houses in the city proper against about 4,000 last year while the country districts of which no record is kept, will come up with at least 2,009. This some influence. No rains of consequences were reported in the corn belt, but the tem is kept, will come up with at least 2007. This estimate, of course, will vary a little, but it is as apt to be too low as too high. These 7,000 houses will afford accommodations for 85,000 people. Where will they be found? Cartainly perature was said to be lower and more favor perature was said to be lower and more favor-able. The market opened 3,60% to above the closing prices of yesterday, was easy for a short time, selling off \$4c, then firmed up, ad-vancing in all 1%(2)\$4c, ruled very firm and closed 1%(4)\$5c better than yesterday. Onts were active, stronger and higher. Open-ing sales were at about the lowest and closing at nearly the highest, and recorded a net ad-vance of 1%(2)\$5c. Mess Pork-Considerable interest was mani-fested in the market. Prices were advanced not altogether in the city. A great many of them will be new accessions, drawn hither by the certainty of steady employment at good wages, or the many opportunities for starting in business. These 7,000 houses mean \$ large addition to the population of the city and fested in the market. Prices were advanced

Allow roll - Construct Prices were advanced fosted in the market. Prices were advanced 4004%, and the market closed rather firm. Lard-Trading was active. Prices were ad-vanced 10616c, and the advance was fairly well supported to the close. Short Rib Sides-Quite an active business was transacted. The feeling was firm and prices were advanced 150174c, and the appre-ciation was fairly well supported. The leading futures ranged as follows: WHEAT-No. 2. August, 350944,6930944(c); September, 91740956c, CORN - No. 2. August, 476453,6476454(c); September, 91740956c, CORN - No. 2. August, 476453,6476454(c); September, 91740956c, CORN - No. 2. flats, they being engaged before completion, and all of them occupied as soon as they are out of the builders' hands, it is likely that quite a number, including several large ones, will be built next year. A small but wealthy Mr. W. A. Lincoln, of Baxter, Thompson & Co., returned yesterday from a business trip to Buffalo. While there he met Mr. D. P. Black,

PITTSBURG DISPATCH, WEDNESDAY, AUGUST THE 6. 1890.

BANKS AND BANKERS.

Good Reports From the Institutions Which Dispense Sinews of War.

Reports of bank officers yesterday were to the effect that money was abundant for business purposes, with a tendency toward greater ease, a fair demand and the 6 per cent rate main-tained. Exchanges were \$2,874,859 \$5 and bal-

tained. Exchanges were \$2,374,559 % and bal-ances \$465,328 93. For July, 1889, clearings of San Francisco banks were \$71,288,951; for the same month this year they were \$79,010,576, showing a gain of \$7,711,625. Pittsburg clearings for July, 1889, were \$67,547,846, and for the same month of the present year \$72,086,723, showing a gain of \$15,-538,877. At this rate of progress it will not take long to reverse the financial positions of the two cities. ous drawbacks early in the season, such as wet weather, muddy roads and labor troubles, is on a larger scale than in any former

long to reverse the innancial positions of the two citics. A bank officer remarked yesterday: "Not-withstanding large deposits there is sufficient demand for funds to prevent excessive accum-ulation. I remember but few summers when money was as largely and profitably employed as now. Thus shows the industries of the city are in active and healthy operation." Money on call at New York yesterday was light, ranging from 454020 per cent, last loan 5, closing offered at 5, Prime mercantile paper, 55054. Sterling exchauge quiet and firm at \$4 85 for 60-day bills and \$4 8954 for demand. in architecture and provisions for comfort

uting the past year and a half, but he could not say whether his father would quit the business.
It is generally conceded by river operators that if any of them could dispose of their interest if any of them could dispose of their interest if any of them could dispose of their interest is a reasonable price they would not be slow in being counted among the former coal operators. The business is so evercewded that there is little profit in it at present. There are certain coal operators in this city who, to dispose of large fleets of coal in the lower markets, sell under the established rates rather than leave it remain there for a long period. This is supposed to be one of the reasons why O'Neil & Co are quitting—that is, if they do, Nr. H. R. O'Neil flatly contradicts the statement which he is credited with having made to the effect that the company had all its towhoats now for sale. He told a DISPATCH reporter that the whole thing was a mare fabrication, and had originated with some rival operators, who gave it out for publication with ave no ther effect. O'Neil & Co are classed mong the largest coal operators here. The have not yet been worked, and coal tippies and anumber of towhoats. The value of the whole that one operator, speaking of the condition of senters, but it is very large. A of the coal business, but it is way load not cannot be estimated, but it is way increate in the business that would not findly get out of it if could get a price that would not in the past few months, said: "Thave have noil and shift more in the business that would not in the pusce. A more report that our first in the sole indived to the coal trade. The report that our first indived as the price of coal is fair at Cincinnate. There was an English publication of selling out my interest in the business, n-bining failing the price of coal is fair at Cincinnate. A COLONIZATION SCHEME. A Plan to Establish Negroes on Mexican

Coffee Plantations.

ST. LOUIS, August 5 .- J. Milton Turner, an attorney, will leave for New York to-day to arrange the details of his plan for colonizing negroes in Mexico. He says the plan is being promoted by a firm of coffee dealers in New York, who have a capital of about \$5,-000,000.

"The purpose of the firm," he said yesterday, "is to put the negroes to raising coffee and sugar. They own about 21,000,000 sores of land, which will be divided among the colonists. No rental will be charged for the land and the firm will turnish all means of support for the negroes till they can get their grounds under cultivation and become their grounds under cultivation and become self-sustaining. They are willing to spend \$2,000,000 to \$3,000,000 in that way. The details of the scheme will be settled August 14. It is believed the movement can be made very beneficial for the negroes. I have already received a large number of ap plications from negroes who are anxious to ro."

These applications come from all parts of the country.

Impaired Circulation.

NEW YORK, Angust 5.-The drygoods mar-ket continues to exhibit improvement, both as to demand and tone. The volume of trade was not as large as yesterday in the absence of mails from the West, but there was more doing locally and on the part of buyers in the market. All cotton goods are in good shape. Impulses Circulation. Dr. Flini's Remedy, by exercising a regula-tire influence over the action of the heart and the general circulation, will check at once bleeding from the lungs, and will cure dropsy of those organs. A MONOTONOUS DAY.

Awalting the Opening of Proffers of Silver Bullion-Benra Using the Corn Crop Situation on Railroads-Lons

Animation in Bonds.

NEW YORK, August 5.-The movements in Atchison, Missouri Pacific and Sugar Refin-eries continued to be the only features of the had fallen on the Boor of the laundry and been found by the proprietor, who lost no time in restoring it to its owner. Honesty is not limited to the white race. . Plans are being prepared for the proposed schoolhouse at Edgewood. It will be built so stock market to-day, and the remainder of the list was, as usual, extremely dull and practilist was, as usual, extremely dull and practi-cally stagnant. During most of the day there was a firm tone prevalent, but final prices show very slight changes from those of last evening. The monotony was as oppressive as at any time, and even in Missouri Pacific and Atchison the movements were comparatively insignificant, the declarations of the interest on the Atchison incomes having seemingly no influence what ever upon the stock or the bonds. The selling of the past two days has come almost exclu-sively from bear sources, but the buying is more difficult to trace, but, as usual of late, when the pressure of short sales was removed. prices rallied while the market became dull and uninteresting. The street is now anxiously awaiting the time

when the proffers of silver bullion will be opened in Washington under the new law. The late movement of silver outward seems not to have been maintained, and a noted bullion house to-day ordered \$200,000 in silver from London, which will arrive in time to be included in the first offering. The little flurry in money last evening was an-

other factor in the disposition to wait which is so prominent in the street, and the action of the new law is awaited with the expectation that all such movements will be prevented by its enforcement. The rise in silver seems to have reached its limit for the time being, and Local Stocks Hold Their Ground, but Trad-

is enforcement. The rise in silver seems to have reached its limit for the time being, and the price to-day went back to below 118. The early London figures were generally lower than ours of last evening, and first prices here were generally made up on the same plane with a special loss of $\frac{1}{2}$ in Pacific Mail. Further de-dines of fractional amounts were scored under a renewal of the pressure of the forenoon, the forenoon decline being led by Missouri Pacific in the regular list, and Sugar. The bears united here forces against Missouri Pacific, as a weak-ness in that stock always causes outsiders to believe that Mr. Gould is in favor of lower these on operating in the market. The bears are laying great stress upon the holders of railroad stocks, but from the stand-point of railroad stocks, the per grow will be extremely smail. The spurt in the market had displayed much more steadiness havy to weak at small fractions under the any esterday. The close, while quiet, was heaving prices, even Missouri Pacific failing to just dury blayed the same dropping tomes and any but displayed the same dropping tomes and and while they were weak failed to make any more than a fraction. Bailroad bonds were if anything, less animated than yester-day, but displayed the same dropping tomes and and while they were weak failed to make any more than experiment bonds duil and stread on the grand total of only \$955,600, and missi decine. Northers Pacific merminal and the failed and without facture. ing Nothing to Brng Abont. As usual of late the bulk of business and in-terest centered in Electric rights yesterday. The lowest price at which they sold was 50 cents and the highest 60. Regular business was confined to Pleasant Valley, Electric, Chartiers and Philadeiphia Gas, sales of which aggregated 65 shares. The market presented a firm front, but price changes were unimportant. For a membership in the exchange \$460 was bid—an advance over recent figures.
