The Situation of Markets Decidedly in the Buyer's Favor.

COMMISSION DEALERS COMPLAIN.

Prices of Sheep and Lambs Decline Owing to Hot Weather.

LITTLE LOCAL DEMAND FOR PORKERS

Our local trade requires not more than 75 head of cattle, and in such hot weather as we have been having the past week requirements are even less. As there were 135 head on the market at East Liberty on Monday morning, it does not need telling that the situation was decidedly in buyers' favor. There were very few beeves on the market, such as our trade calls for, mainly light tidy butcher stock weighing from 1,000 to 1,200 hs. This grade did not constitute more than 5 per cent of the total receipts. By reason of scarcity, light smooth butcher stock was fairly steady at last week's prices. All other grades were slow at a decline of 15 to 25 per cwt. The highest price paid was \$4 30 fer a load of 1,400 h very good but not prime cattle, which were bought for export purposes. Primes of the same weight would have brought \$4 50, but there were none of this class offered. \$4 50, but there were none of this class one real. Light, tidy butcher cattle ranged in price from \$3 80 to \$4 10. Said one of the leading commission men: "I have never seen live stock markets more demoralized than they have been this week. Buyers saw their advantage from large run and hot weather, and made the most

could not be brought to our terms. They in that, having paid low prices for stockers and feeders last fall, with a big corn crop be-hind them, it would be poor policy to pay pres-ent prices with the prespect of double prices for corn. Stockers and feeders were as low this week, if not lower, than any time last

There is no doubt that the recent hot weather and poor pasturage has had the effect of bring-ing large numbers of cattle to market. The in-ercased expense of keeping stock, owing to burned up pasturage, and prospects for a poor corn crop have without doubt influenced many a farmer to shove his stock on to market.

Sheep, Lambs and Swine. There were about 30 loads of sheep and lambs

on the market this week, and prices declined fully 25c per cwt from last week's markets. The hot weather and bad markets East are The hot weather and bad markets East are given as the causes of the decline.

Prime wethers weighing 35 to 100 hs were sold at \$4 6004 55 per cwt, and good mixed stock weighing 85 to 95 hs at \$4 25@4 50.

Lambs sold at \$455/c per h. Hogs were dull and slow this morning at \$3 8063 90 for the best selected, and mixed at \$3 65@3 75. Grassers sold at \$3 50@3 60.

Pigs and thin hogs are very dull stock at any price. It seems that farmers are getting frightened in view of high-priced corn, and are crowding stock on to markets. The recent hot weather and consequent had effect on pasturage and corn crop has had the effect of bringing to our markets far more stuff than can be

ing to our markets far more stuff than can be handled. The stockyards are no place to fatten up thin stock. This can be done much cheaper

McCall & Co.'s Weekly Review.

The supply of cattle has been liberal and the market very slow and lower on all grades ex-cept neat 1,000 to 1,100 hs, which sold at about last week's prices. Thin, light grades and coarse heavy was almost impossible to sell. We give the following as ruling prices: Prime, 1,300 to 1,600 hs. \$4 10@4 30: good 1,200 to 1,400 Bs. \$3 50@3 50; common to fair, 1,000 to 1,300 bs. \$3 50@3 50; common to fair, 1,000 to 1,200 bs. \$2 55@3 25; stockers and feeders, 800 to 1,100 bs. \$2 55@3 25; stockers and feeders, 800 to 1,100 bs. \$2 50@3 00; mixed lot's cows and heifers, \$2 00@2 50; fresh cows and springers, \$20@55 per head.

The receipts of hogs this week have been only fair and the offerings chiefly common and grassy, food corn-fed hogs are scarce and in fair demand. We quote the market to-day as follows: Choice scheeted, \$3 90@4 00; fair to heat Yorkers, \$3 80@3 90; grassers and common Yorkers, \$4 00@50 for sold \$40.

The receipts of sheep this week have been heavy and the market slow at a decline of 25c to 50c per cwt. from last week's prices. We quote sales as follows: Prime Olno and Indiana wethers, weighing here 105 to 110 lbs, \$4 75 to \$5 00; good, \$6 to 110 lbs, \$4 50 to \$4 50; fair to good yearlings, \$4 25 to \$4 75; fair to good, 50 to 60 lbs, \$3 50 to \$4 25; spring lambs, \$4 00 to \$5 25; veal calves, \$4 00 to \$5 00; heavy calves not wanted. hs, \$3 80@4 00; butcher grades, 1,100 to 1,300 hs,

MARKETS BY WIRE.

An Unsettled Feeling Still Dominates the Grain Pit-Crop News the Disturbing Factor-Corn Excited and Decidedly Stronger-

Pork Stendy. CHICAGO-Wheat-The feeling was again unsettled to-day. Trading was rather large and prices again higher. The opening was 1/2% higher than yesterday's closing, advanced a trifle and then fell back again, but later became strong, and prices were advanced 15/2013/c above inside figures, eased off some and closed about 13/2013/c above yesterday's closing. Nothing new in the way of bull news developed, but operators are evidently beginping to believe in the crop damage reports in

the Northwest and this is causing the firm

ness.
A report was circulated that a weekly local paper made the condition of the two Dakotas 51 against the Government report of 84. Operators did not give much credit to the report, though it had some effect in influencing the market. Advices received from the North-west continue to be of a conflicting character, and while some claim great demand, and great yield, others are claiming a fair average crop. Corn—Was active, excited and very much stronger, the market ruling very nervous and unsettled the entire season. The actions to stronger, the market ruling very must on unsettled the entire session. The sentiment of the local crowd was bullish, and there were numerous outside buying orders to fill on counhistorias varies outling orders to fill on country account, while offerings were extremely light at times and there were jumps of 1/6/4c without an intervening trade. The market opened 1/6/1c better than the closing prices of testerday, was firm and sold up 1/6/1c, cased off 1/6/1c order realizing, but again advanced 1/6/1c, ruled steady and closed 1/6/1/c better than yesterday.

than yesterday.

Outs—The market was active, unsettled and Oats—The market was active, unsettled and prices covered a wider range and touched higher figures than at any time on this bulge, but although outside prices were not maintained the closing sales showed a net advance of 28,683c. The strengthened advances were attributed to the illinois crop report showing a shortage of 82,000,000 bushels from last year.

Mess Pork—Quite a good trade was reported. Prices were advanced 59,670c and closed comparatively steady at medium figures.

Lard—A fairly active trade was reported with an advance of 10,615c. Subsequently prices reacted 10,615c, and during the latter part of the day prices rallied 56,75c and closed at about medium figures.

Short Rib Bides—A brisk business was transacted. Early prices ruled 10,612/2c higher;

Moderation on the Part of Owners Necessary to an Active Market.

RAPID DESTRUCTION OF THE FORESTS.

Speculators Assemble and Go Through the Usual Monotonous Routine.

Land owners here and hereabouts are apparently beginning to see the folly of holding out for fancy prices. This is sensible. Nothing has so depressing an effect upon this great interest as extravagant values, They drive buyers out of the market and obstruct business. Whenever an owner

his own light. It takes at least two to make a bargain. Buyers will not be coerced. If prices in the East End do not meet their views they can go to the Southside or down the Fort Wayne Railroad. There is an abundance of available land in large or small parcels in each of those districts. On the other hand, if Southsiders or West Enders feel that they are being squeezed they can transfer their operations to the East End. There is too much unimproved land in and around the city for owners in any particular district to put on airs as if buyers were under obligations to come to them. The com-plete recognition of this fact will be the making

of the market. It will insure permanent activ Of course intelligent buyers are aware that prices will strengthen as the city grows in population and business. This is as much in their favor as that of the owners. Fixing of values would indicate that the city had attained its full growth and an end of development—a con-dition that would soon put an end to dealing in lands and houses. Fair prices and steady appreciation, therefore, are evidences of strength and an incitement to activity.

Vandalism in the Woods.

The question of forestry is one of wide inerest to those who have given the subject thoughtful consideration; but the uninitiated have but little idea of the great destruction of forests on this continent which has been going on for years by lumbermen, and by fires which frequently follow in their wake. Mr. William Little recently addressed a printed letter to the President and Council of the Montreal Board of Trade on the forestry interests of Canada, which is an elaborate and forcible plea against been going on for many years. The facts pre-sented by the writer of the letter in question, bearing upon the reckless cutting of timber in the United States, are positively astounding.
if e asserts that the present annual production of sawed lumber in the United States would load a train of cars 25,000 miles long, or long enough to encircle the earth, and adds: "I fancy some will be surprised at such figures; but it is figures like these that force all who will reflect on the matter to use expressive adjectives whenever treating of its importance; but this sawed lumber is only a small part of forest freight, there are still all other forest

and fencing, mining and export, round and hewed timber, we have our train loaded 72,000 miles; and if to this we then add the fire wood, etc., amounting alone to 216,000 miles, we have a total train of 288,000 miles in length, or more than enough to reach from the earth to the moon, still leaving our lumber train encireling the earth, with 22,000 miles of train to spare." The whole of these timber products handled annually by the American workmen not only shows what a mighty weapon is the ax in the hands of the skillful chopper, but leaves all other agencies-whether of fire, flood, or temest-so completely in the rear, that in the race of destruction they may be said to be practi-

THE BUSINESS LUBRICATOR.

Money Moving Satisfactorily-Demand and

Supply Rusning Well Together. Several bank officers spoken to yesterday said money was working somewhat easier than last month, the lessened demand for accommo-dations being due in part to absenteeism and in part to partial suspension, as usual at this season of the year, of some of the mills and factories. It is also the dull season with many of the wholesale merchants.

The supply of funds on hand is, however, quite moderate, as compared with former years, with a prospect of employment during the coming fall season. Financiers are thoroughly satisfied with the results of the summer's operations and encouraged to look forward to something as good, if not better.

Checking was fair and depositing heavy enough to indicate a lively movement in trade circles. The regular rate on call loans was 6 per cent, anything lower being exceptional and rare. Time paper was accepted at 7, as a general thing. Exchanges were \$2,340,977 and balances \$41,524 35. eral thing. Exchanges were \$2,320,977 and parances \$441,524 35.

PRICES TAKE A TUMBLE.

Benra Much More Aggressive-Scarcity of Money on Call Worked to Full Extent -Railrond Bonds in Close Sympathy With Stocks.

NEW YORK, August 6.-The stock market to day was more active in spots, and developed a decidedly weak tone in the afternoon, during the prevalence of which prices were brought down to a lower level than has been seen for some time. The bears are much more aggressive and point to the fact that no matter what the expectation may be for a more active and higher market with an abundance of funds in the near future, there is, and has been for the past few days, a growing scarcity of money on call, which the disbursements by the Secretary of the Treasury for bonds is not sufficient to relieve, and for the present there seems no im

mediate prospect for an improvement.

The point of attack was shifted from Missouri Pacific and Atchison and C. B. & Q. and Reading to-day, but all the others sympathized to some extent with the declines in those shares. The other grangers were compara-tively well held, but the coal stocks were uni-

shares. The other grangers were comparatively well held, but the coal stocks were uniformly weak, and while they were dull, Delaware and Hudson lost a large slice of its late advance. The industrial stocks for the time being were comparatively neglected, especially in the afternoon, when the pressure on the railroad list was most severe, but they also felt the influence and declined with the stocks of the regular list. Sugar was very feverish and some violent fluctuations were recorded in it. New England was also active and feverish, but was well maintained, and with one or two others, succeeded in closing a fraction higher than yesterday.

News to-day was principally of the crops and of an unfavorable nature, while the fear of tight money was worked for all it was worth by the bears, and these two factors were all that made the heavy declines of the day, coupled with persistent hammering. The temper was at the opening more hopeful, and first prices were something better than last night's figures, while further improvement was made in the morning hours. The usual dullness intervened, however, and the bears then got to work, Burlington coming first, followed by Reading and the others. The lowests prices were grantally reached in the last hour, and money going up to 12 per cent, there was no reaction. The close was fairly active and weak at the lowest points. The list is generally fractionally lower, but Burlington is off 2%. Wisconsin Central 2, Chesapeake and Ohio second preferred 1%, Rook Island 1½ and Union Pacific each 1 per cent.

were conflicting, but the statements of the damage along the lines of the Missouri Pacific and Atchison have doubtless been considerably exaggerated. Late rains have fallen and will reduce the amount of the damage. It is expected that the meeting of the trunk line representatives to-day will result in an adjustment of existing differences and a restoration of rates, but nothing definite was known up to 2 o'clock. A meeting of representatives of the coal trade will be held here, probably to-morrow, to devise some plan for the regulation of production and tonnage that all the companies will adhere to. The favorable statements of St. Paul and Atchison, together with easier money here and in London and an advance in Argentine securities, helped to make higher prices here during the forencon.

RIVER INTELLIGENCE.

A Great Engineering Feat to be Attempted Next Week.

The preliminary work incidental to placing the channel span of the Ohio connecting bridge is well under way. The span is resting on the

false work a few yards below the pier. It will be put on nine barges and towed up to its final position, when the barges will be sunk. The span weighs 1,800 tons and the placing of it on the pier will require at least two days. This is quite a new departure in bridge constructing. It was first attempted at Sidney, Australia, but before the span there was put into position it was blown down and the work abandoned. M. J. Becker, engineer for the Panhandle road. stated that the span would be ready to be put nto position about the 15th, but it will depend largely on the condition of the river. The feat is attracting wide-spread attention,

and will be witnessed by railroad men and en-gineers from all sections of the country. The carrying capacity of the barges built expressly for this purpose is estimated at 620 tons, the whole carrying 1,240,000 pounds.

The wharf were an air of bustle and activity yesterday. The Retail Grecers' Association plenic drew large crowds to the wharf to take the boats for McKee's Rocks. The four boats did a land office husiness carrying constitutions.

plenic drew large crowds to the whart to take the boats for McKee's Rocks. The four boats did a land-office business carrying excursionists during the day. Policemen in citizens' garb were on hand in case the crowd became disorderly, but their services could have been dispensed with, as nothing occurred to mar the simple festivities. The up river packet lines had all they could handle comfortably in the way of passengers and freight, and everybody was jubilant as a result.

HE SAID IT WAS ALL IN FUN.

A Colored Man Does Some Execution With a Razor on Market Street. John Hutchinson, a colored man living at 1826 Union alley, ran amuck on Market street, near Second avenue, at noon yesterday. He was brandishing a razor in his hand and cut one man's coat down the back and severed the coattail of another man and

gave several other pedestrians lively chases before he was arrested by Officer Hilder-buck. He said it was all done in fun. Horse and Buggy Stolen. H. Sheiffler, of Brushton, had a horse and buggy valued at \$150 stolen from in front of his residence Tuesday night. The horse was hitched to a tree, when a man entered the yard, and, cutting the strap, jumped into the buggy and drove away. The thief
