It is entirely too late to dilate upon the pleasures of the past season, and too early to anticipate the coming one. We are simply "betwirt and between," but numerous little pleasure excursions testify to the fact that those who remain at home during the summer months are enjoying themselves in various ways. Besides the yachting parties and straw parties, several charming little luncheons and dinners have been given recently by the home folk to the home folk.

And one of them last week was especially noticeable, not alone for the elegance of the menu and the enjoyment of the guests, but for the daintiness of the service which ineluded the latest wrinkle in that line-exquisite little damask dovlies with which to hold the roasting ears that formed a part of the dinner and which fill a long felt wantthe doylies I mean, though in many in-stances that remark might apply to both dovlies and roasting ears. No more soiled fingers from eating the

very popular though very unromantic ear of corn! The tiny doylie, about the size of the finger bowl doylie, will prevent all such and really with the assistance of said doylie the act of eating corn is elevated almost to a plane of dignity-almost I said but not quite. It is impossible to conceive how it will ever become really dignified when visions of big people and little cars of corn and big cars of corn and little people in the very hottest of the fray float before the eye; but dignified or not it is a pastime hugely enjoyed just at the present season and made much more enjoyable by the use of pretty little embroidered napkins.

## HOURS OF PLEASURE.

## Social Gatherings in the Two Citles That Interest Society People.

What promises to be a most enjoyable social event is the lawn fete to be given next Wednesday evening at Windsor Park, Bellevne, by the officers and members of Major Sam Harper Camp No, 162, Sons of Veterans. Handsomely engraved invitations have been issued to over 500 of their friends, many of whom have signi-fied their intention of being present. This camp has made a reputation for itself by camp has made a reputation for itself by former entertainments, and as the gentlemen having this affair in charge determined that this one shall be fully up to the standard of previous events given by the caup, a most en-joyable time may be looked for by the lucky holders of their invitations. The members of the camp will appear in uniform, and the plat-form and grove will be beautifully decorated with bunting, flags, etc., while the grove will be fluminated by natural-gras jets and hundreds of fancy colored lanterns. Guenther's Orches-tra will furnish the music from 8 to 1. A special train will return from the grove, leav-ing Bellevue at l o'clock A. M., city time. Mr. Lewis R. Foulk, Chairman of the committee, has every arrangement completed for the has every arrangement completed for the event, and the friends of the camp may look forward to an enjoyable evening.

A very interesting and social yachting party and , carriage drive took place fuesday last, under the invitation and management of Mr. Milton I. Baird, owner of the fine and neatlyequipped little yacht, "Nautilus." The party sted of Miss M. Walton, of the East End Miss Emma Fralich, of Glenfield, and Miss Alice E. Foulk, of Urbana, O., and the Messrs . Baird, George K. Anderson, and Bosweil R. F. Foulk. The party departed from the Sixth Street Suspension Bridge, at 4 o'olock, and glided gently down the Ohio, till naviga-tion at that hour, was impossible—that is when they reached the Davis Island Dam they could proceed no further with the yacht—hence they departed by rail to Sewickley, at which place they procured a couveyance suitable for the congenial company and proceeded to Economy, calling on Captain John L Beno and family who are summering among the Economites; returning that evening to Gienfield, and the following morning bright and early the entire party proceeded to the yacht, and returned home at noon, after going a short distance up the Allegheny, to further enjoy the pleasures of boat riding. GUSHER AT CHAMBERTATE

Artesian Well Found That Throws a Two

and a Half Foot Stream.

CHAMBERLAIN, S. D., August 7 .- The

recent discovery of a natural artesian well

or geyser on American Island, is causing

considerable talk in this portion of the

ew State. American Island has, until re-

cently, belonged to the Siour Indians, and

for this reason the citizens of Chamberlain

have never had an opportunity to make a thorough examination of the springs, which

have for many years been known to exist there. Several days ago some of the citi-sens began experimenting, and the result of their labors has been as much of a surprise to the solution of the several sever

to them as to the people in this section of the Northwest. There are two of the springs, located but a tew hundred feet

spart, one of them being a large one and the other somewhat smaller. After several days' labor the workmen suc-ceeded in sinking a galvanized iron tabe,

21/2 feet in diameter, into the center of the larger well, and it was found necessary to put a weight of several tons on top of the

tube to prevent it from being blow out.

After repeated efforts the tube was forced

nearly twenty feet into the earth directly

over the big spouter, when a rock bottom was reached, and the men were unable to sink the tube any further. After fastening

it down a long iron rod with rope attached was sunk into the center of the well, but it

failed to touch the bottom. This points plainly to the fact that the water bursts

through a fissure in the solid rock 20 feet below the surface of the island.

Many competent engineers who have care-fully examined the wells give it as their

opinion that the geysers receive their sup-plies of water directly from the great artesian

basin which underlies the Dakotas. Th larger well, or spring, is now throwing a

214 foot stream of water fully 40 feet abov

the level of the Missouri river. The same ex-periments were made on the smaller well and

the results have been as successful as with

the larger one. Pipes have been connected

with the smaller well and the water is car-ried to a spot a short distance away beneath

the trees, where bathtubs have been placed in position, and visitors to the island are in-

wited to take a bath tree of charge. The water from both wells has been analyzed

and found to contain iron and a number of other ingredients that make it very valuable

for medicinal purposes. The water is quite warm, having a temperature of about 80°.

The cause of the trouble was a difference of opinion between the two while doing guard duty at the last camp, and while the affair was dee.ned of rather a tame character at the time, the charges above mentioned were ultimately preferred. It has been a number of years since a general court was held in this end of the State, and even if the charges referred to scarcely war-ranted trial considerable instruction might be bronght out by such a session. That the court will be ordered, however, is scarcely probable, as Second Brigade Headquarters seem to have considerable dread of making any moves of the kind, since several papers of a similar charac-ter have been pigeon-holed during the past year or two.
