my forehead; my eyes were very painful, had roaring in ears, dry nostrils, frequently blow-ing pieces of thick mucus from them, throat parched and raw, had taste in mouth in morn-ing, sickness at stomach and frequently vomit-ing of meals and also a heavy feeling over my heart. My work is that of a tank inspector at the Fort Wayne shops, Allegheny, and lately these troubles became so severe I had to knock off work, for when I would stoop down to look under a car I would get so dizy I would fall over, and I had such agonizing pains in my head I thought I would go crazy. My throat became so raw and my voice so husky I could searcely talk. Night sweats set in, and while I slept soundly, I would get up in the morning more tired than when I went to bed, and my legs ached so I could hardly drag one after the other. "I was induced to consult Dr. Byers, as he had so much success in cases like mine, and the third day after my first treatment the agoniz-ing pains were relieved, and in two weeks I was at work again. I haven't a vestige of pain left, and I can est and enjoy my meals as well as ever I could. Naturally I feel very grateful to Dr. Byers for the great change he has worked in me."

A GOOD FALL BUSINESS

Is Now Expected, but Hopes of a Decided Advance Have Been Given Up.

TEPECIAL TELEGRAM TO THE DISPATCE.

CINCINNATI August 15-Rogers, Brown & Co., says: "There are no important changes to note in the iron market. A quiet spell always develops some weak sellers, no matter how strong the general situation. Some of these have been heard from the past week and sales are reported a shade under what leading com-panies arg holding for. There is a great pressure to get iron forward on orders, parpressure to get this torward on outer, par-ticularly on certain scarce foundry grades. Foreign markets are stronger, consumption keeps up at an unprecedented rate, finished products are in great demand, and latest reports show a temporarily diminished output of pig. On the other hand much is being made of the

On the other hand much is being made of the promised shortage in the corn crop, and the ex-prected blowing in of new furnaces South and No tb. On the latter head it seems certain that the accession of new furnaces to the pro-ducing list will be slow on account of the diffi-culty of securing material in full supply. As to corn, it is contended that a fair crop at high prices is a spood as a big one at low prices. Prospects continue to favor a good fall busi-ness, but expectations of a decided advance in prices are practically abandoned. prices are practically abandoned.
