The Elements Do Great Damage in Some of the Most Important Mining Districts.

DISCOVERY OF A BONANZA LODE.

One Piece of Ore Declared to be Rich Enough to Assay at the Rate of \$100,000 Per Ton.

SOME COMPANIES GIVE UP THE FIGHT.

ne in Montana Succeeds in Securing Only Thirty Cents' Worth of Silver.

NEW YORK, August 17 .- The following reports have been received from the leading

TUCSON-The heavy rains have continned. We have had no communication with the East for a week, and the present outlook is that it will be several days before it will be possible to get mail that way. Mining news from the south is also cut off, and the Sonora Railroad is a perfect wreck, and it will cost more to rebuild it than to construct a new road to this city, abandoning the road from Benson to Nogales. A mass meeting has been called to provide ways and means looking to the change, which would, without doubt, be of great benefit to this city, and relieve that company from the vexations delays that they have nearly every year. A. J. Ritter made a rich strike at the Mammoth a few days ago. He made several loeations and sent some of the rock from each elaim to be assayed. One of the most uninviting looking specimens went so high in gold that Mr. McNeil, Mr. Moore's partner, went at once to the Mammoth to look after the new bonanza. The rock assayed into the thousands and Mr. McNeil is still at the mines, where arrangements are being made to develop the claims. Dr. Peters, a copper metallurgist, accompanied by Charles T. Gooding, left for Silver Bell mining district to investigate some copper mines there. With the extensive operations of the Silver Bell syndicate, soon to be commenced, the working of several copper mines there will give that splendid district a send-off that it has not had for years. The silver production of Grant and Sierra coun-ties for this year will be considerably greater than it was last year, while there will, in all probability, be a falling off in the amount of gold produced. Lake Valley, Hermosa, Georgetown, Lone Mountain, Cook's Peak and Hachita will show a large increase in silver produced over last year, and the other silver camps in the two counties will show an increase, but not so marked as in these camps. Pinos Altos and Hillsborough will show an increase in gold production, but the Carlisle Gold Company (Limited) which has the largest gold plant in the Territory, has suspended operations in the mine, and this will more than offset the increase in the other camps

A Searcity of Coke.

DEADWOOD-The Deadwood and Delaware smelter, which blew in last week, continues in very successful operation. Two carloads of coke, or sufficient for five days' run, are on hand, but nothing can be learned from subsequent shipments of coke. Owing to the poor freight accommodations between this and Chicago, the Deadwood and Delaware smelter has not been running more than half time. It is now running on Maggie and Hester A. ore. The Superintendent of the Iron Hill speaks enthusi astically of the situation at that mine. Lead ore is coming in on the 300 workings, which heretofore exposed dry ore exclusively, and in the 160 and 100-foot levels. Considerable rich lead ore, similar to that of the Home Run shaft, is taken from between the 100 and the surface. Only 12 men are employed, but the force will have a handsome output for the smelter when it shall blow in, upon completion of the railroad. The Montana mines and mills were temporarily closed down on last Monday and all employes discharged, pending the arrival of the Burlington and Missouri. Another reason assigned for closing down was that the ore does not pay. Five thousand tons of ore were milled, yielding from \$1,200 to \$1,500, or an average of about cents per ton. Just what percentage of the assay value this may have been is not known. A vastamount of money and labor has been expended on the Montana enter-prise, and, as with the Greenwood, undoubt-edly squandered with no expectation of realizing anything from legitimate mining operations. The Montana plant is one of the most complete, as it is one of the most expensive, in the hills. It is said that work will shortly be resumed sinking a shalt to a

Some Who Do Not Talk.

SAN FRANCISCO-Many of the richest mines in California are seldom heard of because they are owned and worked by pritheir own hands and say little about the property. A very large percentage of the total gold and silver output of California is from mines not known to the public. New forms of metallic ore are constantly being discovered by miners. While taking out galena at the White Hills, Ingo county, P. Key and A. L. Davis found a vein of brittle, fine-grained ore of dark luster, which they supposed to be worthless, and threw several tons of it down mountain. Being curious to learn what the majorial was they sent a sample to an assayer who reported that it contained 772 punces of silver to the ton. The prospectors are not dumping any more of that rock into the gulch. Tests made of the rock used by the contractor who is building jettles in Eureka harbor, Humboldt county, show that it carries \$20 in free gold to the ton, and the people of Eureka are wildly excited. The contractor has dumped thousands of tons of the rock into the bay for \$2 a ton, and he is the wildest man in the county. Rock taken from the prospect shafts of the Moore mine, Placer county, assays \$240 a to,n \$4,300 is the clean-up from one crush-

Discovery of an Alleged Bonanka. TACOMA-Recent explorations in the Olympic Mountains have been of great interest to mining men. A geologist who has given some attention to the work of the exploring parties says: "I have examined many specimens from the Olympics, but un-til of late they were of low-grade out-crop-nings. Recently, however, some extremely has been admitted to the order as a postulant. rich specimens have been received. These new discoveries have excited a great deal of new discoveries have excited a great deal of interest in prospectors in this region, and specimens are coming in rapidly. Not long since I received one piece that was so rich that I refused to assay it, as it could not possibly be a fair sample. It would have assayed over \$100,000 per ton. There could not possibly have been in any locality any considerable quantity of quarts so rich. I have long known that this region was rich in coal and iron. I am now conwas rich in coal and iron. I am now con-vinced that it hides vast treasures of silver and gold. Numerous prospecting parties are being fitted out and hundreds of pros-pectors are already in the mountains, which are quite easy of access."

Good Hope mine, in Dun Glen district, Humbolt county, is producing ore that yields \$1,000 a ton. The Chinese are making good wages in the neighboring placers. A group of mines in Montezuma placers. A group or mines in Montenuma district, Esmeralda county, are being developed by a company that recently paid \$200,000 for the property. Sam Paul recently discovered near the summit of White Pine Mountain a vein that carries 100 onness of silver and 66 ounces of lead to the ton. The vein in the lower level of the Big Creek antimony mine carried from three to five feet of solid antimony ore free from quarts. The rest of the ten-foot ledge is quartz with bunches of antimony.

A MIRROR OF LIFE. SUMMARY OF IMPORTANT FEATURES OF THE SUNDAY DISPATCH.

All the News of the Old Nations Reported-The Stirring and Interesting Domestic Events-Choice Literary and Illustrated

The Sunday issue of THE DISPATCH was number of unusual interest. Its 20 broad pages were filled with all the news of the day, and in addition there was a mass of choice literary matter and illustrated miscellany. A summary of important features follows:

Disputch Special Cables.

Belgian workmen will strike September 1 for universal suffrage....Proposition to inter Car-dinal Newman's remains in Westminster causes a sensation...Radical members oppose paying the funeral expenses of royalty...The conti-nental Sunday is being abandoned in Paris... The railway strike in Wales continues serious.In London socialism is reported as making great progress...A great restroat on co-operation is being held at Crystal Palace...The will of the Duke of Manchester ties up his estate in a peculiar way...Michael Davitt's plan to relieve the famine distress in Ireland; he proposes the planting of gross that will making relieve the famine distress in Ireland; he pro-poses the planting of crops that will mature next spring....The King of Holland possibly fatally ill....Hall falls to the depth of six inches in Austria; distress in the country is great....The Czar angry be-cause of the failure of his Bulgarian plans; he has a promising field in Armenia....Log-book of the Teutonic falsified in the great race....No Irish Cardinal will be appointed to succeed Cardinal Newman Six hundred succeed Cardinal Newman...Six bundred thousand people visited the Church of Knock, in Ireland, where the Virgin Mary is said to have appeared....Horse meat is used in Berlin by the poorer classes....Ireland wants the re mains of John Boyle O'Reilly interred there.... Bismarck denies the interview in which he was reported as expecting political resurrection.... Wedding of a girl made famous in the journal of Marie Bashkirtseff....The Brush company is to light half of London....The wrong man hanged for the murder of Gamekeeper Babbington....The Emperor to visit the Czar; he will use great caution to avoid arousing jealousy....The French greatly exercised over the McKinley bill; some queer opinions,

Throughout the Country. Senator Quay introduces his resolution looking to a vote on the tariff bill,... The river and harbor bill passes the Senate.... The antilottery bill passes the House....Pinkerton men use rifles at Albany; many of them locked up. .. The strike affects Lake Shore traffic. Tabernacle trustees refuse to accept a bust of Talmage because the mouth is too large; they are sued for damages,... A negro wrecks a train

at Winchester, Ky., for purposes of robbery A dissipated man at Lawrence, Mass, shoots his wife and commits suicide.... Charles S. Wolfe declares he will support Pattison... Knights of Labor in session at Reading de-clare they have not sold out to the RepublicansHow a train escaped being wrecked; it jumps from the main track to a switch....Ballot reform and the public schools discussed at Chautauqua ... The question of suppressing the negro bothering the Mississippi constitu-tional convention...The first rough count of the census; the population 62,695,955, with 1,200 districts not included....Brosi denies the charge of forgery, and extradition will be fought....The carpenters prepared to block-ade work in Chicago....Interviews with some of the richest men on the industrial question

they say the workingmen's condition is good, City and Suburban. A death in the jail; Charles A. Martin dies of

alcoholism; a prisoner who cannot see his dead child...B. & O. officials believe the Atlantic woolen goods trade suffers from the tariff tink. ering; foreign goods held in the country under bond Money being sunk in oil drilling ... Local agents of the Edison company notified of a motor which works noiselessly, and of which ent Chinaman begs for a revolver to commit suicide....Scheme of German glass manu-facturers to evade the tariff; they will have decorated ware finished in this country Westinghouse men are told they will be taken back, as individuals, on a nine-hour basis, but not as a body....Employes of the Penn Fuel Gas Company and of Wilson, Snyder & Co. decide to strike for nine hours, Amalgamated Association sanctions the strike against the Carbon Iron Works President George Jones, of the Building Trades Council, sen marshal for the Labor Day parade.... An advance of 5 cents a ton will be asked by conference with operators will be had at Altoona August 27....A wreck occurred on; the Panhandle at Midway by a cattle train running into the rear car of a coal train which projected from a switch; three men were injured and trains delayed...The miners' eight-hour meet-ing at Mansfield Valley; 3,600 people were

present ... Five hundred people were turned away from the fourteenth organ recital at Carnegie Hall Suit entered against the vate parties or close corporations, and their stock has never been listed on the market. The Derbec mine in Nevada county is an example. It employs over 100 men, has yielded \$1,500,000, and pays seven or eight dividends a year, but the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the stock is held by a few persons in San Francisco who keep it in the s survive the injuries received....The \$2,000 worth of diamonds of Julia Chesswell, of Wheeling were found in the postoffice box of Cora Hamlin, who was suspected of stealing them, after she came to Pittsburg.

CHANGES AMONG THE NUNS,

Improvements Being Made on the Webster Avenue Convent.

The last retreat of the Sisters of the Mercy Order has just ended, and a number of changes will be made in consequence. Rev. Father Smith, of the Order of Jesuits, conducted the retreat, which was held at St. Xavier's. The following will be the

changes: changes:
Sister Saraphina, Superioress at Braddock,
has been moved to Manchester, Allegheny;
Sister Bargio, Superioress at Manchester,
will go to St. Patrick's House on Liberty avenue, where she will teach in the school connected with the church; Sister Jerome, of Allegheny, Washington Street House, will go to Braddock.

will go to Braddock.

The improvements at St. Xavier's school have been completed and the place will be in the best of shape for the opening. A three-story brick building containing a large commencement hall, classrooms, study hall, museum, etc., has been added to the academy at a cost of \$10,000. The school will now accommodate about 160 pupils.

An additional story is being put on the old convent building at the corner of Webster avenue and Chatham street, to make it as high as the new building, which is five

Spasms—Epil-per.

Dr. Flint's Remedy, in catalepsy and epilepsy, at once causes the spasms to vanish, and when taken as directed prevents the recurrence of others. Descriptive treatise with each bottle. At all druggists, or address Mack Drug Co., N. Y.

The happiest women in Pittsburg are those who don't bother themselves with baking, but buy their bread and cake and crackers from Marvin. There is nothing in the world sweeter, better, or more wholesome than the Stanley cake, or the new and delicious coffee sponge cake. Your grocer teams than

AMONG THE OIL MEN

The Dispatch Scout's Notes of Operations in the Various Fields of

PENNSYLVANIA AND WEST VA.

Activity in the 100-Feet District and Elsewhere in Butler County.

MANNINGTON DRILLERS' HARD LUCK

CHARTIERS, August 17.—The Sculley is through the 100-foot, and from this sand would make a 20-barrel producer. While drilling in No. 5 Beck yesterday the bowl was broken off the stem leaving the bit in the hole. Webber & Co., on the Andy May, are through the 100-foot, and like the Sculley well, this would make a good pumper from this rock. On the Joe May farm the same parties are building No. 2 rig. Wesley Webber has leased ten acres

one-eighth royalty and will soon start building The Miller well on the Johnson farm at the present stage doesn't appear good for more than a 30-barrel well. Jennings & Co., on the May farm, brought in their No. 2 Saturday which is flowing 15 barrels an hour. This well makes the southwest end of the pool look better,

MONTOUR—Sill, Odell & Co. shot Young No. 1 Friday with 40 quarts of glycerine which has started the well to flowing again at a 30-barrel an hour gait. They also had the misfortune to stick the tools in McKeown No. 4, which is on top of the sand. Their Moore farm well is down 1,000 feet and will case to-morrow.

Spring farm No. 1, are nearing the interesting spot, and if the well makes a paying produc it will indicate that there is a possibility of the Ferguson pool connecting with the Murdocks-ville field. The well is located three-quarters of a mile ahead of the Ferguson development.

Armor farm, are due to get the sand Wednes-day or Thursday. The well is important, as it docksville developments. James Amm & Co. found a new sand in their No. 2. Lyle farm, 88 feet above the Shannopin sand, from which the well is producing five barrels a day. The oil is of 44 gravity and different in character from Shannopin oil. The well was dry in all the other sands. is located 1,000 feet east in advance of Mur-

Kanawha river from Charleston, and is down Ranawha river from Charleston, and is down 550 feet. About three years ago there was a well drilled half a mile east of the present venture, which was a small gaseer. Fred and Charley Hays are also drilling a wildcat well near Cairo, and have reached a depth of 850 feet. This party have secured a large amount of territory in this locality.

A Contractor's Opinion of Mannington A prominent producer and contractor came up from Mannington Saturday, and in response to THE DISPATCH reporter's interrogations on the Mannington field, said: "This is the worst the Mannington field, said: "This is the worst drilling I have ever struck, and no contractor at the present prices of drilling can get out whole. Here you meet with cave after cave of the most serious nature, and if the majority of the contractors in the Mannington field don't come out bankrupt then my long experience in the oil business ain't worth anything. I tell you, taking the average caliber of the wells, that oil can be bought 25 per cent cheaper that it cun be produced—a fact the majority of the operators will find out before they get through experimenting in this territory. I have been fishing on a well in which I have a half interest for three ballers and a set of tools in the neighborhood of six weeks, and I don't think there is the slightest chance of ever getting the hole clear. I am going to move the rig, and if I should succeed in consummating my contract by getting the well down, I will bid farewell to Mannington and my loss \$3,000 and consider I am lucky in getting off so cheap.

Marrinsville Wells.

since been vigorously applied. The same par

have got the casing back again in their No. 1 Ivory, which is making 50 barrels a day. Huffman & Co.'s No. 2 on the Wolfe farm had the misfortune to stick the tools at 1,500 feet, and t is doubtful if they can ever get them out, it is doubtful if they can ever get them out. The Rouser Oil Company No. 2 Ott farm, are in the salt sand, and with ordinary progress will find the oil horizon the latter part of the week. The Bear Creek Refining Company on the Morganstine, will tap the sand in No. 3 Thursday or Friday. Smith & Climons, on their Ivory farm lease, are drilling at 400 feet. Munhall & Co. are having hard luck with their No. 1 Rouser farm. Two months ago the well was drilled down to the 100-foot, at which time the stem was drepped. Since then they have been fishing, and the outlook for getting the hole clear is not encouraging. On the Marshall farm Fisher Brothers are down 1,000 feet with their well,

At Jack's Run.

JACE'S RUN-Dimmick & Co. No. 1 on the Stone Quarry lot, is being drilled through the sand, and is still making 200 barrels a day. The same parties on the Jones tarm got the sand in No. 1, which is showing for a good well. The boiler was moved out Saturday, and to-morrow boiler was moved out Saturday, and to-morrow the well will be drilled in; it is located the farthest of any well southwest of developments. The Patterson well, on the Patterson farm, would have found the sand Saturday, but the engine gave out, which will cause a short delay. Thayer & Co., on the Burger farm, is expected in to-morrow. The Jonah Off Company, on the Wormer property, are through the 80-foot, and late Saturday night was in the fourth sand, with no show of oil; this well is located 1,000 feet up Jack's Run from Straw No. 2.

Drilling at Canonsburg. CANONSBURG-Fisher Bros. are drilling No. 2, on the Weaver farm, at 2,300 feet, and the ing Springs the gas well still continues to flow at the rate of about 4,000,000 cubic feet every 2s hours. Thirteen new derricks are reported at the springs. The County Farm wells of Wirt are getting down slowly. A number of new wells are reported at Hanging Rock and other points below the Springs.

Trade in Lima Certificates. LIMA—With the opening of the Oil Ex-changes to-morrow a new order of things will go into effect, and parties here are not slow in saying that it will be to the benefit of the trade generally. Lima oil will then be traded in, not as heretofore, in credit balances, but the actual certificate will be issued. An order of the

of the Widow Weish farm at \$35 an acre and

LIABILITIES.

SHANNOPIN .- James Amm & Co., on the

MURDOCKSVILLE.-Drake & Mechlin, on the

Wildcut Venture. R. H. Herron is drilling an experimental well in West Virginia, located 11 miles up the big

MURRINSVILLE-The Snes & Co. well No. 4, Mortland farm, has quit flowing. The well was tubed Saturday, and the churning process has ties on the James Murrin farm will get the sand in No. 3 Wednesday. The well is located southeast of developments, and if it is a well will show an extension of the field. By the latter part of the week several other wells will be due, which will determine in a measure the future of the Murrinsville field.

New Operation at Westview.

WESTVIEW-The Westview Oil Company

Butler County Notes.

BUTLER-A special from Butler says the Long Oil Company have completed No. 3 Wahl farm, 100 foot, and is good for 100 barrels a Long Oil Company have completed No. 3 Wahl farm, 100 foot, and is good for 100 barrels a day. Hunter & Cummings brought in a well Saturday on the Kamerer farm, one-half mile southwest of the Tittley well, on the Wiles farm, in Donegal township, which is making 175 barrels per day. This well would seem to indicate that the belt runs southwest and northwest. This development is a very promising one and now that the second large well has been completed makes assurance doubly sure. The Wiles well is still making 175 per day.

The test well which is being drilled on the Gill farm, in Worth township, has attained a depth of 1,800 feet, without finding any third sand. The well will be sunk 200 feet deeper, but there is hardly any other probability than that it will be a total failure. Fifteen years ago a company composed largely of Philadelphia capitalisits spent \$30,000 in testing the territory immediately west of this well, and it is said that they found no third sand in any of the wells which they drilled.

Pettit & Co. No. 1, Heine lot, have recased their well, but just what it will do when started pumping will be learned later.

The Kanawha Oil Company will find the sand in their well on the farm adjoining Mrs. Burger farm Monday or Tuesday, while the Heine Oil Company are down 500 feet in No. 2 Heine. The Kicker well, on the Mrs. Burger farm, has been packed and is making 50 barrels a day; Kicker No. 2 rig has been completed. The Ohio Valley Gas Company, on the Kirish farm, are through the fourth sand and N. G.

Manufacturers' Gas Company are down 1,900 feet with their well on the Hickman, while Fisher Broa., on the McClay, are down 800

West Virginia Operations. West Virginia Operations.

PARKERSURG—The Stilwell well is down to the black shale and the operators have closed down, presumably to get more leases before going into the sand. Cook Unidwell and others of this city have purchased the oil and mineral interests under the Ohio River Railroad right of way across the Cone farm at Belmont. The Simpson well is within four feet of the strip. Nothing is being done with the Davisville territory this week, the proprietors having shut down operations, it is said, in order to lease more territory. The California well is still a mystery, guarded at closely as ever. At Burns.

certificate will be issued. An order of the Buckeye Pipe Line, nee Standard, of this field, just made public, is to the effect that some \$,000,000 certificates will be ready for handling to-morrow morning, and if they are all taken, there are a few left for emergencies, no doubt. The order referred to is signed by Daniel O'Day, President, and is as follows: "The patrons of the Buckeye Pipe Line Company are hereby notified that on and after August 18, 1880, acceptances will be issued for credit balances of oil held by it. The same rules, regulations and customs now in use by the National Transit Company will be applied to these acceptances, etc."

For this purpose appointments have been made at all of the large oil centers, Thomas Chester being the agent in Pittsburg and R. L. Bates the agent in Lima. Accompanying this is a statement of the stocks of the Buckeye Line on August 1, which will be of interest, in view of the intention to list the certificates. The statement is as follows:

.\$18, 343, 509 30

8,000,000 00

The acceptances mentioned are the certificates, of which but \$,000,000 are now in existence will be issued to the trade Monday, though the above statement shows that some cool \$10,000,000 are in reserve in case the demand is greater than is expected.

A 300 Barrel Wild Cat. ZELIENOPLE—The pipe line connections have not yet been made with the Allen well, and the oil is still flowing at a steady rate, it is expected that the connection will be made early this week. Several new rigs have been completed within the past week and drilling will commence at once. The Gaugler Oil and Gas Company's wild cat well at Wexford, on the Markus farm came in last week and shows up for a 300 barrel well. The company has located a number of other wells and leases are in good demand.

Good Well at Bull Run. TITUSVILLE-Later reports from the well on the Patterson farm, Bull Run, confirm the first reports that it is a good well. It is now doing at the rate of 250 barrels a day of good solid oil. The Patterson farm is about one mile north of Pioneer. The well is owned by a Mr. Sharpe, formerly of Petroleum Center.

The Bundred Foot Field. The 100-foot field is holding up its production as no other field in this county ever did, with the same number of wells drilled in the same given area. Twenty or twenty-ave wells on a

75-acre tract is not an uncommon thing, and there seems to be almost as many new wells there seems to be almost as many new wells under way now as at any time during the past year. A dry hole was completed yesterday on the Jacob Flinner farm, immediately south of the Humphrey, by Leidecker, Black & Co. This well is less than 300 feet south of their No. 1, on the same farm, which has been making 40 barrels per day for some time. It was a complete surprise to those who were familiar with its location. The South Penn Oil Company's No. 1, on the farm of Commissioner Duncan, will probably reach the sand to-morrow, or perhaps to-night. It is 100 rods east of Golden & Co.'s No. 1, on the Thomas Graham farm, which is the nearest producing well, and is important on that account, as it will show quite an extension eastward, if it comes in good. The same company is drilling a well on the James M. Ray farm, at least 20 rods southeast of developments, whole will be in this week. Reisner & Black are starting a well on the Hiram Graham farm, adjoining the Thomas Graham on the east.

H. McC.

THE OSCEOLA INQUEST.

Giving Detectives Time to Hunt Up and Arrest the Train Wreckers.

The inquest on the victims of the train disaster at Osceola, on the Baltimore and Ohio Railroad, will be held by Coroner Mo-Dowell on September 2.

The object of this delay is to give de-tectives an opportunity of finding the train wreckers and also for the purpose of securing witnesses. The passengers on the train were nearly all ten-day excursionists, and they will have returned before the date set for the inquest.

There are many white soaps,

represented to be "just as good as the Ivory." They are not,

but like all counterfeits, they lack the peculiar and remarkable

qualities of the genuine. Ask for Ivory Soap

insist upon having it. 'Tis sold everywhere.

LANGDON & BATCHELLER'S

CORSETS.

The Oldest, the Most Reliable and Meritorious of All Corsets Manufactured. For the last quarter of a century have been tested and tried by millions of Ladies of both hemispherea, and the universal verdict is that they are the most comfortable and self-adapting to every movement of the body. Made in three lengths—Short, Medium and Extra Long, Fifteen grades of varied material. Price from \$1 upward. All leading dealers have them for sale. Money refunded if not satisfactory in every particular, LANGDON, BATCHELLER & CO.,

DOUGLAS & MACKIE Prices Talked Nobly Last Week—This Week They'll

American Satines, choicest designs, that were 12%c, now for 8%c a yard. CATARRH AND LUNG TROUBLE MR. W. H. WISE

Testifies to his Permanent Cure by the Catarrh

Specialists at 323 Penn Avenue.

At No. 815 Brownsville avenue. Southside, resides Mr. W. H. Wise.

When he called on the catarrh specialists at their Medical Institute, 323 Penn avenue, he stated that his catarrh which had troubled him so long had become so severe that at times he was unable to follow his usual business.

The tough tenacious mucus that dropped from his head caused a soreness in his throat. Although he was almost constantly trying to clear his throat, the disease extended to his lungs. His breath became short, and he felt pain in his chest.

There was scarcely a day he did not feel great pain over his eyes. He took coid easily, and every cold would cause such a stuffed-up condition in his nose he could scarcely breathe through it. His appetite was poor, and he had belching of gas from the stomach.

Night sweats weakened him terribly and he lost flesh. In this condition he began treatment with the catarrh specialists on the 9th day of last December; on May 28 he gave the following statement:

"This is to certify that I have been entirely cured. It is now five months since I became cured. I feel splendid, and no symptoms of the disease has since appeared. W. H. Wisk."

who live at 73 Sedgwick street, Allegheny.
Miss Ehrhardt had for years been a great
sufferer from catarrh. She was almost constantly hawking and spitting, had sore throat,
and there was scarcely a day that she was not hoarse.

As some of this catarrhal poison extended to the bronchial tubes of her lungs she felt a tightness and weight in her cheet. She coughed badly, and as her disease further advanced she felt very weak and tired all the time. She could get but little sleep and felt tired and worn out in the morning.

In her weak condition every change of weather would give her a cold. Her appetite failed, and she had belohing of gas and a nauseous, sick feeling at her stomach after eating, and she had a bad taste in her mouth every morning.

eating, and she had a bad taste in her mouth every morning.

Her brother, Mr. Henry L. Ehrhardt, also suffered from catarrh. While he had many of the above symptoms, the disease so affected his head that he became quite deaf. He had a dropping of catarrhal mucus from his head into his throat, where it became very tenscious and hard to expectorate. After becoming cured by the catarrh specialists, at \$22 Penn ave., they add:

"We gladly testify that the above history of our cases is true, and that we have been cured as stated. In proof we hereby sign our names.

"HENRY L. EHRHARDT."

Flease remember these catarrh specialists are

Please remember these catarrh specialists are permanently located at 323 Penn avenue and nowhere else in this city.

Office hours, 10 A. M. to 4P. M., and 6 to 8P. M. Sundaya, 12 to 4 P. M.

Consultation free to all. Patients treated successfully at home by correspondence. Send two 2-cent stamps for question blank and address all letters to the Catarrh and Dyspepsia Institute, 323 Penn avenue, Pittsburg.

Good as Money Found.

Night Shirts WORTH \$1.

They're handsomely embroidered in Silk, are made with yoke, side pocket, and are cut full length-52 inches. The material is extra quality Wamsutta Muslin. We have but 100 dozen of these Night Shirts. Those who want them must come quick.

We nave just received another shipment of those

Patent Reinforced Armhole

UNLAUNDRIED SHIRTS

And will sell them at the same low price of

50 CENTS.

The great stronghold of these Shirts lies in a patented improve-

ment consisting of a separate and distinct piece of goods sewed on the

inner side, which reinforces the seams at the armholes, and extending on

the sleeve, thereby relieving the strain from the thin portion of the fabric, and effectually prevents the sleeve from breaking away at the place where it joins the yoke.

These Shirts have extra fine linen bosom, are made of the celebrated Langdon muslin, and fit to perfection. This Shirt, we guarantee, will more than hold its own with any \$1
