

ALL HEADACHE,

BEST & COES FARTHEST."

PAIN! PAIN! PAIN!

Neighbors Thought She Must Die. after they had exhausted all available means elsewhere, is that of Mrs. Henry Hunziker, who resides at 249 Colwell street, in the Eleventh ward, of this city.

Mrs. Henry Hunziker.

The aches and pains she had in almost every part of her body were simply unbearable. Immediately after eating, her stomach would be seized with terrible pain and cramps, which would continue until she would vomit up her food, and the gas that formed would cause her stomach to swell as if it would burst. In fact all kinds of food except milk would cause pain. She had pain over her eyes, dizziness and noises in her ears. Her mouth would have a bitter, disagreeable taste every morning. She had pain in both sides and across the small of her back, and in the night if she lay on her left sides she would be seized with the most excruciating pain, and her heart would palpitate as if it would jump out of her body.

Night sweats weakened her fast, and she had a constant tired feeling, but more tired in the morning than on going to bed. While in this condition she consulted the above specialists, whose reputation for making permanent cures has long since become thoroughly established. She says of the matter:

"Although I had doctored with several physicians and with patent medicines, I got no relief, but gradually grew worse. In fact my neighbors and even I myself thought I could only live a few months. Reading in the papers how Mrs. Bratt had been cured of terrible cramps and pains by the catarrh specialists at 323 Penn avenue I took a course of treatment and now I gladly testify to my complete cure of all my aches and pains as above described. I cheerfully recommend these specialists to all suffering from catarrh or stomach trouble. Signed with my own hand. "MRS. HENRY HUNZIKER."

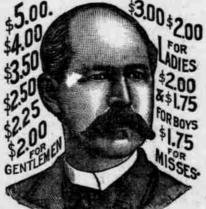

Please remember these catarrh specialists are permanently located at 323 Penn avenue and

Please remember these catarrh specialists are permanently located at 323 Penn avenue and nowhere else in this city.

MONTOUR-Murphy has struck a heavy streak of salt water in his Nair farm ven-ture. The well showed considerable gas from the top of the sand, but on deeper drilling it filled up and commenced flowing drilling it filled up and commenced flowing the briney fluid. This will put a damper on operations to the southwest. Sill, Odell & Co. have the casing in their Moore No. 1, and should get the sand in about ten days. Miller & Co.'s McElhern No. 1 still continues to put out 75 barrels per day. This well is located further east than any in the field, and operators are of the opinion that it shows an extension of the field to the east.

B. & O. BRANCHING OUT. T BECOMES AN ACTIVE COMPETITOR FOR CHICAGO BUSINESS.

Giving Pittaburg Coni a Chance to Compete With Inferior Western Grades-Avoiding the Necessity of Lake Shipments-Building Up a Coke Trade in the West. ISPECIAL TELEGRAM TO THE DISPATCH.

CHICAGO, August 24.-The West Vir ginia coke field, which is reached over the Camden lines, which have been recently acquired by the Baltimore and Ohio Railroad Company, will obtain an important advan tage from the new arrangement which the Baltimore and Ohio has recently made for an entry into Chicago. Heretofore the Bal-timore and Ohio trains have reached the business center of this city over the track of the Illinois Central, and the conditions of the lease were such that the Baltimore and

While it is true that the territory as now developed presents a larger area than any of the new pools, it is also a notable fact that the production is very limited, and with a settled production of the wells that have just come in, the output will not aggregate more than 600 barrels a day. At present arrangement the Baltimore and Ohio trains reach Chicago over the track of the Wis-consin Central or Northern Pacific road, and the terms are such that it becomes an active competitor for eastbound traffic and has far better facilities for distributing the freight coming over its lines from the East. By means of its connections with the Northern Pacific, the Chicago, St. Paul and Kansas City and other lines, it proposes to build up a great coke trade in the Northwest, and in carrying out this purpose it will make Chicago its great distributing point. It will also be in a position to make a cheap rate from Pittsburg to Chicago and Western points for the carriage of Pittsburg coal, which now, by reaches the experience at the property of the prop son of the excessive rates by rail, reaches the West mainly by means of the lakes. If it

West mainly by means of the lakes. If it should do so a great volume of freight which has been diverted from Chicago to such lake ports as Milwaukee and Duluth and Ashland, will be brought back to Chicago, where it properly belongs, and the Pittsburg coal men will be enabled to enter into successful competition with local Chicago dealers in inferior Western coal. Its new route will enable the Baltimore and Ohio to pass through a number of large manufacturing towns and will give it direct connections with the stockyards. Heretofore it has taken from four to six hours for its consignments from the packing houses to reach its main line. Under the new arrangement the time is reduced to half an hour. With these facilities the Baltimore and Ohio hopes to secure a large portion of the through dressed beef shipments to the Atlantic coast, and it expects to profit from through shipments east over the Wisconsin Central, the Northern Pacific and the Chicago, St. Paul and Kansas City. One thing is certain, and that is that in all respects the Baltimore and Ohio will be in a vastly better situation for doing business in the city of Chicago. Its new route will enable the Baltimore

a Late Law He Receives a Year in the Workbouse.

SPECIAL TELEGRAM TO THE DISPATOR. ZANESVILLE, August 24.-W. E. Edwards was tried and sentenced yesterday by 'Squire Brush, under a new law passed by the Legislature last winter to compel men who are able, either by reason of their wealth or labor, to support their children.
It was shown that Edwards deserted his
wife and three children, the youngest 2
weeks old and the oldest 4 years of age, at Newark, May 24. He came to this city and his wite followed, and has been living with her mother.

He was sentenced to 365 days of hard labor at the workhouse, and to pay the cost

of the prosecution. Sunday Services in the Jail. The usual Sunday services were conducted at the jail yesterday. Rev. J. J. Jones, the colored Baptist minister of Allegheny, officiated and made the prisoners sing as they never sang before. The jail officials say the service was the most suc-

Charley Braden, the hustling gauger, is giving the producers the best of satisfaction and all speak well of him.

CLAYSVILLE - To-day the Victor Oil Company succeeded in getting the cable out of No. 3 Carson. Drilling will be resumed, and by Monday or Tuesday should reach the sand. The same company have located No. 4, Carson, 1,500 feet south of No. 1 and on the northeast line of the farm. Carson No. 1 will be treated to a moderate dose of giycerine Tuesday. Saturday the Victor people put in the last string of casing in Gourley No. 3. The Pacific Oil Company, Gourley No. 3. The Pacific Oil Company, on the Lindley farm, shot their No. 4; it is showing for a 75-barrel well. Two and a half miles southwest of developments the Ohio Oil Company are drilling their well on the Laird farm, which was dry in the Gordon, to the fifth sand. Kennedy & Co.'s well, on the Mills farm, came in a duster, which shuts off an extension of the Claysville belt to the north, and it now looks as if the only possible extension is through the J. M. Carson farm, providing there is an extension at all.

In the Heart of the Navajo Reserva-

tion Excite the Cupidity of the

Miners of New Mexico.

ENGLISH SYNDICATE AFTER TIN.

Present Census.

PERCIAL TELEGRAM TO THE DISPATOR) NEW YORK, August 24.-The following reports have been received from the leading

mining centers of the West: SILVER CITY-The special schedules of the Eleventh Census in relation to mining statistics of this Territory have been forwarded to New York. The work has been thoroughly done, and besides giving the value of the output of ore in New Mexico will give the cost of production, amount of capital invested, value of the mines, mills and machinery, and much other valuable information. The output of Grant county is almost one-third of the entire output of the Territory, and Grant and Sierra counties produce three-fifths of the mineral annually taken out of the mines in New

Mexico. These counties furnish the extremes in the cost of mining. WORKING POOR ORE. In some of the camps in Sierra county the cost of mining a ton of ore exceeds \$100, while the Carlisle Gold Company, in this county, has mined and milled thousands of tons of ore for less than \$2 per ton. The Carlisle company was able to work ore running \$5 per ton profitably, even when they were losing half the value of the ore in the tailings. There are mines in Sierra county from which ore could not be profitably shipped even if it had a value 25 times as great as the Carlisle ore. The average value of ore mined in Sierra county is much greater per ton than that mined in any other county in the Territory. And there are thousands of tons of ore lying in the waste dumps in interior camps in that county, where there is no railroad com-

munication, which could be shipped from this place at a good profit, and is worth more per ton than much of the ore shipped by Grant county miner. There are constant rumors that a band of miners will invade the Navajo reservation again, but it is not at all probable that the attempt will be made.

AFRAID TO GO IN. Since the arrest and removal from the reservation of a large prospecting party sev-eral months ago, the military authorities have been very vigilant and all miners have been warned to keep off the reservation by the officer in command at Fort Wingate. It is not likely that any party of miners, how-ever bold, would go to the expense of out-fitting for a prospecting tour to the interior of the reservation knowing that they would certainly be arrested and removed from the reservation by the military. Many tales about the wonderful riches of the mines on the Navajo reservation have been told, and not a lew miners firmly be-lieve that the Adams diggings, which are indoubtedly a myth, are to be found some-where on the reservation. There may be

are any mines there which will compare in races they will once more be to civilized richness with those in either the Grant, man, and the same deposits that mound

Sierra or Lincoln county gold regions Reviving Abandoned Properties DENVER-The ore taken out of the Yankee Girl at Telluride runs as high as \$700 a ton. Mining circles around Telluride are interested in a retest taken out of the Gold King by General Manager Nunn. It weighed 223 pounds and was valued at \$33,000. Gold retests of that size have not as yet been numerous in the San Miguel. The Gold King is owned by St. Louis men, and is valued at \$1,000,000. The shipments from Telluride to date amount to \$65,000. The North Star, at Silverton, is producing ore that averages \$150 per ton. A number of abandoned properties in the Mount of the Holy Cross district will shortly be revived over \$200.000. trict will shortly be revived, over \$200,000 worth of new machinery having been ordered. The Mono Gold and Silver Mining Company, of Pittsburg, now controls the following Ouray claims: Miser's Dream, Mono, Sun and DeCosta. The Miner's Dream has Sun and DeCosta. The Miner's Dream has a 40-foot tunnel which shows a very fine body of ore. The Cimmaron, near Ouray, has just been sold for \$25,000. E. E. Johnson, a miner from the Horseshoe district, arrived in Leadville to-day and told a startling story concerning a prospector in his district. As Mr. Johnson was passing a small cabin in the gulch heard groans coming from within. Inside he tound a man named Edward Brane tied to the bed so that he was unable to move. Johnson quickly released him, but the poor man was unable to stand up. Brane had

man was unable to stand up. Brane had been tied to the bed for over 48 hours with nothing to est. He said that he and his partner, a man named Davidson, had been working some claims in the Horse-shoe district and that on Sunday they had had a quarrel. Both wanted to come to town, but they had only one horse. Finally, after a dispute, Brane took the horse and rode over the mountain to work, while his partner started to walk to town. In the evening Brane returned from work and went to bed. About 1 o'clock Brane felt someone working about him and awakened. Davidson was working over him, and already had him partly fastened with a rope. He struggled, but could not free himself, and his partner con-

tinned to wind the rope about him until he could scarcely move. After he had finished the job he left the cabin, and has not been

New Developments Daily.
IDAHO CITY—At Sheep Mountain and Besfoam districts developments are being made almost daily. Men who went in for the purpose of doing their assessment work and departing, now have plenty of high grade ore in sight. They have now con-cluded to stay and make shipments and it is certain that more than 100 tons of rich ore will be sent to Ketchum for reduction in the smelter there before snow comes. Severa parties are examining mines there with a parties are examining mines there with a view of purchasing, among whom is Chris Mohler, of Challis, who has gone to examine the Mountain King. He is reported as well pleased and convinced that it is a great mine, the vein being well defined and showing a very large chute of high grade ore. George Philbrick, of Wood River, in the interest of Chisholm, has taken bend or a common of mines on Revent Sun. bond on a group of mines on Bernard Sum-mit. There are four ledges in this group, and everyone a bonansa. The representaand everyone a bonansa. The representative of a Denver company, for whom the
mines were bonded, will visit the property
within the next week. Sheep Mountain
and Seafoam are now pretty well developed
—coough to satisfy us all that they will be
the great lead and silver-producing
camps of Central Idaho in the near
tuture. All that is wanted to bring
them to the front are amelters, which will
surely be cructed before the close of another
senson. The Elmira mill at Banner has
started up with 1,500 tons of ore in the
bins and thousands more in sight that will
be extracted as soon as room is made for it.
Another boiler is going in position at the
hoisting works and the large pump will be
put in as soon as the boiler is ready to fur-

nish the steam to run it. At the distance of 300 feet from the mouth of the Little Elmore tunnel at Rocky Bar, Harvey Jenkins & Co. have cut the Pittsburg ledge, which prospects \$10 per ton in gold. As the vein has not been cut through yet its width is not known. This discovery at depth has however added the Pittsburg to the list of the creat wines of Elmore country.

the list of the great mines of Elmore county. The Vishmu tunnel has reached a length of

The California Tia Mines.

SAN FRANCISCO-Whether the San Ja-SAN FRANCISCO—Whether the San Jac-cinto tin mines are worth working or not the English syndicate evidently has confi-dence that money can be made out of them. The first payment of \$350,000 in cash has been made through the Bank of California by the San Jacinto estate of London to the old San Jacinto Mining Company, and a deed of the property has been delivered to the purchasers. Governor Waterman, own-er of the Stonewall mine in San Bernardino county, has bought the adjoining Blue Hills claims for \$50,000. adjoining Blue Hills claims for \$50,000. The Eclipse mine, at Auburn, Placer county, has been attached, and is in the hands of the Sheriff. J. B. Patterson sold this mine to an Eastern company at a good, round price, and the purchasers invested a large sum in improvements, including a model mill for working the ore. The rock proved to be worth less than \$2 a ton. The Fortune mine, near Nevada City, was another unprofitable investment, and it has just been sold on a judgment for \$342. The new ownsold on a judgment for \$342. The new owner intends to do some more prospecting on

The Situation in Arizons. Tucson—A mining deal was consummated this week in the bonding of the Wonderful claim belonging to the Friend Brothers. The bond was given in favor of Messrs. Calhoun & Montgomery, of Watrus, N. M. It involves the erection of a Huntington mill and concentrator, which will be commenced within a few days. The Wonderful claim is within a mile and a Wonderful claim is within a mile and a half of Clitton, and has produced some very fine shipping ore. It is said there is now on the dump, and in sight in the mine, fully 5,000 tons of ore, carrying a good percentage of gold, which will pay largely. Some rich ore is being taken from the Mamie mine at Clarksburg, Tombstone district, by Charles McHenry and his partners who have a lesse on the property. A ners, who have a lease on the property. A few nights ago three sacks of ore were stolen, the value of which was estimated at \$100 per sack. The ore carries a large per cent of black metal, and is plentifully sup-plied with horn silver.

Some Rich Strikes Reported. VIRGINIA CITY-Some rich strikes are reported in the mines near Austin. The Patriot mine shows a widening ledge, bearing ruby silver worth \$4,000 a ton. The Ruby mine, London Hill, has opened a 14-inch lode, four inches of which is a streak of solid mineral. The whole vein will average about \$300 a ton. The Gypsum, beds five miles east of Lovelocks, Humboldt county, have been sold for \$6,000 to San Francisco

TENNESSEE COPPER MINES, WORKED IN ANCIENT TIMES, TO BE OPER

ATED BY A SYNDICATE,

A Spot in the Great Smoky Mountains That is Believed to Contain Very Rich Ore-Abandoned Works to be Started Anow. ISPECIAL TELEGRAM TO THE DISPATCE. CHATTANOOGA, August 24.-The arrangements have about been completed for the transfer to an English syndicate of the Ducktown copper mines. The Ducktown mines are the most ancient on the American continent, and were known and worked by prehistoric man in the days of remote antiquity. In the Great Smoky Mountains primeval man found the vast copper deposits, learned its properties, and evolved a method of its extraction from the ore and dispersed the handiwork of early artisans to the four corners of this continent. What gold on the reservation in paying quantities, but it is extremely doubtful whether there these copper mines were once to these early

> builders worked ages ago will be forced to yield up their treasures to the world of to-day. Of recent years the Ducktown mines have not been worked. Not because there was no copper there, but for lack of fuel. A hundred hills have been denuded of their timber growth to supply fuel, and for miles around the bare and barren mountain sides bear silent witness to the denuding hands of man. When the hauling of the timber from a great distance became too costly to be borne by the proceeds of the sales, the copper miners resorted to charcoal, but like-wise increased in cost as the distance of ob-taining it lengthened and at last the mines were abandoned and hundreds of busy toilers

> moved away. A railway now penetrates the mountains and the problem of cheap fuel has been solved.
>
> In the Ducktown fields the ore lies close to the surface and is easy of obtainment. The cost of mining is therefore a trifle. A dozen

is this company which the syndicate is ar-ranging to buy out. When the fires of the furnace are once more lighted and fed with coal an era of prosperity is looked for.

WHY THE HOTEL BURNED. Young Mes Caused It in Having a Froile With Contraband Beer. WORCESTER, August 24 .- An investigation into the cause of the burning of the Sterling, Mass., hotel building, Monday,

has revealed that half a dozen young men, while hiding contraband beer in a hay-mow, turned a lanteru over.

ISPECIAL TELEGRAM TO THE DISPATCH. MANNINGTON, W. VA., August 24 .-Among the pools of the great Southwest, and particularly those in West Virginia, Mannington holds a conspicious place. Had not the territory in this district been secured by corporations and syndicates the present volume of operations would have largely augmented. Mannington, like Mount Morris, has it drawbacks, and no field since the discovery of petroleum has been so difficult to operate, which is principally owing to the many caves. If a contractor succeeds in getting a well down

without encountering a serious fishing job he is considered lucky. To predict the future of Mannington, or to draw conclusions based upon theoretical assumptions, would be only uncertain folly. The drill, however, has demonstrated one fact, and that is, the territorvis treacherous, and locations that looked like wheat in the

mill have turned out bad investments. there are 30 or 31 strings of tools running, and from 20 to 25 rigs up and building. The bulk of the territory is owned and controled by the South Penn Oil Company, T. M. Jackson and A. J. Montgomery. It was the latter gentleman who opened up the field by drilling a well on the B. F. Hamilton farm last October. Mr. Montgomery and his associates have 6,000 acres of territory.

A VERY GOOD STRIKE. The South Penn Oil Company brought in a oil well Friday on the Jost farm at Fair-view which caused considerable interest and speculation. There is no question but what it is a good well, but just how much production to give it credit for cannot be determined at present, as the owners are not in a hurry in informing the public as to the true status of their new strike. It is definitely known, however, that the well made 32 inches in a 250 tank in the first six hours, and after the tank was filled the well was shut in until more tankage could be

Burt & Co. are drilling Nos. 6 and 7 on the Burt homestead. No. 6 is down 1,700 feet and No. 7 is in the salt sand. Watson, McGraw & Co. on the Blackshire farm, are down 400 feet in No. 3, have commenced spudding in No. 4, and have made locations for Nos. 5 and 6. A. J. Montgomery has a well drilling at 100 feet on the Hamilton farm, and Gilmore & Bennett have reached 1,950 feet in their well on the Irwin farm, and are fishing for a set of tools. The Pritchard Oil Company, on the Pritchard lot, are 50 feet in the sand, but are not deep enough to find the pay. The well is located only 300 feet east of the Dent well, on the Robison farm, and should make a producer The Logan Oil and Gas Company are The Logan Oil and Gas Company are drilling an experimental well on the David Kennedy farm, four miles southwest from the Fleming farm well. The Flaggy Meadow Oil Company are down 1,900 feet with their venture on the Hibbs farm and are fishing for a string of teals. On the are fishing for a string of tools. On the Smith farm the Three Acre Oil Company are down 400 leet, and Mannington parties, on the eastern edge of developments, have a rig ready for the drill on the McDuth farm. McLeod & Co. have concluded to spend no more time with their fishing job on the

Yost farm, but are building another rig on the same farm a half a mile west of the South Penn Oil Company's new well, and will try their luck once more. The South Penn Company, on the B. B. Smith farm, are in the lime sand with No. 2 and will be due to get the "Big Injun" in 10 or 12 days, providing a fishing job does not intervene. They have located No. 3 some 600 feet west from No. 2. Preston & McBride, on their 13 acres, Phillips farm, are drilling No. 1 in the big red rock, and have located No. 2 about 600 feet west of No. 1. Wright & Co., on the Hunt lot, are still fishing, and it begins to look as if they would clear the hole. Still further west from Hunt lot, Fair-mont parties have located a well on the Kohen farm. Gilmore & Bennett to-day finished drilling through the and in Furber No. 1, and the well is now making 75 barrels. NOTES OF OPERATIONS.

making 75 barrels.

The Flaggy Meadow Oil Company have just started a well on the Phillips lot, and
