TARIFF ON LEAD ORE

Forms the Thrilling Subject for One Day's Discussion in the United States Senate.

SMELTERS ASK FOR PROTECTION.

Teller Declares That the Lead Trust Trying to Down the Rocky Mountain Miners.

VANCE LOOKING AFTER THE FARMERS.

Railroads to be Compelled to Place Automatic Couplers en Freight Cars.

WASHINGTON, August 25 .- The Senate spent most of the day talking tariff. Mr. Aldrich presented a proposition that the consideration of the tariff bill be continued, to the exclusion of all other business, except appropriation bills and conference reports, to and including September 1, as subject to general debate, and during September 2, 3 and 4 subject to the five-minute rule in debate; that no Senator speak on any one question more than once, and that on September 5 and thereafter the consideration be continued on the bill or amendments without debate to and including the third reading, when three hours shall be allowed to each side for general debate, and then the final vote shall be taken on its passage. Mr. Aldrich further suggested that the general debate close on September 1. At the suggestion of Mr. Gorman, Mr. Aldrich said be was willing to continue the general debate until September 3, which would allow of a vote being taken on the 8th.

Mr. Plumb objected to the proposition, as he thought the time allowed for debate was too short. Mr. Aldrich thereupon with-drew the notice, but said that he would ask for unanimous consent to-morrow morn-THE DUTY ON LEAD.

The tariff bill was then taken up, the pending question being on imposing a duty of 13 cents per pound on lead ore and lead dross; provided that silver ore and all other ores containing lead shall pay a duty of 13/2 cents per pound on the lead contained therein, according to sample and assay at

the port of entry,
Mr. Coke moved to amend by striking out the proviso and inserting a proviso that ores containing silver and lead, in which the lead is of less value than the silver, shall be admitted free of duty. He said that the passage of the bill as reported would destroy the small be provided by the small be supported. would destroy the smelting works in Texas, Kansas City, Chicago and St. Louis; rende useless the refractory ores of New Mexico, Arizona and Texas; throw a large number of men out of employment, and drive from the United States the trade with Mexico, valuable not only for American manufac-turers but for American farmers.

A QUESTION OF DISCRIMINATION. Mr. Reagan and Mr. Carlisle followed with arguments on the same lines.

Mr. Aldrich asked Mr. Carlisle if he thought it fair to have one form of lead required to pay a duty of 114 cents a pound, and to have another form of lead free of

Mr. Carlisle replied that the question assumed that he was in favor of imposing a duty of 1½ cents a pound on lead ore—which was not the case. If he had his own will lead ore would be free.

Mr. Plumb moved to amend the paragraph by reducing the duty on lead ore from 134 cents a pound to 34 of a cent. He thought that the Senate was coming to a point where the system of protection would result in breaking down certain home inand where the large industries were to de-stroy smaller ones. The smelting interest was entitled to as much consideration as the cotton or iron industries, and that interest was to be injuriously affected by the proposed duty. If the mine owners of Colorado, who had derived so much profit from the recent silver legislation desired to get still more benefit by the tax on these Mexican ores, why did they not propose a duty on the silver ores of Mexico?

A LEAD TRUST MOVE.

Mr. Teller also advocated the adoption of the paragraph as reported and asserted that the contest was one between the Lead Trust (in combination with smelters) and the miners of the Rocky Mountains. These miners were 50,000 strong, and they con-sumed more of the New England products per capita than any set of men living anywhere else. They consumed more of the agricultural products of Kansas and Ne-braska, than the whole of Mexico consumed; and Kansas was indebted to the miners of Colorado for whatever prosperity she en-joyed. He was not therefore, exactly deased when a Senator from that State asisted that he wanted to secure the trade of Mexico and was willing to put the labor of Colorado, Montana and Idaho side by side with the 40 cent labor of Mexico. Continuing his argument, Mr. Teller said that If the lead duty was thrown from the bill there would not be a Republican in that region in lavor of that bill, and that there

AFFECTING THE SILVER SUPPLY. Mr. Jones of Nevada said that the most important feature of the bill for the mining industries of the country was the duty on lead and lead ores. Not only was many thousands of persons engaged in lead mining, but 7s per cent of the silver yield of the United States came from mines in which that metal was found in combination with lead. Of those mines the larger number lead. Of those mines the larger number would not pay expenses of operation for silver alone. Without a duty on lead and lead ores those mines would have to be abandoned. This would not merely destroy a great industry, but would seriously affect the supply of the precious metals which formed the money of the world. Mr. Jones paid a warm tribute to the personal characteristics of the American miners and said that their labors contributed largely to the prosperity of the country. prosperity of the country.

At this point the consideration of the bill was discontinued for the day.

PROTECTION FOR FARMERS.

Senator Vance during the day presented an amendment to the tariff bill. In his pre-amble he states that other industries have been added by the Government, and he thinks it is now time that the agriculturist should be encouraged; therefore, he offered the following amendment:

the following amendment:

In all cases where it can be shown by proof satisfactory to the Secretary of the Treasury that any goods, were sor merchandise imported to this country have been purchased abroad by any citizen of the United States, by exchange of farm products grown in the United States for such goods, or where such goods have been purchased with the proceeds or avails of such farm products in foreign countries, such goods, wares or merchandise shall be imported at the fellowing rates of duty, to wit: One-half the present duty on all manufactures of iron and steel; 40 per cent of the present duty on all woolen or cotton goods or articles of which wool or cotton may be the component material or chief value; one-half the present duty on earthenware, china and glassware; 30 per cent of the present rate of duty on all inaterial used for fertilizers or in the manufacture thereof, and 25 per cent of the present rate of duty on jute bagging and farmers' binding twine.

Extending the Free Postal Delivery. WASHINGTON, August 25 .- The Senate Committee on Postal Affairs to-day soided to make the bill to extend the free delivery system apply to cities of 5,000 inhabitants, or to cities where the postal receipts amount

Redceming the Bonds. WASHINGTON, August 25.—The Secre-tary of the Treasury to-day purchased \$1,450 4's at 124, and \$958,000 4%'s under circular of August 21.

HOPE FOR BRAKEMEN.

AUTOMATIC COUPLERS AND BRAKES MUST BE PLACED ON FREIGHT CARS. Bill Looking to That End Reported to

Congress-Saving the Lives of 20,000 Young Men Annually-President Harrison's Opinion on the Matter. WASHINGTON, August 25 .- Representative Caldwell, of Ohio, from the Committee

on Railroads and Canals, to-day reported to the House the bill agreed upon by that committee to compel railroad companies engaged in inter-State commerce, within a rea-sonable time to equip their cars with such safety or automatic safety couplers as will not require trainmen to go between the ends of the cars to couple or to uncouple them, and with automatic brakes, so that the speed of the train can be controlled by the engineer.

The report submitted with the bill points

The report submitted with the bill points out the fearful loss of life and limb occasioned by keeping in use the link and pin coupling and hand brake on freight cars, and says that from statistics of railroad accidents of this nature, "We have the terrible intimation that 20,000 young men in the nation must suffer painful or fatal accidents from these two causes annually."

The committee appends to its report an extract from a message sent to Congress by President Harrison, in which he said he thought it was competent for Congress to require uniformity in the construction of cars used in inter-State commerce and the use of improved safety appliances upon such

OUT FOR REVENUE.

Miles City's Census Returns Satisfactory to the Taxpavers.

FROM A STAFF CORRESPONDENT.] WASHINGTON, August 25 .- The municipal authorities of Miles City, Mont., have received much comfort officially from the Census Office. It has been noised abroad in Miles City that the census enumerators had only succeeded in finding 979 residents within the corporate limits. The authorities and citizens had not expected that the results of the census would show that there were many more people than that in the town, but they were anxious that there should be at least 1,000 inhabitants, and they fully expected that the Census Office would easily find that number.

They had no desire to have as many or the transport of the Chicago or the

even more citizens than Chicago or the other big cities. Their ambition didn't run in that direction. All they wanted was a population of a thousand or more, so that they could avail themselves of the provisthey could avail themselves of the provis-ions of the State law which provides that a low liquor license shall prevail in towns of less than 1,000 inhabitants, and a high license in towns above that limit. What the City Fathers of Miles City were after was revenue, and when the census office an-nounced that 1,021 persons had been counted as residents within the city limits there was great ion at Miles City. great joy at Miles City.

GETTING INDUSTRIAL STATISTICS.

Pittsburgers Appointed to Get Figures o Coul and Manufactures.

IFROM A STAFF CORRESPONDENT. WASHINGTON, August 25 .- Mr. Mc-Candless, of Pittsburg, was appointed some time ago to suspervise the collection of the statistics of manufactures in Pittsburg. Owing to a mistake at the time in making out his commission, his jurisdiction was limited to the city of Pittsburg alone. Today this mistake was remedied and a new

commission sent him, covering the whole of Allegheny county, including the two cities of Pittsburg and Allegheny.

Mr. Albert B. Miller, of Pittsburg, was to-day appointed a special agent to assist in the collection of the coal statistics in Pennthe collection of the coal statistics in Fenn-sylvania, at the rate of \$3 per day. Most of these statistics have already been collected. In fact, the returns from all the big mines have been received, but there are a large number of small coal producers, scattered all over the State from whom figures cannot be secured by correspondence, and agents are necessary to get this material.

Mr. Cooke Devol has been appointed a special agent to collect statistics of manufactures at Parkersburg, W. Va.

BLAMING THE CAPTAIN

For the Disaster to the Steamer Sea Wing in Lake Pepin.

WASHINGTON, August 25. - Inspector General Dumont has received the report of local inspectors Knapp and Yeager, who investigated the case of the steamer Sea Wing, which capsized in Lake Pepin in July with such fatal results.

After surveying the evidence they say that they are satisfied that nothing could have been done to save the steamer after the squall struck her, owing to its sudden and

violent character. They found that Captain David Wetherin, who was in command of the steamer, violated sections 4463 and 4467, and so much of section 4450, as relates to unskilfulness by starting out as he did, in the face of an approaching storm. Also after he had started out, by not running to the Minne-sota shore where there are good harbors every mile or so, instead of up the center of the lake. They therefore revoked his license as master and pilot, and reported the case to the United States Attorney for prosecution.

DESTITUTION IN OKLAHOMA.

Congress Asked to Take Steps to Relieve the Prevailing Misery.

WASHINGTON, August 25. - Senator Platt, Chairman of the Committee on Territories, to-day laid before the Senate a letter from Secretary Noble, transmitting the tollowing telegram:

KING FISHER, OKLAHOMA, August 28. After many days house to house inspection we find fully one-third of people need aid, two-thirds of farmers need seed wheat; many now in want of food, no work, nothing to sell, prospects gloomy; extreme south of Territory not quite so bad.

THOMAS J. NESWHAM,

Special Land Inspector.

Secretary Noble says that the Department has no resources with which to relieve the destitution, and that its only course is to lay the information before Congress.

WASHINGTON, August 25 .- The amount of silver offered to the Government to-day was 1,020,000 ounces. The amount purchased was 450,000 ounces as follows: 200, 000 ounces at \$1.195; 100,000 ounces at \$1.1974; 150,000 ounces at \$1.1975,

A HAY-FEVER PREVENTIVE. "

The Ingenious Device of One of the Man

Speczing Sufferers. Dr. William Thompson, of Fourth ave nue, is a hay-feyer victim, and suffers terribly about this season every year. Before the 16th of August in each year, he lays in five or six dollars' worth of medicine. The fever was two or three days late this year, but after calling on Frank Calhoun to exchange notes, and hearing him sneeze, Dr. Thompson began also. He has invented a device which he thinks will eventually save him the yearly infliction, but he didnt have it perfected in time for this season. It is a padded steel spring, or clamp, which,

padded steel spring, or clamp, which, fastened on the nose, prevents the entrance of the pollen of the rag-weed bloom.

The doctor caught this idea from witnessing prize fighters whose noses were like those of the heathen gods the Psalmist talks of—they smelled not—being rendered useless in the business prosecuted by the pugs. The doctor thought that if a prize fighter could breathe permanently through his mouth there was no reason why he couldn't during the short time of the reign of havduring the short time of the reign of hayfever. Hence the invention.

Ir your complaint is want of appetite, try Angestura Bitters before meals. TESSU

OIL IN THE SOUTH

A North Carolina Farmer Thinks He Has Discovered on His Land

A RICH DEPOSIT OF PETROLEUM. The Fluid is Found in a Primitive Shaft,

Sunken Thirty Feet. EXCITEMENT IN A TAR HEEL TOWN

SPECIAL TELEGRAM TO THE DISPATCH.] GREENSBORO, N. C., August 25 .- For ome days it has been rumored that oil had been found near town, and there was much excitement in real estate circles in consequence, but the location of the discovery and the name of the owner of the land was kept profound secrets. This morning, however, it became known that the discovery was on a small farm belonging to John J. Phoenix, one and a quarter miles from town. Hundreds have visited the place to-day, and everyone is convinced

that oil has been found. Some weeks ago Phoenix, in digging ditches, discovered oil indications and being somewhat familiar with oil wells, prosecuted his search quietly, in the meantime writing to an uncle, an oil expert, in Pennsylvania, asking him to come on. He did so and after a thorough examination of the locality advised his nephew to bore for oil, assuring him that he would find it.

CRUDE METHOD OF WORKING. CRUDE METHOD OF WORKING.

Phoenix last week began to sink a shaft.
This shaft, a crude and primitive affair, has reached a depth of 30 feet, and the oil indications have grown stronger with the depth.

He proposes continuing the shaft to a depth of 60 feet, and will then arrange for a boring plant. The "find" is on a farm which embraces 32 acres, and it seems to be in a sult in the granifa formation. which embraces 32 acres, and it seems to be in a split in the granite formation which runs through this section. The split is perhaps a mile in width. Among those who visited the shaft to-day were several experts, who pronounced the oil "white sand petroleum" of good quality, and expressed the opinion that it will be found to be in abundant countity.

the opinion that it will be found to be in abundant quantity.

The smell of oil pervades the atmosphere for yards around the shaft, and every bucket of earth dumped from it is full of oil, while the oil floats on every bucket of water brought up. The workman informed your correspondent that they were able to stay in the shaft only a few minutes at a time owing to the gas which had accumulated since it was closed up on Saturday, and that they was closed up on Saturday, and that they found seven feet of water, on which was a coating of oil half an inch thick.

ADJOINING LANDS SECURED. Before he allowed his discovery to be-come known, Phonix secured options on ad-joining lands and to-day he has been be-sieged with offers to buy and to form stock companies to develop the property. The discovery of oil on the Phœnix place has revived interest in the reported oil find near Germantown, N. C., some time ago. Here was found a deposit of flexible sandstone and oil, but the work of developing was never prosecuted. At the foot of the Suaratown Mountains, 30 miles from here, a solution to the company are standard a derick in joint-stock company erected a derrick in 1867, and bored for oil with good prospects. After reaching a depth of 900 feet the drill broke off and the work was abandoned. Excitement here has grown intense. This afternoon and to-night nothing is talked of

on the streets but oil. Hundreds have visited the office of your correspondent and examined the specimens which were brought from the shaft this evening, and the verdict is that the oil is of good quality. LATE NEWS IN BRIEF.

a Man at the Barge Office Accused of Marder. NEW YORK, August 25.-Alexander Phillipsen, a stout, middle-aged man, is a prisoner at the Barge Office, suspected of murder. His arrest recalls the ghastly dis-covery made at the Custom House a number of months ago, when the backed body of a man was discovered in a barrel of lime that was brought to this country from Denmark and seized for duties by the customs officials.

The barrel had lain for some days in the public store before it was opened. The place from which it came was traced by means of tags and marks on the barrel, and the news of the discovery was telegraphed to Denmark.

to Denmark.

Phillipsen arrived here on Friday, with his wife and two children, in the steerage of the Hamburg steamship Normannia, and, after registering at the Barge Office, went with his family to an immigrants' boarding house in Greenwich street. During a conversation with the landlord yesterday, Phillipsen is alleged to have inadvertently confessed the murder of the man found in the barrel and the shipping of the body to this country. The landlord informed the immigration authorities of the case, and the arrest followed at about noon to-day. The immigration authorities are reticent in regard to the affair, and will say nothing about it until an investigation has been made. Permission to talk with the prisoner was refused. to Denmark.

Weak in Value.

NEW ADVERTISEMENTS.

Feel your way cautiously when prices fall so much they astonish you.

Nobody's going to give you \$10 worth for \$2, or twice \$2 either. When clothing is offered at such queer rates, look into the quality. The price mayn't look so low if you do. The goods may be quite inferior, and such as you would have no use for. You may think another reduction wouldn't hurt them.

Expect cheap quality and workmanship. They're both partners in cheap grades of clothing.

They stand no show if compared with our dependable make. It's strong and high in quality, while low in price.

All our prices for odd lots are lower down.
