The weather was threatening, and the grounds very muddy from the effects of the recent rains. The two games, however, for one price of admission attracted 1.917 through the turnstile, and the crowd was certainly a demonstrative one. In the second contest, two particular events happened. Beckley made a home run and Farrell got his knee seriously hurt by a foul tip. He had to be carried off the field. The game was a good one, but the decisions of Umpire Holbert caused considerable kicking. They were bad. Staley pitched in fine form, and so did King.

Allerton, also, holds as a 5-year-old half-mile track record of 2.22. So far this season he comes out third among the bowlers, with an average of rather under 13 runs for each of the wickets he has taken. Sharpe, another comparatively new professional bowler, headed the list up to saturday last with an average of 12.66 runs for his 114 wickets, a first-class record for a second-season player.

SPECIAL WEATHER BULLETIN.

Decided Fall in the Temperature of the Northwest. PREPARED FOR THE DISPATCH. The northwest storm that formed in Mon tana developed very rapidly, the center moving to the Dakotas yesterday, with a sub-center over Colorado, a baromic trough connecting both. To the west and northwest of the centers there was a very steep pressure gradient, ranging between 29.30 inches at Bismarck, Dak., and 30.22 inches at Helena, Mont., the high pressure just reaching the latter place. The variation gave an increased velocity to the winds throughout the Northwest, and they will be high to-day over the lakes, where the storm is expected to be more severe than it was tended over the Northwest States and unne lakes. Showers also fell in the lower lake region, the Ohio Valley and the middle Atlantic and New England States. Elsewhere the weather was fair. It remained warm in all the States east of the Mississippi, with an abnormal percentage of humidity. The high pres-sure in the Northwest was attended by a decided fall in the temperature. At Helena it was only 40 above freezing. The cool wave will move east, and will be felt in the States of the upper Mississippi and Missodri valleys to-day. Frost will probably occur in those districts

Continued from Third Page. and blue bunting. Over 350 boxes of cakes and crackers, and an endless variety of bread, wedding and ornamental cakes are used in its construction. In the background a tall pyramid of boxes, with glass fronts and filled with over 1,000 different varieties of cakes and crackers, towers gracefully toward the ceiling. Across the front, about half way up, is the word "Marvin" made of crackers. A counter, surmounted by a tasty brass railing, surrounds the pyramid, and on the counter are arranged show cases

filled with plain, ornamental and wedding

cakes, breads, rolls and other products of the big factory. The wedding cake in the center of the counter in front is one of the handsomest ever made in Pittsburg. It is about 20 inches across at the bottom, and, including ornaments, is nearly 3 feet high. The cake proper stands on a sort of platform made of sugar work. Between this and the base a wedding scene is depicted, the figures being made of sugar. An incandescent electric light comes up through the center of the base, illuminating the scene and producing a marvelously pretty effect. On the right hand corner of the counter is another cake that could be duplicated at but few factories in the country, while on the left corner is a case filled with sugar ornaments and designs. At one side is a case containing specimen loaves of all the various brands of bread and rolls manufactured by the firm, and at the other side is a case of plain and fancy cakes that look as though they would melt in one's mouth.

In front, near the big weading cake, young lady, neatly dressed and looking as pretty as a picture, sits during the day and evening giving out cakes and picture cards to the crowds of visitors that are always about the stand. On Thursday severa housand Stanley cakes were distributed. Yesterday 1emon wafers were given away and to-morrow something else will be on the ist. Each cake is put up in a neat paper envelope, with its name and the name of the firm printed upon it. The exhibit, as well as the cakes to be distributed, will be changed every few days, so that visitors to the stand will always see something new, no matter how many times they come.

with a cane. A large crowd was attracted, and they followed them to the jail. At the prison door Barrett flourished a revolver and called on the crowd to disperse. Detective McTighe took a hand at this stage, and put Mr. Bar-
