CRESSON SPRINGS, September 16 .- The President and his family to-day enjoyed the first of a series of excursions arranged for their entertainment by the Pennsylvania Railroad. To-day's "outing" was to Rhododendron Park, a spot of rare natural beauty in the Allegheny Mountains about 15 miles from Altoona, over the picturesque Bell's Gap Railroad, on which the ascent at certain points is at the rate of 280 feet to the mile. The Presidental party consisted of Gen-eral and Mrs. Harrison. Mrs. McKee and little Benjamin, Mrs. Dimmick, Private Secretary Halford, Mrs. Halford, Miss Jeannette Hal-lord, and Judge Strong and daughters. The party occupied Vice President Thompson's special car, and were in charge of Messra. George W. Boyd and F. S. Barksdale, of the Pennsylvania Railroad. The trip was over a Pennsylvania Railroad. The trip was over a beautiful section of that road, including the famous. Horse Shoe Curve. It occupied altogether about five hours' time, Cresson being reached in time for supper. The President section of take great interest in the wild mountain scenery, and in the evening said he had enjoyed the trip exceedingly. To-morrow's programme includes the reception of the Grand Army post of Tyrone, Pa., in the morning, and a visit to the flooded district, near Johnstown, in the afternoop.

in the afternoon.

A Greensburg special says: President Harrison and his family and the others of the party naw at Cresson, will be here to-morrow afternoon. They will arrive on a special train about 1 o'clock P. M., and during their stay they will be the guests offColonel Geo. F. Huff. A reception will be held at a late hour and the party will return to Cresson on an ovening train.

### BEACH'S STARTLING REVELATIONS.

An Effort to Save the Nicelys on the Strength of a Confession.

SPECIAL TELEGRAM TO THE DISPATCH. HARRISBURG, September 16.-Counsel for Joseph and David Nicely, the morderers of Iterman Umberger, of Somerset county, who was shot and robbed of more than \$16,000 over a year ago, were not ready to-day for argument on the application for a rehearing before the Board of Pardons, and a continuance was asked and obtained until the next session. The application for a reheating is based on a remarkable statement made by a man giving the name of John Beach, one of the alleged murderers of Umberger. Beach states that the murder was planned at Johnstown about a year before its commission. A man named Miller and he went into the farmer's house, the former shooting three or four times, A shoeful of money was secured. A book agent and several other persons in the plot were on the outside. After the murder the party started for Latrope, and after travel-ing several inlies the plunder was divided at the forks of a road. When they learned of the arrest of the Nicely brothers Beach started for Kansas City and Miller for Cumberland, Md. Beach says he supposes Miller was lost in the Johnstown flood.

Johnstown flood.

The request for a rehearing is based, in addition to the alleged confession of Beach, on a denosition made by a man who says he saw one of the accused brothers lo miles from the scene of the Umberger tragedy between two and three hours before it was perpetrated. The cunfession of Beach was left with Elijah P. King, Justice of the Peace of Somerset county, by the alleged murderer, who made each to the truth of the paper without telling King its contents. The next day the Justice of the Peace read the startling document. Peace read the startling document.

The case of Charles Hannon, of Allegheny, convicted of murder in the second degree, was continued because of the absence of his attorney. W. C. Haus, of Mercer, protested against a pardon to Elmer Campman, sentenced to the Workhouse for fighting or a railroad train. The board refused to grant a pardon to Philip A. Huber, the Adams Ex-

ALL READY TO FIGHT Independents Mean Business in Opposing the Standard.

BOUND TO HAVE THEIR OWN LINES

And Pipe and Refine Their Petroleum on Their Own Hook.

Mr. Thomas Liggett was interviewed yesterday by THE DISPATCH scout upon the feeling among the independent producers, and whether they were ready and willing to pool their interests against the Standard monopoly. Following is what he said: "You are right in supposing that the

producers are ready and willing to combine against the Standard Oil Company. The statistics furnished you by Mr. Kirk in this morning's DISPATCH represent the status of the oil business to-day, and shows how well they can afford to spend money in crushing opposition. The independent element has never been in quite so good condition to fight as to-day. The producers have not been on the Exchange, and are therefore not so poor as usual. The railroad companies have been given to understand that they must give shippers a square deal, and the producing business has square deal, and the producing business has drifted down to the Southwest, until now refineries at Pittsburg and along the Ohio can have an ample supply of crude from Butler, Allegheny and Washington counties, and on down the Ohio. In addition to rail facilities they have the Mississippi and tributaries to scatter home consumption, and home consumption mean profit. The Standard is selling refined in Colorado to-day at 40 cents per gallon

THE SAME CONDITION exists along the lakes in the Northwest, where they ship from Cleveland by water. transportation being the cheapest, the Ohio Valley is the best location for independent refineries for home consumption. A pipe line to

fineries for home consumption. A pipe line to the seaboard is advisable for export trade, but the opponents of the Standard role must not depend entirely on either home or export trade if they intend to stay in the business. For instance, the stills in the new Globe Refinery at Philadelphia were hardly heated properly until refined dropped 2½c in that city and stayed at 7½c in New York.

"You will in all likelihood see a large part of the money which the Standard has paid recently for production go right into refineries and pipe lines; for, while there were some very large properties sold, there were very few individuals included, and you will find that in the three counties—Butler, Allegheny and Washington—two-thirds of the production is independent to-day, and willing to contract their oil with independent lines and take stock in addition. Two millions of dollars in money and two-thirds of the southwest production can be gathered together within the next 60 days. You can safely calculate on nine-tenths of all the production outside of the Forrest and South Run Oil companies going to independent lines. of all the production outside of the 1 and South Run Oil companies going to pendent lines.

READY TO BACK THE SCHEME. "You will find all such men as McCalmont Oil Company, T. W. Phillips, H. W. Christie, Paterson & Lockwood, J. M. Guffey & Co., John M. Patterson, Jennings & Son, M. E. Griffiths, and hundreds of others, will not only put in all their oil, but money as well. With such stock-holders and a good organization the beginning of the end of the Standard power will be cer-tain to follow shortly.

"History, since the beginning of the world, has

shown a growth in nations or corporations (when they used their power and oppression) to a point where they appeared to be invincible, then their downfall started. Such has been the growth of the Standard, and with the combina-tion of circumstances, natural and otherwise, surrounding the business to-day, it appears to me that the beginning of the end of her power in not a great way off."

Better Results Desired. WILDWOOD-If several wells now drilling in the sand at Wildwood do not soon change to better digging the field will lose much of the glory it attained by the advent of the big wells on the Harbush and Roisehouse farms a few days since. Gibson & Giles No. I, Scott, at noon to-day was 37 feet in the sand with no material change. The sand is close and hard and but little oil in the hole. If nothing happens to retard drilling by to-morrow night the question of oil or no oil will be settled. The general verdict of producers here on the Menk farm well is that it is a first-class duster. The Roth Oil Company's No. 3, Harbush, is doing 60 barrels an hour to-day. Their No. 4 is drilling at 1,800 feet, No. 6 at 1,475, No. 5 is rigging up and Nos. 7, 8 and 8 have rigs building. The same company tapped the sand to-day in Kretzer No. 2, and should get the pay streak by morning. They finished No. 3 rig to-day and will soon bounce the drill. A 15 minutes' gauge this morning of Greenlee & Forst's No. 5, Roishouse, showed a production of 16% inches. Kiskadden & Co. have commenced drilling on the Scott ior, located 500 feet due east from Semple station. At noon to-day there was no material change at the Burk & McBride well, on the Doc Moon farm; by morning more of its history will be known. Barnsdall & Co., on the Zeigenhein farm, are on ton the sand, and will ind the pay sometime to-morrow, and Griffith & Co.'s No. 2, Rolsehouse, is also on top the sand and will reach the pay about the same time. Further drilling up to noon to-day has made no improvements in Greenlee & Forst's Ice Pond well. The Smith Farm Oil Company expect the sand in their two wells to-morrow. The Young well was drilled deeper last night, and this morning was making 12 inches an hour, Galley & Co., on the Biyle farm, were 65 feet in the sand at 11:30 o'clock to-day, with no show of oil. Bowman & Co.'s No. 1, Whitesell, is due to get the sand Thursday, providing everything works as it should. Oil men in general are kicking because all passenger trains do not stop at Semple. A new station and other radical changes here would not only meet the h better digging the field will lose much of the glory it attained by the advent of the big wells

The same company have completed No. 15 rig and are building No. 16, both of which are located on the Crawford farm; they are also building a rig on the Kaufold farm, a half mile west from the Crawford farm developments. Younkins, Chester & Campoell have a well in the sand on the Foeltch farm, which joins the Crawford on the east, it is showing up for a 15 or 20 barrel well. Iman & Co. are drilling a well on the Webber farm, and Shefflin & Co. are drilling another, located about midway between the Crawford farm developments and the Bulford farm. Frazier & Co. are drilling a well on the Pohle farm, which is regarded as important. If it proves a paying venture it will indicate an extension of the Saxonburg field to the southeast. Jefferson Center has been relegated to the rear ranks. The only well drilling is by the Jefferson Center Oil Company on the Kornrumpf farm, and is down 600 feet.

riood's Sarsaprilla is the natural enemy of all impurities in the blood. It expels all forms of poison and disease. Read this: "I am a pioneer in this county, having been

here 30 years. Four years ago my little son Ellery became blood-poisoned by impure virus in vaccination. His arm swelled terribly, causing great agony; physicians said the arm must be amputated, and even then his recovery would be doubtful. One day I read about a blood purifier, new to me, and was surprised to learn that it was prepared by C. I. Hood, with whom I used to go to school in Chelsea, Vt. I decided to have my boy try Hood's Sarsaparilla, and was much gratified when it seemed to help him. He continued to grow better as we gave him the Sarsaparilla, and having used 8 bottles is now entirely cured. As Hood's Sarsaparilla has accomplished such wonderful results I recommend it all I possibly can." J. M. SLEEPER, Upper Lake, Lake Co., Cat.

NEW ADVERTISEMENTS.

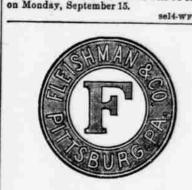

This week we are making our display of Fur Goods in our case at The degree of perfection reached in manufacturing clothing. It is only a few hundred years ago that a tailor to one of the Europeau armies first conceived the idea of the Exposition. This will give you a slight idea of the large assortment that we have in stock. Our cutting average garments instead of measuring each soldier. His efforts were, of Furs were purchased early in the course, crude, but this was the birth of the ready-made clothing trade—and how it has season previous to the recent advance in prices, and we are theregrown! And imagine how amazed this tailor would be if he were to see our grand Fall line of MEN'S and YOUTHS' SUITS fore prepared to offer extra values in Capes, all the very newest and OVERCOATS-perfect fitting and eleshapes in Astrakhan, Wool Seal, gant styles—the aeme of his ideas. We have some surprises for you, too, and there-Cape Seal, Dyed Opossum, Persiana, Black Martin, Mink, Broad fore request an inspection Tail and Sealskin. If you are not ---
