## BOOM IN MILLINERY. MARKETS BY WIRE.

Trade Never Before as Active at This Season of the Year.

A SCARCITY OF OSTRICH FEATHERS.

Plumbers' Supplies Advancing by Reason of the Tariff

AND EXPENSE OF BUILDING HIGHER

# OFFICE OF THE PITTSBURG DISPATCH. TUESDAY, September 16, 1890.

The fall trade in jobbing millinery lines is now at its height, and has been since the beginning of September. Volume of business, so far, is in excess of the corresponding period last year, or any previous year. Imported goods, such as fancy trimmings, ostrich tips, beaver hats and birds, are in extraordinary demand. A leading dealer reorts that his sales for this month have been double in quantity those of any previous September. Other jobbers report a similar

Said one jobber: "We have received over 60 cases of imported goods in the past few weeks and demand has been such that the stock is now nearly cleaned up. There has been an extra demand for feathers, so much so that we are unable to fill orders in this line, and as a result there has been a sharp advance ces the past week or two. In former as fashions have varied, and different his fall ostrich feathers are all the rage, and here are not enough to go round." Orders From Other Cities.

As an illustration of the fact that Pittsburg

reaching out in other lines than the heavy weight industries, it was developed in an inter-view with a member of one of the wholesale millinery firms that orders, of late, have been ing in freely from such points as Buffalo, innati and FL Wayne. Said he: "We have Cincinnati and Ft. Wayne, Said he: "We have a regular agent in Cincinnati, and have been receiving very satisfactory orders from that eity of la e." It is well established in the busi-ness world that Pittsburg has passed Cincinnati as a trade emporium, but it was a surprise to the trade editor to learn that in the line of la-dies' transform way ware furnishing retail the trade entor to team that in the fine of 12-dies' transmings we were furnishing retail stores of the Qacen City. The retail depart-ment of the millinery trade has fairly opened this week. One leading bonse had its fail opening on Monday. All will be in full blast before the week is out. The fail retail trade never as promising in its outlook as now.

### Plumbers' Supplies Advancing.

What is termed the sanitary work in building nes, namely plumbers' materials, are 33 per out higher this year than last. Copper has dyanced 40 per cent, and lead nearly the same mount. There is a prospect of still forther vances as the new tariff puts a tax of lige er pound on lead imported, whereas, under he old tariff this came in free. One of our nam sources of supply of late years has been Mexico. According to Mr. Biaine's views of reciprocity, our Southwestern neighbot's goods should come in free of dute. The new tariff imposes a tax amounting to 25 to 30 per cent on the plumbers' materials imported from Mexico. The section of the tariff bill in which dealers in plumbers' supplies are interested, thus reads: "Lead ore and lead dross, 13cc per pound; provided, that silver ore and all other ores con-taining lead shall pay a duty of 13cc per pound; on the lead contained therein, according to sample and assay at the port of en-try." Said one of our leading deal-ers in plumbers' supplies: "Our lexico. According to Mr. Blaine's views of rs in plumbers' supplies: "Our ade will no doubt suffer from the new tariff. trade will no doubt suffer from the new tariff. Volume of business is already lessened as com-pared with last year, though business is larger in dollars and cents. The old method was bet-ter. In the end the consumer will have to pay the bills. The sanitary work in building is an important factor, and when you add 35 to 40 per cent to the cost in this department it makes a serious impression on the aggregate in con-struction expenses." The opinion is widespread a scroots impression on the aggregate in con-struction expenses." The opinion is widespread that plumbers' bills are rather steep. If to the old-time bills 49 per cent is to be added, there will be astrong confirmation of the popular faith At the head of the tariff bill referred to nonve is this sentence: "A bill to reduce "creance, and equalize duties on imports and for other purposes." Said a leading dealer: "The section which takes imported lead from the free list is evidently for other purposes than reducing reference."

By doubling the circulation the working classes, the mainstay of the country, would be especially benefited. Thousands of new enterprises would spring up, augmenting the demand for labor, which is now in excess of requirements owing to financial mability to pros ecute needed improvements. While I am not an inflationist, a careful survey of the situation forces upon me the conclusion that the country is badly in need of a large accession to the circulating medium. Recent enlargement is not sufficient. We want enough to insure a stable money market and put it out of the power of any combination of men to check the wheels of progress,"

Temper More Mixed Than for Many Days-Expectations of an Easter Feeling In Money - Renewal of the General Hesitation.

NEW YORK, September 16 .- The stock martet was less active to-day, and its temper was more mixed than it has been for many days, but there was on the whole a material feeling, and especially during the forenoon, than at any time during the past week. The general impression was that money would be

general impression was that money would be easier after to-day, but that there would be an active money market throughout fall or until funds, which are now engaged in moving the crops, shall have found their way back to this center. There was, therefore, a renewal of the hesitating character, which was so pronounced

some time ago in the market, and, while there was some investment and some covering of shorts, there was no large demand for stocks, and later the bears again became aggressive. Everyone is of the opinion that the worst is now over and that premiums for the use of

money are not likely to be seen again this year. even though comparatively high rates for money are likely to be the rule in the future. The bears, therefore, were inclined to be mor cautious in putting out short lines and consid-

market followed with advances on first sales of from ½ to ½ per cent over last night's final figures, and, while the market remained fever-ish and unsettled during the forenoon, owing to the further efforts of bears to bring about declines in the Villards, Grangers and Chicago Gas, there was a firm tope in the main, which resulted in fractional advances by noon. Big Four, Chicago Gas and Northern Pacific preferred made exceptional gains of over 1 per cent. The bears then took Lacka-wanna m hand, and before 2 P. M. it was rattled off at 3 per cent on very large transactions. The general list sympathized to a limited ex-tent m this decline, but a portion of the early gain was retained, and, when the pressure was removed, a sharp upward turn in the last hour brought almost everything traded in up to the best prices of the day, and the market closed quiet, but firm to strong, at the improvement. Chicago Gas 1½, Louis-ville and Nashville 1½, Big Four 1½, and others at generally larger fractions. There was the usual limited business in rail-road bonds and the market was nusually steady, the final changes of note being less than usual and the losses fower in number. Millers' National Association. —At Montreal Richard OlBrien, who is said to have sent out the report that Prince George of Wales had been party to a fight in a low quarter of the city, and had in consequence been taken to police headquarters, was arrested on the complaint of R. D. McGlobon, Q. C., Vice Chairman of the Reception Committee to the Prince, on a charge of criminal libel.

# Groceries

Sugars have developed so much strength within the past few days that a rise is probable at an early day. Coffees are steady, and teas are steadily moving upward. The advance in tea the past month has been from 4 to 7c per pound. Canned goods are in an unsettled condition, but the upward movement has been ar-rested. The activity in wholesale grocery trade shows no sign of abatement. The movement is free, and prices are steady all along the line. Five steamers lined the wharf, which bespoke more for the river business, than words can tell. The large wharf was literally covered with every kind of merchandise, products of this city. Ther upon ther of boxes containing glass, loomed up and could be seen for a great distance, and nails in kegs were in profusion. Most of these goods were consigned to Southern ports and would require a dozen or more trains to transport them. Business was not confined to the handle of freight in the least, the passenger traffic also being very heavy. It took nine hours to load her freight from here. CAPTAIN JACK WILLIAMS will be continued in command of the big Joseph B. Williams. She will likely take out one of her small tows in the near future, which is about three times the size of ordinary tows. THE Hudson, newly painted and otherwise improved, will arrive this morning, and will run in the Cincinnati packet trade this afternoon. She will be followed to-morrow by the C. W. Batene-lor, which has been lying in this port all summer. THE Pittsburg and Cincinnall packet steamer Andes, elegantly refitted and remodeled, arrived from below yesterday and departed for Cincinnat with a large load of freight, mostly from and glass. She also carries a full complement of passengers. THE report that the Sam Brown had burned to the water's edge at Cinctinuiti, it is claimed, was circulated by a rival firm. Captain Harry Brown denied the story yesterday afternoon, and showed a telegram from her officers stating they had passed Marietta in the morning en route to this circul right. city all right.
