IRON TRADE REVIEW.

Raw Material Really Weaker Than a Few Days Since, Though

THE QUOTATIONS ARE UNCHANGED.

Still a Very Active Market for the Pinished Products.

REPORTS FROM THE LEADING CENTERS

Truth compels the statement that raw irons are weaker than they were a week ago. While our quotations are unchanged, there is little doubt that holders have been making concessions on these rates to the eash buyer. Reports from the other side of the Atlantic have put a more hopeful feeling into producers, but there are no signs of the upward fall movement looked for and hoped for by dealers for the past few weeks. Bessemer irons are weak, and there are rumors of sales below our inside quotations. A sale of 5,000 tons is reported at \$18 25, and another of 3,000 tons a shade below this figure. With weak markets, such as we are having now, there are always producers whose necessities force them to turn products into money at prices below regular rates. Hence the reported sales of Bessemer at \$18 per ton, a figure below the market. The buyer

Gray forge iron is steady at quotations, Muck bar, manufactured iron and natls are moving freely at about the same prices as reported last week. Structural iron is in active demand, and manufacturers report a difficulty in meeting orders. The great activity in finished products must, be ore very long, be felt in an increased demand for raw iron. Manufacturers of finished products are generally well stocked with material, but the time draws near when they must replenish. A year ago at this time there was a strong upward movement Following are latest quotations:

IRON FAIRLY ACTIVE.

Evidences in Philagelphia That the Market Will Seen Improve. SPECIAL TELEGRAM TO THE DISPATOR !

PHILADELPHIA, September 19.-The iron market is fairly active, and there are evidences that the market will improve, as there are any number of inquiries from large buyers. The pig iron market is good at fair prices. There as not been any markdown, but manufactur ers have been unable to secure an advance in the face of the fact that consumption is probably the largest on record. Production has somemand. Prices are quoted at \$15 00@15 25 de-livered for gray force, \$16 50@17 00 for No. 2, and \$17 50@18 00 for No. 1. There is little or no business using in muck bars. Sellers are asking \$30 00@30 50 at the milli-buyers, however, are only willing to pay \$29 50 delivered. There is considerable city mills and L80@1.85 at interior points. The mills making skelps are full of work. The quotations continue to be very firm; 1.85@2c is named as the price for grooved and 2.15@2.25c for sheared. Plates are active and the mills are very much overcrowded. So great is the demand that it is partially unsatisfied. Prices continue firm with a prospect of an increase. The quotations are: 2.25@2.30c for ship pin es; 2.25@2.30c tank: 2.30@2.40c bridge plates; 2.45@2.25c shell; 3.10@3.30c flange, and 3.75c for firebox.

Dox.
The mills are busy supplying their orders for structural material. There is considerable new business coming in, but the demand for it is not so urgent as it was several weeks ago. The ills have enough work on hand to keep them ousy the remainder of the year. The quo-ations for stocks delivered in the consumers yards are: Angles, 2.202.30c; sheared plates, 2.4022.50c; tees, 2.402.5c; beams and channels, Aic. The activity's ill continues for sheet iron. Prices are firm and are as foll Best refued. Nos. 14 to 20, 3663 10c; be Nos. 21 to 24, 3.296(3.30; Nos. 25 to 25, 3.406(3.) No. 17 3.596(3.60c; No. 28, 3.606(3.70c.

NO ADVANCE IN THE SOUTH.

The Expected Change in Prices Has Not Yet Been Mndr. SEPECIAL TELEGRAM TO THE DISPATCH

BIRMINGHAM, ALA., September 19 .- There

has been little or no change in the condition of the iron trade since last week. Prices are firm at last quotations, and the expected advance has not yet set in. The volume of trade is very satisfactory to the furnace men. Orders are coming in fast enough to prevent any large accoming in fast enough to prevent any large accumentation of stock.

Steel making is just now attracting much attention in this district. The report of a committee of experts, selected to investigate the Henderson process, has been made public. They renort that the Henderson Company, with crune appliances, expensive labor and other disadvantages, is making steel at a cost of \$20 ner ton or less. A committee from the Henderson Company is now in New York negotiating for capital to erect an immense steel plant for the maintacture of steel rails, as well as ingots. Several New York capitalists some time ago assured the officers of the company that when it was es ablished by the testimony of experts that steel could be made here at a cost-of \$20 per ton \$1,000,000 capital would be ready in New York for investment in a big steel plant in this city. The committee referred to his gone on to close this agreement if possible.

FAIR AGGREGATE OF BUSINESS

Scarcest Grades.

Strange to Say the Cutting is Done on the

SPECIAL TELEGRAM TO THE DISPATOR CINCINNATI, September 19.-Rogers, Brown & Mescham say: "There has been a fair ag-gregate of business transacted during the week principally in small and medium lots of Southern coke iron at substantial concessions from quoted prices, and strangely enough these cuts, have affected precisely these grades, which are scarcest, at the furnaces. The situation is abnormal, as other markets repor prices strong and our advices from Southern furnaces point to an early general advance. It car wheel from there is little doing while Onio softeners are in usual demand at unchange values. The scarcity of cars at Connellavill still continues and coke shipments to this sec

tion are so reductd as to cause considerable convenience. We quote for cash f. o, b. Hot blast coke and charcoal: Car wheel and malleable irons: Lake Superior

The Market Samewhat Unsteady.

INTECIAL TELEGRAN TO THE DISPATCH, CINCINNATI, September 19.-Rocers Brow & Co. say the market has been somewhat unstandy the week past. Bessemer and Northern The market for Southern from has been vibrat ing between two influences. Some furnaces largely sold up contemplate advancing prices and others not so liberally sold nhead are willing to sell at figures prevailing the past fort-night and shade a trifle for large orders. The volume of business has been fairly good on the whole.

THE MARKET IS QUIET. But the Melters of Iron All Seem to be Very Busy.

PEPECIAL TELEGRAN TO THE DISPATOR. CHICAGO, September 19.—Rogers, Brown & Merwin say: "The market continues quiet and the amount of buying during the past week has not been large. Some fair-sized blocks of Southern coke iron, however, have been placed. Southern coke iron, however, have been placed.
Silvery iron and softeners are in good demand,
while Lake Superior charcoals are inactive.
Some slight concessions have been offered by
certain Southern coke furnaces for early deliveries, but all of the furnaces in this district are
firm on business for scattered deliveries.

"The prominent feature at present is the
large amount of activity found among all
melters of iron: the car works, machine shops
and foundries nearly all report heavy orders on
hand, and in some cases more business offered
than can be handled. We quote for cash, f. o.

The water had another set-back vesterday. and went below nine feet before it stopped. However, reports from the headwaters are very encouraging, and a rise of a few feet in the next few days should not be unexpected. Telegrams show the rivers at points on both streams to be falling, but the Weather Bureau forecasts heavy rains in the section embracing the head-waters of the Allegheny and Monongahela. The rise, if very heavy, will not beuefit coal shipping in the least. Operators would rather have it at the present height than higher. When it is very much above the present figures coal shipping is quite hazardous.

Captain Christian promises to let Pittsburg rivermen know what work the boats accomplishes through these columns. DEMAND FOR MONEY.

It Has Increased Beyond All Precedent in the Last Few Years.

DECISION AFFECTING TRUSTEES. Money Offered on the Floor of the Exchange on Stock Collateral.

THE NEWS AND GOSSIP OF THE CITY

The need of a more liberal financial polic The need of a more liberal financial poncy to encourage the growth and development of the country is beyond all question. The demand for money has grown beyond all precedent; millions are wanted where thousands were sufficient a few years ago. Industries of all kinds are being developed and built up, and millions of people are becoming more and more dependent mean them, here the importance of dependent upon them; hence the importance of such a financial policy as will provide these in-dustries with sufficient money to exist.

The expansion of trade and business is

phenomenal. As compared with last year the business is about 20 per cent greater. Banking returns show that 12 per cent more money has been handled. Railroad returns show a remark-able increase in freight. The condition of the great manufacturing industries shows a marked increase in production. The demand for ma-chinery, building material, iron, steel, coal, and every variety of crude and finished products, indicates how remarkably rapid is the growth in all material directions. Railroads are opening up regions of country of which but little is actually known. New supplies of timber and mineral are being found; broad areas are brought within reach of immigrants who stand ready, able, and anxious to develop them. On every side there are indications of develop-

ment, of progress, and of wealth,
It would be a great pity—worse than that, a great crime-if, through any lack of intelli-gent foresight or good management, this healthful growth and development should be checked.

Low Governing Trustees. The Supreme Judicial Court of Massachu ance to trustees in the case of the appeal of one Dickinson, as trustee of the estate of Lucius Boltwood, against the decision of a Probate Court Judge. It appeared that the trustee, after consulting with certain persons believed by him to have good judgment of what investments were proper and safe, purchased a num-ber of shares of Union Pacific stock above par. The stock declined in value, and the trustee on filing his account claimed an allowance for the loss on this stock. The claim was disallowed by the Probate Court. The Supreme Court of Massachusetts set down the rule 60 years ago that "all that can be required of a trustee to invest is that he shall conduct himself faith-

fully and exercise a sound discretion." The Court held that the trustee in the pres ent case had not brought himself within the rule, saying: "A prudent man, possessed of con-sider sble wealth, in investigating a small part of his property, may take risks which a trustee would not be justified in taking. While we recognize the hardship of compelling a trustee to make good out of his own property a loss occasioned by an investment of trust property which he has made in good faith, and upon the advice of persons whom he thinks to be qualified to give advice, we cannot hold that the trustee was justified in investing in such stocks, as this was so large a proportional part of the

MONETARY CONDITIONS.

Financial Skies Brightening-Figures Showing Trade in Good Shape.

Several of the leading local bankers expressed the opinion yesterday that the finan-cial equeeze had about run its course, and that the lines would gradually relax. They all said that there was plenty of money here to handle the fall business and lend necessary assistance to new enterprises. Crops are beginning to to new enterprises. Crops are beginning to move at prices satisfactory to farmers, and prospects are good for a heavy fall trade. These are reassuring features.

Loanable funds were in moderate supply and demand yesterday. Rates were steady at 6@7 per cent. The Clearing House did a large business, which was fairly distributed among the banks, indicating not only a good movement of the specialties, but in retail branches as well. Markets Strong and High Toward the Lust Hour-Favorable Expectations for the Bank Issue-A Marked

Absence of Pressure.
NEW YORK, September 19.—The feeling in Wall street on the money question is decidedly easier, and little apprehension is felt that, for the next few weeks at least, there will be any trouble in obtaining accommodation. The payment for the 4 per cents will be completed in time to show in the bank statement of to-morrow, and is expected to place the banks in a very strong posi-tion, but the fact that about \$6,000,000 was drawn in cash is construed by some people to indicate that the hoarding of the money is intended, but this view meets with few believers. The bears, however, have made such strepuous The bears, however, have made such strenuous efforts to make it appear that this time, complete as it has been, is only temperary, and that the treasury absorptions would soon draw all of it back again has created considerable distrust for the present, and the inclination to invest in the market is not at present any more marked than it has been in the past two countly.

To-day there was a marked absence of be ar pressure, although the usual efforts to get prices down were not wanting in some directions. The movements lacked vim, however, and while there was a decrease in the amount of business done, the fluctuations also showed a smaller range, and the important movements were again confined to the low-priced shares, especially in the forenoon, but after that time the covering of shorts and a freer buying for the long account, induced by the growing ease

FAMILIAR FEATURES.

Oaly Novelty on Change Offer of Money on Kicck Collateral.

The local stock calls yesterday differed in no material respect from those of the previous days of the week. There was, perhaps, a stronger undertone, due to easier money. Sales were 170 shares. The active interests were 180 lineage and Lake Frie preferred and Cincinnati, Chicago and St. Louis 1½, and Loises.

What had been talked of for some time, offering money on the floor of the exchange on stock collateral, was introduced by Mr. A. C.

Robinson. He rade the offer, but there was no acceptances. This innovation has many is supporters, and may be adopted as a permanent feature of the stock market. It will useful when the banks have large balances.

THE MARKET BASKET.

Trade in Fruit and Vegetables Rather Dull-Pears and Other Colifornia Products Very High-Scarcity of Fish-Prices of Stanles.

The week past has developed few new features in the line of market basket filling. At Diamond market fruit and vegetable stall trade is reported slow for some days past, Grapes are the mainstay in fruit lines. Quality is all that could be desired and prices are rea-sonable. California fruits are in good supply, but price is steep. With Bartlett pears at 50c a dozen, the average citizen can hardly afford to indulge. In the line of dairy products jobto indulge. In the line of dairy products job-bing prices have weakened during the week past, but not enough to affect retail prices. Creamery butter of the very best quality is wholesaling at 25 to 26c per pound. As there are about six carloads of oleomargarine coming to our market every week, it is highly probable that a multitude of consumers are spreading that a multitude of consumers are spreading their bread and biscuits with imitations of but ter. Fish supplies also have been curtailed of late, owing to storms on the Eastern coast. Western fish are beginning to come in more treely, and a full supply is expected by another week. Florists report a good week, with prices unchanged. The return of the pilgrims to mountain and seasing has perceptibly helped trade in fi-ral lines. Jobbers were fairly active through the presence of nearby trade now coming in the presence of nearby trade now coming in more freely. The coming week promises to be an active one with the jobbers. At first hands, demand was irregular, but of improving tendencies as regards the wants of jobbers, while exporters were buying a good many goods for the Eastern market for future delivery, advanced prices being realized. The tone of the cotton market continues strong and there is again talk of higher prices. Prints were in moderate demand, but in good shape.

Catarrh Permanently Cured. "I am a blacksmith and my trouble began by

my working in a draft," said Mr. E. H. Price, a well-known resident of Lawrenceville, who lives or Forty-six-and-a-Half street, and is in the employ of the Sheffler Bridge Company, "I caught a severe cold and from that time my catarrhal symptoms manifested themselves. My head and nose would be so filled with mu-cus that I was compelled to breathe through my mouth and my nose would often get sore. I had pain over my eyes, dizziness and noises in my ears. The mucus that dropped into my throat

caused me to be almost continually spitting. The disease finally reached my lungs, I felt a weight in my chest as if my lungs were stopped up. My breath became short and finally a violent cough set in, which increased until I coughed day and night. I had eructations of gas from my stomach, and I had a tired feeling, but more so on getting up in the morning As I read in the papers statements from patients who had been cured by the catarrh specialists at 323 Penn avenue of conditions specialists at 323 Penn avenue of conditions similar to mine I took a course of their freatment and became completely cured. It is now some time since I took their medicine and my cure has remained permanent. I shall be glad to further describe my case to any one who suffers as I have done.

E. H. PRICE,"

THE PRESCRIBING

And treatment of all patients at the Catarrh and Dyspepsia Institute is, and always has been, under the direct charge of skilled specialists, who are regular graduates and registered at the Prothonotary's office, as anyone will find by inquiring. They are permanently located at 323 Penn avenue, near Fourth street, and will continue to treat their specialty, catarrh and dyspepsia, as heretofore.

While they charge a reasonable price for treatment, they refuse no one treatment or medicine because he is poor.
