## MONTHLY OIL REPORT

Summary of Operations in the Southwestern Field Dur-

ing September. . AN INCREASE IN PRODUCTION,

Largely Attributable to the Gushers Recently Added to the Wildwood List.

Little That is Surprising in the Way of New

The results of September operations present an interesting study for the producer and the trade in general. Id nearly every pool of the Southwest, the report shows an increase both in production and work, as compared with August, The Butcher well at Bakerstown, on the Clendenning farm, is perhaps the greatest surprise of the | Mount Morris. | 1860 | E. Just whether this new strike will open up any territory to speak of will remain for the drill to determine. One fact has already been demonstrated, and that is, the well possesses the same characteristies as the old gusbers struck in this field, which, it will be remembered, were shortwhich, it will be remembered, were short-lived. With this exception, together with the Mellon well on the Cassiday farm, one mile south of Coraopolis developments, and the Pat-terson well on the McCurdy farm, 134 miles southwest from the old Crafton field, there has been no new territory developed worthy of

The Melion well would seem to indicate anther Coraopolis pool, which, taken in con-nection with the Finegan & Downing well, on the Cooper farm, looks as if there was quite an area of prospective territory in this section. The well to-night is sloing 200 barrels a day, and is the basis on which a number of locations have been made. The Patterson well, from its present showing, is a much better one than is conceded it by the average producer, and the fact that it has developed some new territory cannot be ignored.

AN INCREASED PRODUCTION.

In the Belmont and Eureka, Mt. Morris, Chartiers and Crafton, Wildwood, Mannington

Chartiers and Crafton, Wildwood, Mannington and Washington fields, the report shows a new product of 12,708 barrels, which is an increase for the same territory over August production of 8,451 barrels. This increase comes mainly from Wildwood, which has a new production of 6,759 barrels.

In this connection it should not be forgotten that the large output is atributable to five or six big wells which have come in close together. The production of these wells is already showing a material decrease, and 35 days hence a decline of 50 per cent can be safely counted on. The mest productive part of the territory, which is on a 45 line, has been extended only by one location. The new features of the field are found in the Menke farm fourth sand well, on the southeast line of the field, and the Young well, which, from its location and caliber, indicates a parallel or cross belt. There are now drilling 46 wells and 34 rigs up and building, making a total of 80, as compared with 53 wells and 9 rigs, a total of 62 in August.

Eureka and Belmont rank second in the in-

compared with as wells and a rigs, a doing the infin August.

Eureka and Belmont rank second in the increase of production. There were completed
24 wells, giving a daily output of 2,895 barrels,
while in August there were 20 wells finished,
having a production of 1,200 barrels, which is
an increase of 1,735 barrels. The Stewart well
shows an extension of territory up the river
on the Virginia side of nearly three-quarters
of a mile, which is the only

NEW FEATURE DEVELOPED this month. Chartiers and Crafton together completed 28 wells, with a production of 832 barreis, a decrease from August of 750 barreis. At Mannington nothing particularly new has transpired during the month. There were 11 new wells added to the completed list, giving a transpired during the month. There were 11 new wells added to the completed list, giving a form of the field 1,600 barrels a day.

A careful tabulation of the field indicates 42 wells drilling and 20 rigs up, while the total is an increase of 14 over August's work. Nothing of any consequence occurred at Washington and Taylorstown, and only 325 barrels of new production is shown, an increase of 230 barrels from August. Butler county, for a wonder, has remained passive, and is retrograding from her historical heights both in work and new production. Venango and Clarion have about run their race, and but little available territory remains to be drilled. In the middle and northern fields nothing has transpired to relieve the monotony, and September reports about a standoff with August. Following is a tabulated report of the important Southwest pools: this month. Chartiers and Crafton together

GLADE RUN-Kingensmith, Waldren & Co., No. 1, Waldren farm, has been steadily in-creasing her output for the past few days, and is now safely rated as a 75 barrel well. This

is now safely rated as a 75 barrel well. This rather opens up and enlarges the belt in this end of the field. Guckert & Co., No. & Borringer, are on top of the sand with a fair showing. The result of this will be watched with interest by the Forest Oil Company, who are building a rig eight rods south, on the Waldron, and adjoining the Kingensmith & Co. No. 1. The Forest Oil Company and Boyd, McNulty & Co., of Plittsburg, have been making things rather lively for the past few days. The contest is over the right of ownership of a 30 acre lease on the Frank Miller farm, which both parties claim. Superintendent R. J. Phipps took possession on Saturday evening and had a rig, or part of one, belonging to the Plittsburg company removed, and moved on a boiler. Then things remained quiet until Monday, when the report was circulated that the Plittsburg people were coming with two car loads of men, but that proved to be a canard, and the case now rests until a legal decision is rendered.

Last season the "Press" hat had a most remarkable run. Everybody wore one, even those who usually eschew a soft hat on general principles. This fall it will be confined mostly to those who value comfort above everything, and as this hat combines the elegance of a Derby with the ease of a soft hat, it is (to use a common parlance) "just the cheese." We show the Press hat in black, blue and brown. In dimensions we carry a small, medium and In dimensions we carry a small, r

Fall and winter styles in Ladies' Hats are ready. We are doing an immense business in altering and coloring Felt and Straw Hats. Why? Because we have the right styles, the best machinery and the taste and means to know how to get up a fashionable hat.

Plumes and tips are the style for trimming fine hats this season. Every lady wants tips dyed this fall. Our French feather dyer is a gentleman of art in his branch—life-long experience has crowned his success. No matter what shade you wish your feathers dyed we satisfy you. We are the feather dyers of this city; every first-class milliner will tell you so. Our work in feathers and hats this season cannot help but have an immense success.

Then the catarrhal secretion began to drop into my threat, causing me to hawk and spit. "Finally, after suffering for about three years, I took typhoid pneumonia, and from that time I rapidly grew worse. My lungs became very weak and I felt a tight, oppressive feeling in my chest; my breath became short and a cough set in. My appetite failed, I had a full, uncomfortable feeling after eating, and my stomach feit very sore and tender. I could not sleep well and I had a weary, tired feeling. Every change of weather would cause me to take cold, night sweats weakened me and I lost fiesh. "Having men saveral testimonals of cares."
