# BRIGHT AS A DOLLAR

Reports of Trade at Commercial Centers Show Soundness and Improvement in Business.

A FALLING OFF OF FAILURES.

Increased Exports and Advances in Cereals Noted During the Past Week at Shipping Points.

SUGAR AFFECTED BY TARIFF CHANGES.

The Pittsburg Iron and Glass Market Large in

Volume.

PEPECIAL TELEGRAM TO THE DISPATCE. NEW YORK, October 3.-Special telegrams to Bradstreet's report a very general and seasonable activity in the distribution of staple goods. At several points the volume of September business is in excess of that for September, 1889. Rains have continued to affect the cotton crop, but the wine and raisin yields in California, instead of being short, it is now reported will equal expectations. Hides are dull and tend lower in price after recent activity. Provisions have been a shade lower.

The passage of the new tariff bill appears to have had an influence in enabling pro ducers and others to advance prices of woel and carpets, barley, tin plates and pearl buttons. In spite of some temporary favorable appearances, share speculation at New York continues subject to bearish influences, unfavorable earnings of granger roads and financial stringency abroad checking bullish

FAILURES FALL OFF.

Drygoods are in fair demand East, although the movement is quieter. Springwear cotton and wool dressgoods are more largely sold ahead than in previous years. Clothing woolens are improved in tone and in slightly better demand. Price steadiness is a feature. Special offers by jobbers are more numerous. Wool is in moderate manutacturing demand and very firm. Recent advances have been well held, and some lines, notably combing wool, are still further advanced. Spot cotton is unchanged. Spes-

ulation is fairly active. Reports to Bradstreet's of mercantile fail-ures throughout the United States during nine months of the current year show a total of 7,338, against 8,334 in the first nine months of 1889. The aggregate liabilities of failing traders are \$92,341,950, against \$101,755,518, and actual assets, \$44,450,712, against \$50,751,994 in the first nine months of 1889. September bank clearings reflect an increase in activity at all centers over the preceding mouth.

### A GAIN IN CLEARINGS.

Stock speculation at New York, subtreasury transactions and free crop move-ments West and South have been factors in enlarging aggregate transactions. Compared with 1889, the gain is the largest, except in May, of any month in this year.

Total clearings at 53 cities for September
equal \$4,994,220,382, a gain over last year of
16.7 per cent, while outside of New York

the gain is 19.1 per cent. The nine months clearings of all cities aggregate \$43,856,658,-487, a gain of 9.2 per cent over '89. New York City's clearings show a gain over last year of 7.2 per cent, while at 36 other cities

the gain is 12.7 per cent.

Available stock of wheat increased only 4,115,042 bushels during September, east of the Rocky Mountains in the United States and Canada, as compared with an increase of 5,874,358 bushels in September '89, and 13,-230,844 busnels in September, '88. INCREASE IN EXPORTS.

Stocks available October 1, '90, were not materially larger than on July 1 last, while in '89 they were 6,359,965 bushels larger on October 1, than on July 1, and in '88 they were 4,698,215 bushels larger. Available wheat stocks October 1 were

only a trifle in excess of the total one year ago, but were much smaller than two, three, four, five and six years ago on October 1. Exports of wheat from both coasts this week, and of flour as wheat, show some increase, and the movement is freer from first hands. Prices are slightly higher. The total of foreign shipments is 1,593,900 bushels, against 1,155,121 bushels last week (due to heavy Pacific coast shipments), and 1,624,493 bushels in the like week of 1889. The aggregate exported July 1 to date is 25,760,201 bushels, against 25,839,207 bushels in a like share of 1859 and 33,201,024

EFFECT OF TARIFF CHANGES. Exports of Indian corn this week equal 876,449 bushels, against 747,772 bushels last week. Other cereals except barley are fluctuating, with an upward tendency. The latter shows a pronounced advance owing to higher duties and need of a foreign supply. Sugar is dull and raws are 1-16c lower, while refined is steady and unchanged Soptember consumption was very large in spite of a deficient fruit crop. Low prices for refined (1 cent below last year), have

bushels in 1888.

changes tend to depress prices. Coffee is only fair at unchanged prices. Case oil is higher, owing to the advance on tin. Anthracite coal prices have been advanced and promise to go higher. Iron is barely steady in price. Demand is no better. Rails are no stronger after last week's con-

aided consumption heavily. Recent tariff

cession of 50 cents per ton.

IMPROVEMENT EVERYWHERE. R. G. Dun & Co.'s weekly review of trade

says: Never before has there been in any month so great an increase in the circula tion or so large a payment of public debt as in the month just closed. Domestic trade is improving in all directions, and at least for the time there is more improvement in exports, which now show for the past month n gain of 7 per cent over last year at New

Of the magnitude of domestic trade, it appears that actual payments through the clearing houses outside New York were in September 16% per cent greater than last year. This is partly due to higher prices, for the general average of commodities has risen 1 per cent during the past week, and has been over 6 per cent above last year for the past month. But the earnings of railroads, so far as reported for September, show a gain over last year of 7½ per cent, and the movements of cattle and of cotton is particularly heavy.

### ALL DOING WELL.

In spite of the short crop the movement in oats also exceeds last year's, while the decrease in wheat and corn is partly bal-anced by increase in flour. Sales of iron ore at Cleveland thus far this year exceed last year's to date by one-third.

These items respecting the larger trades secord with accounts from nearly all cities, which continue highly favorable. Boston notes healthy and encouraging trade in New England. Philadelphia reports more confidence. Chicago notes, beside heavy receipts of grain, meats and cattle, a larger trade in drygoods than last year, with prompt collections, and the same in boots and shoes, and a larger trade, but not so prompt collections, in clothing. St. Louis notes unusual sotivity in all lines, with the drygoods trade exceeding any previous year.

PITTSBURG ALL RIGHT.

Cincinnati reports very liberal orders for clothing, a good trade on tobacco at favorable prices, and heavy movement of fruits and produce on account of local scarcity. Milwaukee notes very good trade, the clothiers especially being unable to fill unelablers especially being unable to hil un-expectedly heavy country orders. At Savannah trade is very brisk, at St. Paul sud Minneapolis, Omaha, Denver and Kansas City it is very good, at Detroit better than last year in some lines, and at

Pittsburg large in volume and strong in tone for finished iron and glass, but less strong for pig iron and rails, and for glass chimneys. Many works there are hurrying

The iron market is singularly sustained, in spite of unprecedented production, by the unprecedented demand. A sharp advance in tin closed with prices nominally 24c, though the visible supply is greater than a year ago. Lake copper is firmly held at 17c, notwithstanding raids on those grades, and lead is strong at 5.37c, some foreign having been bought for importation.

PHENOMENAL ACTIVITY. Cotton and coffee have been unchanged in price, with oil and hogs lower, but the price of wheat has advanced, while oats have declined. The details given show that in all-

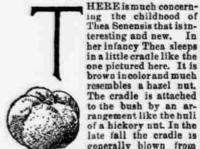

parts of the country and in all important branches of business, there is phenomenal activity and nevertheless there is comparative freedom from speculative excitement or The general soundness of trade is shown

by the reports of failures, which for the third quarter of 1890 were smaller in number and amout of liabilities than for the same quar-ter of 1889, though in Canada rather larger in both respects. The decrease in number in the United States was small-2,196 this year, against 2,276 last year—but the liabil-ities were but \$35,452,436 against \$39,227,045 last year, showing a decrease in the average for each firm failing. The business tailures occurring through-

out the country during the past seven days number 197, as compared with 219 last week. For the corresponding week of last year the MRS, LIVERMORE, Lucy Stone and other

well-known women contribute a symp of interest to all classes for To-Morrow's 20-Page DISPATCH.

THEA, DAUGHTER OF CAMELLIA. Being an Account of Her Life From the Cradle to Happy Childhood.

generally blown from
its moorings and drops
to the ground. Thea, in her nutshell cradle, is a bitter little thing, and reminds one of a concentrated persimmon. In the spring Thea is consigned to the care of the earth in rows like peas or sometimes in clusters. Thea has large and long limbs —a good deal larger than her lithe body— and when she once plants her feet in the ground it is difficult to remove her without

affecting her health. She somewhat resem-bles Madame Carnot in that respect. By this time the "cat's out of the bag," and readers must know who Thea is, but it is hoped that there has been something worth reading in this chapter. For further explanations and the only excuse for this waste of printer's ink the reader is referred to the author, B[U]Y HE-NO TEE. [The next chapter will describe Thea from childhood to womanhood.]

### THE WILDWOOD POOL

Drilling Operations Active and Interest on the Increase.

GAUGES OF IMPORTANT WELLS,

Another Cut in the Price of Crude Buckeye Petroleum.

NOTES FROM THE PRINCIPAL FIELDS

PERCIAL TELEGRAM TO THE DISPATCH! WILDWOOD, October 3 .- While there is no particular change in the Wildwood field, operations are characterized with unusual activity. The interest, if anything, is increasing, and in a few days the drill will bring to light hidden facts on the southwest, northeast and southeast lines of the field, which will pretty clearly outline the future of this proline pool. The pro-

duction has dropped a few notches within the past three or four days, and the aggregate output is slightly under 8,000 barrels a day. It is not expected that the Ringheiser well, drilling on the southwest line, will reach the locality of the pay streak before the middle of next week, although, with good luck, its advent may be sooner. It is just possible, when it does reach the sand, that the fact will not be publicly proclaimed, as different parties are figuring on adjacent territory.

The Hasley well now nearing the sand just northwest of Wildwood station, is another important well, and in a measure will define this end of the field. In the event of this venture proving a paying investment, many derricks would spring up almost as if by magic. The light caliber of the Smith farm wells, where big ones were expected, together with the Bowman gasser, does not contribute any flattering prospects toward the theory that it will be a market breaker. However, the drill has demonstrated the fact that predictions, seemingly based on the best theories, go for nothing in the Wildwood field. The Hancock well, located about a quarter of a mile southeast from the Menke well, and the Stevenson & Whitiney gasser is looked upon as an important factor in defining territory in this section of the field; this well should reach the sand some time next week. At 12 o'clock to-day Griffith & Co.'s No. 5. Whitesell, was two feet in the sand, with a showing of oil. Griffith's No. 2. Smith, got the pay yesterday, and in its present condition will make a 75-barrel well. Barnesdall & Co.'s No. 2 is in the sand and spraying a little oil; it is thought that deeper drilling will make a great improvement. Forst & Greenlee are building a rig on an acre lot adjoining the Ringheiser on the north, and are building another on the Jones farm, three-quarters of a mile southeast from the Menke well. Following are the gauges of some of the wells: by magic. The light caliber of the Smith

Butler County Wells.

ZELIENOPLE-Latchaw & Co.'s No. 8, on the Allen farm, was shot yesterday and responded handsomely. It will certainly make a good producer. Enterprise No. 1, on the Allen, is in the sand, and has good indications for a well. producer. Enterprise No. 1, on the Allen, is in the sand, and has good indications for a well. LeVine No. 1, on the same farm, is also in the sand, and is showing good. The West No. 8 has commenced pumping, but the production is not yet known. The Home well has struck the sand, and will be due in a few days. A fair producer is reported on the Friskhorn farm, between Evans City and Zelienopie. This well is a wildcat, and is looked upon as being a very important strike. It will likely open up quite a scope of territory between these two points. In the Gould district, the well on the Le-Fevre farm, was completed yesterday, and is producing 50 barrels per day. It is a quarter of a mile west of developments. Frederick & Co.'s well, on the John Niethercoat farm, is through the hundred foot, and is being drilled through to the third sand.

In the hundred-foot field, Wahl, Bisbop & Co.'s No. 1, on the Milton Cress farm, although dry so far as cill is concerned, has enough gas to run a half dozen wells, and is therefore not a total failure. A Millerstown company have started to drill on the Dale Thorn farm, one and a half miles cast of developments, near Buttercup Postofice. The Perrin Oil Company's No. 1, on the Thomas Grabam farm, is doing 30 barrels per day and increasing. The test well of Burtner & Co., on the Edward Shuster farm, near Mt. Chestnut, is down 600 feet.

Ohlo Oil Reduced Again. A special from Findlay, O., says: The Standard Oil Company, after destroying the Ohio ex-changes, this morning ordered a reduction in

changes, this morning ordered a reduction in price of Buckeye from \$7% cents to 35 cents, and the price of Buckeye is likely to fall as rapidly as it advanced. A number of the independent companies have been captured by the Standard, and the agents of the company are busily engaged in buying all the land and leases they can, at a great loss to the original owners. This is the same game they played in acquiring control of territory and production by asserting that Lima was good for nothing only fuel, and a forcible illustration of their modus operandi in fleecing the producer and the confiding brokers.

Lucky in His Leases. STEUBENVILLE-Will Lee, on whose farm over the river the recent good oil strike was made, has been very fortunate in his leases made, has been very fortunate in his leases. The farm on King's creek, reaching between the Cove and the Turkeyfoot, which is not of great value for agricultural purposes, cost him but \$45 per acre, and was leased for \$50 per acre; he also gets one-eighth of the oil, and receives \$500 for the first well on the agreement that this first well should produce 50 barrels per day for the first 30 days, and the first well did this. There are now three wells on the place, including the last strike of a 200 barreler. Two other wells are also drilling.

as been reported as doing 400 barrels a day, is only doing 40 barrels. The same company or Wednesday brought in another well on the farm adjoining the Ruttencutter, which is producing about the same amount of oll as the Ruttencutter. These are both shallow wells. The Travelers' Oil Company, 2½ miles up French crees, struck a 15-barrel well at 800 feet.

RITCHIE COUNTY, W. VA.—Fred Hays has a well drilling near Ritchie mines, Ritchie county. He found a little oil and gas in the salt sand, and is now going down for the "Big Injun." Mr. Hays recently finished a dry hole on Island run, same county. At 175 feet the "Big Injun" was found, but there being no oil here the well was drilled to a depth of 2,100 feet, with like results. The Hamiston well at California House, Wirt county, is down 1,000 feet.

EMILENTON—Within the past few days several good wells have been finished in this district. At Mariasville Salisbury & Co. completed a 15-barrel well on the Shiras farm; E. Crawford & Sons got a 10-barreler in the same locality. Salisbury & Co. are drilling another at 800 feet on the Darling lot, and Urquhart & Lavens, on Ritchey run, have a well down 900 feet. In the gray sand district the Emlenton Gas Company just completed an eight-barrel well on the Nick farm and are starting another on the same property.

well on the Nick farm and are starting another on the same property.

Monongahela City — Folks hereabouts are on the anxious seat as to whether or no Ginger Hill well No. 4 is to be a gasser. The Gantz does not give much promise. This well has been under way nearly a year. If it does not come in right it is understood that the city will be supplied by arrangement with the Philadelphia Company.

CHARTIERS—The Fisher Oil Company, Steinmiller well, is doing from 169 to 175 barrels a day. The McKee's Rocks Oil Company, No. 1, McGunigle farm, is 30 feet in the sand, and as yet there is no show of oil. If this venture turns out like the Oatman well, territory in this quarter of the field can be had cheap. There is no other important news in the field.

Bakerstown—The Butcher well, at Bakerstown, was agitated to-day, which increased its production to 50 barrels an hour.

H. McClintock.

A BURNING SORE LEG

PATCH.

Ulcers Form. Hospitals and Doctors Useless Crazed With Pain: Cured by Cuticura Remedies.

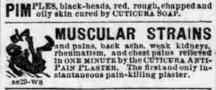

About eight years ago I wrote you from Wilkes-barre, Fa., describing how your wonderful reme-dies completely cured me of a terrible case of excema or salt rhoum. I must now tell you what OUTICURA REMEDIES have again done for me. On the 22d of last September, I had the misfortune to bruise myler, and I put a piece of sticking plaster on it. Inside of a week I had a terrible leg. My wife be-came frightened and advised me came frightened and advised me to go to a surgeon. I went, and doctored for two months, but no good was done me, besides cost-ing me big money. My leg had by this time formed into an ulcer, and got worse overy day. I ing me big money. My lee had by this time formed into an ulcer, and got worse every day. I could not stand it any longer, and made up my mind to go to a hospital and see if I could be helped. I went to several here in the city, in turn, but none could do me any good. I had a terrible leg, with a hole in it as big as a dollar, and pain that almost set me crazy. I got scared about it, and determined to try CUTICURA IZMEDIES. I obtained a set, and inside of five weeks my leg was healed up as well as it ever was, except the terrible scar it left for a reminder of what was once a terrible sore leg. These REMEDIES are worth their weight in gold.
