Mr. Wanamaker Details at Length His Plans for a Joint Universal Service.

SCARCELY ANY FXTRA EXPENSE

Or Increase in the Force of Government Employes Will be Made Necessary by the Scheme.

THE PROPOSED SCHEDULE OF RATES.

Will be Encountered in Securing Instant Delivery

PROM A STAFF CORRESPONDENT.;

WASHINGTON, October 5 .- A voluminous correspondence between Postmaster General Wanamaker and the Chairman of the House Committee on Postoffices and Postroads on the subject of postal telegraph facilities, has just been made public. It opens with a lengthy letter from the Postmaster General, in which he reviews the whole subject, answers the objections which have been made and describes in detail the effect of the proposed law.

Mr. Wanamaker says that he is more than ever convinced of the wisdom and practicability of restoring the telegraph to the postal service and making it what it was originally intended to be, a part of the postal system, As to the constitutionality of the proposition, he presents many arguments from recognized authorities, and gives a history of the movement toward the establishment of the system for the last 20 or 30 years.

After giving many reasons why the pressent service is high-priced and indifferent, Mr. Wanamaker goes on to describe the de-tails of his plan. He says it will not involve any addition to the immense standing army of civil employes nor involve large appropriations. All postoffices where the free delivery service now exists and the offices of the telegraph companies with which contracts would be made, would be postal telegraph stations. The charges for the collection, transmission and delivery of postal telegrams, other than postal money orders and special delivery telegrams, are as follows, briefly; for 20 words between stations within a state or territory, or between stations 300 miles apart or less, 15 cents; for 20 words between stations in the States of Wisconsin, Illinois, Kentucky, Pennsylvania and Mississipp and the States east of them, 25 cents; for 20 words between stations in the States of Minnesota, Iowa, Missouri, Arkansas and Louisiana and points west of them, 25 cents; for 20 words between stations in States forming, generally speaking, zones up and down both sides of the Mississippi, 25 cents; or 20 words between any two stations not above provided for, 50 cents; for all words in excess of the first 20, 1 cent per word; prepayment of replies to be made at the office from which the original telegram is

DIVISION OF THE REVENUE.

The contracting telegraph companies are to have all the revenue from the service except the usual rate of letter postage for each telegraph, which is to be reserved to the department. The companies employ at their own expense all officers, operators and employes for the transmission of the tele-grams. If any postmasters act as operators they are to be compensated by a uniform percentage on the tolls of telegrams handled by them. The Postmaster General will supply telegraph stamps and torms.

tion, which gives a clearer idea of the purpose of the bill than any explanation that has

The working of the plan can easily be seen to be most economical as well as most conven-ient. All postoffice and letter baxes, no matter where they might be located, would be utilized where they might be located, would be utilized by the public as receptacles for postal tele-grams, and as the demand arose special boxes might be estal labed for postal telegrams only from which collections migh be made more frequently than from the regular letter boxes. In all or most of the postaffices the wires of the contracting telegraph company would be placed. tracting telegraph company would be placed its operators would transmit the postal d its operators would transmit the postal egrams to their destination by wires just as egraph companies transmit their business.

BEASONABLE SPEED, With postal telegrams filed by the senders in

person or through the medium of messengers r servants there would be no more delay inolves up to the point of reception at the end of the line than now occurs in the general telegraph business; and in case of postal telegrams lected from letter boxes at short intervals callected from letter boxes at short intervals the delay would generally not be greater than is now required to go to a Western Union branch office to send the telegram. As fast as telegrams were received at the telegraph office of destination they would be "enveloped" and additions of an obstage stamp of proper value affixed, and they would then be handed over to the postedice by the telegraph company for deliberative to the regular carrier service.

As the business developed and its demands as the business developed and its demands were understood the intervals between deliv-eries might easily be shortened. In large cities the to are regular deliveries leaving the post-office almost every hour. In any case the pay-ment of 10 cents extra would provide for an im-mediate special delivery in the same manner as on handled, when a special delivery camp is affixed in addition to the regular post-ce. No matter how remote a postoffice might iron mestal telegraph stations they could al-aly have the advantage of the telegraph serv-e forward and backward, for postal tele-rams could always be core to a server of the server. grams could always be sent by mail to the nearrams could always be sent by man to the hear-st felegraph station for transmission, thence y were to their destination, or they could be eccived by mail from the telegraph stations ludiarly. It will be observed that the postal obegrans would be collected and delivered by seams of the postoffice service, and transmitted re from point of origin to destination go the medium of the contracting tele-

THE COMPANY'S POSITION.

This company would stand in exactly the This company would stand in exactly the same relation to the Postoffice Department that a railroad or steamship company or a stage entire field is credited to the Roth Oil Company or a s that a railroad or steamship company or a stage line or local express company holds which has a contract for transporting mail matter from one city or town to another or between branch postoffices in large cities. In many cases a postal telegram would be collected, transmitted and delivered with no more delay than now ocand delivered with no more delay than now oc-curs in the turness of existing telegraph com-panies; and in most cases the time consumed in the collection and the delivery, especially in respect to postal telegrams passing between distant ciries or towns, would not affect the value of the communication. Indeed it is be-lieved a vast amount of correspondence now committed to the mails would seek the more speedy postal telegraph channel.

In each case the Postoffice Department would earn its postage, while the people would be bet-

In each case the Posseffice Department would carn its postage, while the people would be better served. The telegraph company would be able to do the business at the greatly reduced rates, because it could be relieved, not only of all the accounting, but of two other important items of expense to it, namely, the collection and the delivery of telegrams, which would be removed from them entirely, and that, too, without any appreciable additional expense to the department. In cases where the amount of business to be done would not justify the telegraph company in the maintenance of a separate telegraph staff the postmaster, if not an operator timeself, would employ an opermself, would employ an oper compensation from the tele enabling him to procure such neip. In meny cases the postmaster's assistant or one of his clerks would be selected with a view to his ability to telegraph. The result would be that in such cases the telegraph with could be performed by the postmaster or his assistant, and their compensation thereby be increased, and where the regular postoffice duties are so heavy as to preclude such joint labors without their undue interference with each other, the relegraph company would emildy an operator to give all of his time to the telegraph.

and gives to the vital fluid the quanty and color of health.

Abscess on the Neck.

"My daughter had an abscess on her neck for five or six years, being all the time under care of physicians without any perceptible relief. Hood's Sarsaparilla was then recomplete and operator to give all of his time to the telegraph.

ONLY THREE RATES. There would be no overcharges by thrifty operators. The charges for postal telegrams Sold by all druggists. \$1: six for \$5. Prepared would be easily understood. There are but only by C. I. HOOD & CO., Lowell, Mass. three separate tariffs named: 15, 25 and 50 cer for the first 20 words. One cent per word is

charged in all cases for additional words. If an insufficient value of stamps should be affixed the defict would be collected from addresses, provided at least 15 cents should be prepaid. If stamps of a value less than the minimum amount (15 cents) were affixed the communication could be forwarded by mail.

The bill would protect both the Postoffice Department and the public and would provide for a class of correspondence that, generally speaking, would not be put on the wires at the high rates now prevailing. I can't, be made to believe that this union of the telegraph and the postal service, whereby each would so distinctly lessen the burden of work of the other, will not appeal to the ingenuity, the enterprise and the good sense of the American people the moment they understand it. I am sure that it is casily sasceptible of proof that this convenient, safe and quick service would be very generally used.

USUAL SERVICE STILL AVAILABLE. The question arises, would the public be sat isfied with a telegraphic service which would not provide immediate delivery. It may be remarked that the character of the contemplated service is such that a half hour er so at each service is such that a half hour or so at each end of the line for the postoffice service would not be objectionable, while, for instance, 24 hours or more, if the mail were used, would be so. The fact would remain, however, that the usual telegraph service would still be available for business demanding more rapid collection and delivery. The plan is intended to take care of that class of communications which will stand a delay of an hour or two, but not of a whole day or more.

In conclusion, Mr. Wanamaker thinks that the plan would be profitable to the tel-egraph companies, the service would be more efficient and lower-priced, and the whole craft of telegraph operators would be benefited for the reason that being required to do work of a large variety and more of it they would command higher prices and would be better men. LIGHTNER.

BUTLER COUNTY WELLS. OPERATIONS AND PROSPECTS IN VARIOUS

PARTS OF THE FIELD.

The Outlook at Montour and Cornopolis-Vennage County Producers Preparing for Cold Wenther-Important Wells Expected in at Wildwood. SEPECIAL TELEGRAM TO THE DISPATCH, 1

BUTLER, October 5.-The Forest Oil Company shot their No. 4, Heid, with 12 quarts on Thursday to improve the gas, which is getting to be a scarce article in this field. In the Myoma field the South Penn Company completed their No. 4, John Staples farm, on Wednesday, and it is equivalent to a duster. The Forest Oil Company's No. 8, John Stewart farm, is in the bottom of the sand, and fishing for the

the bottom of the sand, and fishing for the bailer. If they are successful in getting it the well will be shot on Monday.

Guckert & Co., on the Berringer, are about 30 feet in the sand, and have not reached any pay yot. The first pay was rot about 40 feet in the sand. A. A. Leidecker moved part of the machinery from his old Heid farm well to Wildwood on Friday. The Forest Oil Company are experiencing considerable difficulty on account of fresh water that shows a decided tendency to break in. No. 3 Spithuler is the latest candidate for a pine plug. The well is being plugged to-day. The casing will be pulled immediately, as this is the only safe remedy.

The Forest Oil Company's No. 17, Staum, is mediately, as this is the only safe remedy.

The Forest Cil Company's No. Ir, Staum, is through the sand and was yesterday shot with 60 quarts, and is showing up for a good well. The same company's No. I, Widow Pfeifer, is down 800 feet, and their No. 8. Eli May, 1,200. No. I, Eli Goehing, is rigged up and will commence spudding on Monday. They will be rigging up on their No. 9, Eli May, on Monday; No. I, John Marburger, will be ready to commence spudding the first of the week and a new rig is completed for their No. 4, William Waldron.

The National Transit have the lamber on the

The National Transit have the lumber on the The National Trains have the lumber on the ground for their new station near Evans City. When completed and in running order the station now used at Callery will be done away with. Brooks McKee & Co., of Evans City, have recently completed a wildcat on the Green farm, on the outer edge of the once famous Mush Rush pool. It proved to be a rank duster.

Tank duster.

The committee appointed to solicit subscriptions of stock for the proposed new pipe line and oil refinery, have just begun work and have already raised \$30,000. It is believed that there will not be any great difficulty encountered in raising the total sum expected to be raised in the Butler district, \$150,000.

Operations at Montour.

MONTOUR-Phillips No. 2, Sill, Odell & Co., got the sand last night and commenced filling A severe penalty is provided for the punishment of persons in the service who shall secrete, destroy or make known the contents of postal telegrams, so that there would be no trace of power in the bill for an administration to use for improper purposes. With regard to the operation of the scheme, Mr. Wanamaker gives the following description, which gives a clearer idea of the punishment of the week. Their No. 3, Thompson, is good for 39 barrels per day. Sill, Odell & Co. have been having a streak of bad luck at their No. 1, A. 8, Young. They shot in with 69 quarts, and the shot bridged the hole so that they have been cleaning out since, but have not hey have been cleaning out since, but have not got bottom yet. Garrett & Co. have the hole clear at No. 2, Parsonage, and will try another clear at No. 2, Paisonage, shot this week.

The Echols Oil Company's No. 2, McElhern, is due to-morrow, and, from its location, should be a good well. Gailey & Guffer are ready to spind out their Byrner No. 1. They are trying in this well to find an extension to the west from

Work at Cornopolis.

CORAOPOLIS-Haymaker & Co. should get the and at No. I, Arass, about Tuesday. J. M. Guffey's No. 1, Kerr, is dry, and his No. 2, Shanks, is showing for about 20 barrels. Coast & Evans are down 800 feet at their No. 2, Neeley. Gailey & Guffey are ready to start rigging up at McKown No. 1. Mellou's Cassiday No. up at McKown No. 1. Mellou's Cassiday No. 1 is making six barrels an hour, and he has rig up for No. 2. His No. 1 Carreshould be in by Wednesday next. Finnegan & Co.'s No. 1 Neeley is due next week. The out look at Coraopolis for a paying oil field is very rosy. Mellou's Cassiday No. 1 is located about a mile southwest of old developments, and Finnegan's Cooper well is a mile southwest of Cassiday No. 1, and the indications are that all the territory lying between the two is green! the territory lying between the two is good.

Getting Ready for Winter.

OIL CITY—Operations in Venango county are limited. The principal seat of operations is in the gray sand district, and when the wells now drilling are finished it will about wind up drilling for the fall. In nearly every section of the county aperators are getting ready for winter. The production is also falling off and the producers are still murmuring against the Standard for cutting the premium and depressing the market. Especially is this the case in the gray sand, where they say the monopoly had no good reason for taking off the premium, as it is almost identical with the situation in the Tiona field, where no reduction has been made. While there has been no public demonstration toward building a pipe line and refinery, there is a strong undercurrent feeling developing toward this end. The average producer is of the opinion that it is too late in the season to build a refinery of any magnitude, but assert that organization of a pipe line and storage company is among the possibilities. for the fall. In nearly every section of the county

0 1 and 0 1 Men.

WILDWOOD - Several important wells are due this week in different sections of the field, which will be watched with more than ordinary

entire field is credited to the Rosh Oil Company.

HARRISVILLE—The wildcat drilled by Titusville parties four miles out of here, on Wolf creek, is a duster. They found a strong flow of gas at a depth of 900 feet, and at 1,100 feet a 15-foot sand of a very inferior quality.

Titusville—It is proposed to hold a reunion of the oil pioneers of Pithole, at the

Poisoned by Scrofula

Is the sad story of many lives made miserable through no fault of their owe. Scrofula is more especially than any other a hereditary disease, and for this simple reason: Arising from im-pure and insufficient blood, the disease locates itself in the lymphatics, which are composed of white tissues; there is a period of feetal life when the whole body consists of white tissues and therefore the unborn child is especially susceptible to this dreadful disease.

there is A Remedy for Scrofula, whether hereditary or acquired. It is Hood's Sarsaparilla, which by its powerful effect upon the blood, expels every trace of the disease

Brunswick, this city, some day during the present month, or early in November. Mr. John Owens has been sending out invitations, and has already received several favorable answers.

HE WENT AFTER HIS COFFIN. Salcide Teld to Arrange His Fanera

Before Killing Himself. (SPECIAL TELEGRAM TO THE DISPATCH.) JOHNSTOWN, October 5. - The man Ruloff, who committed suicide here yesterday by hanging, has contemplated killing himself for some time. Two or three months ago he purchased a revolver with the intention of shooting himself. Not long ago he called at the office of the Freie Presse and offered Editor Nickel \$100 to shoot him. Mr. Nickel did not think him of sound mind, and humored him to the extent of telling him that as soon as arrangements were made for the funeral he would comply with the

request.

Ruloff went at once to an undertaker to Ruloff went at once to an undertaker to order his coffin, but was not successful in finding one to suit, hence the shooting was postponed. He was insanely jealous, and charged his wife with unfaithfulness with a boarder in the house. He claimed to have caught the man kissing his wife. The neighbors do not believe he had any occa-sion for jealousy. They credit Mrs. Ruloff with being a good woman and an excellent manager.

A DANGEROUS FIRE FEEDER. Nitro-Glycerine, Put in a Stove by Mistake

Mangles a Family. SPECIAL TELEGRAM TO THE DISPATCH. WASHINGTON, PA., October 5 .- Word has just reached here of a strange and probably fatal accident which occurred on a farm near Candor. Mrs. Ladsbaw found a small bottle which contained a quantity of nitroglycerine, and, thinking it was carbon oil, she took it home. Thursday evening, the fire retusing to burn, she emptied the bottle in the kitchen stove, when a tremendous ex-

plosion tollowed. The house was completely torn away and Mr. Ladshaw's body was torn and mangled. The little 3-year-old boy is also burned about the face and hands. Mrs. Ladshaw was struck by flying timbers and considerably bruised, though it is a wonder she was not instantly killed. A 6-weeks'-old babe escaped without injury.

COAL MINERS STRIKE.

Companies Claim Their Employes Broke a Contract.

SEPECIAL TELEGRAM TO THE DISPATCH.1 BRADDOCK, October 5 .- Three hundred coal miners of this upper district of the railroad mines, the Pittsburg, Virginia and Charleston, are out on a strike for an ad-

vance of 6 cents per ton. On May last the Allen Coal Company, the Blythe, the Scottdale and the Fidelity Com-pany entered into an agreement with their employes for one year. The managers of the above concerns now claim that this agreement has been broken by the present strike, and it is said they propose procuring new men with a view of again starting their

PAULSON BROS., 441 Wood Street.

& DOWN, Strous & McAteer 643 LIBERTY ST.

It floats over the largest and most magnificent stock of fall merchandise ever brought to the city of Pittsburg.

IT FLOATS over a line of Fall Overcoats which is the acme of perfection, looked at from any point of view you will. What we have not got isn't worth looking for. In quantity, thousands. In quality, everything that's at all reliable. In styles, the latest only. In linings, the good old-fashioned farmer's satin, the serviceable serge, the silk and the satin lined throughout. Foreign fabrics and domestic fabrics, the best of each. We have the Long Roll, the English Box, the London Top, and coats of genuine American cut, which take no back seat in style. From \$3 to \$25 is a long distance in price, and all along the line we'll show you genuine values and stylish garments.

IT FLOATS over a line of Men's Suits in which which no man can fail to be suited. It's an assortment from which we'll guarantee to please both the head and the pocketbook. We ask your especial attention to the medium priced lines, suits that we are selling at \$10, \$12 and \$15. Don't go by price. 'Twill be a revelation to many when they see the amount of genuine style and good material crowded into one of our medium price

IT FLOATS over the finest stock of Boys' and Children's Clothing we ever offered. In size, it would take four or five good size stores to hold the enormous quantity we've collected for your choice. The designs are beautiful. Choice novelties by the score. Or if you're looking for plain, serviceable goods, at a low price, we can suit you. We say this with confidence, for the stock contains everything at every price. IT FLOATS over a mammoth stock of Hats, in that's your favorite at considerable less than hatters' prices. Latest

styles of Dunlap, Millar and Youman are here at \$1 24. We sell better hats, of course, up to \$3 24. This is the best hat made. They are sold for \$5 in many localities. IT FLOATS over a Shoe Department whose rate. Would you know why? Our determination never to sell any but a reliable article is oft asserted, and we practice what we preach. This gives the public confidence, and on a busy day they literally flock to us for shoes. We make prices and values that make trade,

TFLOATS over a Gents! Furnishing Department complete in every detail, and without a rival in the State. We devote a very large space to this department, carry an immense stock, and make prices which we know, from actual comparison, are not and cannot be met. Underwear, Neckwear, Hosiery and scores of lesser articles are here in endless variety. SPECIAL! SPECIAL! For a limited time we are giving, in our Men's Suit and Overcoat Department, a beautiful etching, elegantly framed, size 22x27 inch, with every sale of \$10 and up. Decorate

your parlors free. 300 TO 400 MARKET STREET.
