New and Productive Territory Being Rapidly Developed in All Parts of the West.

A NUMBER OF VALUABLE STRIKES.

Some Properties Which Have Recently Been Idie Are Largely Resuming Shipments of Ore.

ENGLISH INVESTORS IN THE FIELD.

One Syndicate is About to Pay Nearly a Million for a

SPECIAL TELEGRAM TO THE DISPATCH.1 reports have been received from the leading

mining centers of the West:

Another week of strikes and import not development work in Lake year. county mines is to be recorded around Leadville. New leases have been granted, and properties which have long been idle are about to be started up. The ore encountered on Wednesday in the First National at a depth of 120 eet is identical have been cut through this body, and cutting out at the sides and ends have been done all of which discloses an immense body of ore. The mineral is a fine galena

RESUMPTION OF SHIPMENTS. Another important work of the week was the resumption of shipments from the Evening Star property. The immensity of the body of ore in the Maid and Henrietta mine is still to be determined, and the finding of the big body of mineral in the third, or 750-foot level, can be considered a most important strike. There was plenty of min-eral in the first two levels of the Maid and Henrietta, but to test the extent of the ore body they went to the third level, hardly confident, but hoping to catch the old ore body. At the distance of 70 feet it was encountered, and in its full size, too, proving that this great body of mineral is to be found from the first to the third levels, and how much further is yet a problem.

More quartz is found in the third lead, but the increased silver value more than makes up for the increase in the amount of salica. Some of the streaks of ore in this chute carry mineral that runs as high as 400 onnces of silver to the ton, and also carries a very large percentage in lead. Vigorous work now goes on opening up the new workings. An important piece of development work will be commenced next week by the Lucky Joe Min-ing Company, the ground to be worked being the southern slope of Rockhill. A large shaft house is nearly completed, while an immense lot of maworking shaft is on the Lucky Joe proper and is already down a depth of 205 feet. The Matchless is not to be outdone, and comes to the fron; this week, opening up a lot of new bodies of argentiferous ore. But this seems to be of very trequent occurrence of late. There is argentiferous iron ore everywhere. The shipments amount to about 65 tons daily

AN IMPORTANT STRIKE.

An immense strike was made in the Mike and Starr property on Monday, A short time ago a station was cut about 90 feet from the bottom and work was run out to the west a distance of 40 feet. From this an upraise was run about the same distance. A streak of nice ore was encountered. Assays from this mineral run from 70 to 300 ounces of silver per ton, and also run

A very promising strike of galena ore was made last week in the Edith, near Lake City. When the drift by which the property has been worked was in 50 feet a change in the vein was encountered, and in a few shots further a streak of galena ore was un-covered six inches wide. It now shows nearly a foot wide, and tests show it to run 25 to 60 per cent lead, 65 to 70 ounces silver, and the same in gold. The Rawlston Company, of Georgetown, have a force of men sinking a shaft on its Calla lode extension of the Paymasters. They have in sight, at a depth of 20 feet, four feet of concentrating

At Durango the output of the Wale mill ount to almost \$16,000 this month. The King has been a regular shipper. News of a big strike at Ashcroft is reported; it was made in Little Monument gulch just west of Ashen. It was in this gulch that Asheroft, after whom the town is named, and his partner made the great strike in early days. They took out of the North American mine \$100,000, and it is said that Ashcroft skipped out with nearly all the money belonging to his associates. He was last heard of in New Mexico, but none of the treasure was ever recovered. A strike is reported from the Hidden Treasure, in Spar gulch, Aspen. In this property a streak of rich ore was found in the short line. The line was also sound to be silver bearing for two or three feet and the lessees feel greatly encouraged.

Lots of Ore in Sight.

Tucson-The Tucson smelter is preparing for a long run. The company managing it will blow in as soon as they have accumulated a sufficient supply of ore to keep them going until they can get the ore from the red rock mines that is now on the way and the teams are expected any day now. There is now on the way between 200 and 300 tons of ore from the Silver Bell. The company has substantial backing and may be considered one of the substantial institu-

tions of Tucson. It has plenty of ore at its command; enough at least to keep the smelter running for an indefinite time. The Young American, which is under the control of this company, has ore enough in sight and under ground to keep the smelter running for several years. Auriferous sand his been found in the Sulphur Spring Valley in paying quantities. It was found by accident, and may result in investigations of profit for those engaged in the un-dertaking. From 10 to 20 feet under ground a large body of water and thick sand was encountered. Some of the latter was brought to the surface in pumping water for the cattle. In this way a tub which had been used for pumping water into and which had been emptied, frequently retained in the bottom considerable black sand, which was scraped together by E. S. Adams, of Bisbee, who thought he saw gold mixed in it. He took some of the stuff to Tombstone, and in Frank Earles' assay office Colonel Hart pro-nounced it gold without a doubt. There is no doubt that the river bed lies under this valley, and with proper prospecting gold in paying quantities may some day be found.

AN ENGLISH SYNDICATE. A very important mining sale is to be consummated about the end of this month. It is the Dolores group in Chihuahua. It is to be sold to an English syndicate for \$750,000. The group is a paying one, five gold bricks having been taken out of it during the last 90 days. The mine has been under the charge of Prof. Strickland, who has experienced so much trouble with Mexican miners that he has replaced them with American miners and keeps them well armed. Parties have gone to examine the

old Stiff mine, owned by J. M. Kirkpatrick. This mine is in the Oroblanco district, and the probabilities are that Kirkpatrick will

sell the property for a good round sum before the month is closed.

A company has been formed in New Mexico to pipe water from the Pecos River, 40 miles, to be used in working the San Pedro placers. Fred H. Figel and John Magee returned from Craterville last night, where they have been for ten days examining and prospecting the different gulches and mak-ing a survey for a pipe line to work these placer mines. These placers are well known to the citizens of this country, and are quite extensive and very rich. They were discovered in 1875, and for five years there was quite a camp there. Over \$1,000,-000 have been taken out there. The work is being done by rocker and pan.

SCARCITY OF WATER. Water is the great consideration, all the dirt being packed to the water, or the water to the dirt. There are miles and miles of old workings at the dumps from these works which all yield \$1 per ton or more. The gold is pretty evenly disseminated through the gravel, the richest part being on the bed rock, which is from 4 to 13 feet thick. There are millions of dollars buried

there, and, the gulches having been well prepared for sluicing and hydraulicing, it is New York, October 5.—The following so much easier than a virgin find.

From 40 to 80 Mexicans have for years DENVER-Mr. John G. Morgan, of LeadSt to \$1 75 per day all the time. Mr. Figel ville, is in Pueblo seeing about removing to thinks it will be an easy matter to get capithe Colorado mineral palace of his case of specimens valued at \$10,000. This is one of for the working of these mines will have to the finest collections in the country, and be brought from the Sauta Rita river, some contains many of the finest specimens taken out of the Leadville mines during the past eight years.

five miles away, where a large supply can be obtained. The water-shed is large, and with the usual amount of rainfall there can be easily obtained from 150 to 300 inches of water per day for 200 days or more each

A New and Productive District.

IDAHO CITY-Last week THE DISPATCH correspondent visited the Liberty mine, on Squaw Creek, in the west side of Boise county. The vein is large and yields some with that found in the Frank. Some ten feet | very rich copper silver ore, which the lessees, Barry Bros., are shipping to Denver for reduction. They also have a bond on the mine and are sinking the shaft to the depth of 100 feet. If it continues in size and richness to that depth they will purchase and lead carbonate ore mixed, and runs very it. Locations have been made on the vein a distance of nearly two miles, and indications of ore are visible on the surface on all of them. The success of the Liberty will insure a productive mining district on Squaw creek. H. T. Wright, who has a lease and bond on the Chickamon mine, five miles east of here, in running a cross-cut, has developed a four-inch vein of ore that will yield from 300 to 400 ounces per tou silver, and from \$30 to \$40 gold. He has

commenced sacking for shipment, This mine was discovered 12 or 15 years ago, but the discoverer, not being a miner, ran a 200 foot tunnel parallel with the vein, which he was unable to find beneath the which he was unable to find beneath the surface. After spending considerable money and labor he abandoned it, and nothing more was done until H. Jones & Sons located it last year. It is traceable for about 3,000 feet east of the discovery hole. Another very large body of exceedingly rich gold ore has been found in the Washington, in Cambrigue district and it has been found in the constant. in Cambrious district, and it has been decided to keep the mill running all winter. This is considered one of the best mines in Boise county, and batteries for working the rich silver ore it yields will be placed in the mill before snow falls.

OTTERVILLE TRAIN ROBBERS CAUGHT. Tracked to a Farmer's House They Sur-

render to a Detective. LEXINGTON, Mo., October 5 .- The Otterville train robbers were captured at a farmer's house in Elmira, near here. Detective Thomas Furlong has been quietly working on the case since August 16, when a Missouri train was held up by masked men in Robber's Cut. near Otterville. Two weeks ago he located the bold bandits, and finally completed a web of evidence that warranted

ester rifle from the wall, but was disarme before he could use it.

Prisoner Invents a Toy Puzzle for Which

Big Ofters are Made. WILMINGTON, DEL., October 5.—Stanley Palmer, of Boston, now in jail at New Castle to answer the charge of passing forged checks upon several farmers, has, it is stated, checks upon several tarmers, has, it is stated, invented a new puzzle toy and has been offered \$10,000 for his device.

Three or four New York men have been in New Castle this week trying to purchase the toy, but as yet be has not disposed of it. Mrs. Palmer, the prisoner's wife, has come from the East, and is conducting the negotiations for the sale. It is stated that the prisoner's puzzle game will be the most popular to be put upon the market. The cash realized will more than settle with the farmers he duped.

"ALL WOOL!"

There's probably no other term in the clothing business that's used so much and means so little. As a matter of fact there are three kinds of clothing, viz: Wool and cotton mixed, all (shoddy) wool and all (sheep's) wool. Too often the first two masquerade under the guise of the last named, and only the most experienced eye can detect the deception. The buying of clothing, therefore, resolves itself more or less into a matter of confidence, and where is there a house that is more worthy of and enjoys public confidence to a greater extent than

KAUFMANNS'P

NEW ADVERTISEMENTS.

When we tell you a garment is all wool, 'IT's so. You'll not find any cotton or shoddy in it. Nothing but the genuine article—pure, unadulterated sheep's wool. And that's the king of clothing you want to wear-YOU MUST WEAR, in fact, if you want to get your money's worth. It doesn't pay you to buy any other. It doesn't pay us to sell any other. It would pay us, if transient custom was all that we're after, but, as we want your future as well as your present patronage, we must necessarily sell you clothing that will give satisfaction.

OUR CREAT

FALL AND WINTER STOCK

Of men's suits and overcoats is making many friends and patrons for us daily. Why shouldn't it? It contains all the latest styles, best makes, nobbiest patterns-and we actually sell 'em for less money than other houses charge for inferior goods. WHEN IT COMES TO MAKING
