TRADES IN SCHOOLS.

Should Have a Place Where

BOYS CAN PREPARE FOR LIFEWORK

Careful Consideration.

ways, to give the matter some attention.

and this thing of one feast after another, and the numerous receptions, would kill any man. Ah, but I like you all. Such spitality I never saw before, and what pleased me much to-day was the manner in which the Sabbath was observed. I like to see this day sanctified. I couldn't buy even a cigar. There may be an undercurrent of vice; it exists in all large cities, I know, but why not keep it in the background as in Pittsburg. This is a first-class city, and I am sorry I am leaving it, but I must be

What Mr. Chadwick said about the hospitality of Pittsburg was a universal sentiment. "We didn't expect it," "Come and visit me," "Much obliged for your great kindness," were remarks that were heard on all sides. Sir William Lewis, of Sheffield, had been treated so well at the Duquesne Ciub that he was loth to leave. "I don't want to go," he said. "I should like to remain awhile longer. You Pittsburgers are so open-hearted."

WHY PITTSBURG IS LIKE SHEFFIELD. "This city is situated much like Sheffield, in a river valley, just the place for a manufacturing town. Your mills are crowded together, but not so close as ours. I saw nothing new here, but that doesn't make any difference. The question is, can you turn out a good product? The man who can do that will make money. I have been here before, but I had no idea Pitts-

burg was such a bustling city."
Prof. Gilchrist is very lond of music, and he attended the concert at Carnegie Hall Saturday night. He insisted that many of the amateurs were professional singers, and when told they were not, he remarked: "Well, they ought to be. I see that Pittsburg is not behind in anything. You are not only great iron people, but you cultivate the finer arts as well. I never was so greatly surprised in my life with a city. I saw a number of things here that simply amazed

J. Edward Head, an analytical chemist, said: "After the scramble for a room the first night, and when I got settled I thought I wouldn't like Pittsburg, but the people have treated me so kindly that I am very much pleased, indeed. I think you are a little behind us in rolling iron, but the output of your furnaces is something wonder ful. America in this particular is away ahead of England. The Lake Superior ores here are much richer than our own. Pittsburg is a great iron center, and I will always have pleasant recollections of the

Sir Lowthian Bell and his son, Hugh Bell, had visited Pittsburg before, but they could see marked improvements since the introduction of natural gas. Sir Lowthian said his eyes had been opened. One En-glishman raved over his visit to the coke regions, and others were surprised with the oil Mr. Phillips, of London, had never been

IMPROVED BY NATURAL GAS.

in America, and as he discussed the country with several friends he said: "These Americans are a pretty sharp set, and a man must be well posted to travel in the States. The oil and gas fields are wonder-

He was interrupted at this point by his companion who claimed the gas would not hold out.

"Well, I don't know about that," answered Mr. Phillips. "These Pittsburgers have been using it for a good while, and they seem to have a sufficient quantity left. I saw a good deal of improved machinery in this city. Do you know the manufac-turers are in a peculiar position to-day. Their positions are not secure. A man can't tell when some new plan will be invented that will revolutionize his busi-

DUTY ON THE NOT TOO HIGH. E. C. Martin, of Swansea, and Mr. Farnworth, of Wolverhampton, were pleased with Pittsburg, but they were more interested in tin plate, being tin plate workers. "The American tariff will not affect us." said Mr. Martin. "We can still compete with you. Mr. McKinley didn't make the stuty high enough."
The fact is, that when the foreign visitors

settled down in the cars yesterday afternoon, they one and all were grateful to Pittsburg people for the kind treatment received. Even those who slept in the "Westinghouse lodging house," as they called it, forgave the Reception Committee,"

GOING TO INVEST HERE

English Capitalists Who Are Looking Out for Places to Put Money.

There could be no mistaking the fact that the visitors were well pleased with their reception here, and with the display of industrial wealth thrown open to their inspection. While not wonderfully surprised or impressed with the iron and steel plants, they were unprepared for the extensive deposits of coal, the manner of working them, and with the natural gas.

A rood many of the visitors were here to inquire into opportunities for investing capital, and it is with this object that such a large party-fully two-thirds of the whole -will take the Southern excursions from

The Reception Committee executed its difficult undertaking with much credit to itself, and the members were personally thanked by numbers of their guests for the courteous and hospitable treatment they had experienced at their hands. Among the visitors were a few people who had no business with the party at all. Comments were freely made on the advisability of cutting off the parasites from the party, but on the plea that what was everybody's business was nobody's, they were permitted to

THE BEST NEWSPAPERS.

American Journals Sarprise and Please Gloucester Man.

Mr. James Platt, of Gloucester, England, had this to say yesterday of American journals and journalism: "Your system is very different from ours, you know, but I rather like your style. I must say, too, that the papers in this town are the best I have seen we not demand of nations that they have a etween this and London. I particularly like THE DISPATCH, and its way of telling all the news in the article in the big head

"I cannot refrain from adding that its reports of our meetings and doings, while here, were very much better than those in the other papers, and I noticed that every body appreciated that fact. We have all been buying THE DISPATCH to send home, to show our triends how we are getting on

ROLLED IN THE ASHES.

An Allegheny Officer Who Broke the Dull Monotony of Sunday Life.

Officer McNimery was called to Riley's court, off North Diamond street, Allegheny, about noon yesterday, to arrest a colored man named James White, whose wife complained that he was demolishing the household goods. When the officer arrived he discovered the kitchen floor strewn with broken dishes, and White standing in the middle of the debris.

He attempted to arrest White and a struggle immediately followed. A table and the kitchen chairs were overturned, and the two men rolled out of the door and off a porch onto a hard brick pavement, where they upset the contents of an ash barrel over themselves. The prisoner succumbed finally and was sent to the lockup.

ENGINEERS COMING IN.

A Texan Tells How His Train Was Robbed of \$65,000.

The annual meeting of the Brotherhood of Locomotive Engineers will be held here this week. Several of the members have already arrived, and a good many will come in today. Among those in the city stopping at the St. Charles are D. Hartigan and wife, Horton, Kan.; B. A. Pickens, San Antonio, and Robert Jankes, Houston.

Mr. Pickens was the engineer on the express train that was recently robbed of \$65,-

THE ANGEL OF PEACE

Hovers Over Pittsburg and Plants Seeds of Love Between Nations, for the Abolition of Armies.

MANY MISSIONARIES AT WORK.

Movement to Disarm the Warring Countries of Europe and Settle All Dif-

ferences by Arbitration. GERMANY IS WILLING, BUT IS AFRAID.

Thirty Thousand Dollars Wanted to Assist the Society in the Work of Mercy.

The angel of peace hovered over the city

At 4 o'clock it settled down on the First Presbyterian Church, which, despite the inclemency of the weather, contained a fair sprinkling of Christians of all denominations who are working in the common cause of the total abolition of all means of warfare between nations and countries.

The people came in response to invitations sent out by J. B. Wood, of Philadelphia, Secretary of the Christian Arbitration and Peace Society, an organization that sprung into existence about four years ago. Upon the platform of the church sat Rev. Dr. George T. Purves, pastor; Dr. E. P. Cowan, pastor of the Third Church; Mr. Thomas Ashbury, one of the Vice Presidents of the society, from Manchester, England; J. B. Wood, the Secretary, and Rev. W. T. Hubbard, of Columbus, O., also a Vice President of the organization.

In the front, and below the pulpit, was a large bouquet of flowers emblematic of peace, purity and friendship.

GOOD WILL TO ALL MEN

After prayer by Dr. Cowan, Dr. Purves announced the object of the meeting, which, he said, was to make known the basis of a living Christianity. The society, he said, was organized to bring out the natural relations between all nations of the world and establish a reign of peace which was begun when the heralding angels sang, "Peace on earth, good will to man."

The Doctor said if the people of this country were practical they would put into practice this sentiment, and do everything they could to build up these principles. The society, he stated, seeks to build on the foundation laid by God by the power of spiritual faith.

Secretary Wood, who is a clear-cut, earnest talker, although not by profession a pulpit orator, said:

Our society was organized in 1886 for good Christian work in the peace cause. The move-ment is sweeping over Europe. At the Paris Congress last year the word Christian was not allowed to be used. In the London Congress the term was also tabooed until the last few days of the meetings, when, on account of the popular sentiment sweeping over the country. the word Christian was accepted. The reigious enthusiasm swept to Paris and Berlin, and at the latter place the Empress of Germany, who is a strong Evangelical Christian, caused to be built 12 new churches in that city, and now the Sunday schools in that capi-tal equal those of any city in America. The right-hand man of the Emperor, and the commander of the army, is a strong Christian and Vice President of the Y. M. C. A. He told us that he was open to conviction on the peace question, and if it were not for certain conlitions, he said, the German army could b abolished. With Russia on the east and France on the southwest, and both countries likely to make an attack on Germany at any time, the standing army has to be maintained he claimed. Germany has made friends with Italy, Austria and Sweden, and, if it could maintain the same relations with France and

Russia, the Germans would disarm. ONE THOUSAND MINISTERS WANTED. The McCall Mission has taken up the peace

ause and will sow the good seeds everywhere. believe if 1,000 ministers were sent from England to France to preach the gospel of love of Jesus Christ the people would accept it. There are plenty of first-class preachers there who can speak French fluently, but few Americans can. We expect to raise \$50,000 to forward to the McCall Mission.

Rev. W. T. Hubbard, of Columbus, O., was in-

troduced to speak in place of Hon. Theodore Fry, M. P., and said people who try to fill the shoes of others rarely succeed on account of shoes of others rarely succeed on account of their feet not being large enough. He began by referring to the great curse of war and the community of the large our enemies. He nent to love our enemies. He con-

commandment to love our enemies. He continued:

The world has an idea that the peace sentiment is a beauviful thing for the millennium but is not practical now. I believe every utterance in the New Testament can be carried out. In the words of Jesus, "Our mission is not to destroy the lives of men, but to save them," Years ago, when people differed, the only manner of settlement was a recourse to swords, pistols or other weapons. Muscle and skill were used to decide who was right, when every schoolboy knows that physical endurance can settle ne question of right. An insult in the goneby days of this country was followed by a challenge to duel. When people carre to their senses, and combats became repulsive, courts were established, where disinterested judges decided cases of justice and equity. If it is wrong for one man to fight with another, why should it flot be wrong for a thousand or half a million men to do the same? If there is a law to prevent one man from engaging in corebat with another, why should there not be a law to prohibit brothers of one country fighting and butchering those of another?

NOT A TASK TO LOVE BEAUTY.

NOT A TASK TO LOVE BEAUTY. I voice the words of Thomas Jefferson, that

there is no excuse for war. It is unreas unchristian-like, and we should not be called we not demand of nations that they have a court where all differences must be adjusted? We must stop the strife in our own country by turning our swords into plowshares, and until we do this we cannot claim to be better than others. It is nothing to love somebody that is sweet and beautiful; some person we like; peorie who have kindred characters with our own; but in the eyes of God it is something to love our enemies, or those we do not like.

If we are not acting in accordance with the commandment, we must change our hearts. We should not claim to love our enemies, and then not do it. What would you think of a man who would tell you he loved you, and then punched you in the face? What would you say to a man who shook hands with you with one hand and tried to punch your eye out with the other? The love in one's heart is the supreme attribute of his being.

The people of this country rose up and demanded that slavery be abolished. They also demanded certain reforms along certain lines, and they got them. When they rise up and demand that armies be atolished, the Christian sentiment will have to be recognized.

Representatives of Il nations met in Washington to consider the peace question, and passed a resolution in favor of a ruiteration.

Representatives of II nations met in Washington to consider the peace question, and passed a resolution in favor of arbitration, by which differences arising between them could be settled peaceably, without resort to the sword. It will be years before the grand thought and meaning of the resolution will be carried out, but its adoption marks an epoch in the world's history. When it came up in Congress, both the Senate and House passed it by a unanimous vote. Two hundred and thirty-two members of the British Parliament signed a petition and sent it to the President of the United States, saying: "Your peaceful habits ought to lead the world in the direction of peace."

PEACE AS A SOURCE OF WEALTH. Thomas Ashbury, of Manchester, England, who was one of the delegates to the Iron and Steel Institute, made an eloquent appeal in favor of peace. He had a long list of statistics, showing the development of this country under peace laws. He con-cluded by saying that the day is not far off

lition of warfare. Rev. Dr. Cowan, of this city, made an ap-peal for money to be sent to the McCall Mis sion, and spoke of the work being done in Europe. Rev. Dr. Purves also delivered a short address in the interest of the work. prominent charitable people in the city, to-day, and solicit subscriptions to carry on

LAST OF THE SEASON. mn Reminder of the Flight of Time

as Seen on Fifth Avenue-An Oration on the Shorn Lamb and Tempered Wind. A world-weary hat of yellow straw burst upon the visions of a few beinted travelers along Fifth avenue last night. It hid from sight the dome of thought, and partly concealed the features of a man who looked as if he suspected that every person who saw him was associating the wearer with petty crimes and low-down offenses against so-

As the combination drew near a party of poor but honest gentlemen who were discussing the great overcoat problem, one of them remarked: "It's the last one of the season." The front brim of the hat drooped down over the poor man's eyes at this re-mark like a total eclipse, and he lost his bearings for a moment, but, with the same courage which had prompted him to brave the biting comments of a cold and heartless world, he brushed the remnant of July glory from his sight, and plunged forward toward the land of the sunset, now filled with dark, sullen clouds.
"Sad, isn't it?" queried one of the gentle

"Yes, but there may be a silvery lining to the clouds that lower above him yet," chimed in another. "A year ago last sping my friend Pete Nolan, the pugilist, of Cincinnati, was compelled to pawn his overcoat, and, as he expressed it, that was a horse on him. The following winter was so open that he did not need it, and, in consequence, his 'uncle' had to keep it on the shelf, and, in Mr. Nolan's own language, that was a horse on the old man, making it a case of horse and horse. So you see, gen-tlemen, the hand that tempereth the wind to the shorn lamb may make that souvenir in straw a thing of beauty yet.". Hat and wearer had raded from sight ere this little oration was ended, but if these lines chance to reach the unfortunate pair in their wanderings the orator will feel that

AN AMERICAN INDUSTRY.

is life was not all in vain.

How the Laundry Rusiness Has Grown in the Country-The Washer Woman Period Passed Long Ago-The Annual Meeting

Begins To-day. The laundrymen of the United States and Canada will begin their eighth annual meeting at the Monongahela House this morning. About 100 delegates from New York, Philadelphia, Detroit, Cleveland and Cincinnati had arrived last night, and the Chicago crowd, including President Doremus, will be in this morning. Between 200 and 300 members are expected.

The laundry business has grown to good sized proportions in the United States. The local men claim that \$1,000,000 are invested in Pittsburg alone in the industry. Said L. H. Deckerman, of the American Laundry Journal: "We have passed the washer-woman period long ago. Improved ma-chinery has been introduced, and a good class of people have gone into the business, Washing clothes has been elevated, and has become one of the industries of the country. I do not remember how much is tied up in laundries in the United States, but the amount runs into millions. The man who is not awake can't remain long in this trade. The laundrymen are putting in new machinery of some kind all the time. It may be a new wringer this month, or a machine for ironing shirt fronts. When somebody invents a better plan the old machinery is dropped new introduced."

The sessions will continue three days. The programme includes discussions pertaining to the trade. One day will be taken up with a boat ride on the Monongahela river. The local committees are prepared to spend considerable money in itertaining the visitors.

AN ENTERPRISE THAT WOULD PAY.

Proprietor Says Pittsburg is Ripe for a Top-Notch Dairy Lunch House.

"This city is ripe for a metropolitan dairy lunch bouse," remarked the proprietor of a I were looking for an opening I would not the ambitions of the projectors. Then, the large downtown restaurant last night. "If hesitate a moment at renting a nicelylocated building and starting one. It delphia, and the Pratt School, of Brooklyn might not pay for a time, but it would only both the result of bequests, where the are at the top of the heap." be a question of a few months when it | pupils are instructed in branches of learning would. In New York, Washington, Chi-cago and, in fact, all large cities they flourish and make barrels of money. We have restaurants and restaurants in Pitts-burg, but no dairy lunch houses. What the people want is a place where they can get nice, quick meals or lunches that are above suspicion and at the same time have the service good and the prices cheap.

"People have mistaken ideas about the profits of first-class restaurants. They think that because the price is higher than they expect, they are being robbed. This is a mistake. Take it from year to year, the principal item in our trade is meat. Take the prevailing charges, and there is not a first-class restaurant in the city but what loses money on steaks and roasts. This may sound like a matter of assertion, but it is nevertheless true. Our expenses here are \$40,000 n year, and there is not another business in the city subject to the same risks making a smaller profit. Ask any of them, and they will tell you the same. A first-class lunch-house is the money maker, and, as I said before, if I was not tied up I would soon start one.

LICENSED TO MIX MEDICINES.

The State Pharmacy Board Graduates

Number of Druggists. The work of the State Pharmacy Board in examining the papers of applicants for certificates was completed late Saturday night. In all there were 197 applicants, 143 of them from the Eastern part of the State, and 54 from this city and vicinity. Forty-nine were passed as qualified assistants and 47 as registered pharmacists, while the remaining 101 will be required to again come up for examination.

The 96 who passed make a larger percent-

age or graduates than in any previous ex-amination, and the class was a larger one than any before. Altogether the board is well satisfied with the outcome, and the members do not regret the hard work they have put in during the past week. The session was the twelith quarterly meeting of the board and the next will be held about the first Monday in January at Philadel-

A QUEER MIX.

Confusion in the Numbering

Houses on Bluff Street. "That's a queer system or lack of system numbering the houses on our street," said a resident of Bluff street yesterday. "In many instances there are two or three houses with the same number. Who ever has charge of regulating the numbering of houses should attend to his duties." An inspection of Bluff street confirmed the gentleman's statement. Within a few squares two houses numbered 160 were found, two claimed to be 121 according to the gilt letters on the transom, and 137 was found alongside of 1723, together with other incongruities and absurdities very annoying to the residents of the street.

Bitten by a Tramp.

James Fox, a tramp from Philadelphia proke into a B. & O. freight car yesterda afternoon in the yards and refused to get out when ordered. Officer Roach was called to arrest the tramp, but he gave battle and in the skirmish bit the officer on the wrist. He was finally landed at Central station.

What for? Why, for holiday presents. Well, where can I buy them? Why at Gallinger's, 1106 and 1200 Penn ave. P. S.—A full line of musical instruments.

"Have you heard any talk of a school of the kind being started in this city?" "I know of no movement in that direction, although I hav: talked with a great many people about it, and the rare all of the opin-ion that it would be a very desirable sort of an institution to have in a community like this. There are a great many things to be considered, however, in such an undertaking. It might require a large or a small | get a good polish everywhere in America details of study would require much atten-tion. There is the Girard School, of Philaoutside of the trades. I have no doubt. however, that if the subject is once opened up there will be any number of opinions and suggestions offered that will be valuable, as will see that your shoes always shine like it certainly has been carefully considered by

many people in this city."

Mr. McConway was asked what he thought of a plan suggested of devoting one department of such an institution to the uses of am-bitious young men who were blessed with inventive talent. He replied that the supply of inventors was quite large at the present time, and that the market seemed to be quite well supplied with inventions.

NOT PEACE, BUT A SWORD.

Rev. C. E. Locke on the Downfall of Mon archical Governments.

The Smithfield M. E. Church was crowded last evening by people to hear Rev. Charles Edward Locke, pastor of the church, preach on "Not Peace, but a Sword." During the course of his sermon he said: "The spirit that broke the chains fettering 4,000,000 people in this country and moved Dom Pedro to emancipate the slaves of Brazil was the sword of Christ, and it is a sword that never goes back to its scabbard. As it freed the ser's of Russia, it will continue to fight despotism as long as people exist and will flash to do the binding or the high God. It will not be many years until every monarchical government will be swept off the face of the earth, and I believe the Czar of Russia will be the last monarch. Impenetrable as the government exists in China which system is out of harmony with the age, I believe the common people in that country will come forward and select their own representatives. The sword of Chrisis the weapon by which the aris tocracy in all countries who are supported

at the expense of the masses is being, and will continue to be, fought with. "There is power in our hands to destroy, and do you not see the destructive element in Christianity? The destructive element is Christianity's sword, and it is cutting a swath among the offenders for Jesus Christ. Religion is moving onward, and it shall Religion is moving onward, and it shall reign despite monarchs. While there is a destructive element, there is also a constructive power. The sword of Christianity may everthrow governments, wreck institutions and destroy palaces, but it gives the true religion. It destroys cannibals, but builds schools, inspires new philosophers, inaugurates per governments inaugurates new governments and insures happiness to the people. When the end of life has come, and your frail bark is being tossed about on the tempest near the rocks of destruction, you see a ray of light and your bark is steered away from the rocks into the harbor of the divine God."

A BULLET IN HIS BACK.

The Flobert Rifle Goes Off Again, and the

Victim May Die. William Layhen, a boy about 12 years of age, is lying in a serious condition at the home of his parents, on Hemlock alley, near Forty-ninth street, from the effects of a bullet wound in his back. On Saturday afternoon he and a companion named Charles Kelly went out to Hite's Run to shoot at a target. Layhen carried along a Flobert rifle, and after shooting for some time turned the weapon over to Kelly.

The latter had just taken aim at the target and pulled the trigger when Layhen

get and pulled the trigger when Layhen passed in front of the mark. The hall struck him in the back. He was taken to his home and Drs. McCann and Norrissummoned. They probed for the ball, but could not reach it, as it had lodged too deep. Layhen grew considerably worse yesterday and it is feared the wound may prove fatal. Kelly lives on Fifty-first street.

PATTISON THEIR MAN.

Ex-Master Workman John Coffey Tells Why Green Glass Workers

WILL VOTE FOR THE EX-GOVERNOR.

Delumater and Watres Stop Over Night in Pittsburg Once More.

THEY THINK THEIR ELECTION IS SURE

Intelligent leaders of labor organization who, in the exercise of their duty, have had occasion to travel extensively through the the State report an overwhelming preponderence of sentiment among the farmers, miners and other workers in favor of Pattion for Governor.

Missionary work is being done in an earnest and unpretentions way, and labor organizations are without exception giving ne ex-Governor their undivided adhesion and support. The miners have been heard from through their president, John B. Rae; the sentiment of mill workers is understood to be in favor of Pattison; and now a straight-out expression of sentiment i heard from the green bottle blowers and other workers.

Ex-Master Workman John Coffey, of District 147, Green Glass League, has been in this vicinity for some time past quietly can vassing the neighborhood for Pattison.

Referring to the ex-Governor's prospects last night Mr. Coffey said:

"I can say, with the greatest confidence, that fully 90 per cent of the green glass workers in the State will cast their votes

for Pattison. I have been among them for sometime, and find that the sentimen sometime, and find that the sentiment among them is overwhelming in favor of the ex-Governor. There is every reason why it should be so. He has his past record to refer to, as being clean and honest, and workingmen who recognize in him a friend to their cause will be satisfied that by returning him again they will be sending a man to Harrisburg as Governor from whom they may reasonably expect an honest, open administration and legislation in the direction that they seek.

"The sentiment I refer to is not confined

to green glass workers. I have not con-fined my efforts to them. I find as strong a feeling among workers in other trades in favor of Pattison as among my own trade. And a very curious feature of the wave of Constable Langenbaker, of Alderman popular sentiment tending toward Pattison is that the feeling for the candidate is just Beinhauer's office on the Southside, left as strong in the eastern part of the State, where Republicanism is as strong as it is vesterday for Tarentum to bring back a young man named William Eckert, who is wanted for embezzlement. Eckert is one

here.
"We intend holding meetings, next week, of the men formerly employed by a Mt. Oliver liveryman named Schaub, and who is alleged to have embezzled some money Poplins in the fashionable Tartan Plaid Effects. Crepe De Chine in a com-

or Watres Makes a Few Re

and went to Waynesburg, where he met an 18-year-old girl named Emma Bilby, whose About the Clarion Meeting. Senator Delamater, with his party, ar rived in the city last evening from the trip through the oil country. As usual he had nothing to say for publication, but he is very confident of winning. His side partner, Senator Watres, was The girl was then turned over to a friend of the family who had been here looking for more communicative. He said: "The reports sent out of these wonderful Demo-cratic meetings throughout the State are greatly exaggerated. I find they count the few Republican kickers several times over. It is true a number of Republicans attended the meeting at Clarion, but they went just as Democrats go to our gatherings. The County Chairman was there, and I see they had him heralded as a kicker. He laughed at the idea, and merely attended the meet-ing to gather information about the Democratic strength.

"The State is in first-class condition, and we will come out ahead with a good major-ity. The meetings at Clarion and Brook-

ville were well attended. Mr. Cadwallader Biddle had been to these two places looking over their charitable institutions, and he came back with the party.
Mr. Biddle said the gatherings were well attended. He was much taken with the charitable homes in Brookville. He said he found all the institutions in good con-dition, and he was satisfied with his inspec-

"Even the bootblacks have the money fever here," sighed the Londoner, as he sauntered away. "Great country this. 'In it'—'top of the heap;' well, I like that.

The Grover Cleveland Society will meet this evening at Houston's Hall, Butler street, to arrange for mass meetings in the Lawrenceville Rink every Saturday during the campaign. The co-operation of the Mc-Clellan Club and the Democratic County Committee will be secured.

The County Democracy will hold an important meeting to-morrow evening.

ACCIDENTS OF A DAY.

Two Men Receive Fatal Injuries on the Railroad Track. Lawrence Morio, a German, aged 76 years and slightly demented, was struck by a train on the Panhandle Railroad, near his home at Singer's Row, West End, on Sat-urday night, and died from his injuries soon afterward. The deceased wandered away from home a week ago, and it is sup-posed was just returning, when the acci-

dent occurred.

An unknown man, about 21 years old, and apparently a workingman, was struck by a Pennsylvania train at Thirty-third street Saturday night. The body is at the morgue James Chambers, 10 years old, was thrown

from a horse on Sarah street, and badly cut about the face.

James Ricketts fell against a show window at 124 Wylie avenue, yesterday, break-ing the glass and receiving a deep cut on

the arm. Wilbert Wilson, a lineman employed by the Second Avenue Electric Car Company was repairing the broken lines at the Hazel wood railroad crossing early yesterday morning. He climbed a large tree to splice a wire, when in some way he lost his balance and fell to the ground, a distance of ten feet. He fell across the curbstone, severely injuring his back and shoulders. Charles McElhaney, of Pike street, a brakeman on the Allegheny Valley Rail-road, had his left arm crushed yesterday
