But to make up for this the buildings are of a better class, and the average cost is considerably greater. There has been an increase time loans. in the number of small houses, as compared with the previous year, but they are still far short of the requirement. These are largely owned by working people. There were no other changes worth noting. Sales were 120 shares. A broker remarked: "There are more sellers than buyers just now, which is unfavorable to a stable market. I am usually a buyer, but at prosent I think it wise to wait. There is no probability of much of an advance, if any, until London and New York brace up, which may take some time, and there may be a break, as some of the weaker holders show a disposition to unload. I think there is money in waiting." But the most notable characteristic, perhaps, is the large increase in the number of fine awellings in the suburbs, particularly the East End, although all the surrounding districts have done well in this respect. This is something to be proud of, for strangers judge a city by the character of its houses more than any-thing else, and in this particular Pittsburg will bear comparison with any other community in the country. . . . Moderate Activity in the Street----Vanderbilt Weak While the Rest of the List Advanced---Early Gains Wiped

Out by Bears.

NEW YORK, October 15 .- The stock market to-day was again moderately active, but showed a marked contrast in tone to that of yesterday. being strong throughout the forenoon and the latter portion of the afternoon, and leaving prices materially higher all along the line, although the heavy losses in some of the leading stocks yesterday were not made up. The bulk of the business still is concentrated in a dozen or so leading stocks, while the remainder of the list is comparatively neglected, and the active interest in the market is still that of the bears. The trading to-day sufficiently developed proofs that the heavy selling of London stocks yesterday was almost entirely for domestic ac-count, and, while the London market was this morning responsive to our declines of yesterday and the necessities of the case compelled a weak opening here, the losses shown by the first sales were comparatively slight and immediately the demand from the shorts, helped by some buy-ing for foreign account, developed a strong tone in the market and all the active stocks

moved steadily, the gains during the first hour

tone in the market and all the active stocks moved steadily, the gains during the first hour being most uniform, and before noon advances over last evening's figures of from ½ to 1½ per cent had been established. The trading was unu-ually devoid of special features, but most conspicions was the appar-ent weakness of the Vanderbilt stocks when all the rest of the list was advancing. Canada Southern and New York Central were specially weak, and each scored a fractional decine as the result of the day's operations. Lake Shore and Cleveland, Cincinnati, Chicago and St. Louis on the other hand wire rather excep-tions, and the latter especially redeemed itself in the late dealings. The upward movement came to an end toward noon, when the traders went in for a short turn on the bear ide, and while there was less animation and no marked weakness anywhere in the list, prices slowly but steadily melted away until toward 2 P. M., when most of the early gains had been wiped out. The early rumors of a large interest which had come in to support the market, found few believers, and the hardening of the money rates thus contribute to the downward tendency. Late in the day, however, good buying gain appeared in the list, land again a change in the temper of the speculation oc-curred, which sent prices in the last hour up to and beyond the level of the best figures of the forenoon. The movement gained force as the forenoon. The movement gained force as the fore day. One of the most remarkable movements of of the day. One of the most remarkable movements the day was a drop in Pullman from 217% to 211 with a recovery to 21% at the close, the whole being accomplished on sales of only 1,350 shares. Delaware and Hudson sold ex-rights and Jer-sey Central ex-dividend. The final changes

HAWKINS STILL IN THE RING.

Elected to the Senate.

L. C. McCracken, of Washington, one of Colonel Hawkins' conferees, was in the city yesterday. He says the Colonel is still in the field for the Senate and so is Sam P. White, of Beaver. Unless one or the other retires, he of Beaver. Unless one or the other retires, he expects to see the Demoeratic candidate, Mr. Dunlap, elected. He thinks if Colonel Haw-kins had known a month ago that he would have had to make an independent fight that he could have made the riffle, but his time is too short. There is some talk of referring the matter to State Chairman Andrews. Colonel Hawkins states that if the Repub-lican Committee of Washington county will rescind its resolution concerning his candidacy that he will withdraw. There is little doubt of this being done.
