HAD LOTS OF FIRES

Escaping.

They had more fires to attend to on the

Southside yesterday afternoon, between the

hours of 5 and 6 o'clock, than the depart-

ment on both sides of the river knew what

Three alarms were turned in from boxes

sult was that before the flames were checked

one building containing a ten-pot fur-

nace was entirely destroyed. The fire

was discovered about 5:30 in the root of the

building, which was a frame structure two-

mensions. Just how it started no one seems

to know, but in no time it was a mass of

as inflammable as powder. Within 15 min-

utes after the fire department was summoned

large quantities of material stored in barrels

A PRETTY GOOD FIGHT IN HAND.

The fire attracted a very large crowd of

people, and for about an hour the firemen had a large-sized fight in hand. Several

times the adjoining buildings were ignited

stance the firemen proved themselves mas-

ters of the situation, and the damages were

slight.
When the excitement was at its highest

word was sent to the firemen that Wolf, Howard & Co.'s factory, cornor of Twenty-

first and Mary streets, was on fire from fly-ing sparks from the Phillips' place. Two

lines of hose were promptly laid to the building, and the fire was extinguished

without any losses worth mentioning.

During the Phillips fire a glassblower

named Stepple, who is employed in the works, rushed into the second story of the

huilding for the purpose of saving some tools. The rapidity of the fire was such that

when he started to leave he found his way of

lates the rental of houses and that is the reason it is so much higher here than in other

son it is so much higher here than in other places. Another thing that has its effect is the fact that building is more expensive here because labor is better paid. There is always a great deal of building, but the tendency is not toward the small houses and thus the demand always exceeds the supply.

Many people wonder why capitalists do not see the advantage of investing in small houses instead of tying their money up in immense business blocks in the heart of the city where the return is not so great. The trouble is this. It is a great bother to have a lot of tenants to look after, and a man sometimes finds that it is really more bother than it is worth. The investment on small houses would pay the capitalists at the rate of 10, 15 or 20 per cent, while in a business block investment it would not bring in more than 8 per cent. It is not often that a number of houses are put up by one man. The little dwellings are usually erected by persons who only have a small amount to juyest and numer of noises are put up by one man. The little dwellings are usually erected by persons who only have a small amount to invest and want to realize all that is possible out of it, so they put up three or four bouses and collect their own rents, thus getting a big profit. A man with a big sum puts it into a larger build-ing that does not pay so much interest, but is easier to get at.

Samuel W. Black talked of the want of small houses by men who were anxious to invest their savings in a little home. He

There are plenty of people who want to buy but no houses to select from. There is always a sale for houses of six rooms worth about \$3,000. We have calls for this kind of an in-Vestment every day. A great many young men leve \$200 and \$300 and would like to purchase a house by paying that much cash and the balance in monthly payments like rent. They pay a little more than they were in the habit of giving for rent.

WORKING FOR A HOME.

It is really astonishing at the rapidity with which young married men pay up these obligations. Sometimes it is not more than two or three years until they have the entire amount paid, when they would not necessarily have been compelled to pay it up for a number of years. It seems to put them on their mettle and they rush out of debt very rapidly.

In our experience of 12 years we have not found a case of where a man went into the easy payment plan and did not ret out whole. Some get out with a big profit, while others who are not so progressive do not more than come out even. But still they have their home and have gotten it in a way that they hardly knew they were saving money. Then while they are paying this off they are fixing up the property. They take a pride in having it look next, and in the end they have a home of much more value than it actually cost them.

There is, as I said, a big demand for these little homes, and is would be a good investment for contribility to half a weak houses. There is three years until they have the entire amount money in it for the builder and also for the purchaser, and in the end it is a benefit to all concerned and materially assists in the growth and adds to the beauty of the city.

PACKED LIKE SARDINES. WORKINGMEN UNABLE TO SECURE COM-

MODIOUS QUARTERS. The City's Urgent Need for Small Dwellings

Some Interesting Figures. Evan Jones, the well-known contractor, thought the idea of nice, comfortable homes | ers, and the only interests he represents, at moderate rentals for the working people of Pittsburg was an excellent one. He said: There is not a city in the United States where the demand is more urgent. Under the present order of things industrious men with families are compelled to take almost any kind of quarters they can find, and there are bundreds and ters they can find, and there are hundreds and hundreds of cases where several families are crowded into one house, almost like sardines in a bea. Then they are driven into alleys and out-of-the-way places. Now this is embarrass-ing to the reliable class of workingmen. Their families are just as dear to them as are these of more fortunate citizens, and they are anxious to bring their children up under more favorable surroundings. The truth is, the de-mand for houses exceeds the supply out of all proportions, and in consequence rents are al-most runinous.

A CHANCE FOR CAPITALISTS.

It has been a matter of surprise to me for a not looked into this question. I am satisfied that a man could rent as many houses which would bring from \$12 to \$18 a month as he would bring from \$12 to \$18 a month as he could build. Pittsburg has undergone a wonderful change in the last few years. With our facilities for rapid transit with cable and electric cars, the city has extended her boundaries in all directions. We now have plenty of vacant property to build upon and it is within easy reach of the business portions.

Astèle from being a great move in the interest of the working classes, the man who invests

many houses that suit my ideas of what we need. They are constructed on the Philadelphia and Baltimore plans. They are of brick, with four or five good rooms flat roofs, and built solidly, with size, neat little front yards. do not know exactly what they cost, but I d of think the price exceeded more than \$1,200, and unite likely it was less. Now it is plain to id quite likely it was less. Now it is plain to e that say \$15 a month on this kind of an in-stiment would make it profitable. As I said efore, the idea is a splendid one, and THE ISPATCH will do a great deal of good in giv-ut the scheme a start.

THOUSANDS OF HOUSES NEEDED.

Mr. Booth, of the firm of Booth & Flinn, said he knew of no question that was more worthy o' thorough agitation than that of erately cheap and substantial homes for the working people. He added;

It is an outrage, the manner in which the rents for houses that are anything like decent ones to live in are enormous, and men with families who earn from \$18 to \$25 a week canot afford to pay the same. There is the mo urgent demand here for thousands of house built upon the plan of flats, as in Philadelphia New York, Baitimore and other large cities and the demand will be on the increase for al time. Enterprises of this kind pay handsome returns in other places and would do the same here. We have a great field here for the judi-cious investment of money in the building line and I believe that proper agitation of the suband I believe that proper agitation of the sub-ject through the papers will lead to excellent results.

SO THE ARCHITECTS SAY. APARTMENT HOUSES THE WAY OUT OF THE DIFFICULTY.

The People Must Begin to Live in Tiers One Above the Other Away Up in the Atmos phere-Fiats Not Long Left Vacant.

When there are houses to be built there must be architects to decide upon the plans. Hence an architect should know about the size of houses in demand. For this reason numerous drawers of plans wer visited yesterday to get their opinion of the existing demand for miniature dwelling houses. Mr. Andrew Peebles at once saw the force of the

scheme. He said: As ground is becoming scare in and around the immediate center of the city the demand becomes for large apartment houses. Strictly speaking there are no flats in Pittsburg. In the Eastern cities these apartment houses catch most of the clerks and others who are compelled to live on a salary of \$1,500, and can't afford to pay more than \$40 a month rent. They must needs have a parlor, a couple of bedrooms, besides a servant's room, kitchen and laundry, Such buildings would be a first-class investment, and pay big money to the capitalists. A

ment, and pay big money to the capitalists. A first-class apartment house centrally located could be filled up on a day's notice.

Of course, there is also a demand for houses of five or six rooms, but in the central part of the city land is so high it does not pay to build such small dwellings because they cannot charge enough rental to pay a fair interest on the investment. When a man moves to the suburbs his car fare in a month becomes so high that he might about as well pay the larger rent in the city and then have the time usually spent in traveling to and from his work.

When a great number of houses are built within a block they can, of course, be put up under one contract and thus save considerable money to the builder, who can thus realize

noney to the builder, who can thus realize etter on the investment. There is certainly a demand for small dwellings and apartment bouses and if a trial was made there is no doubt but more would follow.

Said Mr. F. J. Osterling when interro-gated on the quession in hand;

There certainly is a big demand for such courses, and I can't see why it would not be a houses, and I can't see why it would not be a spiendid investment for someone's surplus capital. I find that the call is for five or six recoined houses within the central part of the city that can rent for \$30. But I guess the people of Pittsburg will at last have to come to the plan of Eastern cities and live on top of each other. That is about the only way I can see out of the difficulty unless they apread away out into the suburbs. The plan of apartment houses would take well in this city, I think. Not long ago a small apartment house was built on Fifth avenue near the Market House. It is 40 foot front by 85 deep and four stories high. In that house 16 families can secure four rooms each and not be overcrowded. Before the roof was on the building every flat was taken, and I believe that indicates the feeling of the people in this regard.

Ex-Master Workman John Coffey Talks on the Issues of the Present State Campaign.

HE SAYS THE TARIFF ISN'T IN IT.

Major Mckinley to Talk Tariff and Senator Emery to Give the Inside History of X. Y. Z.

PROMINENT POLITICIANS TO BE HERE.

Southside Majority for the Ex-Governor Predicted by an Alderman.

The County Democracy held a love feast last night, which brought out the full strength of the organization hereabout and put sitting room in the hall on Smithfield street at a premium. A number of veterans were present, including the Snowden township sage and Mr. Reel, of Allegheny. A. H. Rowand, Sr., presided.

The first speaker, and the trump card of the evening, was John Coffey. of Philadelphia, for four years Master Workman of the Eastern District Green Bottle Blowers, and a man of great earnestness of purpose. Mr. Coffey summed up the records of Messrs. Pattison and Delamater, and found in the former all that goes to make up the beau ideal representative and head of 5,000,-000 people, who have all the laws that are needed, and more too, and simply want a man in the Executive chair who has the honesty and courage to see that those laws are faithfully and honestly executed. He reviewed Mr. Pattison's course as Controller of Philadelphia and as Governor of the State, and found in him a man of earnest honest purpose, with an eye single to the good of the people, irrespective of class. On the other hand, Mr. Coffey pictured the Republican issue, so far as the Governorship is concerned, as a mere whitewash of Senator Quay. Delamater had been chosen as the scapegoat who is to carry Quay's shortcom--An Investment Which Would Pay Well ings with him into the wilderness. Capital-contractors Jones and Booth Give istic greed is eating the State's substance, and corporations who wish to put themselves above the law are Delamater's back-

> aside from these, is M. S. Q. NO TARIFF IN THIS CAMPAIGN. In conclusion, Mr. Coffey reterred to the McKinley tariff, and held that it should have no place in the issue. He also said he had been placed on the manufacturers' black list because he had refused to sign a petition for a powerful corporation unless that corporation would displace 700 boys and give their places to 700 men who had 700 wives to support, and several times 700 sons and daughters. These 700 men were denied employment, and the places of selfrespecting workmen given to cheap labor to produce goods made high under a tariff supposed to be in the interest of American

W. J. Brennen spoke next. He said be wanted it understood that he was not at all modest or apologetic in his request to be allowed to occupy "the seat at present disgraced by Mr. Dalzell," and "that a man who had acted as did the latter in the Breckenridge case, acted the part of a dishonest man, and yet some people had the effrontery to say that there were Democrats in this district who would support him. est of the working classes, the man who invests his money in cheap, substantial houses will make a handsome thing of it for himself. At Jeannette, for instance, they have built a great think this Congressional district dishonest

enough to return Mr. Dalzell." Mr. Brennen said there had not in ten years been a man elected to Congress in this district, except Hopkins, whose election had not been secured by the bulldozing of men in the mills, and yet Dalzell and his supporters had the effrontery to profess to be shocked by election methods in the South. He said it was an open boast that McKinley would be re-elected by the shameless ex-

penditure of boodle,

COMPLIMENTS TO AN OPPONENT. In conclusion, said Mr. Brennen: "You want to elect me, for the next Congress will be Democratic, and Dalzell will be of less use to you than a tobacco sign. What has Dalzell done except help to unseat men whose titles to their seats were better than his and to get the Government recruit-ing station on Penn avenue condemned, in order that his property next door might be enhanced in value? In the next Congress he will be, if elected, relegated to the Committee on Alligators, so you see I'm the man you want. The tariff is not in issue in this State campaign. The McKinley bill has been passed, and the Democrats will be unable to repeal it, unless it prove so bad for the interests of the people as to rouse a sentiment that will sweep it out of exist ence. This talk of Pattison refusing to pardon the miners sent to the workhouse is all bosh. I was interested in that case, and know that Pattison had no more power to pardon them than I had."

D. J. McCarthy, who took a prominent

part eight years ago, when Pattison was running for the same office, kept the crowd in a roar for an hour, as usual illustrating his arguments by ancedotes. He gave an extended dissertation on arboriculture, and told how one fruit might be made grow on the stem of another. The possibilities are almost infinite, but, said Mr. McCarthy: You cannot get honest fruit by grafting George W. Delamater on M. S. Quay, He concluded by boosting Mr. Brennen.
It is said that Mr. Coffey has been doin some very effective work in this neighbor-hood of late, and he was forced to leave the

GURERNATORIAL BOOMS Three Alarms and Four Burnings Pattison and Delamater Mass Meetings to be Wake Up the Whole Southside.

Held This Evening. This will be a great day for political en thusiasm. Mass meetings in the interests of both candidates for Governor will be held. and every citizen will thus be given an opportunity to enthuse in accordance with his particular views.

The Independant Republicans will rally

will give the usual majority for the State

for Pattison at Lafayette Hall. The speakers will be Senator Emery, who will tell who "X. Y. and Z." really are; Hon. George E. Mapes, chairman of the Independent Republican State Committee; Thomas M. Marshall, Esq., of the Allegheny County Bar, and probably Rev. J. F. Coar, of Wilkinsburg. The managers of the sflair expect it will be necessary to hold an over-

low meeting. Major William McKinley, of Ohio, author of a widely-read serial entitled "The Tariff Bill," will discuss that measure and the issues of the campaign at Carnegie Hall, Allegheny. The straight-out Republicans are confident that the building will be crowded, and that the meeting will be a great success.

Sepator Emery and Mr. Mapes will be at the Independent headquarters this after-noon, where they will receive their friends.

STRONG ON THE SOUTHSIDE.

Alderman Flack Says Pattison Will Get a Majority Over There. Alderman Flack, of the Twenty-fifth ward, is one of the many gentlemen on the Southside who is very anxious to see Ex-Governor Ptatison returned to the State Executive Chamber this fall. In speaking of the matter last night the Squire said: "So far as I am concerned I am out for Pattison with all my heart. I believe with a great many voters over here that when we find a pure and honest man it becomes our duty to vote for him regardless of party." "How do you think the Southside will go

this trip?' this trip?"
"Why, we will certainly give Pattison a nice majority, though I am not prepared to say what it will be."
"What is the usual Republican majority

"Well, Harrison's majority over Cleveland was 1,741. Only four wards were for Cleveland. The Twenty-fourth gave 35 majority; the Thirtieth, 35; the Thirty-third, 77; and the Thirty-fourth, 153, a total of 300. will turn the tables this time, however, and put the majority on the other side of

TRYING TO HOLD SEWICKLEY.

Arrangements Made for Delamater Meings to be Held There.

The Republican County Committee has arranged for a Delamater meeting in Sewickley. It is to be held in Choral Hall, on the when he started to leave he found his way of escape entirely cut off. He was completely surrounded by fire and in desperation ran to a window with no means of avoiding a terrible death but a leap to the pavement, some 12 or 15 feet below. He had no time to spare, and in jumping to this balance, follier heavily upon the pavement heavily. evening of October 30. General D. H. Hastings, Colonel W. A. Stone, and others have been secured as speakers. Last even ing a special meeting of the Sewickley Republican League was held, at which it was decided to have a meeting of the bor-ough Republicans, on next Saturday evenfalling heavily upon the pavement, break-ing one leg. A patrol wagon was called and he was removed to his home, No. 2318 Jane street. His injuries are said to ing, as a preliminary of the meeting of the

Local speakers are now being sought, and Judge White will do missionary work for the Meadville Senator.

BIG POLITICAL GUNS COMING

To Address the Voters and to Look After Their Fences. Postmaster General Wanamaker and Thomas Dolan, the latter a well-known busi-

ness man of Philadelphia, will be present at the meeting of the Americus Club to be held in the rink on Frankstown avenue next Thursday night. United States Senator Cameron will ar-

rive in the city on Monday and spend two days here. The Senator's visit to this city is to look after his Senatorial interests.

IT IS NOT A BALLOON.

Punxsutawney Residents Thought Was an Electric Light.

As this is the last night of the Exposition and the thousands of lights in and about the buildings will not cast shadows again for many months to come, the people of Punxsutawney and vicinity will probably learn that the evening star Venus is not a balloon with an electric light attached to it. For the past week or so a number of residents of that vicinity have been enjoying a quiet laugh at their neighbors' expense. Some wag started the story that Venus, which is particularly bright at this time, was an electric light sent up from the Exposition grounds each evening on the tail end of a

The joke traveled all around Clearfield county until the people began to look regularly for the appearance of the electric star in the heavens. Many of them have not discovered the joke yet.

PROFITS IN PLENTY.

Bessemer and Gray Forge Irons Are Dull, but Muck Bar Commands

JUST AS HIGH PRICES AS EVER.

Chief Arthur Put the Question of Federation Beyond Doubt.

PROJECT AMONG GROCERS BADLY HURT

The iron and steel trade experienced no change during the past week. Trade in inished material continues good. Business in raw material is still of large volume, but

prices are yet on the low side. Bessemer pig sells at from \$17 75 to \$18. and gray forge at \$15. Muck bar is transferred at \$31 50 for future, and \$32 can easily be obtained for immediate delivery. Some reason for the continued high price of muck bar may be found: First, in the enormous demand for pipe iron which still prevails; secondly, in the great shortage of natural gas during the last two months, which has estricted the output; and thirdly, in the scarcity of old iron rails, which have increased in value and brought muck bar more into value.

NOT THE BATES OF LAST MONTH. Sheet billets, blooms and slabs change ands at \$29 50, which is no deviation from the price which has ruled recently, but a trifle under the rates obtainable a month

rego.

There has been a remarkable movement intely in spelter. Prices have taken a jump in four weeks of \$13 per ton, sufficient to send up galvanized sheets, in which the article is largely used, a point or two.

Affairs in the Connellsville region are becoming worse and worse as the busy season approaches. While stock at the ovens is

transfer the product. And these, instead of increasing as reported, is growing worse. Many Mahoning Valley turnaces are crippled for lack of an adequate supply.

In the coal trade there is no change. While the rivermen are living in the Micawber-like hope of "something turning up" to advance prices, the railroad operators have no complaint to make except on the score of transportation facilities. And this plaint has become such a bugbear as now to be looked for as a matter of course. Both river and railmen will have to face a de-mand for a half cent per bushel advance in

piling up, the furnace yards are gradually emptying for lack of railroad facilities to

WINDOW GLASS TRADE BETTER. Business on window glass is reported as improving. Eastern jobbers have advanced prices for larger size 5 per cent, in sympathy with the new duty. Manufacturers will meet in Chicago next Tuesday to help along the "American Window Glass Association" scheme. The plan went into operation on the 15th. Flint glass and green glass goods

rates in a short time.

are in better demand.

The utterance of Grand Chief Arthur Thursday a ternoon on the question of fed-eration with other branches of the railroad cience, and the manner in which it was received by his hearers, leaves no doubt as to how the matter will be disposed of by the convention. The Brotherhood will remain apart from other organizations, and will con-tinue to conduct its affairs independently of

A report concerning the retail grocers and certain organizations, while being away from the real facts, the purposes of those in-terested, has tended to defer the fulfill-ment of the project without affording any real news to the public. One of the pur coses of the movement reserved to was to obtain for the grocers what was justly and legally theirs. In this object they will be sustained by the labor organizations as fully as they will assist the latter in carry-ing out their line of policy.

BOTH DOWN TO WORK.

The Engineers and Their Ladves Faire Begin Their Annual Conventions in Earnest. The twenty-seventh annual convention of the Brotherhood of Locomotive Engineers resumed business vesterday morning. The

proceedings, as customary with this organsation, were of a secret nature. The Ladies' Auxiliary met in Telephone Exchange Hall, Allegheny, and drew in 15 recruits within the body. The President, Mrs. Murdock, was presented with a well-filled purse, in recognition of her services to the association. Mrs. St. Clair, the Secre-tary, was presented with a handsome gold watch and chain.

SINGLE TAX MEETING.

Ballot Reform and the Australian System to

he Considered. At a meeting of the Single Tax League to be held to-morrow evening an address will be delivered on ballot reform, in which the principles and operation of the Australian ballot system will be fully explained and illustrated. Rev. A. W. Puller, President of the Cur-

and this is why we are trying to establish our own schools. The Blair educational

bill, if passed, would be a grand thing for the colored race, and I think it will be

pushed through some day, but in a different

form.
"My people are improving very rapidly,

The advent of Northern capitalists in the

stantial ideas. There is a strong demand

is that the moral progress made by my race is something remarkable. I want to see the

improvement continue, and I feel sure that the people of the country will help us to maintain the good work of education."

BUSINESS THAT IS BUSINESS.

Work Done in Time.

yesterday. They had not turned in their

books in time to suit the County Commis-

sioners and Controller, and so the latter,

instead of allowing them \$2 a day each for

their services, concluded to apply an act of Assembly intended to stimulate promptness

in such cases, and proposed to settle with them on the basis of \$1 50 per day. They brought suit and yesterday, when the case

was called, County Solicitor Geyer asked for a non-suit and Judge Siagle granted it.

It is gently insinuated that the disposition to regard a public office, not as a public

business back to the same basis as that on which private enterprises are operated.
