Moorhead Residence, in the East End, Bought by a Funeral Director.

That there is no lack of confidence in the real estate market is shown by the large and steady additions to the acreage on all sides The strong opening was due mainly to the firmer tone of European cables. A special dispatch from Manitoba says that the wheat yield of that country which promised so increase of population so certain that investors feel perfectly safe in putting their taining the market during the early part of the session. But with heavy arrivals in the Nor hadvance of demand, which must, however. in the nature of things, in a very few years,

overtake the supply. The danger lies in too

little rather than too much available acreage to keep pace with the constantly increasing necessities of the city.

While new subdivisions are being put on the market at a lively rate, the supply of building sites is kept within moderate bounds by large absorptions by home-seekers, and neither now nor at any previous time for four or five years has there been anything like a glut of such property. Business is reaching out so tast and becoming so diffused that every plan of lots is central to some of the activities of the city. This makes "dead" property an impossibility. Hence it makes little difference where a man buys-he is sure to be central to some important industry, which will in time enhance the value of his purchase. Even distance is ceasing to be an objection, since rapid transit has ing to be an objection, since rapid transit has been or soon will be extended to every district around the city, bringing the raral home and the workshops, mill or store into close conjunction, although in reality several miles apart.

The fact that people of large means are putting their money into real estate should inspire those in less affluent circumstances with confidence in the stability of this great interest. Conditions favor the buyer. Prices are firm and enhancement certain. Workingmen, therefore, should strain a point, if necessary, to obtain possession of a home. They cannot invest their earnings to better advantage. The wolf seldom visits the door of the man who owns the roof that shelters him.

Business News and Gossip. If all the building projects on foot materialize,

It was stated in THE DISPATCH a few days ago that an important deal in East End residence property was on the eve of being closed up. It was learned yesterday that the transac-tion had been consummated, the Moorhead residence and eight acres, on Fifth avenue, Oak, land, passing into the possession of Mr. H. Samson, the undertaker, for \$125,000. Messrs. W. A. Herren & Sons, agents for the estate. had no particulars to give out, but did not deny

that the sale had been made.

The property is among the finest in the city. The mansion is new and commodious, and the gounds handsomely improved. The purchaser will occupy the house as a residence. The rewill occupy the house as a residence. The report that the residence and grounds formerly occupied by L. W. Dalzell, Esq., were included in the sale to Mr. Samsom is incorrect. They were sold last spring by Messrs. Herron & Sons to J. C. Heilly for \$25,000.

C. H. Love sold a vacant lot on the corner of Forbes and Murdock streets, 87% on the former by 260 on the latter, for W. P. Getty to John Z. T. Robitzer for a price approximating \$6,500. The purchaser will erect a fine residence on the lot.

Local Trade Almost as Good as Before the Exposition Closed. The steady increase in the volume of trade,

prove. Facts in support of this claim come It was feared by some that the closing of the

further liquidation during the past week, were active throughout the day, and in a few stocks their hammering operations were rewarded by the marking of lower quotations.

Sugar Refineries, however, continued to be the most prominent feature of the marker, and a story that the Attorney General of this State had rejected the flual plan of reorganization, had the effect of opening, however, and immediately after, there was a flood of information gathered from different sources which thoroughly discredited the story, and covering of shorts in the certificates went on at a rapid rate, with the result of lifting the prices of the certificates before the close to 72%, at which point almost all of the loss of the early portion of last week had been recovered. The bears, in the meantime, pegred away at the railroad list and made a specialty of Burlington and Quincy, the attack being accompanied by a renewal of the old rumor of an issue of bonds by the company, though nothing new was learned about the matter. The story, however, served its purpose as an aid to the hammering of the hears, and 2 per cent was knocked off of the value of the stock by 2 P. M.

There was also heavy selling of Chicago Gas on orders estensibly from Chicago, and new rumors of trouble among the companies composing the trust were circulated, and before the close 3% per cent had been taken from the price of the stock. The general list, however, failed to sympathize with these movements to any marked extent, and while the opening decline in Sugar and the steady pressure by the bears upon the leading shares caused slight depression in the forenoon, the improved feeling in the last hour, with the desire to cover shorts, which became more pronounced, together with the sharp raily in Sugar, helped to recover the losses in the railroad list, and final prices are generally upon a slightly higher level than those of the opening. The bears brought considerable pressure to bear upon Union Pacific, Louisville and Nashville, Atchison and North American, but wh

time. The market closed fairly active and strong a the improvement, although Sugar reacted over the improvement, although Sugar reacted over 1 per cent in the final dealings. The list to-night shows a large majority of advances, which are generally for small fractions, but Sugar is up 1% and Silver Certificates 1%, while Chicago Gas is 1% lower, and Burlington and Quincy 1%.

Advancing. GROCERIES MOVE ALONG IN OLD RUTS

OFFICE OF PITTSBURG DISPATCH. MONDAY, October 27, 1880. Country Produce-Jobbing Prices. A wet Monday morning seldom furnishes anything new in the produce situation. Trade proved quite quiet to-day under unfavorable atmospheric influences. All vegetables are dull with the exception of potatoes. The supply of potatoes has improved in the past few days, but good stock is in active demand at outside quotation. Apples are plenty and tending lower. Supply of grapes exceed lemand, and markets are weak. Dairy products were kept back last week by reason of railroad delays. This week the blockade is broken and there promises to be a surfeit. With this prospect trade is quiet. Eggs are coming in more freely, but strictly fresh nearby stock is firm,

Drygoods Market.

Drygoods Market.

New York, October 27.—Trade in drygoods opened with a moderate spot business and good mail orders for spring and summer fabrics. There were no new developments, Considerable inquiry for staple cottons was present, and the indications seemed to be that more activity will result in the near future on about the present basis of values, though prices have an upward look in some directious.

Grain in Sight.

River.

for Louisville. THE steamer Elizabeth arrived and departed

Nor a great many coal boats passed yesterday. Traffic in this line seems rather dull at present. THE Hudson arrived and departed vesterday

for Cincinnati. She had 55 bales of cotton up from New Orleans.

Louisville. H. Rogen, the pilot, said it had been done in 25 hours to the former and 30 hours to the latter place. Captain Ellison, of the Hudson, and several others rather intimated that it would require wings to make that time. The run is commonly made in 52 hours.

THERE is a slight war on river rates. Two companies are working for a boat load to St. Louis. The Hiawatha has been lying at the foot of Wood street for several days trying to get a load and has been working on the quiet, cutting the rates by quite a figure. The rival line has been trying to keep the matter quiet, and say they would not object to the opposition if the rates were maintained. The Hiawatha expects to get out to-day.

It was feared by some that the closing of the Exposition would materially lesson the volume of trade, but the difference is so small as to be scarcely noticeable in the general result, as shown in the Clearing House report. Yesterday's exchanges, representing Saturday's business, were almost up to the level of Exposition times, being \$2,851,827.98, and balances \$292,867.22. The fact is clearly deducible from this that the basis of Pittsburg's prosperity is her manufacturing and mercantile interests. Outside enterprises come and go, and are valuable factors in general results white they last, but like Tennison's brook, iron and steel, glass, coal and coke go on forever.

There was only a moderate demand for money yesterday, and no stringency. Rates were steady on the sual basis of 667 per cent. Pittsburg laid San Francisco out last week, Clearing House figures giving her nearly \$5,000,000 a head. Baltimore was nowhere. When it

comes to a steady thing, Pittsburg is always reliable. Her dependence is in solid business, and it never goes back on her.
