BY MEANS OF PNEUMATIC TUBES.

A New Project Which Seems to be Very

Profuse in Promises.

PEASIBLE FEATURES OF THE SCHEME

NEW YORK, October 28 .- Arrangements

are making for the laying of a double pneu-

matic tube line between New York and

Philadelphia. Between these two and all

ntermediate points it is expected that let-

ters, newspapers and small packages will be

whirled at the rate of four miles a minute.

S. F. Leake, of Philadelphia, claims

to have discovered all the essentials to this great undertaking-

namely, a practical switching sys-

tem for intermediate points, a long-distance

carrier that will not heat by friction, ability

to stop the same without serious shock or

injury, and very rapid transmission of

messages, etc., without even a liability to

accident. His carriers will run on wheels

whose axles will revolve in a journal of asbestos and plumbago. The carriers will be automatically stopped by compressed air, and he will be able, he says, by means

of a block system to make a switch or a sta-tion at any point on the line.

GOOD TROTTING AT POUGHKEEPSIE.

A Big Chess Match Arranged-General Sporting News of the Day.

IBT DUNLAP'S CABLE COMPANT.1 LONDON, October 28 .- It is expected that negotiations will shortly be completed for a visit of the American team of cricketers, who will probably, in that event, arrive here early in May, and the campaign will be carried on until September.

The programme, so far as it is now arranged, takes in 29 games in England alone. It is possible, of course, that the American team may also visit Scotland and Ireland. In England the first-class county elevens will be met. Three games will be played against teams representative of all-England, and other games will be played in England with the gentlemen of England and the players. They will play in the North and South of England, the Oxford University, the Cambridge University, Marylebone club, Lyric club, Hurst Park club, the United Service club, the counties of Kent, Middlesex, Surrey, Sursex, Lancashire, Gloucestershire, Somerset, Derby-shire, Essex and Cheshire, Dr. W. G. Grace, the captain of the Gloncester men, the chamtion cricketer of England; Mr. A. N. Hornby, the captain of the Lancashire team, and Mr. I. D. Walker, of the Middlesex club, have been in personal communication with Mr. Crowhurst, the representative of the Americans, and will contribute much to the completion of this vast

programme.

There is more interest in the proposed visit of the Americans than there has been in any previous visit. It is considered here that cricket playing in America has greatly improved during the last year or two, and the English cricketers hope that the Americans will send over the best eleven they can get acceptle.

together.

There is also much talk here at present about a series of football matches between English and American teams. The very rapid way in which football is springing into popularity in the United States prompts the notion that a series of international matches can be arranged.

### SUGGESTIONS ABOUT FOOTBALL.

An Admirer of the Game Thinks a Challenge Cup Ought to be Secured. The following letter on local football will be of interest to those interested in the game: To the Sporting Editor of The Dispatch:

SIR-I read with great interest your opinio last Sunday on football at home. I am also a great lover of football, having played both Rugby and Association rules in the old country. I prefer the latter rules, and I am glad to know that the public is taking an interest in the

game.

I think there are some clubs in and about Pittsburg that could induce our leading business men who patronize football to give a challenge cup to be played for. I think this a good idea, and it would make the game more popular in this section of the State. In Ireland they have got a cup that they call the Irish International Chailenge Cup, and all the professional clubs play for it. The club winning it three years in succession holds it, and the club winning it there years in succession holds it, and the club winning it. years in succession holds it, and the ciub win-ning it one year only, their name is engraved on it for the year they won it. The Alleged World's Championship Cor testants Stop Until Next Spring.

NEW YORK, October 28.-The World's championship series between the Brooklyn and Louisville teams came to an unexpected close this afternoon. Seven games have been played, each team winning three and one being played, each team winning three and one being a tie. The cold weather was too much for the players, and the series will be played off next spring. To-day's game was played at Washington Park, Brooklyn, before a few hundred shivering spectators. When a ball struck a player's hands it sounded like a pistol shot. The Louisville men simply outbatted their opponents and won easily.

The bieyele clubs do not wish to-lose their identity mor give un their club houses, but have given promise that about 400 men will join individually from their ranks in order to gain the privileges of the proposed tracks and grounds. This insures a large membership to start with. The site for the grounds which will probably be purchased is located between Maryiand avenue and Charles street and includes a whole square. Another general meeting of the committee representing the clubs will soon be called and final action taken, in case the union is formed there will be a grand athletic tournament on the grounds early in the spring in which some of the crack amateurs of Chicago. # A UNION PACIFIC MAN REPLIES

To Several Stories Which Have Been Circu-

lated About the Road. BOSTON, October 28. - Vice Presiden Lane, of the Union Pacific Bailway, was seen to-day with regard to the stories with which the "street" of late has teemed derogatory to the Union Pacific, its manage-ment, elc. With regard to the "boycott" and the effect thereof, Mr. Lane said: "The west-bound through business is really all that is affected, and even this can suffer but little." The Union Pacific people are not at all disturbed by the so-called "boycott," and they find in the causes leading to it and in the ill-feeling of competitors an inspira-tion for all the recent wild reports concern-

ing the road.
The stories of accidents have, Mr. Lane says, been greatly exaggerated. A few ac-cidents have naturally occurred under the circumstances of enormous traffic but nonof these have involved any serious damage. As regards the latest story from Chicago to the effect that the management was working tacitly to wreck the road with a view to ultimately turning it over to the Vanderbilts, Mr. Lane says the yarn is too absurd to

# LOOKING AFTER LO

General Grierson Wants the Bad Indian Tribes Kept Apart.

VALUE OF RED MEN AS SCOUTS. Better Accommodations Needed for Troops

on the Frontiers. SIOUX PROPHET MAKING TROUBLE

WASHINGTON, October 28 .- In his an nual report upon the operations of the army in the Department of Arizona Brigadier General Grierson gives at considerable length a history of the events of the year. He says now that Forts McDowell and Verde have been abandoned with a view to their early transfer to the Interior Department for Indian school purposes, the authorities should consider the udvisability of reducing with the least possible delay the number of Indians in the vicinity of the San Carlos agency by the removal of the Yuma and Mojave Indians, numbering about 1,000, to those reservations. The keeping of so many Indians at San Carlos is detrimental to their advancement and

tends to a renewal of old tends. White men have taken up nearly all of the hunting and grazing grounds of the quiet and peaceable Yavai Suppai Indians in the Cataract Canon, Arizona, and these Indians have become exasperated to such a degree that trouble is likely to arise at any

RESTORING THEIR HERITAGE.

Therefore, General Grierson recommends that "Black Tanks," their heriditary winter camp, taken from them by white men two years ago, be restored; 'that their reservaton be enlarged and defined, and their title

made good. The report says that recent surveys have shown that a railroad can be constructed throughout the Grand Canon of the Colorado at a feasible cost, and liberal encouragenent should be given by the Governmen hasten its completion and open up that lamous wonderland, now beyond the reach

The General recommends that the term of enlistment of Indian scouts should be incressed by pay on the re-enlistment. The position should be made desirable, so as to secure the services of the best class of In-dians. The proposition made by an Indian inspector to organize a regiment of Indians, it is said, would prove a very dangerous experiment. To place the worst element to be found among the most savage Indians in a regular army organization under white offi-cers would be unsafe and would be placing too much faith in such Indians. ABANDONING OLD FORTS.

The posts at Forts Lowell, Grant and Bayard, says the General, can be aban-doned without detriment to the service, and such of the troops now stationed there as cannot be provided for in New Mexico and Arizona may be removed to Southern Cali-fornia, The post at Fort Unton could be abandoned at once by transferring Troop G, Sixth Cavalry, to Fort Wingste; Company C, Tenth Infantry, to Fort Marcy, and Company H, of that regiment, to Fort

General Grierson renews his recommendation that the present military reservation at San Pedro, Cal., be enlarged, as it is the most available place for a harbor adjacent to Los Angeles. The small, poorly situated post of San Diego, Cal., should be disposed of, and a more suitable reservation obtained without delay, in order that a large post may be permanently established at that important seaport and facilities afforded for the proper fortification of Point Iona. The best site is at North Island, a peninsula on the east side of the bay entrance. General Grierson says that Congress should make liberal appropriations for the purchase of such tracts and the construction of per-manent posts for the accommodation of troops now at inland ports, where they are no longer needed and which must soon be

ESTABLISHING PERMANENT POSTS. The railroads obviate the necessity for keeping so many troops in the territories where hardships and privations have to be endured, and they should be concentrated on the sea coast where they can be made comfortable, instructed and disciplined. In view of the recent unwarranted at-tempt to grasp Lower California from

Mexico the time is auspicious for the estab-lishment of these permanent posts. The General speaks with satisfaction of the marked improvement in the condition of the Indians of the White Mountain reser vation, and he recommends that they have a separate agency, and that a good school be established at Fort Apache.

General Grierson says that the Jicarillas, who are still attached to the Ute agency, should have a separate agency. He says that Mr. Batholomew, the agent, spends his time with the Utes seeking to accomplish their removal. His clerk, Mr. Stallsteimer, the former agent, who converted the Ute reservation into a cattle range and used the Jicarilla reservation for the same purpose is an enemy of the Indians and should have nothing to do with either agency.

# KICKING HORSE THE KICKER,

Foment Indian Troubles. BISMARCK, October 28 .- Kicking Horse, the great Sioux prophet, seems to be responsible for most of the trouble at Standing Rock. He claims to have visited heaven and returned to earth to tell the Indians what good things are in store for them. Major McLaughlin ordered him off the reservation, and confined several other troublesome spirits in the guard house. The Indians have been making day and night hideous. Kicking Horse is cunning enough to mix Christianity with his prophesies. He tells them they must not kill the whites, as the Great Spirit would take care of them. To Relieve the Distress in Ireland's Famin Stricken District.

ISPECIAL TELEGRAM TO THE DISPATCH. 1 NEW YORK, October 28 .- T. B. Gill, the delegate of the Irish (Parliamentary party, who is now in America, denied to-day that the Irish party was indifferent to the action of Americans in collecting money for the relief of the famine-threatened counties of Ireland. Among other things he said:

The delegation of the Irish Parliamentary party who are on their way to this country at the present moment will be representatives equally of the people of the distressed districts and of the rest of Ireland. It will certainly be a part of their business to lay before the American people the exact plight of their famine-stricken constituents. Relief of distress will form a leading portion of our programme, distress occasioned by the famine and distress among the thousands of evicted families who are always in proximate danger of starvation and who depend solely upon our aid for their support. But we also intend to appeal for the means of advancing that policy which aims at ending forever this periodical recurrence of famine. Our only anxiety is not to see the mischief of 1879 repeated, when, for want of a proper system in the distribution a large proportion of the money subscribed was worse than wasted. Much of it passed straight into the pockets of the landlords. relief of the famine-threatened counties of

FIGHTING FOR A PATENT. Invention of a Beer Filter, Worth Millions of Dollars, in Dispute.

sioner Mitchell, of the Bureau of Patents, to-day rendered an important decision in the case of Zwietusch against Stockheim, involving the right to a certain beer filter and a filtering process for purifying beer, now in very general use in this country. It appears from the record that Stockheim's applications were first in the Patent Office. Zweitusch, however, claims to be the first inventor of the apparatus for practicing the process as well as the process

The only question involved, therefore, is that of priority of invention.

The Board of Examiners of the Patent Office lound for Zweitusch. On appeal to the Commissioner, however, their decision was reversed and priority awarded to Stockheim. This decision follows that of Judge Gresham, recently rendered in the suit brought by Simon and Frederick Uhlmann, as assignee of the Stockheim patent, against Bartholomay and the Leicht Brewing Com-pany. Very large interests are involved in this decision, inasmuch as the invention is said to be valued at several million dollars.

SPECIAL WEATHER BULLETIN. The Freezing Point Reached as Far Sout

as Knoxville. (PREPARED FOR THE DISPATCH.) The storm of Monday that was on the New England coast moved to the northward, the center keeping far north of the steamer line. It became more severe as it crossed Nova Scotia, the barometers in that region dropping below 29. The high winds continued to blow off shore on the New England and Middle Atlantic coasts, In New York in the morning the velocity reached 34 miles an hour, and the winds were somewhat higher further up the coast. Snow fell in Northern New York and Western Vermont, and in the greater part of the lower lake region and Canada. Elsewhere the weather was fair. The cold wave sent the temperature down to within 60 or 80 of the freezing point east of the Mississippi. It reached the freezing point as far south as Knoxville, Tenn., killing frost covering Tennessee and Kentucky, and light frost extending to the Atlantic over Georgia and North Caro lina. Killing frost may be expected this morning in the greater part of the lower lake regions, the Middle Atlantic and New England States. It was a little warmer in the North-

west States, and was generally above freezing. Yesterday's Steamship Arrivals. Westerland. Antwerp. New York.

How a Money Lender Used to Kill Two Birds With One Stone CHICAGO, October 28 .- The whereabout of W. S. Whorton, who has been engaged in the money lending business in this city for several years, is troubling a number of citizens, and particularly the Chicago Trust and Savings Bank and the United States Loan Company. For over a week Whorton has not been seen, and his wife and creditors have finally concluded he has left the city.
It is asserted that his indebtedness will amount to \$250,000. It is asserted that Whorton frequently pursued a plan of double dealing in hypothecating notes made to him. When a note became due, it is to him. When a note became due, it is asserted he was accustomed to notify the signer that he could not carry it unless a new one was made. When this was done, he promised to destroy the old notes, but instead of doing so would leave them with the financial institution where he had placed them and take the new ones to

### AUTUMNAL ADVICE.

Keep your feet warm and dry. . Wear waterproof boots in preference to retics or rubbers. Keep your eye on your umbrells, you will

need it vourself. Stop a cough or a cold at once. Pneumonia and consumption may be started by either.

If you wear rubbers take them off whenever you have the chance, even if only for a few minutes.

If you feel a cough or a cold coming on take

a drink of pure whiskey at once. It will keep the blood in circulation and is the best pre-ventive against the diseases of the season. Remember that only puce whiskey should be taken. Duffy's Pure Malt Whiskey has the strongest recommendations from the leading scientists and medical men in the country, and s the only standard medicinal whiskey known Insist on having it.
