Salford Barriers Make a Failure-General Sporting News of the Day.

PRPECIAL TELEGRAM TO THE DISPATCE. NEW YORK, October 30 .- Considerable interest is being manifested in the proposal of F. P. Slavin to come to America to fight J. L. Sullivan. The general opinion is to the effect that Slavin's talk is all "bluff," because, if he does come to this country, he wants the public to know it. Stavin is a great talker and his managers urge him to

Sullivan for \$10,000 a side and the championship of the world. If Sullivan should refuse to meet him, Slavin says he will claim the championship. Just about the time of Slavin's arrival in New York Peter Jack-had sent them a 32-pound trout, and the fish son will arrive in San Francisco from Australia, and the three greatest pugilists of the "day in the heavy-weight class will be in this country. Sullivan will most undoubtedly secept Slavin's challenge without much

was utilized toward making up the good things for a banquet. About 100 gentlemen, including representatives of the press, were on hand and enjoyed themselves thoroughly.

A splendid entertainment preceded the banquet. G. H. Christy, E-q., made an extremely interesting speech on fishing. During his remarks he very humorously pointed out the necessity of a man, who goes on a fishing excursion, taking more than one pair of pants with him. Mr. Christy went on to argue that all the head waters of the local rivers should be stocked with fish so that citizens could take a "day's outing" to catch fish. The speaker also paid a very high enconnium to the work of Fish Warden Hague for his untiring efforts in running down poachers and illegal fishers. Vocal music was rendered by the Amphion Quartet, Messrs. Holden and Thomas and members of the club. Medals were awarded to the best rower and shooter of the club and also The "talent" here think that the first thing Slavin should do is this: That he should first fight Peter Jackson and let the winner of the Slavin-Jackson fight engage with Sullivan. If this is decided upon, Sullivan will then have plenty of time to get resdy.

#### SATURDAY'S FOOTBALL MATCH.

Inusual Interest in the Coming of the

Princeton Preparatory Kickers. Local interest in the first appearance in this city of a Princeton football team is extraordinarily high. Everybody who takes an interest in the game is talking about the visitors who are schediled to play here on Saturday. That the team is a good one there is no doubt, as they have this season defeated the regular Princeton team. The local players, however, are confient of making a good stand against the dent of making a good stand against the Princeton boys, although they, the home players, have not been able to secure sufficient practice during the last few days owing to inchement weather. The visitors' team will be made up as follows: Ewing, left end; Cowan, loft tackle: Reynolds, left guard; Fine, center; Dounelly, right guard; Petty, right tackle: Rafferty, right end; Robins, quarter back; Walker, left half back; Denlinger, right half back; Edwards, full back Mr. Cowan is captain and was a member of

last year's regular team at Princeton. He is a great player. Mr. Fine, who plays center, was a member of the regular Princeton team of 1884, and is also a powerful man in the rush

line.

In football circles yesterday it was stated that the Shadyside team have resolved to only play under association rules in future. The parents of the boys have demanded this change, claiming that the Rugby rules permit of too much rough work.

#### COMPARATIVE SCORES.

A Table Showing How the Crack Football Teams Stand.

While by a comparison of scores nothing definite can be ascertained as to the strength of the different college teams, yet some idea can be had of their relative merits. Yale, so far, has outplayed Princeton, except in the Lehigh game, but Lehigh played a much stronger game here than at Princeton. The scores against Williams and Amherst, while not as large as those made by Harvard, were quite good, since Yale was weakened by the absonce of three of her best men.

the Chicago Pootsellers. CHICAGO, October 30,-Last summer Ed Cor rigan, proprietor of the West Side track, caused the arrest of a number of city poolsellers for violating the State law and city ordinance forbidding the sales of pools except within the inclosures of racecourses. One of these cases came up for final hearing before Judge Tuley to-ney in the Circuit Cones, and the Judge rendered a decision to the effect that the statute becon + they give special privileges.

The laws, he found, are similar to those in New York and Louisiana, and his decision was those States. Judge Tuley stated that the law gave power of suppression of poolselling to the Mayor and authorities, but no authority the mayor and authorities, but no authority was contained for the regulation thereof. The framers of the ordinance, therefore, had acted beyond their authority, and the police have right only to prombit the sale of such pools. The city will take an appeal from the decision. In the meantime, there is nothing to prevent pool selling at will in this city unless the remeal State by a sealer.

clubs of the various cities at which joint meetings have been given was equal division of the profits, if there were any, the home club to stand all losses entailed.

At Detroit about \$600 was divided, at Chicago the meeting was a failure, at Buffalo there was a smail division, at Boston it was a failure, and at Philadelphia the Athletic Club of the Schuylkill Navy footed up over \$100 on the wrong side of the ledger.

The managers of the troupe rely upon the Madison Square Garden meeting to help-cut down the losses, which fall upon the Manhattan A. C., for the visitors "can't loose," having been guaranteed \$1,000 irrespective of how the venture panned out. [SPECIAL TELEGRAM TO THE DISPATCH.] DUNBAR, PA., October 31 .- The flames in the Hill farm mine are being slowly but surely overcome. Men have been at work in the mines every day for two weeks past, and are daily in peril of their lives, from either the fire or the black damp, which is very thick. A depth of 1,500 teet has been reached, and the manway has been made secure by bratticing, so that the men may work more easily. The slopeway has also been cleared to this distance, and on the way some large falls have been passed. Live coals are being daily hauled out in the wagons and dumped like slack.

If the combination's visit to Boston was not attended with happy results, that to the City of Brotherly Love was direful. Barely 400 spectators were present and the games were a farce. The A. C. S. N. had advertised Westing, Conneff, Copeland, Carey, in fact nearly all M. A. U. champions had been entered for the meeting, but none appeared for competition.

The A. C. S. N. officials were very indiguant at this state of affairs and were not at all backward in expressing their feelings to the M. A. C. representatives present.

The Philadelphians had heard of the Salford Harriers' charges of discourtesy against the Boston Athletic Association, and were determined to avoid such a complaint against the Schnylkill Navy. Therefore an elegant banquet was tendered the visitors after the games, but the courtesy was almost regretted when several of the Englishmen sat down to the repast wearing blue flannel shirts. The other guests were not ultra fastidious, but this display of British eccentricity caused a great deal of purknown had becoment. The officials are hopeful of a speedy termination of their troubles with this unlucky mine. There will be some awful discovery in a few days, though no bodies have as yet been discovered, nor has anything belonging to the men been found. The workers fear they will find the poor men dead from starvation instead of being smothered to death, as was at first supposed. A depth of 1,500 feet more will bring the workers to the level of the water.

The third attempt to enter the mine, which began three weeks ago, has reached the critical point, and the progress of the men from this time on will be watched with the greatest interest. Hugh Doran, assist-ant mine boss, leads the effort. Under his direction an iron pipe laid down the man-

way is used to carry water to the fire.

Up to last Friday night four sections of the slope had been cleared away. The fith section was finished to-day. This section was a terrible test of human endurance, Fire which could not be quenched was handled with the shovel and redhot coals were hauled to the surface and disposed of. The heat was so intense that but a few minutes could be spent in it at one time. But it was cleared at last. The sixth section is that part of the slope known as "Jacob's Ladder." Here all interest has been cen-tered for weeks. It was explored to-day by Mine Boss Doran, as no other man would brave the heat. Several falls were en-Doran was nearly overcome by the heat and gas arising from the fire.

HOT NEW YORK CITY CAMPAIGN.

If the Two Democratic Leaders Clash Factional Fights May

PERIL THE INTERESTS OF BOTH IN '92

IFROM A STAFF CORRESPONDENT. 1 NEW YORK, October 30 .- The municipal very hot one. The personal bitterness and factional animosity engendered by it will be carried into national politics. This affects the Democratic party directly and the Republicans indirectly. Out-of-town people will understand the

importance of the issue to the national Dem-

ocracy from the fact that Governor David

candidate, has been laboring day and night with the party leaders to secure harmonious action as to Assemblymen and Congressmen. These efforts have not proven satisfactory. An apparent truce is but the cover of the mining and countermining continually going on between the warring factions.
This bitterness between Tammany Hall and the County Democracy is one of the curious features of New York City government. The combination of the latter with the Republicans and municipal reformers, the Republicans and municipal reformers, styled the tripartite alliance, as against Tammany, is something in politics absolutely unknown and impossible in any other city of the union. The so-called County Democracy is composed of the worst lot of Democratic spoilsmen that could be scraped together. In their present company the Municipal Reform League are all the awallow talks municipal and the swallow-tails, mugwumps, political and social cranks of every denomination-men who consider themselves above and superior to both parties, and who are constitutionally antagonistic to "the state of things."

The third party to this combination i composed of simon pure Republicans, who indorse Ingalls' Pittsburg declaration that any Republican is better than the best Democrat. The combination presents every extreme in local and national politics. It is bound together by a single bond of friendship, "To beat Tammany."

Now the only interest this situation has for the readers of THE DISPATCH is in its bearing on national politics. While this

bearing on national politics. While this chiefly concerns the general Democratic organization, it has a not unimportant reference to national Republicans. For it is possible that the result of the present mu-nicipal quarrel may remove from the national political arens one or two prominent Presidental candidates — perhaps eliminate New York as a State from consid-

eration in that connection. Governor Hill is personally interested in the success of the Tammany candidates, but he is also more than personally interested in the defeat of any condition that embraces Republicans and Mugwumps as its princi-pal elements. Nobody knows better than David B. Hill the significance of the vic-tory of such a combination. It would wipe him out of national political existence. No wonder, then, that the chief executive of the State of New York has temporarily moved his office to the metropolis. He has need to camp on the field.

There is one other man who is deeply affected by the present movement, and that is Mr. Grover Cleveland, lawyer, Williams street. Mr. Cieveland is in rather an equivocal position. He is just now imitating "B'r Rabbit," and is lying low in the high grass. While Hill is working tooth and nail to secure harmony in the ranks of his party, his rival is quite as earnestly

CLEVELAND EMBARRASSED. It is not wholly a difference of character. Mr. Cleveland is embarrassed by mugwump-His law partner, Mr. Stetson, has in dorsed the People's Municipal League and quite a number of his distinctive friends have gone the same way. On the other hand Mr. Whitney and Colonel Lamont are straight Tammany. There is a considerable undercurrent of comment on this situation of the Cleveland wing, and some of these same comments would doubtless pain the

ex-President's friends to hear.

It is grimly proposed by the disciples of
Mr. Richard Croaker to smoke B'r
Rabbit out. This idea is a cruel one, Rabbit out. This idea is a cruel one, but it has a practical sound that reminds us of practical politics. Tammany wants to know, you know, where Mr. Cleveland stands. Will he vote with them or will he side with his wicked partner and support the tripartite alliance? From \$50,000.

Gas will be sbut off in the Demmler Iron and Tin Plate Works, at McKeesport. The works will use coal.

MICHAEL FRIEL, an employe of the Ohio Iron Works, at Zanesville, was killed by a switch engine yesterday.

SAMUEL E. CABOTHERS has announced himself a candidate for Mayor of McKeesport, and Tammany and the latter are successful he strengthens Hill's Presidental hand. If he should go with the combinations of the strengthens of the combination of the point with the strengthens of the combination of the combinati hand. If he should go with the combina-tion, he bids farewell to Tammany's good graces. Manifestly it is to B'r Cleve-land's advantage to "lay low." And this sort of diplomacy accords with his political character and personal disposition. On the results of the present New York municipal campaign, therefore, hang the

hopes and aspirations of two national Dem-ocratic leaders. It by no means follows that the success of Tammany means Hill, or that the success of the opposition means Cleve-land. A united Democracy will be neces-sary to either of them. It is a bopeless and bitter division that endangers both. But the part one or the other takes in the local fight will go a long ways to prejudice for or against.

WAR TO THE KNIFE.

There are strong indications that the present row will end with the scalps of the County Democrats in Tammany's belt. The war this time is to the knie and the Dem crats of New York are expert with the knife. Should Tammany's boast that she will wipe out the Counties for good and all become a realization the Democratic vote of this city in the next national election will not be quite as heavy as it was the last time. There will be a sneaking back into the Tammany will be a sneaking back into the Tammany ranks of many spoilsmen like John R. Fellows, but the cutting and thrusting that will be done by those who remain outside will make a greater showing than the difference between the last Cleveland and Hill yote. The knowledge of this may prevent the Democratic Convention from chosen the next Democratic Convention from choosing a New York man as national standard bearer. Certain it is that should Hill or Cleveland, or both together, be unable to straighten out this kink in the ranks satisfactorily, the party will do a wise thing to steer clear of them and try a man from some

other State.

The animosities of this factional quarrel are likely to leave a sting behind, and any other course will increase the chances of the Republican party carrying New York and the Presidency. But for the bungling and incompetent leadership of Boss Platt there would be no chances about it. They would carry it certainly.

CLAIMS A SWINDLE.

An Allegheny Young Man Who Lost Two Dollars and a Half-His Story of the Way He Dropped His Boodle.

F. M. Stewart, an agent in charge of what is known as the Inter-State Manufacturing Company at No. 533 Wood street, was arrested yesterday by Alderman McMaster's constable on a charge preferred by John Russell, of Allegheny.
Russell alleged in his complaint that he

called on Stewart in reference to an advertisement stating that a young man could find employment at the office at \$15 a week. Russell says he was under the impression that he was wanted to run the elevator. After some talk he was asked to sign a paper, which he did, thinking, he stated, that ne was to secure the last named posi-Russell asserted that when he signed the

paper the reading matter was covered by a blotter, so that he could not see what kind of article he had signed. He was next asked for \$2 50, which he gave, and in return got eint for the money signed by Stewart for the Interstate Manufacturing Company. Russell was then handed the prospectus of book which Stewart said he was to sell. Russell stated that he could not understand this, as he thought he was being employed to run the elevator, and not to sell books. Stewart said that was what he agreed to do Russell was given a duplicate copy of the paper he had signed. He read it over and found that by signing it he had agreed to work for the company for four weeks on trial in a capacity that would be required of him, such as a collector, solicitor or deliverer. He had agreed to work faithfully eight hours each day, for which he was to receive \$15 per week. An average of 24 orders weekly was expected, but if he delivered only half of

that number the work would be considered complete. The money for the prospectus was not to be refunded, but if it was returned in good condition the money would be taken in exchange for a complete copy of the works upon payment of \$2 additional. Russell said that he had never had any experience in canvassing, and told Stewart that he would not take the job, and at the same time asked him for the \$2 50. Stewart refused to return it, but said that he would sell him the complete works for the \$2 additional, as stated in the agreement.

Stewart was held in \$300 bail for trial by the Alderman.

ONE MORE KNIFE STORY. One Railroad Man Accuses Another of

Felonious Assault and Battery. James Cully was arrested by Lieutenant Moreland, of Allegheny, yesterday on a charge of felonious assault and battery, preferred by John Maypole. The men were both employed in the Pittsburg, Ft. Wayne and Chicago Railroad yards, and Cully was recently discharged. He blamed the fact that his services were discontinued on Maypole. Monday night Cully went to the yards and accused Maypole of working against him, and in the melee that ensued the prosecutor alleges that Cully used a and one in the side.

Maypole was unable to be around until resterday, when he appeared before yesterday, when he appeared before Mayor Wyman and swore out a warrant for Cully's
