Wheat Unsettled and Lower in Response to the Wall Street Flurry-Corn Also Loses Ground-Oats Nervous-Pork Picks Up.

CHICAGO-Wheat-There was only moderate trading to-day, and the feeling was somewhat unsettled and quite nervous. The monetary situation and Wall street affairs are having considerable effect on the market at present. The large increase in visible supply was another weakening feature, as well as the increase in private elevators in the Northwest, The market opened weak and l@lisc lower, influenced by the break in stocks East. Later the market became steadier, prices advancing 13%, assisted some by a little more reassuring news from the East, and closed about 3% lower for December and 3% lower for May than closing figures of Saturday.

marked yesterday: "I am often asked for an opinion respecting values-whether they are likely to advance, decline, or remain stationary. Business and choice residence properties are steadily advancing. They are comparatively scarce, and, as they are wanted by people in affluent circumstances, with whom location and surroundings are of greater importance than money, they are always in demand at top figures. This is a guarantee against a slump in this direction, and also explains the recent action of some holders in ordering their agents to mark up their goods. They realize that demand will keep pace with the growth of the city, and that it will be as easy to market their property one year or five years hence as it is now, greater importance than money, they are alerty one year or five years hence as it is now, and at a price so much higher that it will well pay them for waiting. This is a sound conclusion, and that buyers take the same view is shown by the large number of transactions in high-class properties. This being the case I think it perfectly safe to assume that it will be many years before business and residence properties of the kind in question will reach the top round of progression. Hence, I think this is a good time to buy. It is certain in my opinion, that there is nothing to be gained by waiting.

"As to ordinary building sites, while they are

"As to ordinary building sites, while they are in good demand and are being picked up very fast, there is so much acreace susceptible of subdivision, and which the extension of rapid transit will soon make available, that while enhancement is certain, it will be so gradual as to be scarcely noticed. This is a good feature of the market. A radical advance in building lots of the kind under review would drive buyers out of the market, since purchasers are largely of the wage-working class, and easily reach the limit of their investing capacity. They are compelled to compare their outlay to their earnings, and will only buy when it is as cheap or cheaper than to rent. Without reasonable inducements they will remain renters, because they cannot afford the expense of proprietorship. Now, and for several years past, the market has been in their favor, and that they have not been alow to take advantage of it the volnot been slow to take advantage of it the vo on the need sales abundantly testifies. The acquisi-tion of homes cannot be made too easy for the good of the city and the best interests of real estate, and owners having property on the mar-ket will expedite business by putting a curb on their demands, so as not to discourage buyers."

HOME MONEY.

Financiers Make Ample Preparations Ward Off the Unexpected.

Calamities seldom come, or if they do come, do little harm when people are prepared for been reduced to infinitessimal dimensions by the care taken to present it. Financial instiources so as to be prepared for emergencies. Legitimate interests have been taken care of, but speculative projects have received cold comfort. Ordinary stock collateral for loans has for some time been in bad odor. Hence speculative interests have declined, and are still on the wane. This is as likely the result of manipulation as anything else. In all other respects the financial situation is apparently as strong as ever. All of the great centers of trade report plenty of 8 and 7 per cent money on regular business paper. Production and consumption keep well together. There is a good demand and fair prices for everything. There is more work than workmen. These are not the conditions out of which panies are made. But with the air burdened with disquieting reports and rumors, cool heads are necessary to hold things level.

ports and rumors, cool heads are necessary to hold things level.

The local money market yesterday was fairly active in the way of discounting, with a sufficient supply of funds to meet all requirements. Good business paper was freely taken on the basis of 6 and 7 per cont, but stock collateral, when accepted at all, was pretty heavily margined. Depositing was good, showing continued activity in general trade. Exchanges were \$2,960,467 32, and balances \$339,508 29.

Money on call at New York yesterday was tight, ranging from 66,96 per cent; last loan, 86; closed offered at 96. Prime mercantile paper, 868. Sterling exchange quiet and steady at \$4 73½ for 60-day bills and \$4 85½ for demand.

NEW YORK STOCKS.

A Rich Mars's Panic-Gould Parties Credited With Large Purchases-Great Liquidation-Few Leading Bonds Show Marked Weakness.

NEW YORK, November 10 .- The stock market to-day continued the rapid and heavy de-cline of the latter portion of last week, and for a time this morning it looked more like a panic than at any time since the downward movement began. As remarked by a prominent Western manipulator of stocks and other speculative commodities, it was only a rich man's panic, and thus far the slump in prices, which has reached some 15 per cent in some cases, has een accompanied by a complete freedom from failures upon the street, emphasizing the fact that not for a long time have stocks been held to any extent upon the street in brokers offices on margins.

To-day, however, the excitement, which was

of the suppressed order and almost entirely free from the usual noise and wild gyrations which marked the transactions of business at the Stock Exchange at times, was sufficient to

Falls Into Line.

This is a trying time for those who are on the long side of the stock market and are compelled to realize or go to the wall. Heavy losses are inevitable in such cases, for there is no market for anything except at a ruinous sacrifice.

Wall street was the scene of a semi-panic yesterday. Everything was bearish. This was due to alarming cables from Loudon and Paris, predicting disaster to the markets at those centers this week. This news completed the demoralization. Everybody wanted to sell. There were no buyers, even for the specialties.

That Pittsburg securities should be affected by this condition of affairs in Wall street was to be expected. The bottom seemed to drop out of nearly everything on the usually active list. The leaders were bid down to zero and below, but holders maintained their equinimity and refused to part with their goods. This and the absence of buying orders had a tendency to minimize the decline, but falled to rally the market, and last prices in most instances were the lowest of the day. Sales were 100 shares—85 Luster at 22, 16 Philadelphia Gas at 23% and 6 Pittsburg Traction at 33.

CONDITION OF CROPS.

A Small Yield of Corn and Potatoes in Most of the States.

WASHINGTON, November 10.—November returns to the Department of Agriculture of rates of yield per acre make the average for corn 19.9 bushels, potatoes 57.5 bushels, buckwheat 14.5 bushels, hay 1.2 tons, tobacco 718 pounds. The corn crop makes the smallest yield reported. It is 83 per cent of the average of the last ten years, and only 73 per cent of last year's crop.

The decline of the last decade is not due to

impairment of fertility, but to unfavorable meleorological influences. The highest rates are in New England, as u-ual. New York aver-ages 25.3, Pennsylvania 27.5, Ohio 20.7, Michigan 26.7, Indiana 24.3, Illinois 25, Iowa 26, Missouri 28.8, Kansas 11.3, Nebraska 20.3. 28.8 Kansas II.3, Nebraska 20.3.

The average rate of yield of potatoes is 57.5 bushels. The condition of the crop in October was lower than in any reported previous crop, except in 1887, being 51.7. The low rates of yield of principal States are as follows: New York 62 bushels, Pennsylvania 68, Michigan 58, Ohio 46, Indiana 37, Illinois 30, Iowa 48, Missouri 39, Kansas 28, Nebraska 27, Minnesota 68; Maine reports 95, New Hampshire 90 and Vermont 96. The cane sugar crop will be a large one, and sugar beets have done well west of the Missouri, indicating a probably rapid development of the sugar industry.

Grain in Sight.

CHICAGO, November 10.—The visible supply of grain as reported to the Board of Trade is as follows: Wheat, 22,699,000 bushlels; increase, 1,484,000 bushlels. Corn. 6,385,000 bushlels; decrease, 632,000 bushlels. Oats, 3,968,000 bushlels; decrease, 175,000 bushlels. Ray, 707,000 bushlels; decrease, 175,000 bushlels.
