light trade and charge it up to the financial depression and downward tendency of stock markets. Manu acturers are disposed to pursue the hand to mouth policy in the present uncertain condition of raw iron markets. In the line of finished iron and steel products, trade holds up well and manufacturers are still behind their orders. Transactions for the week past have been light as far as raw irons are concerned, and holders were disposed to make concessions. Markets are decidedly in buyers' favor.

Structural iron is still in good demand, and last week's prices are well maintained. All manufactured iron holds up well when the condition of the raw iron market is con-

Muck bar is still in fair demand, but prices are searcely as strong as they have been for a few weeks past. Steel nails and rails are quoted at last weeks figures, but markets are slow, and the cash buyer can,

without doubt, discount our quotations.

#### IN SOUND CONDITION Large Demand for Iron in Philadelphia for

Legitimate Use.

ISPECIAL TELEGUAY TO THE DISPATCH. PHILADELPHIA, November 18.-The flurry in the money market is but slightly reflected in business circles and the iron market has not yet suffered from the recent depression. Although there is some hesitancy about new undertakings, those already under way are in a perfectly sound condition. ## AFFECTED BY WALL STREET.

Prices for Iron Have Reached the Botton Notch at Cincinnati.

SEPECIAL TELEGRAM TO THE DISPATCHA CINCINNATI, November 14.—Rogers, Brown & Co. say: The market has had the general appearance of a stand-off the week past on account of the troubles in Wall street. Buyers generally want to see how the flurry in stock ould affect general business before making large engagements. #### PRICES FIRM IN THE SOUTH,

But No Special Features Have Been De veloped Recently.

SPECIAL TELEGRAM TO THE DISPATCE. BIEMINGHAM, ALA., November 14.-The trop market is without special features this week. Prices are still firm but unchanged and manufacturers are not holding stock for

an advance.

The volume of business continues good and the railroads have all they can do to move the from as fast as it is sold. No big contracts have been reported this week, but plenty of small orders are coming in. The demand for pig for immediate shipment is nearly equal to the out-put of the district, and the furnace men are

In-dications point to a quiet period during the balance of the year, and for the most part sales are likely to consist of small lots for nearby de-liveries.

BEPORTS FROM THE LEADING CENTERS

The pig iron market has developed few new features in the week past, but tendency is towards lower prices. Brokers report a light trade and charge it up to the formeral.

#### THE MARKET BASKET.

Scarcity of Ocean Products-Choice Cream ery Butter Higher.

At the fruit and vegetable stalls the uniform report was that markets were very quiet the past week. All garden stuff is unusually slow for the time of the year. Heavy frosts have been long in putting in their appearance this season. The delay of frosts has been a fair offset to the late spring, and the growing time has been about its usual length. There have been no frosts to kill tomatoes until the past week. whereas the average time of arrival of killing frosts is in the latter part of October. In the line of ocean products dealers report a great scarcity and higher price of oysters. Choice fish and oysters are not in sufficient supply to meet demand. There has already been an vance in oysters, and another advance is looked for at an early day. The catch of fish and oysters of late have been unexpectedly light.

Florists report a quiet trade for the week, with prices unchanged. The failure of frost to put in its appearance in the latter part of October has proved a depressing factor in lines of floral products.

floral products.
Supply of game is scarcely up to demand and prices are very firm. Staple meats move along in the same old ruts, notwithstanding a sharp decline in price of live stock. # BOOMING SWISSVALE. Outline of the Most Important Move-

ment Ever Undertaken There.

HOMES THE BEST INVESTMENT. Some of the Local Stock Leaders Away Up in the Region of the Clouds.

THE NEWS AND GOSSIP OF THE CITY

Swissvale is looking up. The syndicate represented by Mr. H. H. Negley, who recently purchased the Palmer homestead at that place, consisting of about 30 acres, are planning extensive improvements on the property. The ground will be laid out in large lots and sold only to those who will build high-class dwellings. There will be lawns and driveways, and a road will be opened to connect with the main street of Braddock. To give the project a start the Braddock. To give the project a start the syndicate will take the initiative by building a number of houses as a sample of the kind required of those who may purchase lots. Several prominent McKeesporters will likely be the first to build after the syndicate. This is the most important increases. This is the most important improvement evenudertaken at Swissvale.

The Best Investment.

Two good reasons why people should buy or build homes, whether able to pay spot cash or not: First, because in a judicious purchase an ownership is acquired that may be disposed of at any future time at a profit; it is a good investment; second, because the outlay in rental will meet the demand against you as a pur-chaser. Besides, the pleasure and satisfaction enjoyed as an owner are never realized as a tenant.

The Banner Wards. The bulk of the house building this year has been done by wage-workers, hundreds of whom have established homes and are in a large de-gree secure against the frowns of fortune. The value of these improvements is not to be measured by what they cost. Each house represents a family with a personal interest in the pros-pority of the city and the maintenance of good government. In the aggregate these new homes represent a conservative force in business and morals, which will be widely felt, to the advantage of the entire community. Home building should be encouraged, as it brings grist to everybody's mill.

Natural Gas Stocks.

There is likely to be a rally in natural gas shares, since it has been found that the want of well pressure can be remedied by artificial means. Some think there is as much gas as ever, and that the mills will be using it again before long. Be this as it may, it is pretty cerbefore long. He this as it may, it is pretty certain that the supply is in no danger of immediate extinction, with a strong probability that it will last for years for domestic purposes, if nothing more. It is the recognition of this pleasing prospect that underlies the upward movement in the stocks of the natural gas companies. It is an interest of the utmost importance to the city, and all attempts to throw discredit upon it and weaken it in public estimation should be promptly rebuked.

Business News and Gossip.

The rapidity with which new acreage is being prepared for the market is a practical exhibition of confidence in the future of real estate. The wooden bridge that is being built over Wood's run is only temporary. It will be replaced by an iron structure, material for which is on the ground.

The most important mortgage on file yester-

day was for \$16,000. Of \$1, 13 were for purchase money. Each of 19 was for less than \$1,000. The wards that have taken the lead in building this year are the Sixteenth, Nineteenth, Twentieth, Twenty-first and Thirteenth, in the

Twentieth, Twenty-first and Thirteenth, in the order named.

Cigar and toby makers are running their full capacity, and in some cases are obliged to refuse orders.

Southern lumber is gaining ground in this market. A dealer remarked yesterday: "A few years ago it was a rare thing for a man to use over a car load of Southern yellow pine during a season, while the same man now thinks nothing of carrying in stock half a dozen car loads of the same material."

Oil reached a point yesterday which was very dozen cas loads of the same material."

Oit reached a point yesterday which was very discouraging to producers. A new market should be found or the drill stopped.

## STILL UPWARD.

The Reaction in Local Stocks Carrying Things Skyward-Lively Trading. Local stocks were again active and strong yesterday. They not only held the advance of the previous day, but many of them scored material gains. Electric sold up to 29, but weakened later and closed at 28 bid. New York and Cleveland Gas Coal was so firmly held that a bid of 88 failed to bring it out. Manufacturers' Gas was strong at 20 bid. Philadelphia Gas held advanced ground. Switch and Signal improved its standing and even the Tractions braced up a triffs. Sales at the first call were 15 shares of Phila-delphia Gas at 25, 100 Electric at 28, 110 at 28%, 60 at 28%, 10 at 28%, 120 at 28, 90 Columbia Oil at 2%, and 100 Pleasant Valley at 26%. At second

call 40 Philadelphia Gas brought 25, 100 Electric 2834, and 50 Pipeage 13. At third call 80 Switch and Signal went at 1334, 2 Electric at 2844, 10 at 2854, and 15 at 28. Total sales were 902 shares.

## NEW YORK STOCKS.

Shares Again Dull-Weakness of Lacks wanna in Forenoon and Heavy Selling of Union Pacific in the

Afternoon the Features. NEW YORK, November 14.-The stock market to-day was much less active than for a week past, the general list being comparatively dull, with small ficetuations and practically devoid of feature. There was, however, no lack of animation in a half dozen or more of the leading stocks, and their fluctuations were as large as usual, the prevailing tendency being down

The cause for the renewal of the uneasines in the market was to be found this morning in the dispatches from abroad, which reflected a less confident tone than for the past two days, and indicated that the squeeze for money on the other side was by no means over. Here the money telegraphed from San Francisco yester day and to-day, aggregating \$1,500,000, gave a much easier tone to the money market, and while funds on call were run up to 12 per cent at one time, loans were made as low as 4, and the final one at 5.

at one time, loans were made as low as 4 and the final one at 5.

The domestic news was rather of an encouraging character, but the movements in the market were again principally downward, owing to the operations of the bears who took advantage of the cessation in the disposition to buy for a rise which has been so pronounced for the past day or two. There was, however, buying of an excellent character, and the general list showed its effects.

London prices were generally lower than ours of last evening, and with the news from the other side, encouraged a demonstration against a few stocks at the opening which were very irregular with marked losses in a few stocks, among which Louisville and Nashville, with a loss of 2 per cent: Union Pacific, with 1½, and Atchison and Cleveland, Cincinnati, Chicago and St. Louis, with ½ each, were most conspicuous,

Wesiern Union and North Ameican were

Western Union and North Amelcan were Wesiern Union and North Amelican were the only really strong stocks on the list, the former opening with a gain of 1½ per cent and the latter rising in the early trading from 11½ to 14. A severe drive was made against Pacific Mail with the first sales, and it was depressed 3½ per cent, the decline being accompanied by certain vague rumors, but about which nothing of a definite character was developed. The stock later seemed to give good support and made a substantial raily.

The great feature of the forenoon's transactions, however, was the weakness in Lacka-

The great feature of the forenoon's transactions, however, was the weakness in Lackawanua, for which there was no explanation, and the general opinion was that its friends, who have been standing under it for so long, had quiet'y let it off with the remainder of the list. Its decline was almost continuous, and in the afternoon it touched 131%, from which it recovered only % per cent, against 138% last evening.

the atternoon it touched 161%, from which it recovered only % per cent, against 188% last evening.

North American for the first time in many days ceased to be the most prominent stock on the list, and for some time it was comparatively neglected, while the transactions in it during the day reached a very ordinary figure. The early advance wasn't held, and it slowly drifted back to the neighborhood of 11. There were no new developments in regard to either of the men prominent in its affairs.

The feature of the later dealings was the heavy selling of Northern Pacific preferred, which from 60% declined to 57, and, like Lackawanna, railied only a small fraction. The general impression was that most of the selling came from parties who held it as collateral for loans, and who bought it in at the Exchange. The bears, however, were very active in the stock, and its transactions ran up to the largest figure yet. There was a good buying order in the common, which kept it steady throughout the day.

Sugar refineries again bobbed up in the after-

figure yet. There was a good buying order in the common, which kept it steady throughout the day.

Sugar refineries again bobbed up in the afternoon with a sharp drop, and the leading Grangers were weak, with Louisville and Nashville, of which there was considerable sold for foreign account. The market continued to sell down slowly and steadily, and finally closed active and weak at or near the lowest prices of the day. The final changes are all in the direction of lower figures, even the strong stocks of the forenoon failing to hold any of their improvement, and Lackawanna is down 19: Louisville and Nashville, 36: Union Pacific, 24: Sugar, 24: Northern Pacific preferred, 25: Jersey Central and Canada Southern, each. 13: Archison, 19: St. Faul, 13: Wheeling and Lake Erie preferred, 14: Burlington and Quiney, 14: and New England, Rock Island and Chicago Gas, each, 1 per cent. There was much large dealings in the speculative bonds to-day, and for that reason the total sales of all issues were run up to 32,659,000. Of that amount were 500 Pacific 5a, which displayed a much firmer tone than for the past few days, and, although they failed to advance any, furnished \$257,000. Reading first, \$192,000. Kansas and Texas first, \$165,000; Texas and Pacific seconds, \$163,000, Reading fee, \$113,000, and Rock Island 5a, \$163,000. Reading fee, \$113,000, and Rock Island 5a, \$163,000. Reading fee, \$113,000, and Rock Island 5a, \$163,000. The pressure upon

these issues gave the list a heavy tone aagin, and material losses are more numerous tonight. Rock Island 5s lost 2½ at 98½; Louisville, New Albany and Chicago consols, 2 at 92; Reading 4s, 2 at 77, and the firsts 3 at 54.

The Post says: The temper of the stock market experienced an entire change to-day from yesterday, and the change was distinctly the result of the less favorable aspect of affairs in London, together with the continued high sales of interest, which are mainly the result of the situation here. Yesterday large amounts of money came into Wall street to buy stocks upon the belief that the London situation had cleared up, and that as all weak spots here had been developed, and their effects fully discounted, it was a good time to buy stocks; but to-day there was no such disposition. Aside from the stringency of money and the apprehensions of trouble in London, all the conditions here are in favor of higher prices for railroad stocks. The movement on the part of many of the Union Pacific stockholders, and also of the officials of the other Granger roads, to break up the Union Pacific stockholders, and also of the officials of the other Granger roads to break up the Union Pacific stockholders, and also of the officials of the other Granger roads, to break up the Union Pacific stockholders, and also of the officials of the other Granger roads, to break up the Union Pacific stockholders, and also of the officials of the other Granger roads.

There was an unusually active demand here for cables this morning, which some persons imagined indicated a desire to advance the rates of exchange to a gold exporting point. There is, however, not the slightest occasion for thinking that any gold will be either exported or imported while the rates of interest are so high that the time for transit across the ocean (and during which time the capital is practically out of existence) would make it a very losing transaction. The increased demand for cables to-day was undoubtedly the effect of the desire to move money t

count.

MINNEAPOLIS—Spot wheat was very dull to-day owing to the severe decline in prices. Good high grades met a price they could all be sold at to to to store while selections to bring about that were slow, if they were not really chosen. PHILADELPHIA AHEAD

McAllister Awards the Palm to the Sleepy City on Terrapin, Philadelphia Press.]

In Mr. McAllister's classic, "Society as I Have Found It," he discusses the vexed question whether the Philadelphia or Baltimore style of cooking terrapin is the better. Mr. McAllister indorses the Philadele phia. This is a subject upon which he is particularly happy and sensitive, for it is his opinion that New Yorkers are obliged to go away from the city to get terrapin. It is served in almost all the swell restaurants, but Mr. McAllister advises his friends never to touch it in such places, and a suspicion has been created that terrapin stew, as it is known in New York, consists of one part of cheap mud turtle, one part of liver, and one

part of condiments skilfully flavored, on the same plan which makes mock-turtle soup.

There is another custom which has grown recently enormous in New York, which Mr. McAllister frowns upon. This is a cheap and reprehensible imitation of that aristic cutinary delight of Doston known as broiled lobster. It is with a very wry face and gesticulation expressive of disgust that Mr. Mo-Allister says that New Yorkers never have

broiled lobster. only kind of buying of sufficient bulk to turn the price.

Hutchinson tried to stop the decline, but he soon perceived that there was too much force arrayed against him, and he abandoned the attempt. There was heavy liquidation of country holding, and, altogether, a very large business. Oats were active, but weaker, and a good decline was recorded, the finish showing a net loss of 1½@1% from yesterday's close. The opening was weak and %@% lower, and quickly started on the down grade, at one time dropping le for May, with few intervening trades. Shorts bought liberally on the decline, and a reaction of %c followed, but was not all maintained until the close. morsel for a gournet, for they take a live lobster, kill it by thrusting a needle through the back, split it instantly and put it on the grill. Thus the sea flavor is retained, while New Yorkers are content to have a lobster which has died in the fish stalls, and which has then been boiled, cut open, placed on the gridiron, heated through and then served as broiled lobster, and this Mr. McAllister propounces an artistic offense. Whether it is a shock to art or not, McAllister's de-scription of the New York method is entirely accurate, although the dish has become

enormously popular here.

Youths' Companion.] Tommy is very hard on shoes and trousers, His mother understands this, and governs herself accordingly when she goes shopping. One day, while out with another lady, she was buying cloth for a pair of pantaloous for Tommy, and ordered a good deal more

than seemed necessary. "Why do you get so much?" asked her friend. "Oh," was the reply, "this is for reserved seats!
