Perhaps never before in the history of the country has legitimate business sustained severer assaults than during the past three or four weeks. London, New York and Philadelphia combined to produce a panic,

but the result was a conspicuous failure outside of speculative circles. The great activities of the country have emerged from the

ordeal practically unscathed, What more is needed to show that business is on a sound footing? Caution is all that is necessary to

carry the country safely through the remaining weeks of the year. The disposition of banks and business men

to help each other is a source of encouragement to all, and has a great deal to do with bringing about the restoration of confidence, which is appreciated on all sides. A Landmark Gobbled.

A Wilkinsburg Deal.

Property in Wilkinsburg is looking up. W. E. Hamnett sold yesterday a lot 22x110, on the northeast corner of Penn avenue and Wood street, for James Horner for \$3,630, or \$165 a foot front. This is the highest price ever real-

ized for property in the horough, and shows the high estimation in which it is held by in-vestors. The purchaser, Mr. A. Patton, a prominent Crawford county merchant, will erect a fine business house on the lot at once.

Contracts have been let for 27 dwellings, all by purchasers of lots, and plans are under way for 12 more. All of these houses are to be completed early next spring. It is probable that nearly all of the lots sold will be built on next year. Several business houses are talked of.

The exports of specie from the port of New York last week amounted to \$508,459, of which \$73,562 was in gold and \$434,927 silver. The im-ports amounted to \$502,316, of which \$305,420 was in gold and \$25,805 in silver. The Post says: London was again a buyer of stocks this morning, and the early proces were bigher than the closing figures last night. Discounts there are easier, and the whole financial situation there is improving. But London is not the leading factor in the ad-vance in stocks now. To a considerable extent capital there will be still locked up in the mass of from \$700,000,000 to \$800,000,000 Argentine se-curities, which will have to be nursed by the addition of other capital, while the syndicate of bankers who hold them will necessarily have to assume a practical protectorate over Argentine finances and Argentine po-litics. The panic in stocks and railway securities generally had its immediate origin in London, but the recovery, which seems to have set in at last, after six months of decline, is almost entirely due to the buying of stocks by American capital, s large part of it being the capital of the general pub-lic, who are not the usual speculators in stocks, but only come in as buyers in conjunction with the great and radical change of values. NEW YORK STOCKS.

#### Bank Statement Shows a Small Margin on the Right Side, and Ail Stocks but Two Advance-Causes of the Rise.

NEW YORK, November 22 .- The stock market to-day was still very active and decidedly strong throughout the session, the opening prices as a rule being the lowest of the day. while the final are either at or near the highest. The buying to-day was even more pronounced than that of yesterday, and the feature was a heavy demand from brokers indentified with the leading bear operator. Among the strong stocks may be mentioned Manhattan, Wheeling and Lake Erle preferred, Union Pacific and Rock Island, but the advance extended all

large operators secured big blocks of the lead-ing speculative stocks at panic prices, in some instances to save the collapse of important con-cerns possibly, and in some other instances be-cause it gave these people a chance to get con-trol of certain properties. These holdings, or some of them, will doublies be for sale before long, but they may be withheld long enough to make a further rally possible. There has been an unusual amount of outright buying of low-priced stocks by small traders, which also tends to diminish the floating supply. These arguments have begun the latter part of the week to operate on the minds of shorts and outside traders, who are as usual tempted in at advancing figures. There was a big fail-ure in Chicago to-day, a rolling stock company, but it had no effect here, and the bank state-ment showing a loss of about \$300,000 in actual cash (though a gain in reserves of \$22,000) cut no figure in the market. As we said leat night there is no use to orgue about whether things are all right or not. Those who have been bearish on general conditions cannot persuade themelyes that the situation has radically along the line, and the final gains are proportionately larger than those of yesterday. The bank statement showed only a slight bange in the surplus revenue, but it was on the right side, and the banks are once more above he requirements of the 25 per cent rule, although the surplus is only a few thousands bearish on general conditions cannot persuade themselves that the situation has radically changed, though they must recognize the fact that an acute panic in London was averted, and this favorable sentiment created from a The large decrease in the loans, amounting to nearly \$6,000,000, was regarded as encouraging, as it reflects the purchases of securities which have been paid for outright and taken from the

sense of relief. The market is a hard one to read just now. The market is a hard one to read just now. So many bulls have lost money that it can hardly be expected that the recovery from a state of panic can be immediately permanent, but on the other hand the powers here, in London, New York and Philadelphia, who have come to the rescue of failing firms are im-mensely interested in "whooping things up" to enable them to ultimately soll. We must con-fess that at this writing it looks as if the mar-ket had a momentum which will carry it ma-terially higher irrespective of any general con-ditions. The power of capital now appears to be effectually back of it. There was some selling by arbitrage brokers, and also some talking of profits by the traders, who say that the advance has been too rapid to last, but the demand was so urgent that there was no interruption to the upward movement, and only one or two weak spots in the entire list. North American was one and the other

Villard stock hesitated in sympathy. The market opened with a continuance of the activity and strength of yesterday and the open-ing advances were generally for large fractions, while Missouri Pacific and Canada Southern each were 1½ per cent higher. Great activity marked the dealings during the first hour and the upward movement was very pronounced, the whole list, with the exception of the Vil-lards and one or two specialities, advancing with great rapidity. There was some hesitation be-fore the issue of the bank statement, but after that was issued the upward movement was re-sumed and the stock market closed strong and active at the best prices of the day. North American yielded slowly and is alone in showing a decline of all the active stocks. The loss was 1½ per cent, but on the other hand Lackawanna rose 2½. Rock Liand, 2½; Union Pacific, 2; Wheeling and Lake Erie preferred and Missouri Pacific, 1½; Atchison and St. Paul, 1½; Canada Southern and Louisville and Nashvile, 1½, and Clevenand, Cincinnati, activity and strength of yesterday and the open-
