TAKE

ON THE HOLY HILLS.

Rev. Dr. Talmage's Sermon is a Continuation of His Remarkably

REALISTIC VIEWS OF PALESTINE.

Even Jesus Influenced by the Surroundings of Early Youth.

THE SCRIPTURAL AND MODERN WINES

SPECIAL TELEGRAM TO THE DISPATCH. 1 BROOKLYN, November 23 .- The interest in the series of sermons in which Dr. Tal-

since leaving Jerusalem, and all of us as kindly treated as though we had been the Pope and observed a bundred bright-eyed Arab children ught out to sing for me, and it was glorious! has morning I come out on the steps of the convent and look upon the most beautiful vil-lage of all Palestine, its houses of white lime-stone. Guess its name! Nazareth, historical Nazareth, one of the trinity of places that all Christian travelers must see or feel shat they have not seen Palestine, namely Bethlehem, Journalem, Nazareth. Babyhood, hoyhood, namhood of Him for whom I believe there are 50,000,000 people who would now, if it were re-quired, march our and die weether under ax, or down in the floods or straight through the fire.

Grand old village is Nazareth, even putting saide its sacred associations. First of all, it is an; and that can be said of few of the Orienal villages. Its neighboring town of Nablous the filthiest town I ever saw, although its her export all of it Nazureth was perhaps nusually clean the morning I speak of, for, as e tode into the village the afternoon before, is showers which had put our machintosies of the test had poured floods through all the lary under command of the clouds, those ministioners.

a Bonaparte commanding, that greates norals of the two, the antipodes, the snows ussia and the plagues of Egypt appropri-following the one, the doxologies of earth e halfelujahs of beaven appropriately or the other. And then this town is so situated in a great green bowl, the es of the bowl, the surrounding 15 hills, he God of nature who is the God of the evidently scooped out this valley for y and separation from all the world durof Christ's botheod and youth, for of the 33 cents of Christ's stay on earth, he spent 30 of them in this town in getting ready—a startling them in this town in getting ready—a startling them to those who have no patience with the ong years of preparation necessary when they relet on any special mission for the Church or the world. The trouble is with most young men that they want to launch their ship from the drydock before it is ready, and hence so many sink in the first cyclone. Stay in the tore as a subordinate until you are thoroughly supposed. He a good employe in your trade until you are qualified to be an employer. Be content with Nazareth until you are ready for the buffetings of Jerusalem.

INFLUENCES OF YOUTH. Il Christ's boyhood was spent in this village other's side He trotted along holding No doubt about it; it is the only ell in the village, and it has been the only well This morning we visit it, and inve the children with them now work of drawing water in all countries has been women's work. in these countries has been women's work, sof them are waiting for their turns at ce great and everlasting springs rolling to that well their barrels, their hogsheads for in floods gloriously abundant. The is surrounded by olive groves and spaces, in which people talk and chilwearing charms on their heads as proposed against the "evil eye," are playing, and movin their strings of coin on either side or face and in skirts of blue and scard white and green move on with watern their beads. Marx, I suppose, almost stock Jesus the boy with her, for she one she could leave Him with, being in took Jesus the boy with her, for she one she could leave Him with, being in circumstances and having no atten-

I do not believe there was one of the inding Io hills that the boy Christ did not

me from bottom to top, or one cavern in

somes he did not explore, nor one species ord flying across the tops that he could not by mane, or one of all the species of fauna using on those steeps that He had not resee it all through His sermons. If a man You see it all through His sermons. If a man comes a public speaker, in his orations or scourses you discover his early whereabouts, and a boy sees between 7 and 17 always sticks imm. When the Apostic Peter preaches, you is the fishing nets with which he had from earliest days been familiar. And when mos delivers his prophecy you hear in it is bleating of the herds which he had in princed attended. And in our Lord's sermons if conversations you see all the phases witage life and the mountainous Hife surveinding it. They raised their own chickens Nazareth, and in after time He cries; "Orusaiem! Jerusalem! how often would I have thered thee as a hen gathereth her chickens hered thee as a hen gathereth her chickens her her wings?" He had seen his mother on the family wardrobe at the close of sum or and the moth miliers flying out, having de the garments, and in after years he "Lay not up for yourselves treasures on the where moth doth corrupt." In childhood had seen a mile of flowers, white as the v or red as the flame or blue as the sea or a sethe tree-tows, and no wonder in His hood sermon He said, "Consider the

creaks of nature all through Christ's serand conversations. When a pigeon dehe Jordan it was not the first pigeon He had con. And then He has such a wide sweep of scourse as you may imagine from one who as stood on the hills that overlook Nazareth. If an as I understand, Christ visited the Mederraneau Sea only once, but any clear morning He could run up on a hill near Nazareth and look off to the west and see the Mediternean, while there in the north is snow jount Lebanon, clad as in white robe of assession, and vonder on the east and southeast on, and youder on the east and southeast it Gilboa, Mount Tabor and Mount Gilead, onder in the south is the Plain of Estraover which we rode yesterday on our way gareth. Those mountains of His boyhood his memory, do you wonder that Christ when ontain—"seeing the multimes He went up the mountain." And when He wanted scial communion with God, He took James into the mountain." And when He wanted especial communion with God, He took James and John and Peter into "a mountain apart." 3 6th, this country boy of Nazareth, come forth to atome for the sins of the world, and to correct the follies of the world and to stamp out the crueltees of the world and to illumine the darkness of the world and to illumine the hemispheres! So it has been the mission of the country boys in all ages to transform and inspire and rescue. They come into our merchandise and our court rooms and our healing art and our studies and our theology. They have an our studies and six the race. Late hours and histories would have eanervated and sickened and siain the race. Late hours and histories and crowding environments of city life would have halted the world, but the vallers and mountains of Nazareth have given fresh supply of health and moral invigunation to Jerusalem, and the country saves the town. From the hills of New Hamischire and the hills of Virginia and the hills of Georgia come into our national eloquence the Weisters and the Clays and the Henry W. Gradys. From the plain homes of Massachusetts and Maryland come into our national cleatinies the George Peabodys and the William Corcorans. From the casins of the lonely country regions come into our national destinies the Andrew Jacksons and the Abraham Lincolns. From plowbay's furrow and village counter and libraismith's force come most of our city gamts. Nearly all the Messiahs in all depantments dwelt in Nazareth before they came to Jerusalem. I send this day thanks from these cities, mostly made prosperous by country boys, to the farmbouse and to the prairies and the ves, mostly made prosperous by country boys, the farmbouse and to the prairies and the omtain cabins, and the obscure homesteads North and South and East and West, to the its and mothers in plain homespun if they ill alive or the hillocks under which they

AS IN DAYS OF OLD. But, alas! that the city should so often treat

the long sleep. Thanks from Jerusalem

the country boy as of old the one from Nazareth was treated at Jerusalem! Slain not by hammers and spikes, but by instruments just as cruel. On every street of every city the crucifixion goes on. Every year shows its 10,000 of the slain. Oh, how we grind them up! Under what wheels, in what mills and for what an awful grist! Let the city take better care of these boys and young men arriving from the country. They are worth saving. They are now only the preface of what they will be if, instead of sacrificing, you help them. Boys as grand as the one who with his elder brother climbed into a church tower and, not knowing their danger, went outside on some timbers, when one of those timbers broke and the boys fell, and the older boy caught on a beam and the younger clutched the foot of the older; the older could not climb up with the younger hanging to his feet, so the younger said: "John, I am going to let go; you can climb out into safety, but you can't climb up with me holding fast; I am going to let go; kiss mother for me and tell her not to feel badly; good-by!" and he let go and was so hard dashed upon the ground he was not recognizable. Plenty of such brave boys coming up trom Nazareth! Let Jerusalem be careful how it treats them.

A gentleman long ago entered a school in

in the series of sermons in which Dr. Talmage is describing his recent tour in Palestine and inculcating gospel lessons suggested by his theme, increases from week to week. There was never so large a crowd at any one of the previous eight sermons as there was to-day around the Brooklyn Academy of Music in the morning and at the service in the evening to hear the ninth sermon, the subject of which was:

"Among the Holy Hills," and the text, Luke 4: 16. "He came to Nazareth, where he was brought up." Following is the sermon:

What a splendid sleep I had last night in a Catholic convent, my first sleep within doors since leaving Jerusalem, and all of us as kindly treated as though we had been the Pope and his vollege of cardinals passing that way. Last DIFFERENT KINDS OF WINE.

In about two hours we pass through Cana, the village of Palestine, where the mother of Christ and our Lord attended the wedding of a poor relative and having come over from Nazareth for that purpose. The mother of Christ-for women are first to notice such things-found that the provisions had fallen short and she told Christ and He to relieve the embarrassment of the housekeeper, who had invited more guests than the pantry warranted, became the butler of the occasion, and out of a cluster of a few sympathetic words squeezed a beverage of 125 gallons of wine in which was not one drop of intoxycant. of a cluster of a few sympathetic words squeezed a beverage of 125 gallons of wine in which was not one drop of intoxicant, for it would have left that party as maudin and drank as the great centennial banquet in New York two years ago left Senators and Governors and Generals and merchant princes, the difference between the wine of the wedding in Cana and the wine at the banquet in New York being that the Lord made one and the devil made the other. We got off our horses and examined some of these water jars at Cana, said to be the very ones that held the plain water that Christ turned into the purple bloom of an especial vintage. I measured them and found them 18 inches from edge to edge and 19 inches deep, and declined to accept their identity.

But we realized the immensity of a supply of 126 gallons or wine. What was that for? Probably one gallon would have been enough, for it was only an additional installment of what had already been provided, and it is probable that the housekeeper could not have guessed more than one gallon out of the way. But 126 gallons! What will they do with the surplus? Ah, it was just like our Lord! Those young people were about to start in housekeeping, and their means were limited, and that big supply, whether kopt in the pantry or sold, will be a mighty heip. You see there was no strychnine, or logwood, or nux vomica, in that beverage, and, as the Lord made it, it would keep, He makes mountains and seas that keep thousands of years, and certainly He could make a beverage that would keep four or five years. Among the arts and inventions of the make a beverage that would keep four or five years. Among the arts and inventions of the future I hope there may be some one that can press the juices from the grape and so mingle them and without one drop of damning alcoholism that it will keep for years. And the more of it you take the clearer will be the brain and the healthier the stomach. And there is a remarkable fact in my recent journey—I traveled through Italy, and Greece, and Egypt, and Palestine, and Syria, and Turkey, and how many intoxicated people do you think I saw in all those five great realms? Not one. We must in our Christianized lands have got hold of some kind of beverage that Christ did not make. make a beverage that would keep four or five

THE HIGHEST PULPIT. There are rocks around me on this Mount of Beatitudes, enough to build the highest pulpit the world ever saw. Aye, it is the highest pulpit. It overlooks all time and all eternity. The valley of Hattin between here and Lake and its surroundings. There is the very well Galilee is an amphitheater, as though the allen 'The Fountain of the Virgin,' to which preach a sermon, in which there were more startling novelties than were ever announced in all the sermons that were ever preached. To those who heard Him on this very spot, His word must have seemed the contradiction of everything that they had ever heard or read or experienced. The world's theory had been: Blessed are the arrogant; blessed are the supercilious; blessed are the laberty blessed are the week past nations to come and sit down, and hear Christ read or experienced. The world's theory had been: Blessed are the arrogant; blessed are the supercilious; blessed are the tearless; blessed are the year less; blessed are the war eagles; blessed are the year easies; blessed are the Herods and the Cobars, and the Ahabs. "No! no! no!" says Christ, with a voice that rings over these rocks, and through yonder valley of Hattin, and down to the opaline lake on one side, and the sapphire Mediterranean on the other, and across Europe in one way, and across Asia in the other way, and around the earth both ways, till the globe shall yet be girdled with the nine beatitudes; blessed are the poor, blessed are the bungry, blessed are the poer, blessed are the bungry, blessed are the merciful, blessed are the pure, blessed are the peacemakers, blessed are the persecuted, blessed are the peacemakers, blessed ar

LIVE STOCK MARKET.

Condition of Trade at the East Liberty Stock Yards.

OFFICE OF THE PITTSBURG DISPATCH, SATURDAY, November 22, 1890. Cattle-Receipts, 1,596 head; shipments, 1,143 head; market nothing doing to-day; prospects favorable for next week; 4 cars cattle shipped

Invorable for next week; 4 cars cattle shipped to New York to-day.

Hogs—Receipts, 2,200 head: shipments, 2,900 head; market firm: Philadelphias, 83 9064 by; mixed, 83 6562 80; heavy Yorkers, 83 4063 50; light Yorkers, 83 2063 35; 10 cars of hors shipped to New York to-day.

Sneep—Receipts, 800 head; shipments, 800 head; market slow at unchanged prices.

By Telegraph.

When baby was sick, we gave her Castoria, When she was a Child, she cried for Castori When she became Miss, she clung to Castoria When she had Children, she gave them Castoria

v demonstrated by the great growth of the express business. About 50 horses are employed to deliver packages to Oakland, Shadyside, East Liberty and beyond, outside of those employed by the merchants of the city in delivering goods. One company employs 13 teams constantly, and, in present condition of East End streets, the work is very trying to the patience and muscle both of horse and human flesh. Last winter this of horse and human fiesh. Last winter this company lost six horses, and, from present condition of streets in eastern suburbs, as many are likely to succumb this winter.

One expressman, who, until recently has been delivering as far east as Wilkinsburg, has lately retired from the field. There are no harder worked men or horses in our city than those employed in delivering packages to the suburbs.

Hides Still Dull. The hide market continues dull. From al centers of trade advices of drooping tendencies are received. A letter received by one of our dealers to-day, from one of the leading opera-tors in Boston, says: "The financial cloud over the country makes buyers very cautious. There is no change for the better, but rather the re-verse. The drooping tendency in our hide market still continues."

market still continues."

The tanners of Pittsburg and Allegheny are offering within \(\frac{1}{2} \) to pound of the lowest price reached by light hides last spring. This brings prices \(\frac{1}{2} \) below last week's offers. Heavy hides and calf skins are practically unchanged, but dull and slow.

The following from the \(\frac{1}{2} \) to ond \(Leather Review \) opens up a subject of great importance to the tanning industry: The Bark Problem.

"One casually would scarcely comprehend the great drain which is annually being made upon our bark-producing forests. Half a century ago the tanning industry of the United States ago the tanning industry of the United States was uentered in Western Massachusetts and Eastern New York. Gradually by the denudation of the forests and the development of the Great West the industry has become more generally disseminated, until to-day prosperous tanneries are scattered throughout many states of the Union. But as the bark supply becomes limited in one section the industry is becomes limited in one section the industry is apt to seek new fields. This has been demon-strated in the East. Western Massachusetts apt to seek new helius. This as teem dealor strated in the East. Western Massachusetts to-day does not possess a dozen firms, and those in Northern and Eastern New York, Maine, New Hampshire and Vermont are gradually geing out of the business. Bark, which is such a factor in the production of the heavier leathers, is becoming too scarce and too dear to make the business profitable.

"Each succeeding year notes an increased demand for both oak and hemlock bark. This increase is not alone due to our own growth and development as a nation, but to the increased call for American leather or extract which other nations make upon us. This country is not alone expected to supply the hark for tanning the leather used by its own 61,000,000 people, but in addition to our own population we must supply the tannin or leather for nearly as many more.

"How much bark have we left on the trees? How long will it continue to supply this

"How much bark have we left on the trees?
How long will it continue to supply this country with tannin to: the great number of vats and prospective vats? Perhaps the man of to-day—the generation of to-day—need not worry. There is no danger of the supply giving out right away, and forcing barefooted nations into existence. There is much bark left in Pennsylvania. There are millions upon millions of cords still standing upon the great trees of Michigan, Wisconsin, Minnesota and other Western States through to the Pacific slope. The South and Southwest will still yield us cords upon cords. Virginia and West Virginia still yield, and will continue to give our Pittsburg. Wheeling and Cincinnati tanners oak bark for their famous harness leather."

Hogs and Provisions.

It will be seen by reference to domestic mar-

dustbins, are extremely valuable, and find their way again into our houses in most artistic forms. They are soaked in many waters to remove the dirt, all the nails and threads are picked out, and the leather reduced to a thick pulp, from which the now fashionable wall papers, screens, etc., are made. The finer the original quality of the leather the better it takes the bronze and old gold of the designs which make these hangings things of beauty. Bookbinders and framemakers also know full well the value of this pulp, and carriage builders press it into sheets, which are invaluable for the roofs of the most luxurious vehicles. After this one feels that the word "rubbish" is a misnomer, and that no such thing exists. is a misnomer, and that no such thing exists,-

NEW YORK STOCKS.

Bank Statement Shows a Small Margin the Right Side, and Ail Stocks but Two Advance-Causes

of the Rise. NEW YORK November 21.-The stock market to-day was still very active and decidedly strong throughout the session, the opening prices as a rule being the lowest of the day, while the final are either at or near the highest The buying to-day was even more pronounced than that of yesterday, and the feature was a heavy demand from brokers indentified with the leading bear operator. Among the strong stocks may be mentioned Manhattan, Wheeling and Lake Erie preferred, Union Pacific and Rock Island, but the advance extended all along the line, and the final gains are proporionately larger than those of yesterday.

The bank statement showed only a slight hange in the surplus revenue, but it was on the the requirements of the 25 per cent rule, alhough the surplus is only a few thousand The large decrease in the loans, amounting to early \$6,000,000, was regarded as encouraging as it reflects the purchases of securities which have been paid for outright and taken from the

street. There was some selling by arbitrage brokers, and also some talking of profits by the tracers, who say that the advance has been too rapid to last, but the demand was so urgent that there was no interruption to the upward movement, and only one or two weak spots in the entire list. North American was one, and the other Villard stock hesitated in sympathy.

The market opened with a continuance of the activity and strength of yesterday and the open activity and strength of yesterday and the open-ing advances were generally for large fractions, while Missouri Pacific and Canada Southern each were 1½ per cent higher. Great activity marked the dealings during the first hour and the upward movement was very pronounced, the whole list, with the exception of the Vil-lards and one or two specialties, advancing with great rapidity. There was some hesitation be-lore the issue of the bank statement, but after that was issued the upward movement was rethat was issued the upward movement was re-sumed and the stock market closed strong and

sumed and the stock market closed strong and active at the best prices of the day.

North American yielded slowly and is alone in showing a decline of all the active stocks. The loss was 1½ per cent, but on the other hand Lackawanna rose 2½, Rock Island, 2½; Union Pacific, 2; Wheeling and Lake Erie preferred and Missouri Pacific, 1½; Atchison and St. Paul, 1½; Canada Southern and Louisville and Nashville, 1½, and Cleveland, Uncinnati, Chicago and St. Louis 1 per cent.

Railroad bonds were as active as usual of late and the strength of the market was in strict conformity to the advance in the share list, the final changes showing many marked gains among the active bonds. The sales were \$1,150,000, out of which the Texas Pacific incomes furnished \$123,000. The important advances were: Burlington and Quincy, Nebraska 4s, 3 to 88; Hocking Valley 6s, 3 to 83; Mobile and Ohio 4s, 2½ to 68; Northern Pacific 5s, 2 to 85.

The exports of specie from the port of New York last week amounted to 8568 480 of which

The exports of specie from the port of New York last week amounted to \$508,489, of which York last week amounted to \$508,459, of which \$73,562 was in gold and \$434,977 silver. The imports amounted to \$333,815, of which \$505,420 was in gold and \$26,895 in silver.

The Post says: London was again a buyer of stocks this morning, and the early prices were higher than the closing figures last night. Discounts there are easier, and the whole financial situation there is improving. But London is not the leading factor in the advance in stocks now. To a considerable extent capital there will be still locked up in the mass of from \$790,000,000 to \$200,000,000 Argentine securities, which will have to be cursed by the addition of other capital, while the syndicate of ddition of other capital while the syndicate of

curities, which will have to be dursed by the addition of other capital, while the syndicate of bankers who hold them will necessarily have to assume a practical protectorate over Argentine finances and Argentine polities. The panic in stocks and railway securities generally had its immediate origin in London, but the recovery, which seems to have set in at last, after six months of decline, is almost entirely due to the buying of stocks by American capital, a large part of it being the capital of the general public, who are not the usual speculators in stocks, but only come in as buyers in conjunction with the great and radical change of values.

The lowest prices for all stocks which have been made for years, were those of November 15, 18 and 19. From that point there has been a general recovery of from 2 to 5 points in the last week, though this still leaves all the active stocks from 18 to 25 points below their prices in May.

The following table shows the prices of active

Boston Stocks.

Philadelphia Stocks. Closing quotations of Philadelphia stocks, nished by Whitney & Stephenson, brokers, N Fourth avenue, Members New York Stock change: Pennsylvania Railroad, ...

Reading Buffalo, Pittsburg & Western. Lenigh Valley. Lehigh Navigation Northern Pacific preferred...... WEATHERED THE STORM.

Develop Recuperative Power. Local stocks had a hard road to travel last week, and some of them showed signs of exhaustion. Nearly everything on the active list

Stocks Depressed by the Eastern Flurry, but

was shaded off. Support was found for the leaders, however, at the most critical period. This prevented any bad breaks.

Gradually it dawned upon investors and brokers that the scare was more imaginary than real, and a reaction set in which held until the close, which was large fractions to points better than the lowest.

Trading was light Saturday, but there was a buoyant feeling in response to continued cheerful advices from New York, Sales were 10 shares of Luster at 23%, 50 Electric at 24%, and 50 Philadelphia Gas at 23%, A small lot of Electric scrip brought 50. Total sales were 10 shares. Sales for the week, 2,435 shares.

NO WILD CAT MONEY,

But Enough to Keep Business on Its Legs-

Money ruled closer in Pittsburg the past week than for a long time. The banks were well supplied with funds, but their habitual consupplied with funds, but their habitual conservative policy caused them to tighten the
lines to protect their customers. All persons
entitled to credit got all they wanted, but outsiders were barred out. The feeling was a little
easier at the close of business yesterday.

If there was a panic the Clearing House report doesn't show it. Bank exchanges were
over \$500,000 larger than those for the previous
week and nearly \$4,000,000 in excess of those for
the corresponding week in 1889. These figures
show that there is no reason for complaint:

Saturday's exchanges..... 2,619,202 Drygoods.

NEW YORK, November 22.—There was a fair trade in drygoods for Saturday. The tone of the market continued steady to firm, and the following price changes were made by agents: New York Mills D and T cotton advanced 5 per cent: New York Mills light check cottonades advanced 2½ per cent. THAT hacking cough can be so quickly cured by Shilob's Cure. We guarantee it. Sold by Jos. Fleming & Son, 412 Market st.
