The First Cold Snap of the Season Finds the Supply in Both Cities Not Up to the Demand.

A COLD AND ANGRY POPULATION

Inquires as to How Long the Public Must Wait Before a Satisfactory Supply Can be Had.

THE SAME OLD PROMISES RENEWED.

Philadelphia Gas Officials Say There Will be Plenty of Gas Next Week.

The supply of gas in the mills and private residences was shorter yesterday than at any other time this winter. The sudden change in the weather and a natural decline in the supply were the chief causes.

The greatest trouble was over in Atlegneny, where all of the mills using gas were either compelled to close down or be satisfied with part of a day's work. In some of the houses there was not enough gas to cook a meal, and everybody was angry.

Mills and factories on the Southside and Lawrenceville were put to an endless amount of inconvenience. However, as the manufacturers are preparing to discontinue the use of gas, and it is said that no less than 500 furnaces will be turned off within the next few days, gas company officials think there will be a more satisfactory supply Wery soon.

There were more complaints received at the office of the Allegheny Heating Company than anywhere else, and the officials of that company did all they could to give the people more gas. But, as their supply is received from the Philadelphia Company, and the latter was giving all the gas they had, they could not offer much relief to their shivering, angry patrons.

THE MILLS HAVE TO GO.

Frank Wilcox, the Assistant Superintend ent of the Philadelphia Company, was seen in the afternoon. He was found looking over a list of the mills and the number of furnaces each will have turned off to-day in the two cities. The number and their locations have already been published in THE DISPATCH, during the last two weeks, while the owners have been making the necessary changes for the use of coal.

We will shut off about 500 furnaces,' said Mr. Wilcox. "This, I think, will give us plenty of gas by Monday. Of course, all of the furnaces will not be cut off at once. Some of them may not be ready to go back to coal on the 1st, but we will not push any of the firms. We only have seven wells on our Bellevernon line, but we are drilling 23 others, and we ought to have three of those in to-morrow. But then we have been exthey are not in yet.

"It is impossible to tell anything about a in. If these wells turn out all right, we will have all the gas we will need inside of a month. Although our gas is short, and it has been right along, for that matter we have not received many complaints here Of course, it is the same old story. Whenever a cold snap comes, people try to get every inch of gas their fires are capable of burning, and when you say the supply is strained, you tell the whole story. It is not because there was less gas to-day toan yesbut it is because that the demand, by of the colder weather, is greater.

MUCH MORE OF A DEMAND.

"We supply over 20,000 houses, in which there are fully 75,000 fires. But suppose there would only be an additional fire in each house when a cold spell comes, the difference in the amount of gas used would will be exceedingly great. But in many houses two or three fires are added.

"There is another thing that makes the supply seem shorter. Since the people have bernn to use meters, they turn out the cas at night and their houses get cool. In the morning it takes more gas to heat up again. I know this has been the case in my own

President Pew, of the People's Company, was also seen. The company was not troubled very much yesterday, as it has one of its new pumping stations in operation, and the second will be started about the middle of next week. It also has the foundation for a third station about completed, and does not expect to have much trouble supplying its customers.
Yesterday was the coldest day of the

season, so tar, and this had all to do with the gas supply. But the supply seems to be ort at all times, and the cold snaps as they come trotting along at intervals only serve to impress the people with the fact. Consumers are beginning to be auxious conceruing the matter, and to know whether they will be compelled to follow the manufacturers back to the use of coal or not,

THE WORST TO SUFFER. Among the places that suffered most yesterday were: Allegheny citizens; houses along Wylie avenue; lawyers' offices on Diamond street; the Tradesmen's Bank; the Court House, pension office, Howard block, on the Southside, and many

offices on Fifth avenue.
In regard to economy in the use of gas, a gentleman who is posted on the matter said

yesterday: "Fuel in all past time having been dirt cheap in Pittsburg, her people have little idea of the amount of heat they have wasted in the last 90 years. They are few eightroom houses in which there are not kept burning at least three fires in grates in the wanter, and the flues leading from these grates are so imperfectly constructed and the grates so set that 66% per cent of the heat is drawn up the chimney.
"By use of some furnaces placed in cellars

this waste can be reduced to 10 per cent. By placing a radiator in the hall the bed chambers can be sufficiently heated in any weather without registers, save perhaps in the bathroom and in one room where it may be needed in case of sickness. I know of one heater in a house isolated in the country, whereone of these furnaces gives a temperature of 75 to 80 degrees in six rooms in midwinter with an expenditure of two bushels of coal in 24 hours. Had there been no waste in rolling mills and had all houses in these cities been fitted with these heaters, our gas supply need not have been in danger at present, and half of the wells now bor and producing might have been saved for future use. It is probably safe to say that 75 per cent of the gas used in the last four

## BAD FOR THE MAN IN THE CHAIR. A Barber Assaulted While He Was Shaving a Customer's Throat.

years has been wasted."

Dude McFadden, a sailor, 62 years old, went into Frank Sauerwein's barber shop, No. 550 Grant street, last evening, and noted in a boisterous manner. Sauerwein told him to behave, whereupon McFadden struck the barber, causing him to cut a nick in the throat of a man he was shaving. McFadden left the shop, but was pursued by Sauerwein who, with the aid of Coroner McDowell, captured McFadden and sent

Southside Boy Just Learning that it's Cruel to Wound Animals for Pastime-He was Arrested for Shooting a Dog-A Peculiar Case.

System Called Up

Judge Ewing and Jury Commissioners Walker and Jiles are now making up the list of jurymen who will be called upon to

serve during the year 1891. Thirty-five hundred names will be selected, two of the three furnishing 1,167 each, and the third 1,166. These lists must be prepared on or before the first Monday in January, and the names be ready for the wheel. These names are numbered on the tab from 1 to 3,500, and the names, with corresponding numbers, are copied into a book, which is kept in the Prothonotary's office, and is at all times open for the in-

and the total number is never drawn. Before the Brooks law came into effect the usual veariy drawing amounted to about 3,200, but since that time not more than 2,800 or 2,900 are taken from the wheel. When the new lists are prepared the names remaining in the wheel are taken out and

These precautionary measures have all had their origin within the last 12 years, but for all of that it has been a fond desire of when they will personally visit the ground and examine the claims made by both parthe Bar Association for several years to still further reform the jury system by having the courts appoint the commissioners instead of having them elected by the people.

At the last session of the Legislature, it will be remembered that George Shiras III. introduced a bill covering this particular point, at the request of the association, and it was reported tavorably from the Judiciary Committee, to which it had been referred, but the business of the session was so extensive that it was not reached on the calendar before the date of final adjourn-

A member of the association, in speaking of the matter last night, said that the bill would be revived at the coming session of the Legislature, and that many local atble consideration. The main argument that therefrom shall be paid quarterly to his wife, so long as she shall live, the same to be in lieu of her dower at common law. The trust is to continue ten years after his wife's death, the income to be paid in equal quarterly payments to his two sons, Thomas H. is claimed that in many instances these men are not chosen with reference to their fitness to properly discharge the duties required of them, but for their ability to hustle up votes for the delegates who name the Commission

FIGHT FOR A SWITCH.

Lively Time in a Committee Room-One Firm Willing to Buy a Strip of Land at a Reasonable Figure-The Other Man Wants to Make Money.

The special committee appointed by Comnon Conneil met vesterday to investigate AGAINST JOHN AND GEO. VARLEY. the difference between Rea & Co. and Lloyd's Sons over the ordinance which the former desire to have passed for a switch Result of the Lithograph Fight Made by track connecting their warehouse with the Panhandle Railroad at Second avenue and Greenough street. Both firms were represented at the meet-

ing. Mr. Lloyd stated his opposition to the ordinance was that if Rea & Co. were allowed to put in the proposed switch it would cut off the Lloyd rolling mills from con-nection with the Panhandle and would block Greenough street so that they could not get an independent switch to the mill. The trouble was caused by a narrow strip of ground owned by Rea & Co., upon which they desired to lay part of the track and which lies between the Lloyd property and the railroad. Lloyd said he was willing to buy this strip, but Rea knowing its value to him would not sell at a reasonable figure.

Mr. Rea made a proposition to Mr. Lloyd
in the meeting that if the right was given
him to lay the track as he desired, Lloyd &

Sons could continue it down to their works and use it for hauling cars, provided Lloyd & Sons would agree to pay 25 cents for each car passed over the Rea & Co. strip. Mr. Lloyd figured that as they used about 2,000 cars per annum it would cost his firm at least \$300 per year for the privilege of hanling them over Rea's strip, if this p sition was agreed to. He thought this was

entirely too steep and refused to accept. The two gentlemen were doing all the when Chairman Bigham decided to adjourn the meeting with the understanding that the committee meets next Wednesday afternoon,

## COULDN'T FORM A TRUST.

Glucose Makera Tried to Combine, but One Man Refused to Join.

B. F. Rhodehamel, a wealthy glucose manufacturer of Peoria, stopped at the Anderson yesterday. An attempt was made recently to form a combination of makers with a capital stock of \$20,000,000, on which 10 per cent would be paid annually, but he says because one man refused to join, the cheme collapsed.

Most of the money in the glucore busi-ness is invested in Illinois, and there would have been ten firms in the trust. The makers now have a pool, but Mr. Rhodehamel says that if one member got up feel-ing badly in the morning he could kick a hole into it, if he were so inclined. He said further that the business had come to such a pass that unity of action was necessary to make it profitable.

TIN PLATE WORKS GOING UP. Two New Firms Embarking in the Industry en a Big Scale.

The American manufacturers seem determined to try their luck at the tin plate business anyway. An application has just been made for a charter by the Chicago Tin Plate Company, of Chicago, with a capital stock of \$250,000. Another tin plate scheme is talked of for the little town of Elwood,

the natural gas region of Indiana. While some of those who expressed their intention to go into the industry before the passage of the McKinley bill, may have been only bluffing in order to help the bill, it might be possible they will regret some day that they did not make their bluff good.

NO CHANGE TO BE MADE. False Rumors Afloat About the Allegheny

Bessemer Plant. Some unfounded rumors have gained circulation in regard to the future intentions of the new owners of the Allegheny Bessener plant. One of these is to the effect that heavy structural iron is to be made for the Keystone Bridge Company. No changes are contemplated at present and the plant will continue to manufacture rails as heretofore.

The improvements are about completed. in the same manner that was contemplated before the transfer of the works was made. The plant will be put in operation on Tuesday next under the new management, and steel billets will be made for the present.

Ought to be Finished Now. The new plate glass plant now in the course of erection at Irwin will not be completed any too soon. It is said that the caacity of the plant will be 1,500,000 feet half of which has already been contracted

A Carload of Miners for Irwin. A carload of Italian miners arrived here vesterday morning from Northern Wisconsin, where they have been employed in the ore mines along Lake Superior. They were

him to the lockup.

Humane Agent O'Brien ran across! peculiar case on the Southside yesterday. He made an information before Alderman McGarey, charging Wolfgang Crouse, an 18-year-old boy of the Twenty-seventh ward, with cruelty to animals. According to the story told at the Alderman's office, Crouse has been a victim of dime novel reading. Crouse, in speaking to Constable Linder, said that he and a number of his companions have a reading room in the Twenty-seventh ward, where they congregate to spend their even-ings and discuss ['Jesse James' shooting. Crouse is charged with shooting a dog without killing it and leaving it to die. The allegation is that Crouse, with his com-panions, went to an open field near the Bell Tavern, on the outskirts of the city, on Sunday last, to practice shooting with revolvers that they had in their possession. While practicing shooting a number of small boys came along and had with them a little dog. This is said to have attracted Crouse's attention and he immediately began shooting at the dog without any effect. Crouse is charged with going nearer the dog and firing. putting a hole clear through its body without killing him. The boy who owned the animal picked it up and carried it to his home on South Nineteenth street, where he

the matter was reported to Constable Linder. The officer reported the matter to the Humane Society, and an information was made against Crouse. Crouse, on hearing that a suit was entered against him for the killing of the dog, gave up a position at a Southside glass factory and began making preparations to leave the city. He was arrested, however, on St. Joseph street yesterday and taken to the Alderman's office, where he entered \$500 bail for a hearing. Crouse, when asked why he shot the dog, said that he didn't think he committed a

precincts, the Second, Fourth and Eighth. The Second precinct has a valuation of \$3,117,975; the Fourth precinct, \$2,195,962, and the Eighth precinct, \$360,885. THE CONCERT DECLARED OFF.

Several Hundred People Find Disappoint

ment at Carnegie Music Hall.

There were several hundred very much disappointed people at Carnegie Music Hall, last night. Many carriages rolled up before the great granite steps, but were greeted only with darkness and closed doors. The parties in charge of the Carnegie Star Course of entertainment had arranged with the Ovide Musin Grand Concert Company for a concert last night. The singers were in the city, but owing to troubles on

the part of the people in charge of the Carnegie Star Course the entertainment could not be given, as the hall couldn't be opened. THE DISPATCH to-morrow will hold 24

Mr. Cochrane tramped on the ordinance, and it will take a sleep for 30 days. Every member was present. Mr. Cochrane took the floor and a decided stand against the measure which he said would kill the new water works. He argued that pure water was more needed than paved streets. He said the city was unable to take both burdens and it was simply a question of which would live. The streets were in a fair condition and he was in favor of improving a few streets each year by taxation

nounced as an imposition and accused the committee of trying to railroad the bill. Mr. Muchlbronner called Mr. Cochrane's attention to a promise he had made that in consideration of the laving over of the Federal street ordinance, as first presented, he would favor a general plan of street improve-

Mr. Cochrane admitted this, but said he would not favor a wholesale measure that would cost the city \$20,000 per year. He thought the trouble all lay with the Street
