The Trend of Prices in the Grain Pit Still

Downward - A Decline in All the Cereals, and Also in Provisions.

CHICAGO-The grain and provision markets opened weak and lower than they closed on Friday, and while the day's business had a few hard spots interspersed the final result was a decline in all the speculative articles. The wheat market was heavy at the opening,

and the price of the May delivery started at a decline of 1/26 from the closing quotation of the ing and Alumnium Company, of Lockport, day before. The spirits of the local speculators were depressed by the evidence which continhas been preparing to produce pure alumieued to crop up of the far-reaching effects of the recent shaking out of the bulls in the stock market. Money is still scarce, even for such num by a new process which appears to be a finality in solving the problem of the cheap extraction of this useful metal from increased, adoney is shill scarce, even for adda increased by purposes as the carrying of grain and provisions, as evidenced by the whilening of the premium between December and May wheat to 30 per bushel. The receipts here were again liberal and considerable in excess of the esti-mater made vanished as Creabs are work the common clay. Eugene H. Cowles, President of the company here, said: "Pure aluminum in the ingor, not containing over 114 per cent of impurity, is selling to-day in England at \$1 25 per pound. The

premium between December and May wheat to Se per bushed. The receipts here were again liberal and considerable in excess of the esti-mater made yesterday. Stocks were weak. The New York hank statement was expected as a possibility within the next few days. These were the influences under which the speculators in grain could see nothing but gloom in the outlook when they started trading. The crowd in the wheat pit was unanimously on the selling side during the first 10 minutes of the seasion, and the May delivery declined ke under the opening quotation. After this spell of weakness, the news which came to hand be-ling of a less somber character than the fors-bodings of the speculators, there was a period of strength, which lasted up to about 120 clock. There was a degree of firmness every time the price of May wheat got to the neighbor-hood of \$1 00%, which it did several times dur-hord of \$1 00%, which is did several times dur-hord of \$1 00%, which is the meantime the difference between December and May had widened to 8½ on the start at the last moment. Some of the spectures. In the meantime the difference between December and May had widened to 8½ on at has the spread pre-vailing as the market closed. The final trading in May was at \$1 00% and December. The corn market opened weak in sympathy wit wheat, and first sales were made at a de-cline of the recovery toward the closes was due to the reported purchase in New York of ten bratioads for shipment to Lisbon. The corn market opened weak in sympathy wit wheat, and first sales were made at a de-cline of ke from yesterday's closing during the first half of the session. Lacking any efficient support the prices inclined downward, answer-ing in this respect the predominating feeling of the local speculators, which favors a lower range. Reports from Kansas and Neberastar. pound. With the duty at only 15 cents per pound it will not be long before the market price here should drop to the Euglish price, plus the duty and cost of importation. I therefore assume that the present worth of pure aluminum in the United States is \$1 50 per pound when turnished in wholesale lots in ingots containing not over the above per cent of impurity. We sell the same metal in our iron alloys at \$1 for the contained aluminum. "In the United States there are but two concerns that produce aluminum. They are the Pittsburg Reduction Company, and the one in Lockport, N. Y. Heretofore we have only produced aluminum in the form of alloy; but now by reason of two unique and beautiful chemical discoveries it is found that the pure metal can be extracted direct from the clay. This is a new process and entirely chemical. The reagents used are almost as cheap as the mud itself, and

electrical heat isn't needed. Patents on every step of the process are applied for. When operated on as large a scale as that in which iron is produced aluminum should be made so cheaply that it could sell for \$200 per ton, a price less than the present price of copper. "Alterations will at once be made in the Lockport works to make the metal on a large scale by the new process. Two groups of capitalists in New York City are also pre-paring to build immense new works of probor the local speculators, which favors a lower range. Reports from Kanasa and Nebraska were as gloomy with regard to the outcome of the crop as any previously received, but the active demand for shipment, which character-ized the closing days of lake navigation, is now abated and has now to adjust itself to all rail rates. The business was heaviest in the last half of the session, during which all semblance of strength was eradicated, and the weakness developed continued to the end, the closing price being within $\frac{1}{\sqrt{2}}$ of the lowest figures of the day. The highest price was made imme-diately after the opening. Oats were fairly active, but weaker, unsettled and prices ranged lower. The opening was at $\frac{1}{\sqrt{2}}$ decline, but, on fair buying by a large opera-tor, railied $\frac{1}{\sqrt{2}}$. The weakness in other grains, and free selling by parties who bought freely yesterday, produced a heavy feeling, and prices receded $\frac{3}{\sqrt{2}}$, railied slightly, and closed easy $\frac{1}{\sqrt{2}}$ lower than yesterday. ably 20 times the capacity of the Lockport works. One of the large plants will be located at Niagara Falls where 10,000 horse power will be required to operate it. The plant will likely be in operation in July, 1892. As methods have lately been discov-ered by which the metal can be hardened and its strength greatly increased without

interfering materially with its toughness and great lightness, it would really seem as if the aluminum age was at hand." COLONIAL TREATIES OF COMMERCE.

Pork-Only a fair trade was reported, and the feeling was easier. Opening sales were made at 15@20c decline. Later, prices rallied 5@71/c, and closed quiet at about medium figures. Lard-Quite a good business was transacted. Opening sales were made at 75/2010 decline, but moderate buying tended to a steadier feeling, and prices rallied 23/205c. Deputy Grand Master Workman Samuel L Osmoni has returned home from the East after a very successful trip, planting two new lodges, one at Johnstown and the other at Altonualarge ones, by the way, and paving the way for several more. He is now pushing an active campaign in Alicpheny county, having two fine charter lists fidner up ravidly, one in Pleasant Walley and the other at Oakland.

The officers of Juniata Lodge No. 246, of Altoona, which was recently instituted by Grand Organizer Samoel L Osmood are: Past Master Workman, Dr. William D. Hall; Master Workman, L. B. Reifsneuder; Fore-man, George A. Baer; Overseer, W. J. Den-ning; Guide, W. S. Hostier; Recorder, George Piper; Financier, John Hurd; Roceiver, W. R. Smith; Inside Watchman, W. C. Leet; Outside Watchman, L. R. LeVan; Trustees, J. S. Leissen-ring; Eso, Lloyd Cooper and W. W. Rudisill; Medical Examiners, Drs. W. S. Ross and Eriel Medical Examiners, Drs. W. S. Ross and Eriel C. Cherry; Representative to Grand Lodge Dr. William D, Hall. The officers of Juniata Lodge No. 246.

C. L. Hannan, of industry Lodge, is a candi-late for Grand Inside Wardt of the Grand adge of A. O. U.W. and his prospects are fair or being elected. The brothers can rest as sured that if he is elected he will make a very efficient officer. He has been connected with the order for a number of years, and has been an earnest and hard worker during the entire ime. The election begins Monday, December 1890. Mr. Hannan has heard nothing yet hout a circular in regard to prices on chang a uniform, and thinks it is high time a repo-ere made. Otherwise the order may expr o loose some legions. He has been endeave ing to find o t something about the Youngs-town allisir, but it is still in the dark and he ex-pects it will turn out like No. 9 did. He asks for enlightenment.

A Contortionist's Friends Antions

Mayor Gourley yesterday received a letter

from John J. Dolan, of New Orleans, ask-

ing for information about his nephew, Lew

Bell. Mr. Dolan stated that Bell was a

contortionist, and he heard that the young man died in one of the hospitals of this city

about a year ago. The Mayor will endeavor to find out if such a person died in any of the institutions about the city.
