Quick Work in Arranging for a Six-Story Stone Front Building.

PITTSBUEG IS BOUND TO LEAD.

THE NEWS AND GOSSIP OF THE CITY

An interesting incident connected with By pursuing this course they expect to be able to furnish all the accommodations re-quired by legitimate business. Rates were steady on the basis of 667 per cent, according to time. Exchanges were \$2,775,660 S4, and bai-ances \$279,016 S9. Money on call at New York yesterday was tight, ranging from 6 to 8 per cent, last loan 6, closed offered at 6, Prime mercantile paper, 734610. the recent fire on Liberty street came to the surface yesterday. It is a good illustration of what can be done under pressure. Mr. W. C. Stewart, representative of Mrs.

Mary Eva Stewart, his wife, owner of the building occupied by Mr. Harris, did not hear of the fire until he reached his office at 9 o'clock next morning. When informed of the fact he started on a tour of exploration to see for himself how matters stood. Alter viewing the ruins a tew minutes, he made up his mind that the only thing for him to do was to crect a new building at once. He accordingly made a bee line for Architect Steen's office, told him what he wanted, and within an hour of the time of learning of the fire had decided upon a plan and made arrangements for a six-story stone front, iron-beamed building, to occupy the site of the one destroyed, and expects to have it easily for occupancy by the old tenants by Tenants have little to fear from fires so far

gs loss of time is concerned, when landlords are so prompt to rebuild.

Pittsburg Bound to Lead.

The supply of natural gas has not given out, and some appliance for the economic use of the fuel may lead to its reinstatement in the mills. But whether this be so or not, Pittsburg is in no danger of being displaced from her potion as the leading manufacturing city in America. A prominent business man, in a disensaten on this subject vesterday, said: "We have got down at last to a close study of methods for producing cheaply, and even if we have to use coal, our mill men are now able to more than hold their own against competition. We to use coal, our nill men are now able to more than hold their own against competition. We have made wonderful advances in economics in the last few years, but we have not reached the limit. The expense of turning out finished iron will be still further reduced. We have ex-perance, money and enterprise-everything increasive to minimize the cost of our products and keep us in the lead. Pittsburg's position as the manufacturing center of the new world is secure, gas or no gas."

Oak is the Caper.

A prominent furviture dealer said vesterday: ak is the popular wood for furniture, and will probably not be superseded by any other util, from its scarcity, its price advances sevond the limit of medium-priced furniture. Valnut will never lose its prestige, but its sourcity will forever bar it from cheap furniture. Cheap stained goods are not in as active demand as they were two years ago, natural woods taking the preference."

Business News and Gossip.

Equiness operations were quite generally suspended yesterday on account of the snow. People hving on California avenue talk confidently of rapid transit by next Fourth of uly. There will be considerable building in

that locality next spring. Some of Phitsburg's enterprising real estate men might make a big stroke by buying the Sandwich Islands and cutting them up into

building lots. They are for sale. Modern buildings will scon take the places of those recently destroyed by fire on Liberty street. Contracts have already been made for two of them.

Yesterday was a cold day in Wilkinsbure. Cooking had to be done almost entirely with

wood. Several Pittsburgers have recently invested in building sites, at Middlesboro, Ky. enty yesternov assist to exchange his farm for eity property. He received very little en-contragement.

Several business men on Fifth avenue, near Scho, are taking up the Scho avenue, in root of their places and putting down har-

Drygoods.

Drygoods. NEW YORK, Dec. 8.—The drygoods market presented no new feature. There was a good volume of mail orders, but selections were light. The situation is a steady one, while awaiting a more settled state of the financial market. Some staples are accumulating under the circumstances, but not out of proportion to conservative wants of trade. More activity is likely to be reached before the end of the month, but neither buyers nor sellers are anx-ious at present. The market is in good shape and the trade is being well supplied with goods from the active business of November.

A large pro-portion of offerings to-day were from Ohio and Pennsylvania and quality was better than the late average. In spite of improvement in qual-ity of offerings markets dragged and holders were forced to concede on prices of last week. While buyers were present in full force, they made the most of their opportunity from the big men, and markets declined from 15 to 25c per ewt. all along the line. As prices at sources of supply were fully up to what was reported last week, it is difficult to discover any margin of profit for the shipper on this week's shipments. ith three or four exceptions, local stocks held their own yesterday, holders refusing to make concessions. Several ugly rumors, for which there was probably little or no founda-tion, aided by the miserable weather, conspired to still further weaken confidence in two of the pecialties and make the lowest prices ever known for them. These were Philadelphia tias and Electric. The former sold down to 135, and closed at 13 bid. Electric sola at 13%.

ngures were no doubt compulsory, and by no means reflect the intrinsic value of the stocks. Luster was fractionally weaker, while New York and Cleveland Gas Coal returned to its former position at 38. Few figures were made, and there was no particular pressure to either buy or sell. There was nothng like a scare, and no symptoms of general sculization.

is at all interested in securities. The weakness of the Gould stocks was pointed out, while the attack upon Reading, which forced its price off to 20%, was made the occasion of a revival of the old story about the liquidation of the holdings of the pool. There was undoubtedly a great deal of liquida-tion of long accounts, but there is no evidence to show that they are anything but those of the professional traders of the street. A firsh issue of \$1,000,000 Clearing-House cortificates was also used against the market. The tightness in the money market passed away toward delivery hour and it became known that \$1,000,000 gold had been ordered from London, which again set the shorts to covering, and prices moved up randly in some stocks in the fluid dealings. The improvement, however, was insufficient few stocks. A mong the latter the stocks which led the early advance were most conspicuous, and come of them closed with a material gain on Saturday's prices. The market was active and strong at the close, but most atocks are left below Saturday's figures.
