LIMA OIL FOR FUEL

Several Pittsburg Establishments Make Tests Which Are

SAID TO BE VERY SUCCESSFUL.

The Latest Intelligence From the Various

PRODUCERS NOT IN A PLEASANT MOOD

Field Centers.

It will not be surprising to see in the future some of the manufacturing industries adopt the use of Lima oil as a fuel. It | The Vanderbilts and the Pennsylvania Form has been said that the Lima product will in all probability take the place of gas, and menting with Lima oil at their lower Woods' Run mill for the past 30 days and the most satisfactory results have been at-

ness to contract for 100,000 barrels of the stuff a year.

An extensive Pitisburg producer was accessed by an official of one of the principal Standard Oil Company's refineries with the remark: "Well, I suppose you are rushing the drill, as usual?" The producer replied: "Don't you know that I can't produce oil at 64 cents? Ic's a losing game, and I will not play the sucker any longer. How is it that when refined was 7.4c per gallen you people could pay the producer \$1.13 a barrel, and when refined has only dropped one-tenth of a cent you raise the cry of overproduction as a pretext, and have shoved the crude market down to 64 cents a barrel. If the Standard was making a good profit on refined when crude to 64 cents a barrel. If the Standard was making a good profit on refined when crude was \$112, their profits now must be simply enormous," At this juncture of the conversation a railroad official put in an appearance, much to the relief of the Standard man, who availed himself of the opportunity of taking his departure. The producer and railroad official continued the conversation on the situation, in the course of which the railroad man said that the Standard Oil Company just now was making things very interesting for the independent refineries, and in his opinion they were attempting to completely freeze them out. He said: "Why, don't you know that the Standard Oil Company is now furnishing our road with the best grades of lubricating oil at ridiculously low prices, and are supplying us with the finest quality of valve oil at 25 cents a gallon, for which we paid last year 60 and 45 cents a gallon.

The News From the Fields.

The News From the Fields. WILDWOOD-There is nothing of an import ant nature to report from the Wildwood field to-night. The big wells show a decline from yesterday's gauges. The Smith Farm Oil Company's No, 7 was drilled some to-day, but did pany's No. 7 was drilled some to-day, but did
not increase its production; the well to-night is
making 8½ inches an hour. The same company
located Nos. 9 and 10 to the north of No. 7.
The Forest Oil Company are in the sand in No.
4 Young, but not deep enough to tell what the
well will be good for. Patterson & Co.'s Backbonse well is dry in the third and fourth
sands and they are now drilling for the fifth.
At Coraopolis, Finegan & Downing No. 2
Kerr is in the sand and is said to-night to be
showing up good. Their Meek's well has been
drilled down to the fifth sand with poor results.

A West Virginia Wildcat.

A West Virginia Wildcat. The Nutter's Fork well, owned by Ira De

GLADE RUN—The roads are getting in splendid condition since the cold, freezing weather set in, but still there is precious little being done, and the indications are that there will be less ere the blue birds nest again. The field presents such a quiet appearance that it reminds one of a funeral. Christic & Sutton's recently completed No. 1. Winner, is about a serving murician can desire. In point of will be less ere the blue birds nest again. The field presents such a quiet appearance that it reminds one of a funeral. Christic & Sutton's recently completed No. 1. Winner, is about a five barrel well. J. A. Leidocker's No. 5. Bleakley, recently pulled up from the lower sand, and shot in the 100-foot, had the packer lowered and since is showing up good. Jack White & Co.'s No. I. Martin Behman, is in the sand with fair showing. Campbell & White are putting up the rig for their No. 3. Marshall.

Downfall of a Sensation.

weil, suddenly went out on a strike on Saturstay and refused to produce anything. The tools will be run, but whether agitation will help lier or no., remains to be seen. No. 5, Harlett, was shot with 80 yards, and No. 5, Harlett, was shot with 80 yards, and the clemning-out tools are being run. A curious feature in connection with this well was that when McCandless & Russell's well came in, the well lost her fluid and gas, showing clearly that they must be connected. No. 5, same farm, is due to reach the sand this week. This well would have been in now, but has been held back by drilling out a piece of steel. The old wells are falling off fast in production in this field. The only thing that keeps the production any ways near up is the strival of an occasional good well.

Not Entirely Dead Yet.

Not Entirely Dead Yet. RENEEW-This locality is not entirely dead. A little new work is done occasionally, just enough to keep the old thing moving. The Phillips well, drilling on the Pearce farm, is on top of the sand, and shut down for tankage Out on the Mangel farm, in the old territory, Mr. Mangel, the owner territory, Mr. Mangel, the owner of the farm, has a well which is through the 180-foot, and going on for third sand. The contractor, John Siewart, claims to have gone through a nice 189-foot sand that showed up good. Retbold, the old Hartman well, when shot, bridged over at a depth of 1,209 feet. If this doesn't pan out a good well there is nothing in sand or indications, as the ear marks are here. The tools are being kept bobbing, but the well won't be tubed for a day or two yet. On the Heckert farm, Turner & Pattersou, about 2,000 feet in advance of the Hartman, are started to drill for 190 foot. The indications are now that the belt leads in this direction. territory,

A Nice Producer. PETERSVILLE-Vogely & Co. No. 1, Hiram Graham, made her first run on Saturday. The well, though not large, is still a nice producer, being good for 35 or 40 barrels. Shoup & Co. have a well just completed on the Bleakley, which is certainly a good well, being rated all the way from 100 to 250 barrels. The Lagrippe Oil Company have a new well on the Mc-Kinney farm that is showing up nice. There doesn't seem to be any doubt but what this end of the 100 fact will show up some nice wells yet ere the field is drilled in.

Not Keeping Up the Gait. AMBERSON-After Tate & Co. drilled their No. 2 Dambauch further into the sand and tubed her she showed a 90-barrel gait at the start, but has since fallen off about half and is how doing about 45 barrels. The same company have the rig for their No. 4 completed.

The Hundred-Foot Oil Company, No. 1, George Weich, is down between 690 and 700 feet. Campbell & Co., No. 1, McGee, is rated at about a 25-barrel capacity. Schlegal & Co. are fishing for the two strings of tools lost in their No. 1, McDonald.

Excited Some Attention.

CALLERY-The arrival in of Geobring & Co., No. 1, Irvin farm, at a 3:0-barrel gait on Friday last had the effect of turning the attention of the festive operator in this direction again. The well has since failen off, but is still doing 210 barrels, and a peculiarity of the well is that though the territory is noted for salt water, this well is doing nothing but straight oil.

H. McC.

Railroad Movements at Trinidad. The railroads centering in Trinidad, Col., have purchased a site for a handsome union depot, to be built of stone and pressed brick at once. The Union Pacific is surveying for a new roadbed and track between Trinidad and Pueblo, a distance of nearly 100 miles, to be built without delay. The Rock Island will begin construction into Trinidad soon, it is authoritatively reported. W

AN ALUMINUM PROCESS DISCOVERED. A Southern Inventor Thinks He Has Found

a Way to Make It Cheap. COLUMBIA, S. C., Dec. 16.-P. A. Emanue member of the Aikens bar, has discovered a process by which aluminum can be freed from kaolin at an inconsiderable cost. It is known that a fortune to be reckoned by million the discoverer of a cheap process for the manu the discoverer of a cheap process for the manu-facture of aluminum. About a year ago Mr. Emanuel applied himself to this problem and it is believed that he has arrived at a correct solu-tion. On making the discovery Mr. Emanuel went to Washington and submitted his process to scientists there, and now he has his discovery secure from attack by the proper letters patent and caveats. The announcement is now made that by the ingenuity of Mr. Emanuel, alumi-num can be freed from kaolin at a cost of about \$2.50 a ton.

An advisory council is created with power to woods Run mill for the past 30 days and the most satisfactory results have been attained. It is said that Painter Bros. are also making a thorough test with a view to its use in their extensive mills; and it was reported to-day that snother extensive manufacturing industry have tried the new fuel with good results and have signified their willingness to contract for 100,000 barrels of the stuff a year.

An extensive Pittshure producer was accompanies.

MRS. CARNEGIE'S ILLNESS.

The Physicians Believe That the Crisis Has Been Passed.

SPECIAL TELEGRAM TO THE DISPATOR.; NEW YORK, Dec. 16-Mrs. Andrew Carnegie, who has been ill for some weeks past with who has been ill for some weeks past with typhoid fever, had a very bad sluking spell this morning about 2 o'clock, and for a time her life was almost despaired of.

Later on there was a change for the better, and during the day Mrs. Carnegie showed such a marked improvement that her physicians, Drs. Janeway and Dennis, concluded that the crisis in the disease was past.

TIRED OF THEIR LEGISLATURE. Oklahoma Will Petition Congress to Annul Their Rulers' Work.

WICHITA, KAN., Dec. 16.-Petitions are circulating all over Oklahoma, asking that Congress declare the present Legislature an ille-gally organized body and all its work set aside. It is the outgrowth of general dissatisfaction among the people over the work of legislation, no section getting as much territorial recogni-tion as desired.

AWFUL SKIN DISEASE

NEW ADVERTISEMENTS.

Child a Mass of Raw Bleeding Scres-Miracu lous Cure by Cuticura Remedies.

A face, from the hair to the neck on both sides, a raw mass of bleeding sores; two little hands and arms in the same condition: a body, around the waist of which was a broad band of bleeding eruptions, and from the hips to the tips of her foes the sin was so raw as to be absolutely sickening to the sight. Such was the frightful condition of the little four-year-old daughter of Mr. and Mrs. H. A. Stout, of Dansville, N. Y., when I first saw her, about two months ago. At that time I was clerking in the drug slore of C. W. W. Woolsver, had much fallth in the Cuttcura Hemedies, and resolved to try them on her. I could not bear to see the little one suffer as I knew she did, "I have tried everything suggested to me on my little daughter, who has been so afflicted almost from birth," sald Mrs. Stout. "I have had three doctors expriments on her, but she seemed to be getting worse every day. I was almost distracted. Every night I had to bandage her all over, and tie mittens on her hands to prevent her from digging the raw fiesh with her fingers. Frequently little 'Hae' would lie awake all night sobbling and moaning with pain, which I feared could never be relieved until death ended her sufferings. One day, Mr. Faulkner stopped in, said he had often noticed my little daughter, and believed that Cutticura Remaphes would cure her. He offered to bear the expense, and I resolved to try them, but without much hope, for at that time she was worse than I had ever seen her, and there seemed no prospects of recovery. He brought the remedies as promised, and a faithful use of Cuticura. South and fair, and I had ever seen her, and there seemed no prospects of recovery. He brought the remedies as promised, and a faithful use of Cuticura. South has wrought a miracle. To-day, her skin is smooth and fair, and I had ever seen her, and there seemed no prospects of recovery. He brought the remedies as promised, and a faithful use of Cuticura. Fakendier, whelm, I am sure, saved my child's life," I know the above is tree in every particula
