GOOD BEEVES FIRM AT OLD PRICES. Common and Low Grade Stock Very Slow

HOGS OFF, AND GOOD SHEEP STEADY

at Reduced Prices.

OFFICE OF PITTSBURG DISPATCH, WEDNESDAY, Jan. 14. The run of cattle at the East Liberty yards was larger this week than for a month past, the total being about 100 loads against 80 loads for last week and the week before. A large proportion of the offerings this week were common and low grades, and as to strictly prime beeves they were conspicuously absent. A few loads close to prime were sold at 5c according to report. With 90 loads on the market Monday morning, good cattle opened steady at last week's ces, but all common stock started out weak

at lower prices and have been growing more so from that time till the present. About all the good beeves offered on Monday were taken at last week's prices, but interior stock started out 10c to 15c lower, and are a strong 25c lower to-day, with four or five loads strong 25c lower to-day, with four of five loads smooth. Advices from Chicago and New York on Monday had a depressing effect, and commission men were forced to make concessions on the strength of unfavorable news. One commission man said: "I took 25c less per cwt, for a load of mattle on Tuesday than I was willing to accept to Monday.

Good fresh cows were scarce and in good demand. Common are not wanted in these times

and. Common are not wanted in these times f high priced grain. Veal calves were also in hort supply, and prices ranged from 5c to 65%, oth a few extras selling a shade above the outside figure.
Sheep and Lambs—The sumply was nearly double that of last weeks at the proportion of good in the offerings was small. The common and low grades, which were very largely in the majority, were slow at a decline of 15c from prices of last week, while good stock was steady at last week's mires.

Hope-The run has been unusually large,

House—The run has been unusually large, fully 25 loads larger than last week or the previous week. There were about 30 loads on sale Monday, and about 30 loads have been received since. Top price on Monday was \$3 85, and this was exceptional. Top price this morning was \$3 75, which corresponds with prices at Buffalo and Cincinnati all the week. An unexplainable fact is that Pittsburg markets for begs have been about 13c higher than Buffalo all winter, though couble the number are handled at the latter place.

At the beginning of the week the East Liberty hog market was the highest west of the Alleghenies. Now it has found its proper level. Said a leading stockman to-day: "I cannot see how it is that our prices here should be higher than at Buffalo, as they almost always are, for our situation in relation to the sources of supply is much the same. Cattle prices are as a rule about the same at Euffalo as here, but hogs are generally highest at this point."

Drygoods Market.

New York, Jan. 14.—Buying was brisk, the uch mostly in small quantities. Firmness mevalls. There is little important yarn business. The index of buyers of export yarns are rarely acceptable. Home consumers are sly, Prioting and floushing cloths are quiet, but steady. The demand is largely for the best, good and medium makes, which are well engaged. The common kinds are neglected. The production appears to be lessening. Best heavy goods are strong. There is sufficient demand for medium and low to keep prices steady.

MARKETS BY WIRE.

Props Knocked Away From the Grain Pit and Prices Take a Slight Tumble-Provisions Easier Early, but

Close at an Advance. CHICAGO-Wheat was tame to-day. There was but little anxiety to trade and a lack of orders from outside. A feeling of weakness succeeded the confidence indicated by the price at which the first transaction took place. The opening quotation for May wheat were 96%c, with sellers more numerous than buyers at the price named. Afterward there was a decline to 884c. There were many very dull intervals in the trading pits. The decline in silver and the absence of any addition to the export business, which was reported near the opening, caused the market to act heavily during the last half of the session, and there was a return to the lowest price of the decline, 96% c for

to the lowest price of the decline, \$65,6 for May.

Corn was firm at the start. May opened at \$55,6, and was steady for some time around \$52,6, and was steady for some time around \$52,6; but persistent, although not very heavy, selling gradually undernounced it, and a gradual decline set in.

The trade in outs was light and all local. The market opened at 465,6 for May, touched 465,6 465,c, and declined to 455,6 on the close, indicating \$5c\$ decline as compared with the previous day.

The receipts of hogs were considerably less than those of the previous day. At the opening the product was easier, but at the lowest price it was quickly picked up. It was discovered that there was not much for sale. In addition came the reported improvement in the hog market, and the packers again came to the rescue and the close showed a slight advance.

A BUSY COMMUNITY

The Town of Jeannette, Dissatisfied With the National Census,

TAKES ONE TO ITS OWN LIKING.

People Who Think Realty is Inflated Show How They Make a Mistake.

THE NEWS AND GOSSIP OF THE CITY

The Government census of Jeannette proper showed a population of 4,700. This was unsatisfactory to the crtizens, and a recount was made by the Western Land and Improvement Company. Every resident was counted, and the result shows a bona fide population of 5,500. The revised figures have just been forwarded to Washington.

There are few towns in the country that can show as rapid progress as Jeannette. Three years ago one family comprised the population—all was open farm land. A gentleman from there yesterday said everything was on the jump. According to his estimate at least 300 houses will be erected there this year.

Slow Movement in Bonds. The bond market is rather slow, but an improvement is expected to follow the upturn in business generally. Andrew Caster, a specialist in this class of securities, said yesterday: "So much money has been put into real estate, loaned on call, and otherwise tied up that bonds are almost a drug. What demand there bonds are almost a drug. What demand there is seems to be limited to the old-timers—Ashtabula, Panhardie, Junction, and others of that class which have been tried. Investors prefer these to street railway bonds, notwithstanding they come higher. All the bonds handled in Pittsburg have been thoroughly examined and found to be well secured. This should inspire confidence in them as a reliable investment."

A Strong Backing. Now and then a man is found who thinks Pittsburg real estate is inflated. Such men are off their base, as a baseballist would say. There is no city in the country where values rest on a more enduring basis. Of course prices advance with the growth of the city and increasing demand. It would be strange if it were othermand. It would be strange if it were otherwise. Demand makes the market, Property in
New York is worth more than property in a
a rural town because there is more demand for
it, and it can be made to yield a larger return.
This is what makes property so valuable in
Pittsburg. Every lot or parcel of ground for
sale in or about the city is worth, as a general
proposition, ail that is asked for it, because it is
or soon will be wanted for improvement. With
this support to the market there is little danger
of a reaction.

A Chance to Invest. Opportunities for investment are multiply ing, the latest at hand being set forth in the prospectus of the Thurber-Whyland Company, ublished in this issue of THE DISPATCH. As s generally known, this is one of the largest wholesale and manufacturing groceries in the world. For ten years the average net profits of the business have been equal to 3 per cent per annum upon the \$1,500,000 of preferred stock annum upon the \$1,500,000 of preferred stock which the successor company is about to issue, and a larger amount upon the \$1,000,000 of common stock to be issued. A re-erve will be maintained to provide for desirable extensions of business. The firm desire to retain a half interest in the company. The risks of the business are small, since it consists of turning the necessaries of life as rapidly as possible. The conservative policy of the house will be adhered to. All of the legal formalities attending the new company have been passed upon and approved by Messrs. Evarts, Choate and Beaman. The subscription books will be opened on January 19 and closed on the day following.

Business News and Gossip. Real estate hunters are putting in their time

The Arsenal, Farmers' and Mechanics'. Liberty National and People's Bank of McKeesport elected directors yesterday. There were no changes. This about completes the list. As soon as the weather permits, surveyors will begin plotting a large tract of land a short distance below Temperanceville. It will be put on the market in the spring.

The Building Record. Two manufacturing concerns took out per mits yesterday-one for a factory, the other for a warehouse. This shows that business is growing and demands more room and better facilities. Another permit was taken out for high-class dwelling. The list follows: high-class dwelling. The list follows:

Walworth Manufacturing Company, frame one-story factory, 30x120 feet, on Second avenue, Twenty-third ward. Cost, 8828.

W. F. Casey, stone and brick two-story dwelling, 22x48 feet, on Fifth avenue, Fourteenth ward. Cost, 57,000.

changed. Trading was active, sales aggregating \$42 shares, against 762 the previous day.

Electric continued its downward course, and closed considerably below zero—634 bid and offered at 7. The reasons for this have been frequently stated and are well known.

Philadelphia Gas, notwithstanding it was slated a dividend would be declared at the meeting then in progress, closed a fraction be-low the opening. The result of the meeting is published elsewhere. Central Traction also submitted to a concession. Luster improved its standing, and there was a firmer feeting in Consignee. Manufacturers' Gas was wanted at

The opinion widely prevails that the recent squeeze and scare will have a good effect. Business men generally will study to see that they are in a position to make two ends meet. So far no serious harm has been done. Speculative operations have been checked, and wildcat securities have either been thrown aside or put where they belong. From this out business people will more than ever confine them, selves to legitimate dealings, which are always safe.

NEW YORK STOCKS.

The Effect of Silver Legislation Shows It self on Wall Street-The Industrial Shares the Feature of the

Day-Many Declines. New York, Jan. 14.- The stock market today was very active in the forenoon, but became more quiet later in the day, and while showing still a firm to strong undertone, failed to make any material movement in either direction, and at times displayed considerable weakness in spots. The great influence in the market was the silver legislation. Silver cer-tificates in the market to-day, on the vague report that the free coinage amendment had been killed, dropped away suddenly from 1071, to 104, but upon the announcement that the silver men had accepted the amendment, confining the coinage to the production of American mines, a full recovery in the certificates occurred.

The industrial stocks to-day were the great feature of the market, being the only ones showing any real strength throughout the day. The stocks of the New American Sugar Refir ery were traded on the board to-day for the first time, or rather, the temporary certificates representing those stocks, the preferred selling at 92@95, and the common at 65. It may be at 92@95, and the common at 65. It may be noted that at the present high prices a great many holders of the Sugar Trust certificates are realizing. To this movement may be attributed the check to the advance in the certificates, and at times to-day positive weakness was shown in them. They closed unchanged, however, after large dealings.

Wall street is showing daily that a large accession of outsiders are taking user in the cession of outsiders are taking part in the speculation, and this does much to give hopes of a continued strong and active market. In the list of active stocks of the regular list toof a continued strong and active market. In the list of active stocks of the regular list to day there was only one that showed any real strength, and that was New England; but the improvement was made in the early trading, after which it became quiet and fluctuated within narrow limits with the rest of the list. Chicago Gas was still very strong, and shows a material improvement this evening, notwithstanding the passing of the dividend. The weak spots were Lackawanna and Union Pacifit; but even these afterward recovered the greater portion of their losses, and, with the rest, closed at insignificant changes for the day. The market, after a firm opening, weak-ened, but, after many and quick changes in temper, closed firm. The final changes snow a majority of declines, but they are all for small fractions, while Chicago Gas is up 3%. Tennessee Coal 2% and New England 1%.

Railroad bonds showed a continuation of the diminuition of the volume of business, the business in all issues reaching only \$2.047,000, the tone of the market being fairly firm, with some weakness in spots. The Atchison incomes were again active, furnishing \$163,000 to the tone of the market being fairly firm, with some weakness in spots.
