### A POLITICAL PERIL.

The Coming Convention at Galion of the Farmers' Alliance.

ITS PROBABLE EFFECT IN OBIO

A Braddock Mill to Manufacture Armor Plates for War Ships.

IMPORTANT LIFE INSURANCE SUIT

SPECIAL TELEGRAM TO THE DISPATCHA CLEVELAND, Jan. 15 .- Considerable in terest is being manifested in political circles in Ohio, as well as among the farmers themselves, regarding the probable action of the Farmers' Alliance at its State Convention, to be held at Galion next Tuesday. This arises from the circumstances under which the convention will meet, as well as from the past action of the farmers of the State. One year ago the Alliance declared, in a mild sort of way, in favor of a protective tariff, and unhesitatingly followed the example of Judge Lawrence and other Ohio wool growers in demanding a higher tariff on wool. At that time the Aliance was in its infancy in the State, and had, all told, less than 5,000 members, so that a comparatively small majority could swing the body either way. During the year the country has ex-perienced the McKinley bill and a political revolution of unheard-of magnitude. The formers have studied the tariff, and had it taiked at them as never before, and it will be interesting to notice how far all this has af-fected the attitude of the Alliance in Ohio. The Political Effect of the Decision.

The decisions of the Alliance are likely to have a very marked influence on party action During the 12 months the order has had an un precedented growth. There are now over 66 sub-Alliances in the State, and the total mem-bership is not far short of 30,000. An increase

bership is not far short of 30,000. An increase of over 500 per cont in membership in one year shows an awakening among the agriculturists that is very significant. These men hold much more than the balance of power in the State, and neither party is in a position where it can afford to autagonize them.

If, for example, these delegates, representing the farmers of Obio, should declare against the McKinley bill and its high protection, it would go farther toward squelching the great boom which the Republican papers of the State have been giving McKinley for Governor next fall than any other one influence could.

It is significant that Joshua Crawford, the Secretary of the State Alliance, has recently said: "We are not ready for separate political action, and will not be until 200,000 farmers are ready be say they will vote and work in union," ready to say they will vote and work in union," and he adds: "At the rate we are now growing that time may not be far away."

Political Action Highly Probable. This represents the feeling of the conservative wing of the order in the State, and makes it clear that even if the conservatives continue in control, which is not certain, the order may be expected to begin active participation is politics not later than 1892 for at the present rate of growth it will number 230,000 in Ohio before the next Presidental election.

The workingmen of the State have also arranged to hold a State convention in Gallon on the same days as the Farmers' Alliance convention. It is understood an attempt will be condented.

tion. It is understood an attempt will be made to unite the conventions so far as public affairs go, and secure the adoption of a harmonious course of political action. It is also stated that the old Greenbackers will make overtures to the Farmers' Alliance people and attempt to form a union with them.

By this time a big crowd had gathered and the excitement was very warm. The railroad company rab in a carload of section hauss top protect their interests. The wire was repaired, and shortly after Ben May, a Pennsylvania Railroad policeman, sprang upon the top of a coach and cut the wire again with an ax. As soon as the train pulled out, the electric linemen spliced the wire again, it is expected that the wires will be cut again to-night, and it is feared the dispute may result seriously before it is settled. mie may result seriously before it is settled.

The Lowest Prices Ever Reached

Trade is running a steady grist with us. No reason why it shouldn't; yet we can stand more. We believe we can please you as you never were before. It's the unusual to buy such clothing as we manufacture 20

per cent less than former prices. Who's going to buy ill-fitting, mean-quality clothing when he can get good-fitting reliable goods for less money? Not you. Not anybody who thinks his dollar's worth 100 cents. Don't let us both lose money! We've got to. You save

what we must lose. No reservation of any kind. Everything in our store on the one basis. Note this statement with our name attached. The regular selling prices are untouched and marked in plain figures on the garments; you pay just 20 per cent less

than you see on the tickets. Will you see us to-day? This is your chance for Ready-Made or Made-to-Measure Clothing.
