At Oxford the supply has been completely

stopped by the frost, with the curious result that the reopening of the ladies' colleges

In Berlin on Saturday the thermometer registered 40° below freezing point, and from all parts of Germany comes the news of heavy snow storms, which interfere seriously with railway communication. Affairs at the mouth of the Elbe are very bad. The

The Pittsburger Will Fight Any Middle-Weight for the Championship Beit.

That there is no bluff or nonsense about the challenge of Pat Farrell, the following definite statement made by J. J. Quinn in this office inat evening will prove. Mr. Quinn said:

"Richard K. Fox has offered a belt for the middle-weight championship of America, and Fitzsimmons declines to fight for it or hold it. Now Pat Farrell will fight any man in America at 186 pounds for that belt. Kessler, Carroll and Gallagher are all out of an engagement at present, and any one of them can be accompedated. If any club will offer a purse Farrell will put up \$1,000 as a guarantee that he will be at weight, and we will make a substantial beton the outside. We mean business and have the money to back our man. Any party who desires to accept this challenge can forward articles to THE DISPATCH, and as soon as a club offers a reasonable purse Farrell's \$1,000 will be torwarded to the clut, I trust that some of these alleged champions will take notice of this offer. 860,000,000 Tunnel 42 Miles Long for a Two-Track Railroad to Be Bored Under the City - Connections With Brooklyn and Jersey City.

SPECIAL TELEGRAM TO THE DISPATCH. NEW YORK, Jan. 19 .- Articles of incorporation of a company organized to construct a tunnel between the foot of Whitehall street, New York, and Atlantic avenue, Brooklyn, were filed in Albany to-day. The incorporators include Austin Corbin, Secretary of the Navy B. F. Tracy, General John Newton, H. O. Armour, ex-Mayor Abram S. Hewitt, President E. Norton, of the Louisville and Nashville Railroad; President F. P. Ol-cott, of the Central Trust Company; Presi-dent W. B. Dickerman, of the Stock Ex-change; Vice President Levi P. The organization of this company is the first step in an effort to be made by the capitalists named to furnish the metropolitan district with what they believe to be the only adequate system of rapid internal transportation. Not only is New York to be connected with Brooklyn, but the two cities are to be connected with Jersey City, while the city of New York is to be tunneled on the east and the west from Battery Park to Jerome Park. It is a scheme that involves the boring of an underground passageway more than 42 miles long and large enough throughout its length to ac-commodate a two-track railroad of the usual surface road form and stability, not to mention the excavations necessary for terminals and stations and the construction of ele-vators capable of handling trainloads of

people a minute.

It is a scheme that involves the expenditure of more than \$60,000,000 in the actual purchase of an outfit. Much preliminary work has been done and detailed plans have been made for the most important part of the work. In all, over \$30,000 has be pended in preliminary work. Borings have been made every 500 feet along the routes under the river and at frequent intervals along the route in the city, by which it has been learned that all of the 42 miles of tunnel, save 2,410 feet in the North river and a narrow space in Canal street, will be

I located in this city a little over two years ago, bringing with me a number of family medicines that I knew had no equal. In order to convince the people of this fact I have treated and restored to perfect health hundreds of patients given up to die by other dectors. Thousands of sufferers from chronic aliments bless the day they began using my remedies. Out of all cases treated I have lost but five. A wonderful record, indeed, considering that a majority of the sufferers had given up hope of care. I have relieved 130 persons of tape worm in 24 months, and seven long-standing cases of cancer were cured in the same time. I have cured were cured in the same time. I have cured more people of chronic catarrh, scrofula, stomach, liver and kidney troubles, blood taints, eczema, rheumatism, male and female weakness than all other dectors combined. The demand for my family medicines has become so great that I am compelled to give up traveling practice. After this date I shall give my undivided attention to my office and laboratory, and can be consulted from 8 a. M. until 9 P. M.

Get Burgoon's System Renovator, Burgoon's Catarrh Remedy, Worm Powders, Cough Syrup, Cancer Cure, Healing Balin and Corn Salve at all drugstores. BURNED WITH HIS HODSE. Result of a Fire at an Early Hour Near Braddock.

At an early hour this morning the house of James Naughton, at Hamburg, a settlement just outside the borough limits of Braddock

here 36 hours before he withdrew the hostiles from the warpath and brought them submissively under the guns of the military. While he was performing this work, white men ambushed six members of his band, who were on their way to Pine Ridge from the Bear Butte country. The party con-sisted of six men, two squaws, twelve ponies and two wagons. They carried with them a pass from General Brooke and assurances from Captain Taylor that they were peace-able. Not a member of the little band was

They had gone but a short dis-tance when they were fired upon from am-bush by a party of whites. Few Tails iell dead. His squaw was shot in the leg and breast. The squaw managed to crawl to the bushes, where she hid for a day before setting

out on her painful tramp to Pine Ridge, 100 miles away.

The rest of the Indians abandoned the other wagon and fled, and she supposed that they, too, were slain. On the day of the murder two young men named Culbertson called at the camp of Colonel Merriam and admitted that they had killed an Indian, but said the band had been caught stealing horses. Colonel Merriam, in his report to General Miles, says this story is untrue, and requests that the Governor of South Dakota be advised of the outrage, so that the murderers may be punished. Lieutenant Marshal characterizes the killing as cold-blooded murder. When the wounded squaw crawled into camp yesterday she was almost dead. miles away.

day she was almost dead. The Hostiles Badly Excited. The Indians at the hospital quickly spread the report that a relative of Young-Man-Afraid-of-His-Horses had been killed by the whites. Almost instantly there was com-motion in the hostile camp. Scouts reported the situation to General Miles, who immediately sent runners after Young-Man-Afraid When that chief appeared at headquarters and learned of the murder, he scowled, and for a moments refused to be pacified. Meantime the hostiles were saddling their horses on the sides of the buttes and herding their

cattle. Three shots were fired in the hostile village during the afternoon. It took all the diplomacy at the command of General Miles and his staff to win back the good will of the chief. Finally Young-Man-Afraid walked away apparently satisfied that the army at least was not responsible for the assassination, but the fright of the hostiles was intensified to such an extent that the military became alarmed. The situation has now become so complicated that the quarter-master has ordered 20 days' additional rations, and troops that were expected to come to the agency for a grand review have been ordered to remain in camp. This order

for rations is as heavy as any that has been issued since war began. Big Road Remains Loval. Few Tails was not only a relative of Young-Man-Afraid-of-His-Horses, but a brother of Big Road, one of the most pow-erful sub-chiefs at Pine Ridge. Big Road said to-day that cowboys had slaughtered the little band, and that the squaw of Few Tails was the only survivor. Another squaw who was killed was Big Road's sis-

ter. Despite his grief, Big Road said to-day that his heart was still good. Several guns were surrendered by the hostiles to-day. Many of the weapons were good Winchesters, while others were old rim-fire rifles with records that go back to the time when White Clay creek was so muddy that wind would not make a ripple on its surface. Two-Strike, Crow Dog and Young-Man-Afraid led a detachment of 18 nostiles who gave up 15 rifles. Less than

PARIS, Jan. 19 .- John Dillon, T. P. Gill, and Mr. and Mrs. William O'Brien arrived in this city to-day. In an interview, Mr. Dillon said he had made inquiries in regard to the matter, and had found that there was absolutely no foundation for the statement which recently appeared in Insuppressible to the effect that

Mr. Harrington has held back the lunds which had been collected in America for the relief of the evicted tenants in Ireland for the political advantage of Mr. Parnell. On the contrary, Mr. Dillon con-tinued, Messrs. Webb, Kenny and Harrington were using the funds strictly in accord ance with the agreement arrived at in America. Not a farthing had been used to any purpose connected with the present dis-

pute over the Irish leadership.
"I am happy to state," said Mr. Dillon,
"that both sides, including Mr. Parnell,
have agreed to an arrangement whereby the persons evicted from their homes will be protected, quite apart from the dispute in regard to the leadership." The Favored Nation Clause. PARIS-In the Chamber of Deputies today M. Bourgeois proposed the renunciation of all existing treaties of commerce, including those containing the favored nation

clause. He extolled the system of reciproc-

ity as the best means of protection against

M. Ribot, Minister of Foreign Affairs, in responding to M. Bourgeois' remarks, said that the moment had not yet arrived to examine the general economic policy of the country. France did not wish to isolate herself in the midst of Eu.ope.

The "favored nation clause" applied only to Russia, Austria and Denmark and countries supplying France with raw materials duty free or cereals taxed as soon as they entered the country. Nothing was to be gained by abolishing the "favored untion" clause. The treaties with China and Mexico were of advantage to France and their renunciation would result in great loss to French trade.

The Chamber, at the conclusion of M. Ribot's remarks, by a vote of 458 to 11 passed to the order of the day, thus approving his course. Koch's Experiments With Lymph. PARIS-Further details have been learned of Prof. Koch's experiment with his lymph. They show that many thousands of guinea pigs which had been inoculated have been cremated after the work of vivisection has been completed. The bodies of the animals are burned in a buge turnace situated in the Hygienic Institute. The researches which are being carried on with the new remedy are attended with considerable danger. It is reported that five scientists died after testing the glanders bacillus, and that three medical men who were working on the cholera microbe subsequently suf-

fered from a violent attack of the disease. It is explained that Prof. Koch and his assistants owe their immunity from sickness to the unceasing precautions which they take while pursuing their experiments. The Pope and the Indians. "The new national agreement is the one move that will make the January conference in New York the greatest historical event in baseball. The National League, the American Association and the Western Association are the parties to it. It preserves many of the lines of the old agreement, but the board of control is something new to the business. It consists of three men-one each from the three parties. These men are elected for five years. They are: Thurman, Krauthoff and Rogers. They are all lawyers and are sage, honorable men. This heard has absolute power. There is no appeal from its decision any more than there

"Hereafter, if a player thinks he has not been treated justly he can act independent of his manager or his president and throw his case into the hands of the board. If a president of a club overreaches himself or is guilty of some act that the board thinks prejudicial to the interest of baseball, the board has the power to simply swipe him off the face of the earth."

Mr. Spaiding added that the reserve rule was never in question at any time during the conference, but continued to stand as firm as a rock.
