REPAIRS TO TENEMENT HOUSES. A Sharp Reaction in Electric, but Coal

and Gas Stocks Score Advances.

THE NEWS AND GOSSIP OF THE CITY

One of the completest flats or apartment houses so far erected in either city is owned Mr. S. P. Harbison. It is situated on McClure avenue, Allegheuy. The building is three stories high, with six rooms and bath on each floor, and is so arranged that access to one story is independent of the others. The entrance is through a vestibule by three doors, corresponding to the number of the floors.

The building stands on a lot 40x150, and cost about \$12,000. It has just been completed. The idea worked out in its construction was imported from St. Louis. It possesses several novel features which must be seen to be fully appreciated. The agents, Alexander Loggate & Son, will take pleasure in exhibiting the building to owners, archi-tects or any others in quest of new ideas in this

> . . . Landlords and Tenants

A correspondent wants to know if it is the ustom in Pittsburg for landlords to keep their bouses in repair. The law requires tenements to be kept in habitable condition, but all else is matter of agreement. Leases generally specify that all changes and improvements shall be at the expense of the tenant. Some landlords coastrice this provision literally and refuse to do any hing in the way of repairs, while others are quite liberal. Generally, however, when a landlord gets a good tenant he wants to keep him, sod bears the expense of maintaiding fences, gates, walks, etc., in a good condition. This matter should be understood before leas-

For the Children.

Societies have been organized in several of the Eastern cities for the establishment of parks and playgrounds for children. The movement is a good one and deserves support, es-pecially in the smaller cities and towns where o such parks exist, and where, at present, it is not a difficult or costly matter to provide them. It has been demonstrated that the es-tablishment of public parks, including both the cost of original purchase and of improvement, is a wise expenditure from the business point of view, by increasing the value of adjacent roperty, and by making the city more at active as a place of permanent residence for on of means, to say nothing of the effects of such open spaces and recreation grounds on the health, morals and manners of the

No sheep were offered. Clipped lambs sold from 5340634c and wool lambs from \$6 600 7 15. Market opened at East Liberty with 89 loads Market opened at East Education and State Monday

Market opened at Last Laberty with S loads of dattle on sale, against 68 loads hast Monday and 93 loads the previous Monday. The quality of offerings was scarcely up to last week, but better than the late average. Receipts were in the main from Chicago and Ohio. There were very few from Indiana. The kind of cattle suitable for our markets, such as smooth, light butcher stock were scady at last week's prices suitable for our markets, such as smooth, light burcher stock, were steady at last week's prices, but all common and low grade cattle were weak and at the buyer's money. There were very few good stockers and feeders on the mar-ket. The kind offored were not wanted. Top price for carload lots was \$5 25, and only a few reaches here at this figure.

It Was as a Wrestling Match on the Chicage Exchange-After a Strong Fight the Bulls Carried Off the Laurels of Victory.

CHICAGO-It was a day of surprises in the wheat pit. The operators were like well-matched contestants in a wrestling bout, first one and then the other party being uppermost, and the victory in the end was a narrow one, but such as it was rested with the bulls. Wheat for May delivery is 1/20 higher than the close of the market on Saturday. A fair amount of steadiness was the first characteristic of the trading, followed in a few minutes by decided weakness. The price for May at the start was 97%c, with plenty of sellers at 97%c, with a tightening transformation to 97%c, and as quick a change to 97%c, 97c and down to 96%c before buyers again predominated. The fluctuations here noted occupied the first half hour of the here noted occupied the first half hour of the session. The predominating influence at the opening was the cold wave hurrying hither-ward from the Northwestern storm reserve, and this was succeeded by the easy wheat mar-ket at Liverpool and the expectation of not over 202,000 bushel decrease in the official visi-ble supply, but the chief disturbing factor to holders near the opening was the heavy re-ocipts at primary markets. Cautious local speculators were indisposed to sell short over a week's decline aggregating 5 cents per bushel, and easily persuaded themselves when prices began to recover from the break noted above that least dangerous operation was to buy "for a turn."
