W. J. Rainey Enters Suit in the United States Court Against Several Miners' Officials.

A CHANGE IN WORKING HOURS WANTED

Delegates at the Building Trades Council Rad a Lively Scrap Last Night.

The inventive ingenuity of General Manager Potter, of the Homestead mills of Carnegie Brothers & Co., has cropped out again in the introduction of a cold saw, for the purpose of sawing iron and steel, which has proved a great success, and is creating considerable interest.

For some years an instrument has been in use, known as the hot saw-that is, it could only cut metal that had been heated to redness, but it is not equal to the new saw brought out by Mr. Potter. The hot saw leaves a burr on one edge, but the new cold saw does clean, smooth work and is not very expendive.

A DISPATCH reporter had a talk with a gentleman yesterday who had seen the saw at work a day or so ago, and secured from him the following description of the new invention:

## What the Saw Is Like.

The instrument itself is simply a circular saw of fine steel, tempered somewhat hard and about one-quarter of an inch in thickness at the periphery. It is ground slightly thinner at its center to clear itself easily in a deep cut. It is made to revolve at a slow sreed, while the old hot saw was run at a high rate and did its work by means of the intense friction created rather than teeth. It cuts but one inch a minute. The ma-

chine differs from the ordinary circular saw in this respect, that it is not the work that moves up to the saw, but the works is fixed stationary and the saw is made to travel along the table through it. It is driven by a worm-wheel and screw of some four or five feet in length, along which it can be moved easily by hand-screw gear or by self-actin The saw runs in a tank of solution, and

the greatest care is necessary in regard to the quality of the materials in this solution It is made up of 10 pounds of whale oil soap 15 pounds of sal soda, 2 gallous of best lare oil, with water added to make 40 gallons of

## A LIVELY LITTLE TILT.

Delegates in the Building Trades Counc Have a Scrap.

There was a lively session of the Building Trades Pouncil last night." A resolution was introduced providing that no local union of carpenters or painters should be entitled to representation in the Trades Council unless they were first represented in their own dis-

During the discussion which consumed nearly the whole of the session which did not adjourn until after 11 o'clock a heated debate took place between Robert Tenary, or the Plasterers' Union, and M. P. Carrick, of the Painters'. The former made the open charge that the carpenters and painters were trying to "rin" the Building Trades Council. Carrick replied in pretty ho terms in support of the resolution, and calling Tennry to task for questioning the motive which prompted its introduction. The resolution was finally laid over.

## THREE-TURN MEN WON.

Employes of the Oliver Iron & Steel Company Wanted a Change. Some of the employes of the Oliver Iron

and Steel Works, of the Southside mills, have been endeavoring for some time to have their working hours changed. As it is now the milis run on three turns of eight hours each. The heaters, rollers and cupalo men desired to change to two turns of 12 hours each. The main supporters of the change are the heads of the different departments; the rest of the men desire to work the three turns per day.

One reason advanced is that if the mill would go on two turns a day a large number of men would be thrown out of employment. Yesterday afternoon the matter was taken up by Macanu Lodge No. 93, A. A. I. and ., and after quite a heated discussion it was put to a vote, and those in favor of

## MORE MONEY FOR STRIKERS.

The Weekly Distribution of \$2,000 Made at Corning Yesterday.

The regular weekly distribution of funds was made yesterday among the Corning strikers. Word was received at the flint workers' headquarters that Houghton & Co. were having considerable trouble with

the work they are turning out.

Last week, it is said, they sent away 300 barrels of bulbs, and 229 barrels were returned to them marked "rejected." They are still operating, or trying to operate, their factory with green men and boys, but it is said business is gradually leaving them now that four or five other firms in the country are in a position to make the same country are in a position to make the same

## WISHART WINS AGAIN.

Judge Stowe Decides Against Coal Operator for Sunday Work.

Judge Stowe yesterday handed down an opinion on the appeals of F. L. Robbins the coal operator, and J. Nichols, one of the employes, from the decision of Alderman Bell. They had been fixed at the suit of Captain Wishart for engaging in worldly employment on Sunday. The work performed consisted of hauling coal from Robbins' mines in Mc-Candless township to the Pittsburg and Western Railroad.

Judge Stowe, in his opinion, said that he could not find any evidence in the cases tending to show that the work was such as falls within the exceptions of the statute re-garding work of necessity, and he affirmed the judgment of the Alderman.

## A Statement Denied.

Harry Brown, the coal operator, stated vesterday that some of his men are returning to work. Miners' officials deny the statement, and say that the men are firmer in their position than when the strike first occurred.

## A New Constitution.

The new constitution of the Carpenters' Brotherhood has been finally adopted, and goes into effect immediately. A. M. Schwartz, the new General Financial Secre-tary, has had some hesitancy in furnishing the \$20,000 bond required of him, but matters have been arranged and he will enter upon his duty at once.

GOING INTO THE COURTS.

W. J. Bainey Asks for an Injunction Against Labor Officials

W. J. Rainey entered suit yesterday in the United States Courts against John Mc-Slay, John McBryde, Peter Wise, C, M. Parker, Mike Desinal, Frank Kerfoot, Frank De Haven and J. B. Rea, charging them with illegal and violent acts. The defendants are officials of the United Mine Workers, and Mr. Rainey asks for an injunction restraining them from assembling and procuring others to assemble near his works and from making threats and menaces to compel his men o quit work.

Mr. Rainey's attorney, Johns McCleave, lett for Scranton last night to present the bill of complaint to the court.

# SENTENCED TO THE PENITENTIARY.

Fate of Three of the Representatives of the Granite Association. Messrs, Kimberlin, Eggleson, Cary and Snyder, the four representatives of the

Granite State Building and Loan Association, who were convicted of conspiracy, were brought up for sentence vesterday. Judge Stowe said that the defendants had been given a chance to prove that the As-sociation was an honest one, but had failed to do so. He thought the whole thing a stapendous fraud. The defendants had been given an opportunity to pay back the money they had fraudulently obtained and had failed to do so, which strengthens the belief

hat the company was a fraud. He then sentenced Kimberlin, Eggleson each pay a ot \$500 and undergo an imprisonment of two years in the penitentiary. Snyder was given until next Saturday to produce evidence of his

He looks exceedingly well and refuses to talk about the arrest. He is now a man of about 40 years of age.

The story of his crime was told last week. It was the murder of the Means sisters at Parnassus on November 13, 1881. He was sentenced for the murder of the one and is now to have a trial for his life for killing

Copeland is 30 years old, and a member of the firm of A. B. Copeland & Sons, one of the best known business houses in the Allegheny Valley. About a year ago he had an attack of la grippe, and about the same time became much excited over a land boom which struck that vicinity. His mind was unbalanced, and he was taken to Chautauque, where he remained for two weeks without any apparent improvement. Later he was removed to the State Hos-

pital for the Insane, at Warren. Last December Copeland's mother was stricken with paralysis, and while her death was daily expected he was taken home, the physicians having decided that he was much improved. The death of his mother did not appear to materially affect him, and he attended to business with his usual assiduity. He has always lived with his wife and two children at his father's house.

## Peculiarities of an Insane Mau. Last Wednesday Mrs. W. S. McMeekin,

his sister, gave birth to a child, and Friday her condition was such that it was necessary to take the infant from her, and it was arranged that John's wife should care for it. John was then asked to spend the night with his brother, J. Renwick Copeland, and after some objection consented. At that time he appeared to be very much excited, and said he believed they intended to send him back to Warren. He was quieted and went to bed.

When he arose yesterday morning he appeared in good spirits. He went to his tather's house and directly to his wife's room. He kissed her, told her to prepare for breakfast, and sat down to wait. When dressed Mrs. Copeland started to leave the room, but was called back by her husband. He asked her whether she loved him and would continue to do so always, and when she replied in the affirmative he kissed her,

and quickly pulling a revolver fired.

Mrs. Copeland grappled with her husand and attempted to secure the weapon. She falled and he fired a second time. Then she fell, two bullets having entered her left breast above the heart. He then aimed a shot at himself which missed, and another at his wife which also failed of its mark. Before he could fire again his father entered the room and disarmed him. When messengers had been sent for physicians and members of the family, John went to his wife and leaning over her, apparently did not realize what he had done.

The Maniac Under Guard. Mrs. Copeland was conscious at this time and as her eyes wandered to her husband she murmured, "Poor John." Later the husband was put under guard in another room, where he remained perfectly passive. Occasionally he would ask about his wife and then sit still, with his head resting

upon his hand.

The senior Mr. Copeland says that the time of the shooting was only a few seconds, and that at the first report he hastened to

## A VERY HARD FIGHT

Being Waged at Apollo and Leechburg on Local Option Laws.

LONG PETITIONS ON BOTH SIDES Forwarded to Harrisburg for Legislative Consideration.

WHAT ONE OF THE RESIDENTS SAYS

The boroughs of Apollo and Leechburg have for twenty-five years been working inder a local option law, and in that period have had no saloons. At present the citizens are very much stirred up over a petition to the Legislature to have the law repealed and make the Brooks liceuse law operative. On this question the people are divided, some standing up for the present law and others arguing against, while still others refuse to take either side and say they care not which way the matter ends. First those against prohibition got up a etition stating their side of the case, then

the other side came out with the following WHEREAS, We learn with inexpressible regret that a petition will be presented to the Legislature at the present session, praying for the passage of an act, submitting to the qualified voters of the boroughs of Apollo and Leechburg, in the county of Armstrong, the re-peal of a certain act of the General Assembly of

the State of Pennsylvania, entitled "An act to prohibit the issuing of licenses within certain boroughs in the counties of Armstrong, Potter, Indiana and Perry, or within two miles of the same, in the counties within which such bor-oughs are located," approved the 27th day of March, A. D., 1868, so far as the same shall apply to the said boroughs of Apollo and Leechburg, in the county of Armstrong.

Protest of the Local Option Side. We do therefore most earnestly protest against any such action being taken, or such ubmission being awarded, for the reason mong others, aside from mere moral considations, that we believe that said local pro-hibitory laws have been instrumental in the most direct manner in promoting the industry, development of resources, wealth and growth of our respective localities, and the contiguous territory along the Kiskiminitas Valley, evidenced especially by the following facts:

First—The number and excellence of the schools and churches in said boroughs.

Second—The industry and thrift of the inhibitants

habitants.

Third—The multiplied number of nouses actually owned and enjoyed by the citizens, beautified and made comfortable by that care and interest developed and exercised under the influence of actual ownership.

Fourth—The significant absence of absolute powerts or paymering among the nearly. poverty or panperism among the people. The insignificance or comparative absence of taxes for the support of indigent poor, as compared rith other localities.

Fifth—The rarity of crime in our communi-

Fifth—The rarity of crime in our communities, especially the higher grades, as compared with its prevalence elsewhere.

Sixth—The promise of larger outgrowth and prosperity that seems assured for the future if our present prohibitory system is continued, which in the past has done so much to invite and encourage investment, and the erection of industrial plants in our midst.

Seventh—That a change of the system, after a successful and prosperous experience of 25 years, would be a breach of faith to those who have come among us and invested their money, established our industries, and built our homes. We do therefore most earnestly protest and remonstrate against any act, resolution or legislation tending toward the repeal of or in any way affecting or impairing the beneficent provisions of the act of 1866 as it now stands.

The Agitation Goes on Vigorously.

The Agitation Goes on Vigorously. At present the affair is at a stand, except that every day there are new signers to each petition, and the question furnishes a fruitful theme for conversation. Nothing else scarcely is thought of in the talk for and against the repeal of the law. James Kirk-wood is a well-known business man of Apollo, and is in a position to tell some-thing of how the matter stands. He was in the city yesterday on business, and a DIS-PATCH reporter had an interesting talk with him on the question in hand. He is a very conservative gentleman, and at first said he preferred not to talk about it, but after considerable difficulty was drawn into conversation, during the course of which he said

among other things;
"The lacts are that we are constantly treated to great surprises. For instance, some of our leading citizens in Apollo, who have been heretofore familiar figures on the temperance platform, are now arrayed in favor of license. Some are uncharitable enough to attribute their present attitude to mercenary motives, as they are interested in a new hotel, which they consider rather a poor investment without license. "On the other hand, we have in the town

Twenty-Five Years. The Henry F. Miller pianos have gained pre-eminent artistic reputation, the result of years of brilliant successes in the great orchestral concerts of America, as also the orenestral concerts of America, as also the concerts of the world's most distinguished pianists and vocalists, who have, from time to time, selected as their first choice the Henry F. Miller grands to accompany them on their concert tours throughout the United States. The Henry F. Miller is the favorite with musicians, and a piano that has gained great fame on account of its wonderful musical tone, quality of tone and unsurpassed durability in the homes of music lovers.
