Ordinance No. 155 fixing the number of joint standing committees, the apportionment of members, etc., was read by Mr. Cochrane and passed in similar short order, as was No. 156, establishing the office of Controller of Taxes. defining his duties, etc. The next, No. 157, relating to the Board of Assessors, was dis-posed of as soon as read, and so was No. 158, in

posed of as soon as read, and so was No. 158, in relation to the city scals. The charter ordinances thus having been rapidly disposed of President Lindsay called Mr. Cochrane to the chair, and Councils then went into committee of the whole to consider the appropriation ordinances, No. 159, and Mr. Henricks made the first motion by advocating the reduction of the general tax from 13 mills to 12 mills. He withdrew the motion temporarity until the estimated expenses could be reached. When this was done the first blow was struck, Mr. Kensteay moving to reduce the figure for salaries from 5% 400 to \$65.00. Mr. Wertheimer objected. There was but \$56,000 in the contingent fund, he said, and he don not know where the momey was to come from to run the city. A reduction of 1 mill nade a difference of \$50,000 in the income of the city. There were many contingencies to

made a difference of \$30,000 in the income of the city. There were many contingencies to meet, among others a new bridge to be built at Herr's Island for \$30,000. W. W. Speer, interrupting, said: "I wish to put the point of order that the gentleman is not in order." Mr. Wertheimer-I wish Mr. Speer wouldn't before and propagade to say that propagations

bother; and proceeded to say that preparations being that in proceeded to say single preparations were being inndet to get in the old shape. Some claim that 50 per cent of the taxes would be collected when it was well known that 85 per complete when it was well known that 85 per

cent had never been gotten in. During his address Mr. Werthemer was fre-quently interrupied by Mr. Speer, and finally said to him. "Don't bother me," to the great delight of the lobby.

Mr. Lare made a speech, the burden of it was that this was important legislation and the city should "go slow." He talked about the exbense of the city's clerical work and attacked the Finance Committee for not giving details. Mr. Snaman offered the information, Mr. Lare would not vield it and Mr. Snaman said he did not know what he was talking about and the lobby was again delighted. It was a boisterous quarter of an hour.

The Exact Amount of the Cut.

The Exact Amount of the cut. Arthur Kennedy said that year in, year out, committees were cut down in their estimates and it resulted in \$200,000 debt piling up. The cut made in salaries at the last meeting amounted to \$5,400, or one-tenth of a mill. That amounted to \$5,400, or one-tenth of a mill. That and it resulted in extraord dettiphing up. The cut made in salaries at the last meeting amounted to \$5,400, or one-tenth of a mill. That was the result of the labor of the mountain. Some of the cut was outrageous; other parts were all right. But that was the amount of the dut, and nothing more. He deprecated the interruptions which took

place and said they should be there as business men and not make a monkey show of themselves.

The salaries were fixed at \$65,000 instead of \$70,400

The next item was interest, \$17,000. Mr. Speer wanted to know on what was the inter-est. He said he wanted information and was there to get it. Mr. Suaman, Chairman of the Finance Com-

nittee-luterest upon new bonds not provided. for, Mr. Henricks thought it was to provide inter-

Mr. Heariets thought it was to provide inter-est on the oefficiency. Mr. Speer said he did not want thoughts, he wanted facts, and then there was a general call for the Controller to throw some light upon the item. Meanwhile, a number of members arises and began talking all at once, until the Chairman called for order and the Controller said the interest was for bonds outside of the shving fund. The fire department item of \$165,214 came up work.

The first department item of \$105,214 came up next, and W. M. Kennedy moved to reduce it to \$100,000, which was carried.

The street department item of \$80,000 was cut to \$75,000 without trouble. The police depart-ment item was fixed at \$135,679 61. Mr. Speer ment item was fixed at \$135,679 61. Mr. Speer unwed to out it to \$130,000, and his motion was quickly followed by others for \$155,000, \$120,000 and \$100,000. Mr. Wertheimer asked the gen-tlemen to show how the department could be run on any such money? Councils had fixed the force at a certain strength and the men had to be paid.

Old Women on the Police Force.

Mr. Sneer-The citizens of Allgheny are bleased. They have fewer thieves than most cities, but at the same time they are blessed with a greater number of old wearen on the police force than any city in the country. If the gates around the city hall were looked, and if a man could only get on the force by climbng over them, nine-tenths of the police force would be looking for other jobs. Nine-tenths would be looking for other jons. Nine tenths tolly of the design down. Just look at them. What are they? Wooden men! Wooden men! [Much laugh-ter.] We could get good men for the money we bay them. Mr. Snaman defended his estimates, but Mr.

A resolution was adopted providing for the amendment of the rules in order to enable the school boards to make an equitable apportion-ment of teachers in each of the departments to the spread world as a result of schedules of he several wards, as a result of schedu alaries adopted at the previous meeting. schedules of

The difference in the rates is bound to be great, and while a man is trying to talk to a distant person he could send 30 telegrams. Turning to the subject of the weather, he said: "I can remember when I was a boy that we had plenty of show and sleighing in Pitts-burg, and I have often noticed in later years that a few miles out of the city the ground is covered, while there is searcely a flake here. I think that the rising heat from all the mills and furnaces in Pittsburg modifies the atmos-phere and prevents the moisture from coming down in the form of snow. We haven't had a good enow for a dozen years." ters, but the sons were absent. Scarcely a young man was seen on any of the cars, and the general appearance of the passengers indi-cated that they were invalids. Either a trip to the Golden Gate on a magnificently equipped train is stapid, or the young men remain at home to run the business while the old folks are enjoying the fruits and warm climate of Southern Galifornia. The train will run over the Santa Fe road,
