That NEW YORK, March 31.-Business in drygood at first hands was unchanged in character.

is true now. The first three months of 1891 have been full of distrust and foreboding. That business has held up so well is not a little sur-prising. The, steady improvement noted on several occasions lately indicates that the worst is over and that the impulse from this time forward will be in the right direction. By going back to 1859 it will be seen that business of the two periods shows very little difference. The bank clearings for march of the former year were \$52,735,140 51; this year they are \$62,578,800 72. Clearings for march of the former year were \$52,735,140 51; this year they are \$62,578,800 72. Clearings for march of the same months this year, as compared with the same months this year, as compared with the same months this year, show a small bal-ance in favor of 1891. This fact is sufficient to show a healthy state of affairs, since 1889 was conceded to be the best year in the history of the city up to that time. The causes for any depression that may exist have been pointed out so often as to be well known and understood. It would be unreason-able to expect greater activity than exists with half the people sick and the other half com-plaining. It's along have that has no turn. In the nature of things there must be a change for the better before long. Courage and per-severance will brings the clearing House report for the day and month, with comparisons with 1890 and 1859. There is nothing in it to cry over, but much, when everything is considered, to be proud of. regularities, hot flashes, are cured by Dr. Miles' Nervine. Free samples at Jos.
