LETTER FROM A GRATEFUL PATIENT IN-DORSING DR. SYERS' HOME TREAT-MENT - TREATMENT \$5 A MONTH TILL JULY 1.

MONTH TILL JULY 1.

"GREENSBURG. PA., March 23, 1891.

"DEAR DOCTOR—I am in receipt of your favor 21st inst., and was greatly pleased that the contents of my former letter were so gratifying to you, and I assure you that words fail me at this moment to express to you my unbounded satisfaction with the results of your treatment. I am full of activity and hope to-day where one year ago I was despondent and ill natured. When I wrote to you the other day! did not write as an advertisement, it was purely the outpourings of a thankful heart, and I would say if you wish to use my name in any way that will further your interests I am sure that you have my warmest consent, and in the meantime anything that I can do for you, will be, on my part, a deed of justice to one who takes such a deep interest in his fellow man.

DR. J. VAN DYCK, 502 PENN AVE.,

Coke Operators Have Offered Their Men the Only Terms They Can Grant and Meet.

COMPETITION FROM THE OUTSIDE,

The Terms of the Sliding Scale Claimed to Give the Workers Far the Best of the Bargain,

H. C. FRICE SCORES LABOR LEADERS.

He Charges That Much of the Disturbance Is Due to Their Haranguing.

The situation in the coke regions is and displays evidences of continuing for some time to be the question of greatest interest end. Many thousands of dollars are at stake on the issue on both sides; operators are seeking to reduce the cost of the product under that of last of our State should see that these men do end. Many thousands of dollars are at in pay above the last year's rate. From what Pittsburg operators say on this matter. and from the utterances of the labor leaders, there is scarcely any hope of an early adjust-

ment of the difficulties. Declare They Will Not Recede. There is one position from which the operators say they will not recede, even had that is, any higher wages than those offered under the stiding scale. This schedule of wages places the price of mining at \$1 per 100 bushels when coke sells at \$1.75, and provides for an advance of 2 cents per 100 bushels for every 10 cents increase in the selling price. It also provides that \$1 per 100 bushels shall be lowest price paid, the scale to run for three years. This is 7 cents per ton less than last year's | tells a reporter that we were trying to comrate. In relation to this subject Gilbert Rafferty, of the McClure Coke Company, was asked vesterday for an expression of his

sliding scale," he said, "is not alone fair to | the State, who is called upon to act in this the men, but very much more to their ad- matter, to expose this sham and present it in vantage than it is to ours. In fact, it is so its true light. ing offered had I been in Pittsburg when it was drawn up. Under it El per 100 bushels is the lowest price which can be paid no matter how low the price of coke may fall, and a proportionate advance is given for every rise in coke above \$1 75 | sorted to.

Where the Miners Have Best,

"You can see that the miners have the advantage in every way. They cannot receive less than \$1 per 100 bushels, while the operator is fied to that figure no matter how much under \$1.75 the price may drop."

"But is there much likelihood of coke failing below that figure?" You must remember that the scale runs for three years, and who is to foretell what may occur in that period? I remember an occasion when coke sustained a fall of 65 cents in half an hour. We had a meeting, and circumstances were such as to bring about the reduction. It must be remembered that the Connellsville operators do not make all the coke that goes into the matter, and that they have to compete with those outside. The rates in our region have been steadily advanced during the last few years, and sometimes when there was no excuse for it, while the rates paid outside were not advanced in proportion. We are no longer able to pay higher wages than our neighbors do, and while we are desirous of pay ing our men every cent they earn, we canthe form more than will allow us to hold our own in the open market. When the Connellsville operators look around and see the number of works which are being women and children. Twenty pages. run without the assistance of unions, and consider the treatment they receive at the hands of the labor lenders, is it not time for them to attempt to operate their plants with inst as much freedom as to the source of

their labor, as their neighbors do? When a Settlement Could Ocear. 'The settlement of the difficulty will occur when the men are ready to accept the terms offered them under the sliding scale, and not before. As far as the McClure Com-pany is concerned it will shut down its works for six months before it will offer any other terms. We believe in paying our men well and have always treated them fairly, but this time they have, through their leaders, taken a position we cannot accept, and they must retreat from it." H. C. Frick was seen during the after noon yesterday. He expressed the opinion that the presence of troops in the region would have the effect of preventing further

disturbances. In reply to the question as to the probabilities of a settlement, he re-"We are attempting to operate our plants with men who are willing to work for us at the rate of wage we have offered, and we should have ind the Morewood plant in operation yesterday if the strikers had not interfered. We regard the terms offered under the sliding scale as being fair, and we certainly don't see our way to make any improve-ment upon the terms therein ofterest. We are not seeking to compel any-one to accept this scale, and we believe that the men who have formerly worked for us are ready to accept it if permitted to do so

by the men who claim to be their leaders. Mr. Frick Replies to Mr. Watchorn. "My attention has been called to an interview in a morning paper wherein ex-Sec-retary Watchorn, of the Miners' Union, is reported to have charged that the present violence in the coke regions grows out of the attempt on the part of our company to compel Hungarians to go to to compel Hungariaus to go to work. Mr. Watchorn is an appointed of Governor Pattison, and from his official position his atterances might be regarded as coming from the Executive Department of our State, and therefore I think it worthy of reply. In this interview Mr. Watchorn also charges me with having imported thousands of foreigners, promis-ing them a sort of Utopia, and at-tempts to hold me, therefore, re-sponsible for their acts. Mr. Watchorn well knows that this same charge was made by the labor leaders in a former strike, and at my request a full investiga-tion was made of it by the appointed repre-sentatives of our National Government. He also well knows that in this investigation our company gave to the Government full necess to all of its records and correspond-ence, and that a report was thereupon made, and filed in Washington City, complexely exonerating both myself and our company

from these charges. A Challenge for Investigation. "With these facts so well and personally known to Mr. Watchern, I cannot imagine any justification that he has for repeating them, as they were untrue when originally made, both as concerns myself and our company, and he knows them to be untrue now. And I am now ready and willing to state that neither myself nor our company, nor anyone on its behalf, directly or indirectly, assisted, procured or requested my man to emigrate to this country, and if Mr. Watchorn or any of his associates challenges this statement in any particular, we are pre-

"Although the violence committed in the

pared for the fullest examination.

vicinity of our works has been mainly by foreigners, the public knows that these peo-ple are simply the tools working out the plans and designs of others. The plan now adopted of using these men to accom-plish their works of violence is but a repetition of former acts. In every strike in the coke region these are the men which have been used, and found to be pliant tools, whenever violence is to be done. The public should not allow itself to be blinded to the real authors of the present

Bloodshed the Result of Bad Advice. "This breach of the peace and violation of the law of our land is not the result of a sudden gush of uncontrollable passion, but is the result of a deep-laid scheme and wellplanned attempt to override the civil authority of our State. Not the foreigners, who are advised that their living depends upon their resort to violence, are to be blamed for this, but those who give that advice. Riot and bloodshed are the inevitable and natural results of the influence and counsel of bad advisers. They have called meetings of these foreigners, and have incited them by incendiary speeches, well knowing that when excited they will resort to violence, and then try to in relation to industrial matters. Assuming that the presence of troops in that section this foreign element has gotten beyond will prevent rioting and the destruction of property, there yet remains the consideration of how the whole matter is likely to and the public press, and the lawful authority of our State, should fix on them the

year, while the men demand an increase | not escape the odium resting upon them, which is due to their acts and conduct. "Finding we were not able to pursue our business peaceably we handed over our works to the civil authorities of the State, Let the labor leaders, if they can, show how it came that these men belonging to their union, and whom they claim to represent, came in conflict with the authority of the State. Let them explain why these rioters were marching around our works with they to cease making coke in support of it; drums and firearms at 3 o'clock in the that is, any higher wages than those offered morning. Why did the Sheriff deem it necessary at all to have deputies to preserve the public peace, if these men were law-

abiding men as the leaders would have you believe they are? Not a Morewood Man Harmed. "It is a significant fact that not a single employe of the Morewood Coke Works, CUTICURAwhere the riot took place, is found among either the killed or wounded. Mr. Watchorn

pel these men to go to work, and with such falsehoods as these trying to throw the blame off themselves on to our company and the officers of the law. This is too serious a iews.
"The rate of wages proposed under the owes it to the people and to the Governor of

"The statement made by Mr. Watchorn much more reasonable an offer than the con-ditions of the market and the circumstances to work is not true. We simply offered to of the case warrant, that I myself would put our works in operation again, and to have earnestiv protested against its beupon a sliding scale proposed by our com-pany, based on the selling price of coke. Many of our men accepted this proposal, and were glad to do so, and it is to prevent these men, willing and anxious to work, from doing so that violence has been re-

NO MORE TROUBLE EXPECTED.

Special Agent Houghton, of the Pennsylvania, Returns From the Region. Special Agent Hampton Houghton, of the Pennsylvania road, returned from the coke region last evening, where he had been watching the company's property. Mr. Houghton says the country is as quiet as a church, and he anticipates no further trouble. Some strong talk is heard in the

crowd that attends the inquest but it ends in words. The Eighteenth Regiment edified the natives yesterday afternoon with a dress parade on one of the hills overlooking Captain Harry Palmer, of Freedom, passed through the city last evening on his way to the region with two recruits. He has charge of Company B, Tenth Regiment, and when the order to report was issued he was not at home. The Pennsy

vanua road sent him to Mt. Pleasant from Greensburg on a freight engine. THE Home for Indigent Gentle-Women at
