Houston, J. H. Gray, W. B. Lupton and Charles McKennan. This report states that Superintendent Quay stripped all the boys in the school, and found 42 marks of punishment. The committee found at least three-fourths of the cases were so slightly marked that under ordinary cir-cumstances they would not be noticed. Of the 42 before the committee, 28 were marked on the arms, 6 on the body and 7 on the legs. Ten boys said they had received their marks within six months, and the balance had been pun-ished previous to that time, some as far back as five years. "Your committee are of the opinion that there has been no crueity in the punishment inflicted upon the boys."

Government can and cannot de," Mayor Gourley-Blaine's argument is conclu-sive. A Government that is good enough and sale enough for our own citizens ought to sal-far the foreigners who come to this country. Chief Brown-Secretary Blaine's contention that citizens and aliens are on the same footing that celtizens and aliens are on the same footing in this country, so far as relates to the projec-tion of life and property, ought to satisfy the Italian Government. The Constitution of the United States is in every diplomatic library in Europe, and was thoroughly understood when making treaties with this country. Morris Mead, Chief of the Bureau of Elec-

Captain Crosby Gray-The controversy between the United States and Italy shows the weakness of the doctrine of State's rights. State lines should have been abolished years State lines should have been abolished years age, and no better time could have been found than at the close of the war. If we are to take our place among the nations of the earth the Government must be in a position to make treaties, which it cannot do at present to the satisfaction of other nations. Rudhi takes the right pround when he intimates that if the Constitution stands in the way of fulfilling the provisions of treaties made with forcien provisions of treaties made with foreign powers it should be amended. I believe that this incident is simply a sign pointing to a change in our method of government. We need a strong government for this country, and we must have it, whatever the cost. It is easy to say that aliens have the same protection as eitizens, but our citizens are not protected. For a hundred years, in some sections of the country, a certain class of cuizens have been country, a certain class of chirens have been otherred from those inalienable rights guar-anteed by the Declaration of Independence-life. appoints committee to come here and investi-aste the school." Speaking of the parole system, Mr. Quay said that it was the desire of the managers to send the younger inmates of the school back to their homes. When this cannot be done, then they are sent to people who will take them upon the promise of doing the best they can for them and reporting the conduct of the paroled person to the Superintendent. "Unfortunately," said Mr. Quay, "we are compelled to send most of the cuildren who have been here back to their homes, where they meet the same baleful in-fluences from which they were supposed to have been taken." His preference was for out-side homes, and a man who could give all his time to looking after them. But he thought a man who could fill that bill worth inore money than could be paid him by the State. Mr. Quay took up the report from the female department, which was handed to bim yester-day moraing, when the question was asked about the girls not being taught useful work, fielping the housekeeper, 7; cooking, 8; laundry, 45; brush works, 40; sewing 21.
