IMPECTAL TELEGRAM TO THE DISFATCH.1
 NEW YORK, April 23.—The condition of the iron and steel markets is reported as follows by the *Iron Age*:
 American pic—The market has been dull during the week under review. We print else where an interesting report from a centleman high in authority in the iron trails of this city, on the position of the Southera farmaces. This report shows that the stocks are low. As re-flecting the position of the most important producers in this section, we may state that the stock of the Thomas Iron Company, which was 10,800 tens on January 24, is now about 4,700 tens. Since the company make about 3,300 tens weekly, their present stock is equal to less than ten days' product. Northern brands are quoted at \$172815 for No. 1, \$166215 30 for No. 2 and \$14814 30 for gray forge. Son hern iron sells at \$163021725 for No. 1, \$165726105 30 for No. 2 and \$14814 30 for gray forge. in the East, large buyers being well covered in billets, which are quoted at \$27.50027.75 at Eastern makers' mills. Rods are dull at \$39 at lidewater. There is nothing doing in foreign rails-During the past week the market

Steel rails—During the past week the market has been very quiet, no transactions of any size having been closed by the Eastern mills. The latter, however, are now in excellent shape, so far as orders for the near future are concerned. Up to the first of this meant three mills, in which we include the Cambris, had orders on their books for about 250,000 tons, out of which they had delivered up to that time about 55,000. They have certainly taken more orders this month than they will deliver, so that even if they get no further sales in Areit they will enter May with from 175,000 to 200,000 tons of rails to be rolled. Since the greater part is for early delivers, the majority of this group of mills are in very good shape for the next two months. The two large Western concerns, Illicois and Carnegre, have done so little work during the first quarter— having delivered only alout 00,000 tons up to April 1—that they have a good deal before them, in spire of their enormous canacity. It is estimated that the two motes ather week in section. April 1-that they have a good deal before them, in spite of their enormous canacity. It is estimated that the two entered this month with about 225,000 tons of rails to roll. Of course, the pressure from the roads of the Northwest for track materials comes a little later. On the whole, therefore, the rail mills regard the near future with very little anxiety. They are firmly holding at \$30 75631 00 at tidewater, and it is pointed out that all of them have a strong interest in maintaine prices along ther have need out that all of them have a strong creatin maintaining prices, since they have ting the days of anxiety and doubting end a considerable aggregate of work, as undelivered, with the understanding that and a break occur the purchasers are to get here fit of a.

form. Operations have not yet increased to any remarkable extent, however, the advance being due chiefly to the over-sold state of the market, and the difficulty experienced by oper-ators on the bear side in securing warrants to cover their short accounts. The bulk of supply is well belo. A quantity of warrants changed hands privately at prices much above present open quotations. Stocks in warrant stores have undergone a further large increase. There are now 52 furnaces blowing in Scotland. Cheveland advices note a better demand in that section. Latest sales of warrants were at 45 for Scotch. 29 2026 201 construction of the loss, although trading has been moderate. dence for himself. John McBride, Whitney & Stephenson's ex-John McBride, Whitney & Stephenson's ex-change expert, returned from New York yes-terday. The strong close of Electric yesterday indi-cated a firm market for it to-lay. With the exception of Philadelphia the natural gassers are painfully dull. Some in-sist that Philadelphia is being bought by certain people as an investment. Clinzeus' Traction is the leader of that group of slocka. Its strength is partly due to talk of a larger dividend. Superintendent Hannan has ordered the canals in New York State to be opened for navigation on May 5.

day, especially in the forenoon, was an ex-tremely active and buoyant one, with a quieter tremely active and buoyant one, with a quieter state of affairs in the afternoon and some con-cessions from the high prices of the early trading. The movement, yesterday was at-tributed to the Gould party, and that of to-day, although Mr. Gould is not yet here, and the Gould stocks were relegated to a secondary posi-tion in the market, and the Grangers again brought to the front, was attributed in great measure to the same source. The old stocks and Industrials were not only sluggish to-day, but inclined to weakness at times. In the latter Lead Trust was an excep-tion, and displayed great strongth throughout

times. In the latter Lead Trust was an excep-tion, and displayed great strength throughout the day, with a comparatively large amount of business. Chicago Gas was left to take the same course as the other Industrials. Outside of this there was no marked morement among active stocks. The market finally closed active and firm at close to the best prices. Railroad bonds were more active, the sales reaching \$2,120,000, with a firm tone through-out, but without material change in quota-tions.

Groceries

The scarcity of sugar noted in this column for a week or two past bids fair to be corrected soon. There is now plenty of granulated in the hands of jobbers, and while soft whites and brown sugar have been scarce since the tax was lifted, if consumers will but possess their souls in patience they will soon be amply sup-plied. Coffees are still firm. All wholesale

grocers report great activity of trade. GREEN COFFEE-Fancy, 243422554c; choic
