A SCARCITY OF IRON

Is Reported From the West, Where Bessemer Has Advanced.

STEEL RAILS ARE AGAIN PULL.

Considerable Feeling Stirred Up in the Manufactured Trade.

STATE OF FOREIGN METAL MARKETS

INPECTAL TELEGRAM TO THE DISPATCH. NEW YORK, April 30 .- The condition of the iron and steel markets is reported as follows by the Iron Age:

American Pig-The first signs of a temporary scarcity of iron are reported from the West, where spot Bessemer has advanced to 517, although May delivery is offered at low prices, coupled with the provise "in case the coke strike is settled." in this market the situation has not changed. Northern brands are quoted at \$17@18 for No. 1, \$16@16 50 for No. 2 and \$14 @14 50 for gray forge. Southern iron sells at \$16 50@17 25 for No. 1, \$15 50@16 25 for No. 2 and \$14@14 50 for gray forge.
Ferro Manganese and Spiegeleisen—All man-

ganiferous material is exceedingly dull. We quote 80 per cent ferro \$63 50g64 00, which is the equivalent of the English combination

Billets and Rods-Some special slabs have sold for early delivery at a low price lately, and the reports from the West make prices on orwhich is close to the lowest figure touched. In Eastern Pennsylvania the delivered price is \$27.50@,27.75. Rods are dult in this section. The West quotes \$36.00@36.50. Wire rods are being offered at \$33.00, at mill, by at least one works.

eel Rails-The market has relapsed into Steel Rails—The market has relapsed into duliness, not a single sale of any magnitude being reported by the Eastern mills, who continue to quote \$30 75@31 00 at tide water, while Pittsburg asks \$30 and Chicago 83 atmill. In some cases brokerages are being paid. We print elsewhere a series of tables showing the monthly cost of making rails at a leading mill. Manufactured from and Steel—The trade is agitated over the proposed State bill relating to iron in buildings, which is construed into an attack on the rolling mill interests in favor of the architectural iron works. At the same time a matter has been given publicity, which has been the subject of comment in the trade for some time past. The leading architectural works of the city sent a circular letter some time since to the structural mills, protesting against the action of some firms in Fidding for work over their heads, in their eagerness to secure work. The representatives of at least two mills are said to have gone to the customers of the architectural works. The majority of the mills, however, protect the latter. Within a day or two at least two large contracts, involving 1,000 tons of beams each, are to be placed. The quantity of work in sight is satisfactory, but prices continue low. We quote angles, 1,95@2.10c; sheared plates, 2@2.25c; tees, 2.45@2.75c, and beams and channels, 3.1c on dock. Steel plates are 2@2.15c for tank, 2.3@2.0c for shell and 2.5@2.7c for flange on dock. Bars are 1.7@1.8c on dock.

dock, Rull Fastenings-A meeting is being held in this city by the spake manufacturers, who have endeavored to shroud their purposes in mystery. It is understood, however, that an fort is being made to advance prices, and 2 25 is spoken of as the figure to be arrived at. between the Southern mills. The trade will receive any announcement of an advance with the skepticism which past signal failures in the same direction warrant. A new spike mill is to start at an early sate at Allentown Pa. We quote fish plates, 170@1.80; they have sold as low as 1.67c, delivered. Bolts are 2.65@2.85c. Old Material—The market is liteless. Mills within reach of this market decline to take any interest, but intimate that their views approach \$21 at Jersey City. In one case an Eastern mill has bid equivalent to about \$21 50 at Jersey has bid equivalent to about \$21 50 at Jersey City. Foreign lots here are being held at \$22 50 @23 00 and upward.

LIVELIER SPECULATION

In Pig Iron Warrants Shows Up in the English Iron Market. SPECIAL TELEGRAM TO THE DISPATCE.1

NEW YORK, April 30 .- The Iron Age thus reports the foreign iron and steel markets: In London there has been a livelier speculative movement in pig iron warrants, and prices show and bematites. The turn for the better in prices is due chiefly to scarcity of Scotch war-rants and consequent difficulty of operators on the bear side to arrange settlement. There are new 54 Scotch furnaces in blast. Export demand is slow and home trade buying merely fair, but

makers hold aloof, although recognizing the fact that mills must stop to prevent increase in stocks. Some improvement is noted in the steel trade. Earl Dudley's works at Brierley Hill have been formed into a company, with a capital of \$700.000.

New York, April 30.—Pig tron quiet. Cop-per stagnant and nominal. Lead quiet and steady; domestic, \$4 12. Tin—Straits, \$20 65.

Hutchinson's Trades Would Be Settled -An Early Advance and a Late Decline-Cash Corn Up.

CHICAGO—The official announcement on the floor of the Board of Trade this morning before trading hours began, that all of B. P. Hutchinson's open trades had been transferred to Cougdon & Co., who would settle them, had a decidedly quieting effect on the cereal markets, and doubtless headed off the bear raid in wheat and corn. There were no exciting trans-actions in wheat, but the market seemed to have a strong, healthy undertone. Futures averaged a trifle better than yesterday, and, taken altogether, it looked better, though the market was in a much more natural position market was in a much more natural position than it has been for some time. The heavy-weight bears were mostly on the buying side. July wheat opened at \$1.04% 1.04%, and was strong on effect of the Hunchinson announcement in spite of weaker cables. The prices advanced to \$1.05%. The latter part of the improvement was retained for some time, but the offerings finally carried July back to \$1.05. The decline toward the close was due to renewed selling. With less support the market gradually gave way.

The bulk of stock on the spot and to arrive is strongly hold. There is, however, but little outside speculative interests at the present time. In copper there has been little movement, and prices, although slightly lower than they were a week ago, have undergone very little change during the past few days.

The demand for tin plate has been very fair, but wide difference between buyers' and sellers' views restricts husiness. Although most of the makers have decided to suspend work during July, it is uncertain whether the agreement will be carried out. About one-fifth of the makers hold aloof, although recognizing the fact that mills must ston to prevent lines.

minneapolis—No. 1 Northern wheat sold fairly to-day, but lower grades were very dulf. Elevator companies were the main buyers of No. 1 Northern at about 20c under July. Drygoods Market.

New York, April 30.—Trade in drygoods was fair. There were no new developments as to demand, but there was an appreciable improvement in the tone of the market, not so much in the direction of advanced prices as in a recovery from the extreme uncertainty and expectations at one time entertained in respect to cotton goods. It is new doubtful if there will be many downward revisions. In a few instances already there has been a recovery from previous decline. Four-yard sucetings are in mer, and to-may agents advanced amosked and stark grain hags ye. The outlook for fall trade is regarded as shewing improvement every day, and operators for shipment by water routes only await a definite arrangement as to freights.

Development in the Outskirts. Pittsburg is peculiarly fortunate in her surroundings. Her numerous colonies are not only self-sustaining, but contribute to the pros-perity of the parent city. All the surrounding boroughs and towns are full of enterprise and adustry. Obtaining their supplies from Pittsburg, their value to her as sources of wealth

can hardly be estimated.

That these towns have sprung up in response to the necessities of the people, and are not the outgrowth of a speculative boom, is clearly seen in the fact that several others have been projected and will, no doubt, in time, become important centers of trade and social life to large numbers of people, who will spend their money in the city and enjoy the proceeds at home. MONEY MARKET. Four Months' Exchanges Compared With

Borrowers had no trouble yesterday to secure all the funds for which they had acceptable collateral at 667 per cent, the outside figure being exceptional. Checking and depositing were liberal, showing a fair trade movement. Exchanges were \$2,405,265 71 and balances \$305,-276 80.

The Clearing House report for the month shows exchanges aggregated \$61,896,148 82, against \$70,442,710 91 last year, showing a difference of \$8,546,000 in round numbers in favor of the former. This is a better statement than was expected some time ago. It is an improvement on April, 1889, when the exchanges were only \$8,900,000. All will remember that 1889 was a good year all through, and so long as the city keeps ahead of it it cannot be doing badly. It would be unreasonable to expect that, with a bad start, the pace of 1890 could be kept up. Business is getting there, however. Exchanges for the first third of the year, with comparisons with 1890:

These figures show a decrease for the four months, as compared with the same period of the former year, of \$35,149,000 in round numbers—quite a large sum, but not too much to be made good in the remaining eight months of the year, with splendid crop prospects, an abundance of funds and a central disposition to make

A Good Business Movement, With Better Prices in Some Cases-Natural Gassers and Tractions Stiffer—A Scheme to Boom Electric Nipped.

There was no special inspiration in the local stock market yesterday, but trading was the best of the week and prices well sustained. Electric, Pieasant Valley, Philadelphia Gas, Commercial National Bank and Luster. The features of most local interest, perhaps,

were the strength and activity of Pleasant Val-ley. It advanced to 24 on good selling, Henry

were the strength and activity of Pleasant Valley. It advanced to 25 on good selling, Henry M. Long taking 225 shares at that price. Citizen's Traction advanced to 65 bid. Pittsburg fell back a little, but developed no signs of permanent weakness. It is said these securities are being sought as investments by those having faith in their outcome.

In the natural gas list, Manufacturers' advanced to 22% bid and 25 asked. Wheeling was stronged. Philadelphia held its advance of the previous day, holders refusing to make concessions. The scare under the pressure of which these securities gave way during the winter seems to have subsided altogether. Many think they are a good purchase at present prices, but it is not easy to get them.

Buston boomed Electric in the morning, but weakened in the afternoon. It got above 15 but the last sale was at 14%, and closed at 14% bid, offered at 14%. Here the highest sale was at 15. The bottom fell out in the afternoon, and the close was 14% offered at 14%.

The early buige was the result, it appears, of a maneuver by Enstern bulls. Loaned stock was called in all along the line, in expectation that shorts would be compelled to buy. But they got the stuff by hook or by crock without going on the market for it. When it was found the scheme wouldn't work most of the calls were cauceled, the effect being in the nature of a boomerang. The bitors were bitten.

There were not a few who took stock in the story originating in the Boston Traveller that Mr. Westinghouse had made a dean with the leased companies. This is probable, but as it lacks official confirmation it is open to doubt. True or false, it is probably at the bottom of Eastern buying, and the principal prop in sustaining prices. The outcome of next Monday's meeting may dispel the fog and let light in on the vexed question. Sales were:
