## BUSINESS IS SMALL

In the Pig Iron Market, in Spite of the Light Production.

EASTERN STEEL RAIL PURCHASES.

Much Comment on Heavy Rejections of Pittsburg Billets.

STATE OF THE FOREIGN METAL MARKETS

NEW YORK, May 7 .- The condition of the fron and steel markets of the country is re-

ported as follows by the Iron Age:
American Pig-Current business is small, buyers acting in a very conservative manner. Prices continue without improvement, in spite of the light production in all parts of the country. An interesting recent transaction is the sale by a furnace on the Hudson river, of 5,000 tons of Bessemer pig to the Connecticut Malle-able Iron Works, at private terms. Northern brands are quoted at \$17@18 for No. 1; \$16@16 50 for No. 2, and \$14@14 50 for gray forge. Southern iron sells at \$16 50@17 25 for No. 1: \$15 50@ 16 25 for No. 2, and \$14@14 50 for gray forge. The burning of the engine house of the Troy Iron and Steel Company is expected to lead to outside purchases of Bessemer pig. The two furnaces in blast were making about 10,000 tons

furnaces in blast were making about 10,000 tons of pig in a month.

Spicgoleisen and Ferro Manganese—Importers claim that prices have been considerably advanced abroad, the German works declining to name figures on account of troubles in the coal trade, while the English makers ask \$7s, which makes the cost considerably above recent nominal quotations. In the absence of any demand whatever in this country little interest is shown in the matter. Ferro manganese is dull at \$65 50,564 00.

Billets and Rods—There has been a little business in domestic billets, which we quote at

Billets and Rods—There has been a little busi-ness in domestic billets, which we quote at \$27.50@28 delivered. We note, however, that some of the leading mills quote considerably above this. Thus one mill asked for a price on .35 carbon billets of somewhat unusual form, asked \$32.50 at mill, while another demanded \$36. There has been considerable comment lately on the heavy rejection some time since, East and West, of billets made by a very prom-ment Pittsburg mill. In some cases the billets have been taken after a heavy allowance had been made. In others they were rejected absobeen made. In others they were rejected absolutely and had to be replaced. We are informed that the concern in question has acted in the most liberal manner in the matter and that the trouble first experienced has been overcome. Wire reds are dull at \$38,585 30 at mill. The Troy Steel and Iroo Company inform us that the fire at the furnaces will cause no withdrawal from the steel market.

Steel Rails—The most interesting feature of

al from the steel market.

Steel Raffs—The most interesting feature of the week has been the rumor that an order for 5,000 tons of rails has been taken by an Eastern works, which has not rolled any rails for some years, and which is not a member of the association. The purchaser is reported to be a New York road. We note also, that an Eastern road has availed itself of an earlier option to take \$,000 tons, and that an Eastern nill reports the sale of a 2,000-ton lot. Quotations remain unchanged, at \$30 75 at tidewater, \$30 at Pittsburg, and \$31 at Chicago.

Rail Fastenings—The spike manufacturers were unable to agree at their meeting in this city last week, the opinions being divided as to advancing the price to \$2.25 or not, the majority apparently not believing in the possibility of holding at such a figure. We quote fishplates, 1.002.17c, delivered; botts, 2.6562.75c, and spikes, \$1,902.19c, therefore her the strike of the housesmiths has brought current local trade to a practical standstill. Prices remain low. We quote angles, 1.602.20c, and beams and channels, 3.1c, on dock. Steel plates are 262.15c for tank, 2.8 2.20c for shell, and 2.562.75c for flange, on dock. Bars are 1.761.9c, on dock.

Old Material—Old rails remain stagnant, only a small sale of American tees being reported at

Liverpool. The shortage in the French wheat crop was estimated at possibly 90,000,000 bushels.

Under these various influences the shorts became demoralized and began to cover, thus assisting the advance. July opened at \$1.0% @1.00%, rose to \$1.02. On this advance the big bear operators were quietly selling wheat through the various commission firms. Their offerings finally stopped the rise and started prices in the other direction. It declined from \$1.01% to \$1.01%, then to \$1.01, holding for some time at each of these points. At \$1.01 the pressure was temporary removed, and a reaction to \$1.01% followed. Then it took a header downward to \$2% c, strengthened near the close and closed at \$99.4.999%.

Corn opened rather excited. Receipts were light; there were a good many buying orders and the shorts were inclined to cover. for the Purchaser's Use. THE PEATURES OF LOCAL SPECULATION

The Anchor Bank building on Fifth evenue and Cherry alley, owned by the Hamilton estate, is to be remodeled and converted into an office building. Two stories will be added and a handsome stone front put in. The banking room will be enlarged and entirely refitted, so as to make it one of the handsomest and most convenient financial stands in the city. This enlargement is necessary to accommodate the growing business of the bank. The work is in charge of Architect Barr. The improvement will cost between \$20,000 and \$30,000. It is now under way, and will be, if the terms of the contract are complied with, completed within

contract are complied with, completed within 60 days.

R. J. Stoney, Jr., who is identified with the bank, will remove from his present quarters on the first floor to a handsome suite or rooms on the third. The reconstructed building will contain about 50 rooms, a number of which have been engaged. Access to the upper floors will be gained by an elevator.

Another Dicker Completed.

The movement in East End property keeps up. Several important transactions in that quarter were closed on Wednesday, as noted in this column. Yesterday Mellon Bros. sold the Galley property on Negley avenue, Esum Grove plan, consisting of a fine new Queen Anne brick dwelling and lot 50x115 to a business man for \$13,000, or thereabouts. The purchaser will occupy it as a residence.

These transactions show two things—that there is an active demand for choice home properties and that sellers and buyers are approaching each other in their views.

Business News and Gossip. It is probable that a bank will be established in Odd Fellows' Hall, Wilkinsburg. Local business is sufficient to sustain such an institution.

It was mentioned in this column a short time ago that another story would be added to the Kaufmann building on Smithfield street. The improvement is well under way.

HOME SECURITIES.

Nothing Like a Boom in Business, but Values Well Up-More Gains Than Lesses-Boston Boosts Electric-Tractions Still Climbing.

Room traders manifested no special vim at the local stock calls yesterday, and sales dropped to 330 shares, furnished by Philadel-phia, Wheeling and Ohio Valley Gas, Citizens' Traction and Electric. New York did little but watch and wait. The outcome of the railroad meeting was unsatisfactory. The only builtish factor was a report that the crops had ustained less damage from frost than re-

sustained less damage from frost than reported.

Locally, while the market was comparatively dull it was distinctly strong, nearly all the changes being advances. Electric was boosted on Boston selling. It sold up to 15½ there, and closed with 15½ bid. Here it sold up to 15½ after opening at 14½; and closed at 15½ on light offerings. As stated, much of the steam was furnished by Boston, but there was considerable local demand from those who think the stock is in good shape for a further advance. There was the usual talk of consolidation with the leased companies and of a full statement at the next meeting of the company, which may or may not be true. Nobody knows. This from the New York Journal of Finance is to the point: "Nothing daunted at the outcome of the Westinghouse meeting the gossips are resuming their vocation. It is now said that the reorganization contemplates a union of the Westinghouse, Sawyer-Mann and United States Companies with a capital of \$12,000,000, and that the Westinghouse stock will go in on a basis of 60 per cent." The strength of the stock indicates a favorable outcome of Mr. Westinghouse's negotiations, but beyond this all is conjecture. The scrip sold up to 67, Pittsburg advanced to 36% bid, and the rest were steady. It is now the general belief that these properties will furnish the bulk of the summer business. There is plenty of the stock to go round—nearly all held here.

Philadelphia Gas held its own and Wheeling moved up a peg. There was a trade in Ohio Valley at 21—the first for a long time. Manufacturer's advanced to 23% bid. There was a moderate inquiry for bank stocks, but none for insurance. Luster Mining closed a fraction better than the opening. Sales were:

\*\*NEW YORK STOCKS\*\*, Waiting on the Issue of the Railroad Meeting—Bad News Sends Shares a Feg Downward—Stubborn Bull Resistance Freezents Heavy Declines.

\*\*NEW YORK May 7.—The stock market again demonstrated that it hinges a present upon the railroad meeting new in session, and while there was considerable trading with a weaker tone in the foremoon, the impetus of the causes which brought these merements about was insufficient to maintain interest in the market throughout the day. The morning's news was unfavorable, and the long expected advance in the minimum rate of discount by the Bank of England was announced, which was followed by further engagements of gold for export. These influences were enough to stimulate a moderate selling movement in the market, which, strange to say, was not aided by any effort of the foreigners to get rid of stocks, but was confined almost exclusively to domestic operators.

The market, however, offered the ulual stubborn resistance to the downward movement, and gave evidence that thore is no real diminution of the confident spirit which has animated it for the last month. The bulls are laying its form the cattles and strong; rough and collections and steady to strong; light and Texans, 300; the cattle—Receipts, 2,600 head; shipments, 1,600 head; market active; extra steers, 470,000 head; shipments, 1,600 head; market active; extra steers, 470,000 head; shipments, 1,600 head; shipm

These influences were enough to stimulate a moderate selling movement in the market, which, strangs to say, was not aided by any effort of the foreigners to get rid of stocks, but was confined almost exclusively to domestic operators.

The market, however, offered the usual stubborn resistance to the downward movement, and gave evidence that there is no real diminution of the confident spirit which has animated it for the last month. The bulls are laying great stress on the grain situation in France, and private cables are full of the promise that there will be a large demand for American cereals during the season to come. They, therefore, look for an early cessation of the cutward movement of gold and the creation of a large amount of commercial bills with which to pay trade balances. Most of the selling today was from Chicago, but was attributed to realization only, and outside of the stocks in which that center is interested there was little weakness in the market, Cleveland, Cincinnati, Chicago and St. Louis being a prominent exception.

The upward movement in Cordage was continued, notwithstanding the expectation that the manipulation would cease after the stock reached par, but the improvement was neutralized in the late weakness in the market. This weakness was due to the announcement of heavy shipment of gold for Saturday's steamers. The pressure to sell was most conspicuous in the Inquistrials and the Grangera but the reaction reached to all portions of the list, and each new announcement of gold taken for export seat prices down farther.

The close was active and weak at the lowest prices of the day. The final changes are all in the direction of lower figures, while the great majority of stocks are only fractionally lower. Burilington, Rock Island, St. Paul and Chicago Gas are down 1½ each; Pacific well, Maiscouri

BICYCLES AND BONNETS.

Signs of Prosperity at East End Express

Signs of Prosperity at East End Express
Company's Office.
One of the busiest places in the city is the
East Liberty and Wilkinsburg Express Company's office on Seventh avenue. Said a member of the firm yesterday: "The number of
bicycles, baby buggies and ladies' bonnets we
have conveyed to East End homes the past
few weeks is beyond all precedent. It is a common thing to receive for shipment a dozen
bicycles in a day, the cost of which
ranges from \$80 to \$135 each. Hesides this we
carry any number of children's tricycles. In
one week of April, 100 bicycles were carried in
our wagens to the East End. There is not a
day the past month when we have not carried
to the homes of Shady Side, East Liberty and day the past month when we have not carried to the homes of Shady Side, East Liberty and Wilkinsburg, a half dozen baby buggies. And then the ladies' bonnets! Why, we had consigned to our care by the milliners more than 100 of the crowning beauties last Saturday, and no doubt they appeared in all their glory at the East End churches on Sunday.

We consider it a poor Saturday for a couple of months past when we do not carry 100 bonnets to East End house. We have carried as many as 30 bonnets on one trip of an express wagon."

THE Bedford will leave at noon te-day for

Parkersburg.
When the wickets of the Davis Island dam When the wiskets of the Davis Island dam have been raised there will be sufficient water to bring all the coal into the lower pool and give the rivermen a chance to prepare for the next rise.

The continued low water has caused the packet lines to practically tie up. The Hudson arrived on Wednesday, about midnight, and was unable to get away. An effort will be made to have the Batchelor get away with a light trip.

trip.

The rivermen have had boards stretched along the comb of No. 8 dam in order to back the water up sufficiently to enable them to bring their coal down to the lower pools. Men were at work yesterday at No. 2 for the same purpose, and if there is not enough water to float the boats No. 1 will be treated in the same
