

THORN RUN-Since the beginning of the oil industry many sharp games have been played

DOUGLAS & MACKIE. in mystifying wells when in the sand. About the shrewdest trick in the line is reported in the Thorn Run pool. The well in question the Taora Run pool. The well in question belongs to the Kanawha Oii Company, and is on the Onstott farm. This well was reported througn the sand and dry a powder born, but after the party secured additional territory the vesture has turned out a producer. This sow leaked out that Tom King, an old timer, and an adept in handling wildcat wells, has played a winning card, and gave those who were watching the result of the well a false scent. The manuer in which Tom worked the scheme was unique. When he discovered they had found oil he unsertweet about 25 feet of the easing, pulled it out, plugged it up tight, and then strewed it back on again. Then, to avert suploion, he put a loose plug in the top of the wanted, the plug was removed and the well diffield in, which is now doing 50 barrels a day sccording to pipe line reports. This is one of the most important wells drild in this field for some time, as it is about midway between Thorn Run developments and heavy acres of prospective territory and makes one at the result of this well has opened may acres of prospective territory and makes one at the some and the same and and heavy acres of prospective territory and makes one at the territory and makes one at the some and the sean and the Moon pool, which are about three miles and a scheme of the same as the same and the Moon pool, which are about three and the two parts. The result of this well has opened may acres of prospective territory and makes on the two are sold. Market are about three and and the same and showing for a 75-barrel well. A Ripple of Excitement at McCurdy. belongs to the Kanawha Oil Company, and is

#### Protest of Lord Londonderry.

"In the first paragraph of Lord Londonderry's uest of January 18, 18.2, addressed to Count Lieven, of Russia, he alluded to the matters in dispute as especially connected with the territorial rites of the Russian crown on the north-west coast of America, bordering on the Pacific Ocean, and the commerce and navigation of His Importal Majesty's subjects in the seas adjacent

thereto. "Trom these and other pertinent facts, it is writed that the protests of Lord Londonderry and the Duke of Wellington had nothing wha-ever to do with the points now in issue between the American and British Governments con-ceraing the waters of the Bering Sca. "In Lord Salisbury's judgment the contention of the United States now rests wholly upon the ukage of BEI by the Emporor Alexander I, of Russis. The United States has at no time-rested its argument sold; on the ground men-tioned, and this Government regrets, that Lord Salisbury should have so misupprehended the Austrian position as to limit its basis of right in Soring Sea to the ukage of BEI. The United States has, among other grounds, insisted, In coring Serio the takes of IS2. The United States has, among other grounds, insisted, without recarring to any of its inherited and superior rights in Alaska, that this Government has as full authority for going beroud the three-mile line in case of proved necessity as Grent Svitain possesses.

#### Sample of British Inconsistency.

"Two or three instances of the power Great Britain exercises beyond the three-mile line have already been quoted, but have failed thus far to secure comment or explanation from far to sectify consistent or explanation from Lord Salaiaury. Another case can be added which perhaps, is still more to the point. In 1890 only two years ago, the British Parliament constant a law, the effect of which is fully shown by a map inclosed herewith. (The map referred to represents a triangular sheet of water, with the apex formed by targe small firths or bays. The grant hody of water is nameless on the bine of exclusion, measuring 55 mBes, and the two sides are 50 miles and 62 miles long, making the total inclosed area 2,709 square miles.) The offerat Britan has attempted to control a body of water situated beyond the north-enstern section of Scotland, 2,700 square miles for exclusion of Scotland, 2,700 square miles for extent and to direct that certain methods of fishing shall not be used within that great body of water under a prescribed penalty. It will be other of the infibition is not alone against British subjects, but against any person.

Quite a Pertinent Question.

"If Great Britsin may thus control an area of 1,007 square miles of ocean on the coast of Scotland, why may not the United States prescribe a space around the Pribyloff Islands, in within similar prohibitions may be enforced? It must not escape observation that the area of water outside the three-mile line on the coast of Scotland, whose control is assumed by Great Britain, is as large as would be found inside a line draws from Cape Cod to Portland harbor, on the New England coast.

an the New England coast. "Lard Salisbury reasserts his contention that the words Pacific Orean at the time of the treaty between Russia and Great Britain did include Bering Sea. Undoubtedity the Pacific Ocean includes Bering Sea in the same sense that the Atlantic Ocean includes the Guil of Mexico, and yot it would be regarded as a very inaccurate statement to say that the Mississippi typer flows into the Atlantic Ocean. I think Lord Salisbury fails to recognize the common diatinction between the Atlantic Ocean, and fold is not a part of the Atlantic Ocean, it would. I am sure, comport with general usage to say that it belonged to the waters of the Atlantic, and while Bering Sea is not stechnicily a part of the Pacific Ocean, it undoubtedly being to the waters of the Pacific.

### No Geographical Dispute.

"The English Channel would not ordinarily he understood as included in the term Atlantic Ocean. One would not say that Dover or Calais is on the coast of the Atlantic Ocean, and yet clearly the English Channel belongs to the waters of the Atlautic. In point of fact therefore, according to the usage of the world, there is no dispute of any consequence between the two Governments on the goographical point under consideration. The historical point is the one at issue.

the one at issue. "The explanatory note from Russia, filed in the State Department of this country, specially referred to in Mr. John Quincy Aslams' dury, and quoted in my note of December 17, 1800, plainly draws a distinction between the Pacific Ocean on the one hand and the Sea of Oxhotzk, the Sca of Kamschatka and the fey Sea on the ether; and so long as Russia drew that dis-inction it mus apply to and must absolutely decide all the coulention between the two gountries, as far as fue waters of the Berng full quart.

A Ripple of Excitement at McCardy. MCCURDY-A little breeze was created in the McCurdy field to-day by Black & Co.'s the McCurdy field to-day by Black & Co.'s well, on the Monke farm, 1½ miles northeast of the McCurdy pool, on a 22° line. This well has been reported as a big gasser, but upon deeper drilling found a pay from which the well is spraying at the rate of 18 barrels a day this evening. When the scout who brought in the informa-tion left the well the digging was good, and he pooked for an improvement. The pipe line people are putting in a line, and will connect to the tank as soon as possible. The Eik County Pine Line

The Eik County Pipe Line. ELE COUNTY-The Elk County Independent Pipe Line is running in full blast, and handling about 8,500 barrels a week, or a little over 1,200 barrels a day. The outlook for operations this season in this field is that operations will not be brisk, as all the available territory is owned by a syndicate, who will not drill at the presen price of oil.

### The Fisher Company's Work.

CLIFF MINES-The Fisher Oll Company finished drilling the 100-foot sand, in which the well was dry. It intends drilling down to the 30-foot. The same company commenced spud-ding to day on the Adamson No.2, and is build-ing a rig for No. 3 on the same farm. H. MCC.

## Yesterday's Prices and Runs.

Nobody wanted to sell oil yesterday, showing that expectations are entertained of better that expectations are entertained of better prices. There was a bid of 70% for each and 72% for June. This was the only market. Refined held to its former position, with an inclination to bob up. Average daily runs were 64,653: average daily shipments, 52,607; average daily charters, 25,828. OH. CHTY, May 7.-National Transit cer-tificates opened at 71% is higher to barrels; clear-fine to barrels; charters, 15,725 barrels; shipmonts, 108,275 barrels; runs, 132,776 barrels; shipmonts, 108,275 barrels; runs, 132,776 barrels; shipmonts, 108,275 barrels; runs, 132,776 barrels; shipmonts, 108,275 barrels; clearances, 46,000 bar-rels.
