stances given last week of owners putting higher values on their property confirm this opinion. It is never too carly or inopportune for the home-seeker to act. His greatest material need is a home of his own where he can set up his large and penates and be independent of landlords, he and his family after him. It is doubtful if he ever will have a better opportunity to become a proprietor than the present time affords. Good and cheap lots may be had in every quarter of the supply is not inexhanstible. They are being picked up very fast. More than 1,000 have been purchased and withdrawn from the market willin a month. With such a demand prices must harden. Therefore home-seekers can gain nothing by delay. The public sale of lots of the Munhall station and Homestead, was a decided success. in the country that comes so near being self-sustaining. These are the factors operating to sustain land values. The certainty of business and work here the year round is attracting out-siders to buy or build homes. During the last two weeks at least three wealthy busi-ness men have purchased fine residences in one of the outer wards and will occupy them. They, as well as citizens generally, have con-fidence in the future of the city. Development may be trammeled by causes wholly inde-pendent of business conditions, as is the case at present, but with a demand for busi-ness stands and dwellings out of all ordi-nary proportion to the supply, there is no danger of a reactionary movement. it opened at 19%, sold down to 14%, firmed up and closed at 16 bid; offered at 16%. Here the feeling was so unsettled, owing to the short-ness of the time for the full digestion of Mr. Westinghouse's circular, that both sellers and buyers observed a hesitating position. The result was that both offers and bids were restricted to a marrow compass. The advance was an agreeable strike to the short of below. The fact that it enhanced un-der the circumstances seems to show that he great bulk of the stock is in strong hands, and that it will be sustained agains any feverish influence likely to be arrayed any feverish influence likely to be arrayed any feverish influence likely to be arrayed mitted by Mr. Westinghouse. NEW YORK STOCKS.

Hesitating Market Which Led to the

Most Pronounced Strength-The List Higher Than Last Week Caused by

Advices From Abroad. NEW YORK, May 11 .- The stock market to-

day began the new week with more activity than usual of late, while a hesitating and weak tone was displaced by the most pro-nounced strength which reached almost everything traded in, and caused advances which left the list materially higher than the closing of last week. The advices from abroad over Sunday were not such as to give

which left the first week. The advices from abroad over Sunday were not such as to give much encouragement to buy stocks, but beyond some bear pressure to sell there was no disposition of consequence shown by holders this morning to part with stocks, and the early weakness may be attributed entirely to efforts of the reaction-ist. The declining tendency in early deal-ings was materially helped also by the weak-ness in the Industrials, and especially in Cordage and Chicago Gas. The dewnward movement in the former was helped by the publication of an article showing that most of the manufacturers of cordage are outside of the trust, and the pirce of the stock, un-supported by the manipulators, fell away to 84, after selling at 101% last week. Chicago Gas showed less weakness and its loss was smaller. London came in as a buyer of stocks, however, the purchases being accompanied by assurances that Russia would do nothing more to disturb the financial situation in Europe. This encouraged the bulls again and they showed their hand in the afternoon by buying stocks all along the line, the business done being larger than for many days and the improve-ment in prices most important. The shorts were driven to cover in many of the leading shares, the Grangers, Louisville, Missouri Pacific, Wheeling and Lake Erie, and some specialities showing marked strength. The financial situation cover in all the vent. The stocks mentioned, while even the weak stocks of the forenoon rallied and closed higher, with the exception of Cordage. The opening prices were irregularly changed from those of last Saturday and the early losses in the regular list were confident to fractional amounts with the exception of chieago Gas, which lost By per cent. The advance from the lowest figures reached a per cent, and the upward movement met with no check during the day, the final fig-ures being at or about the highest feelings. At the close business was much better and the bulks are again confident of a further ad-vance in prices.

the builts are again connection of a prices of active vance in prices. The following table shows the prices of active stocks on the New York Stock Exchange resterday. Through the excellence of the goods manufact-ured, the business has steadily grown, showing an increasing profit each year. The firm now employs over one thousand persons in its extensive works. The "Stetson felt hats" are known and sold by all the trade throughout this country and Europe, especially in the Western States and Territories, in Mexico and Central and South America, where scarcely any other roft hat is worn. This concern originates styles and manufactures largely upon special orders from other hat makers. This fact is important, as it
