Good Returns in Gold and Silver From Some High Grade Ore.

SPLENDID IDAHO MINING BELT.

Mexican Ore Shut Out by Rising Water in the Kio Grande.

BIG SALE TO A LONDON SYNDICATE

SPECIAL TELEGRAN TO THE DISPATCH,] NEW YORK, May 24 .- The following reports have been received from the leading

ining centers of the West: DEADWOOD-The Cora Company has of late been taking out some high grade ore, assays of which give returns of \$200 in gold ami silver per ton. A shipment will soon be made. The owners of the Bullion mine have begun shipments of ore to Omaha. About 35 tons of ore, assaving from \$30 to \$45 per ton, have been taken out, and a portion of this has been shipped already. tons of assorted ore are stacked up on the dump, assays of which bave been made, showing \$100 and upward in gold and silver per ton. An important deal concluded during the past week was the sale of four-tenths of the Little Bonanza and Pin and Perry lodes in Faintail Gulch to the management of the Deadwood chlori-nation plant for \$10,000. Negotiations for a lease of the Uncle Sam mill to the Big Mission Mining Company have been about concluded. Ore from the mine will be hauled to the mill by the Black Hills and Ft. Pierre Railroad at the rate of 50 cents per ten. The will will crush something like 200 tons of ore per day, or all that one narrow gauge train of 20 cars can haul.

Ready for Transportation. At the R. B. Hayes mine there are about 100 rous of ore on the dump and in the bins, carrying 60 ounces of silver per ton, besides good percentage of lead. As soon as the ransperiation can be secured it will be

rintendent Deimees, of the Keystone chloriuntion plant, located at Garden City, reports good progress being made in the completion of the works, which will be ready to start by June 1. The large roaster, ighing 52,000 paunds, has been put in ce and a trial of the engine has been de, which shows everything working in ad order. The Calumet Mining Company applied for amended articles of incorto enable it to conduct a more business than it has done, red from Sturgis to Deadwood. The annual meeting of the stockholders of the Iraa Bill Mining Company will be held in June. A fight similar to the one last year for the control of the mine is ex-

IDANO CITY-This will undoubtedly be the most prosperous year for mining that we have ever had. As far as heard from, of the mines worked during the year delded profits, and many prospects have seen developed into mines. At Rocky Bar, Elmore county, the Atlanta Company is opening a large amount of stopping ground in the Elmore and will start up the mills soon. One is a ten and the her a 50-stamp. The mine paid well and the new ground opened below yields still either ore. Several other mines at Rocky ar are working, the ore from which will hed soon. The sale of the Buffalo nd Monarch mines, at Atlanta, 15 miles Rocky Bar, has given a new petus to that camp. These mines are on Arlanta vein, which is from 60 to 80 for the white metal, and the They must now be handled by ompanies able to erect powerful pumps and hoisting works.

Sold to a London Syndicate.

Judge V. S. Anderson has sold them to a don company for \$3,500,000. The belt in which the Atlanta is situated is very rich and extensive, and many of the mines have paid well in the past, although worked by non who were entirely without means with

which to open them up.
M. H. Kempuer has brought to town several large specimens of silver ore from the Muscow, in the Eldorado district, between this place and Bamer. The vein has just been tapped by a tunnel, where a body of four feet of very rich silver ore is shown. rock from the surface of this worked in the Elmira mill, at Banner, two years ago, yielded large returns. Work is progressing on two or The tunnel running to the the Chickamon in 192 feet. A heavy flow of water is naw coming out of the tunnel, showing that the vein is nearly reached. Should it be as ad where tapped as on the surface, a large (ii) will be erected this year. The Sun and Boise City, is turning out to be a bonan-It has been followed in by a tunnel 150 feet, all the way in good ore. In the face of the tunnel there is a large body of ore, rich in chlorides of silver. The owners Donnigan & Surfleet, talk of erecting a mill

Mines That Pay Well.

SAN FRANCISCO-The discovery of a seam of coal of extra good quality near Anderson, county, is attracting considerable ortention. San Francisco capitalists are preparing for a thorough and systematic uploration of the northern part of the sate and believe that it will be profitable the mines can be developed there. The Bunker Hill Mine, Amador, has a 12-foot vein of ore that runs from \$55 to \$60 per ton. The Plymouth Mine is developing a good ore body, and 60 stamps in the old mill

brick, weighing 263 ounces, is the result of the American Tariff League, talked to a Disa partial clean-up of the month's run of the North Banner Mine, Nevada county. A rich strike of gold-bearing gravel has been gende in the Occidential Drift claim, Sierra. Syn Prancisco capitalists are negotiating for some of the lead mines at Hamilton, White Pine district, and the prospects are that active operations will begin this year.

Shut Out by High Water. SILVER CITY-No Mexican ore is now eing received by the smelters in New Mexico through El Paso, and ore is not being handled by the El Paso smelters, except that which is received over the Southern Pacific Railway. The very high water in the Rio Grande has shut out the Atchison, Topeka and Santa Fe Railroad from all communication with El Paso and about 80 miles of track between Rincon and El Paso have been abandoned for several days. The water is higher than it was in 1881, when through traffic was suspended for about three weeks, and it is hardly probable that the smelters will get much Mexican ore for two or three weeks to come. The yards at El Paso are flooded, and although the river is falling in the northern part of the Territory, there is not much prospect that it will be much lower until the snow in the mountains in New Mexico and Colorado is gone, which will hardly be before the middle of June. Catil that time there will be little or no Mexican ore brought in over the Atchison Topeka and Santa Fe, and the New Mexico

lters will have to run on New Mexico nd Arizona ores. The change in the ruling in reference to the admission of lead ore from Mexico is geleamed by a great majority of miners in his Territory, because cheaper lead means heaper treatment of dry ores. Fully 90 per cent of the lead produced in this Territory is produced from ores carrying silver enough

PANNING OUT RICHLY. to pay most, if not all, of the expenses of mining. Lead ore, which carries no silver, cannot be mining. Lead ore which carries no silver, cannot be mining to profitably in New Mexico now, and could not be if there was an absolutely prohibitory tariff on foreign lead by lutely prohibitory tariff on foreign lead, be-cause lead can be produced much cheaper in the Mississippi Valley than it could be here

Free Coinage More Desirable. The tariff was put on lead ore ostensibly for the purpose of protecting the America miner, but it has not had the effect of it in the Territory, and the ore there runs from 14 to 60 ounces in silver per ton. The free coinage of silver would be of much greater benefit to this camp than a tariff on lead, and the same is true of nearly every lead-producing camp in New Mexico. The development which has been going on in the mines of the Silver Creek district for about two years is showing that the mines are second to none in the Southwest.

More than \$100,000 have been expended in development in two years, and it has been done intelligently. Enough ore has been exposed in one mine there to keep a 20-stamp mill at work for ten years, and theore is of sufficiently high grade to have been a sufficiently high grade to have been expended in the sufficient with the sufficient high grade to have been expended in the sufficient high grade to have been expended in development in two years, and it has been development in the sufficient high grade is of sufficiently high grade to pay hand-somely for working. A large mill will be built to work this ore, but it will probably not be commenced until next year. The owners believe that they will have ore enough exposed to justify them in building a 100-stamp mill, which will be much larger than any now in the Territory. The camp is in one of the most rugged portions of the Southwest, and it is more than 60 miles from this place, which is the only practicable shipping point. There is plenty of water in the camp for milling purposes, but bullion and concentrates will have to be shipped to this point.

MEDICAL OPINIONS VARY MUCH.

The Victim's Wife Says He Is Only Suffering From Erysipelas.

A HISTORY OF THE MAN'S MOVEMENTS

LOUISVILLE, May 24.—There was a panic at the Short Line depot to-day when it was whispered around that a man who had the leprosy was in the gentlemen's waiting room. Early this morning a well-dressed man, with the traveling equipments of a well-to-do gentleman, was observed huddled up on a bench in a dark corner. The passengers hurrying for the early trains paid no heed to the solitary stranger until finally he arose from his seat and came forward to a window. It was then seen that his face and hands were absolutely raw, and the nails dropping from the rotting fingers. His eyelids were almost gone and the sunken eyes almost sightless.

The hideous spectacle immediately caused commotion, and when a few minutes later a report was started that the man had leprosy, there was an immediate and harried exodus from the depot. The watchman tel-ephoned for two physicians, who soon ar-

The Doctors Diagnose the Case.

The doctors refused to touch the loath-some object, but after a brief examination, by touching the quivering flesh with their canes, they pronounced the disease leprosy. By this time the depot was depopulated, and crowds of horror-stricken people stood across the street waiting for the doctors' verdict. The wretched man, evidently al-most insume stated that his name was Willmost insane, stated that his name was Will-iam C. Piatt, and that his home was in Covngton, Ky. He muttered something about having just returned from the Sandwich Islands, where he had been on business and had fallen ill.

Pintt is dressed in a fashionably cut suit of light clothing and a soft navy blue hat. He has a large tan-colored valise and a black He has a large tan-colored value and a black overcoat in his possession. It was gathered from his rambling statement that he had come to Louisville several weeks ago, and had been aimlessly wandering about and was trying to return to Covington.

The patrol wagon was called, and meanwhile the afflicted wretch sat listlessly trying to divise away the flips from his face and

ing to drive away the flies from his face and talking aimlessly to an imaginary companion. When the wagon arrived he was taken to the City Hall, and Chief of Police Taylor ordered him immediately removed to the City Hospital.

The Victim Shunned Everywhere. On arrival there, however, Superintendent Barbour refused to admit him without a special order from the Mayor. The wagon then drove back to the depot and again dumped him out in the waiting-room. The railroad authorities set up a howl. Passen-gers fled from the place, and even the railroad employes were so panic stricken that business was almost suspended. The rail-road men claimed that they had not brought road men claimed that they had not brought the man here; that the city should at once take charge of him, while the jailer, the stationkeepers and hospital authorities re-fused to admit him. After a council of al-most the entire city government, Mayor Tyler solved the problem by ordering him sent to the pest house, beyond the city

Nearly all the medical authorities who saw the man to-day believe that he has leprosy, but the disease is so rare here they are guarded in their opinions. Later investigations to-night reveal that there is considerable doubt about Piatt having leprosy. He is a resident of this city, named William C. Piatt, and has been a traveling salesman in the South for Tapp & Co.'s bagging man-ufactory. He has been in the extreme Southern States for several years, rarely visiting his wife in this city. He became very ill at Greenville, Miss., and his wife telegraphed the hotel people to send him

Claimed to Be Erysipelas Only. His wife claims that Piatt is simply suffering from erysipelas. The pest house is several miles from the city, and no physi-cians have yet visited the man. Some claim that leprosy is not unknown in the Southern States, there being a leper settlement in Louisiana, and that the man may have contracted the terrible disease in the Gulf Coast States. They scout the idea of crysipelas producing the horrible condition from which the man suffers. Dr. Barbour, superintendent of the hospital, said: "I have never seen a case of leprosy, but have read considerable concerning the disease. I hardly think the man is afflicted with the dread plague, but it is possible that he is in the second stage of the disease. When he was brought here this morning I refused to receive him because I feared that he was suffering with a contagious disease, and that

supering with a contagious disease, and that the lives of the other patients might be jeopardized. He should by all means be sent to the Eruptive Hospital."

The mystery is where the man has been since his arrival here, as his clothes and general condition show that he has been well cared for. The police are trying to find out where he has been harbored.

KILLED BY CUPID'S DART.

A Love-Lorn Young Man Takes Rough on Rats to End His Misery.

[SPECIAL TELEGRAM TO THE DISPATCH.] SCOTTDALE, May 24.-Irwin Harrer, a prominent young society man 19 years of age, committed suicide by taking rough on rats last night, dying to-day at 1.o'clock. A love affair was the cause. For some time he has been paying attention to a Miss Knox, of Stonerville. The girl was willing to marry him, but refused on account of objections from her parents, who thought the

couple too young.

He visited the young lady last evening, and was given a postfive refusal until her parents would consent. This so preyed upon his mind that he ended his trouble by death.

One Effect of the End of the Strike. [SPECIAL TELEGRAM TO THE DISPATCH.]

STEUBENVILLE, May 24.—The Riverside Iron Works of this city, which has been idle since the strike in the coke regions, has resumed operations. The managers say they are assured of a sufficient quantity of coke to continue in operation.

GUSKY'S, MARKET STREET.

When slovens get tidy they polish the bottoms of the pans:-When are given SAPOLIO they are never tired of cleaning up.

Two servants in two neighboring houses dwelt, But differently their daily labor felt; Jaded and weary of her life was one, Always at work, and yet 'twas never done. The other walked out nightly with her beau, But then she cleaned house with SAPOLIO.

Laird's 433 Wood street retail store more attractive than before the fire—immense new stock. SPECIAL BAR-GAIN PRICES at both stores. Open Saturdays till 10 P. M. adies' Black Silk Gloves, from 38c
