CHICAGO – The bears scored a sig-nal victory and were in supreme control of the market from the start. So much long wheat was thrown overboard at the opening that it put the bull party at a great disad-rantage all day. This wheat went into the hands of people who did not want it except as ammunition to use on any bull party that was daring enough to attempt a rally. Ves-sels have been chartered for 350,000 bushels of wheat and 445,000 bushels of corn, but no attention was paid to such matters. The call for margins was too loud and persistent to permit of other considerations. Wheat left off at a decline of 1½c, corn dropped 30 and pork 37‰. The leading futures ranged as follows, as corrected by John M. Oakley & Co., 45 Sixth street, members of Chicago Board of Trade: Marked Weakness Everywhere. as follows (Eastern Standard Time); guage of Dr. Talmage. Gives Observations of 754 Drifting Downward. PITTSBURG, DISPATCH, MONDAY, MAY 25, 1891.

[SPECIAL TELEGRAM TO THE DISPATCIL] BROOKLYN, May 24 .- The striking sermon Dr. Talmage delivered this morning to an audience which filled the new Tabernacle in every part, dealt with a topic of interest to all who have watched the discussions now agitating the churches. Wherever the question of the inspiration of the Bible is raised, the trustworthiness of the Mosaic narrative of the Creation is always the point chiefly assailed. The fact that so prominent and eloquent a preacher as Dr. Talmage places himself clearly on record on the side of orthodoxy will doubtless have a marked influence on public opinion. His text was Genesis 1,31: "And the evening and the morning were the sixth day."

From Monday morning to Saturday night gives ns a week's work. If we have filled that week with successes, we are happy. But I am going to tell you what God did in one week. Cosmogony, geology, astronomy, ornithology, ichthyology, botany, anatomy are such vast subjects that no human life is long enough to explore or comprehend any one of them. But I have thought I might in an unusual way tell you a little of what God did in one week and that the first week.

### A Rough World in the Beginning.

And whether you make it a week of days or a week of ages, I care not, for I shall reach the same practical result of reverence nd worship. The first Monday morning found swinging in space the piled-up lumber of rocks and metal and soil and water from which the earth was to be builded. God made up his mind to create a human family and they must have a house to live in. But and they must have a house to live in. But the time was coming when a being called man was to be constructed and he was to have a bride; and where he could fake her must housestend to which he could take her must have been a wonderment to angelic intelli-gences? There had been carthquakes enough, and volcances enough, and glaciers enough, but earthquakes and volcances and clackers instead of huld A worse hough, but entrugances and voicinoes and inducers destroy instead of build. A worse ooking world than this never swung. It cas heaped up deformities, scarifications and monstrosities. The Bible says it was without form. God never did take any one in His coun-els but if He had acked some angel about

bod never did take any one in His coun-sels, but if He had asked some angel about the attempt to turn this planet into a place for human residence, the angel would have smid: "No, no; try some other world: the crevices of this earth are too deep; its crags are too appalling; its darkness is too thick." But Monday morning came. I think it was a spring morning and about 4.30 o'clock.

### The First Task of the Creation.

The first thing needed was light. It was not needed for God to work by, for He can work as well in the darkness. But light may be necessary, for angelic intelligences are to see in its full glory the process of world buildis. No moon or stars can brighten this arkness. The moon and stars are not born et, or, if created, their light will not reach be earth for some time yot. But there is eed of immediate light. Where shall it was ferent.

Desiring to account for things in a natural siring to account for things in a natural you say, and rensonably say, that heat electricity throw out light independent e sin, and that the metallic bases wout light independent of the sun, and alkalies throw out light independent of un. Oh, yes; all that is true, but I do hink that is the way light was created. record makes me think that, standing this earth that spring morning, God d upon the darkness and uttered, her in the Helsrew of earth, or some are celestial I know not, that word other in the Hebrew of earth, or some guage celestial I know not, that word ich stands for the subtle, bright, glowing all-pervading fluid, that word which fils and garlands and lifts everything it ches, that word the full meaning of ill the chemists of the

the world's first week and with this day the week closes. But oh, what a climacteric day! The air has its population and the water its population. Yet the land has not one inhabitant. But here they come, by the voice of God created! Horses; cattle enough to cover a thousand hills: sheep shepherded by Him who made for them the green pas-tures; cattle superior to the Alderneys; wild beasts without their ferocity. Do you not notice that God gave them precedence of the human race? They were created Fri-day and Saturday afternoon. What sta-pendous work for a Saturday afternoon He must originate a style of human heart through which all the blood in the body must pass every; three minutes. The soul Ab, the construction of that God Himself would not be equal to if He were any the less of a God. Ave? Eefore night there were to be two such human and yet immortal beings constructed. The woman as well as the man was formed. God's Most Wonderful Work.

### Adam was not three hours unmated. If a

### could have put Adam into a profound sleep in a short while that Saturday afternoon and made the deep and radical excision

the universe.

the first time I saw it; the seven stars and Job's coffin keep on the same path in the sky and never turn out. It isn't so with man's work. He makes clocks and watches; they may run well for awhile, but they get out of fix and stand stock still. But the sun, and moon, and stars keep on this same way all the while. The heavens declare the glory of God. Yea, I preach this, because I want you to walk in appreciation of Addison's sublime sentiment when he writes:

The spacious firmament on high With all the blue ethereal sky And spanjed heav'ns, a shining frame, Their Great Original proclaim.

onfined to frac

The past week was a dull one so far as trading in local stocks was concerned. For this the unsettled condition of European affairs was no doubt directly responsible by inducing hesitation on the part of investors. Conditions were greatly improved Satur-day, however, and the worst was thought to be over. New York was active and strong, while Europe was decidedly bullish on American stocks. The New York bank state-American stocks. The New York bank state-ment was favorable, money was casy, and a better tone prevailed generally. Saturday's final bids, as compared with those of the previous Saturday, show that concessions were made in Chartiers and Philadelphia Gas, Central, Cittizens' and Philadelphia Gas, Central, Cittizens' and Pittsburg Traction, Pleasant Valley, Luster, Electric and Monongahela Water Company -all confined to fractions excepting Pitts-

### God's Most Wonderful Work.

physician can by anæsthetics put one into a deep sleep in three minutes, God certainly without causing distress. Magnificent piece

# and made the deep and radical excision without causing distress. Magnificent piece of divine carpentry and omnipotent scalpt-uring, but no vitality. A hody without a soul. Then the source of all life stooped to the inanimate nostril and lip, and, as many a skillful and earnest physician has put his lips to a patient in comatose state and breathed into his mouth and nostril, so me-thinks God breathed into this cold sculpture of a man the breath of life. What do you think of that one weeks' work? I review it not for entertainment, but be-cause I would have you join in David's Dox-ology, because I want you to know what a homestend our father built for flis children at the start, though sin has despoiled it; and because I want you to know how the world will look again when Christ shall have re-stored it, swinging now between two Edens; because I want you to realize something of what a mighty God He is and the utter folly of trying to war against Him; because I want you are made, your body as well as your sonl. Omnipotent achievement; because I want you to realize that order reigns throughout the universe.

### The Omnipotence of God.

Every day since I have been in this world I see the sun rise in the East and set in the West. The North star stands where it did he first time I saw it; the seven stars and

In reason's car they all rejoice And utter forth a glorious volce Forever singing, as they shine, The hand that made us is divine.

Drygoods Market.

Mr. Wilson Harper, whose specialty is dairy products, has spent the greater part of the past week in a tour through cheesedom-the Western Reserve. In an interview the fol-Open- High- Low- Clos-ing. est. est. ing. ARTICLES. lowing facts were developed. For the past few weeks pasturage has been almost burnt WHEAT, No. 2. \$1 0256 1 02 1 02 92 1 0256 1 0256 1 0256 1 0256 1 0156 9856 up throughout the reserve, and just before the late rains cattle had used up about all July. CORN., NO. 2. the grazing left. Owing to the high price of feed cows were in poor condition when the 5414 52 53% 56% 54 53 50% 54 53% May. June July. OATS, NO. 2. grazing season opened up. The season for dairy products is nearly a month behind the 4514 43 41 444 17 average time. Cheese factories which turn out 30 to 40 cheeses per day in ordinary sea-June. July MESS PORK 42% out 30 to 40 checeses per day in ordinary sea-sons are not now producing more than half thatamount. The bigh price of grain the past winter caused farmers to put stock on limited allowance, and the result is that the grass for the first few weeks of the season went more to meat than to milk. About the time that the cows were built up in the meat line pasturage fell off on account of long dry weather, so that the supply of checese is not nearly up to what it was at this time a year ago.

While quantity is not up to what it was, the quality of Ohio cheese is better. This time last year grass was abundant and the flow of milk was large. But then the quantity of cheese produced from a gallon of milk was not so large as this season, nor was the quality quite as good. While the flow of milk this season is not so large as last, the yield of cheese to the gallon is larger. Prices of Ohio cheese are is to like per hhigher than they were E months ago. For a

than they were E months ago. For a few weeks past there has been a scarcity of stock in the Reserve market, but of late supplies have nearly caught up to the de-mand. Swiss cheese is le to 15c per E lower than this time last season. Old Swiss cheese is plenty, and the new will not be ready for market for a month. New Linburger cheese has been coming in freely from the West for the past two weeks, and is selling at 12% to 13% per h.

ued-Grangers Lead the Market-Not All Changes Are Advances-Bonds Dull and Featureless-Shares Close Active. NEW YORK, May 23 .- The stock market today continued its upward movement, and while in only a few stocks was there mater-

ial improvement for the day everything ad-vanced, and bull points for next week were thick. The bank statement showed again a small increase in the surplus reserve, but this had no apparent effect at the time, for it had been effectually discounted in the

it had been effectually discounted in the early dealings. The Grangers led in the market, and buying orders from the West were, if anything, the leading element in the strength of the mar-ket, the confidence being based on the latest reports of the condition of crops and the anticipation of an unusually heavy freight movement this season. St. Paul was, as usual of late, the most active stock by a large margin, but Rock Island displayed most strength, and with the two Industrials it is alone in scoring a marked advance for the day.

most strength, and with the two Industrials it is alone in scoring a marked advance for the day. The opening was made at a slightly lower level of prices tian those of hast evening, and Louisville and Nashville was down ½ per cent, but the buying began in earnest immediately, and prices, under the lead of Northern Pacific preferred, moved up until checked by realizations, when Rock Island was up 1½ per cent. Cordage and Sugar were stronger in the later trading, and failed to react with the general list. The issue was anticipated by another upward movement, in most cases reach-ing best prices of the day. The trading, however, was devoid of special feature, and the market finally closed fairly active and strong, though not in all cases at at the best prices. The final advances of note include only Cordage, 1%c; Rock Island, 1%c, and Sugar, I per cent. There were 179. 178 listed, and 11,045 unlisted shares traded in, St. Faul contributing 64,274. Railread bonds were dall and without feature of importance, but they displayed a strong tone and a few are materially higher than the last previous sales. The business amounts to only 390,000, and was confined to a comparatively small number of issues. The following table shows the prices of active strokes on the New York Stock Exchange yesterday. Corrected daily for The Distarce by WHITNEY & STRINENSON, oldest Pittsburg members of the New York Stock Exchange, 37 Jourts avenue:

which suggests a force that flies 190,000 miles in a second and by undulations 727,000,000,000 n a second, that one word God utters-light:

### Natural and Spiritual Light.

Oh! blessed light! I am so glad this was the first thing created that week. Good thing to start every week with is light. Give us more light, natural light, intellectual light, spirit-ual light, everlasting light. For lack of it

ual light, everlasting light. For lack of it the body stambles, and the soul stambles, Oh thou Father of Lights, give us light Heaven itself is only more light. It is Mon-day night, "And the evening and the morn-ing were the first day." Now it is Tuesday morning. A delicate and tremendous undertaking is set apart for this day. There was a great superabundance of water. God, by the wave of his hand, this morning gathers part of it in suspended re-servoirs and part of it fle orders down into the rivers, and lakes and seas. How to hang whole Atlantic occans in the clouds without the rivers, and lakes and seas. How to hang whole Atlantic occans in the clouds without their spilling over, except in right quantities and at right times, was an undertaking that no one but Omnipotence would have dared. But God does it as easily as you would lift a

Just off water. Half of this Tuesday's work done, the other half is the work of compelling the waters to lie down in their destined places, 50 God picks up the solid ground and packs t up into five elevations, which are the con

### Continents and Oceans Appear.

Continents and Oceans Appear. With his finger he makes deep depressions in them, and these are the lakes, while at the piling up of the Alleghenies and Sierra Nevadas and Pyrenees and Alps and Hima-layas the rest of the waters start by the law of gravitation to the lower places, and in their run down-hill become the rivers, and then all around the earth these rivers come then all around the earth these rivers come into convention and become occans beneath, as the cloud's are occans above. How soon the rivers got to their places when Gôd said: "Hudson and James and Amazon, down to the Atlantic; Oregon and Sacnamento, down to the Pacific." Three-quarters of the earth being water and only one-quarter being land, nothing but Almightiness could have enged the three-fourths so that they could not have devoured the one-fourth. Thank God for water and plenty of it. What a hint that God would have the human race very clean: Three-fourths of the world water.

Four it through the homes and make them Pour it through the homes and make them pure. Four it through the prisons and make their occupants moral. Pour it through the streets and make them healthy. There never was a flithy street that remained a moral street.

### Cleansed of Guilt by the Deluge.

How important an agency of reform water is was illustrated by the fact that when the ancient world got so outrageously wicked it was plunged into the delage and kept under for months till its iniquity was soaked out of it. But I rejoice that on the first Tnesday of the world's existence the water was taught to know its place, and the Mediter-rancan lay down at the feet of Europe, and the Gulf of Mexico lay down at the feet of

North America. Now it is Wednesday morning of the world's first week. Gardening and horti-culture will be born to-day. Hail to the green grass, God's favorite color and God's favorite plant, as I judge from the fact that he makes a larger number of them than of anything else. We are pushing agriculture and fruit culture to great excellence in the inimeteenth century, but we have nothing now to equal what I see on this first Wednes-day of the world's existence. The banquet for the human race is being sprend before the arrival of the firstguest. In the fruit of that gardens of the hemispheres. Notice that the first thing that God made for food was fruit, and plenty of it. Slaughter-houses are North America. iit, and plenty of it. Slaughter-houses are

### Meat Is the Food of Savages

Far am I from being a vegetarian, but an ilmost exclusive meat diet is depraving. Savages confine thamselves almost exclu-sively to animal food, and that is one reason head; market firm; Westerns, \$4 25. Buffalo - Cattle - Receipts, 211 loads through, 6 sale; slow and lower. Common to good, 3@4c; no very good steers sold. Hogs-Receipts, 63 londs through, 10 sale; dull and lower; mediums, \$4 80@450. Grain. Flour and Feed.

There were no sales on call at the Grain Exchange to-day. Receipts as bulletined, 33 cars, of which 17 cars were by Pittsburg, Ft. Wayne and Chicago Railway, as follows Eight cars of oats, 3 of hay, 1 of corn, 1 of middlings, 1 of malt, 3 of flour. By Pittsburg, Cineinnati and St. Louis, 1 car of bran, 8 of middlings, 1 of mait, 3 of flour. By Pittsburg, Cincinnati and St. Louis, 1 car of bran, 8 of corn, 5 of hay, 1 of oats. By Pittsburg and Western, 1 car of oats. By Pittsburg and Western, 1 car of oats. Receipts for the week ending May 22, 247 cars, against 228 cars the previous week and 225 for the cor-responding week last year. There were 63 cars of hay received this week. It will be seen by quotations below that prices are drifting downward. The bears have the field all along the line of cereals. Chicago markets have been glutted with grain for the past ten days, for the reason that May deliv-ery goods had to be forthooming. The specn-lative spirit is an unknown quantity in cereal markets of late. In the common view of grain operators, markets are at their worst and future changes must be toward higher prices. But at this date the situation is fav-orable to the buyer all along the line. SPEAKS FOR ITSELF.

S.S.S. not only speaks for itself, but has thousands of peo-

ple to speak for it. The testimonials that have been given in its favor by people who have been cured by it vould fill pages of a newspaper. No other medicine has been so thoroughly endorsed by the public. Here is a

ample of **Disinterested Testimony**.

Rev. M. B. Wharton, pastor of the First Bap-tist Church, Montgomery, Aia, writes: "I have seen Swift's Specific used, and have known many cases of the worst form of blood disease which have been cured by it. I know the proprietors to be gentlemen of the high-est type, and of the utmost reliability. I recommend it as a great blood remedy un-omaled by a mething that I know of." ualed by anything that I know of."
