Extent of the Clancarty Estate

The father of the new Earl of Clanearty was possessed of property valued at about \$1,000,000, and his widow is the daughter of one of the wealthiest of English marquises -the Marquis of Bristol-who does not possess a very large family. The principal Clancarty estate, which gives an income of \$60,000 a year, is at Garbally, County Galway, Ireland, and consists of some 24,000 neves of land. There is another and smaller estate at Roscommon, which is worth about \$10,000 a year, in addition to various other odds and ends scattered over the United Kingdom.

The new Conntess of Clancarty, however, will probably have to content herself with helping to dispose of the entailed inheritnnce, as it is hardly likely that she will ever secure any of her mother-in-law's estate if that lady can prevent it. During the divorce suit last July the actress once said: "As a matter of fact, it is Lady Clancarty who had the most to do with bringing the guit. You see, she knows that her husband cannot live much longer at the rate he is now going, and, of course, at his death I would become Countess Clancarty, while she would be on the shelf as the Dowager

Countess. She is a tolerably young woman yet, and that is why she is trying to disposseas me of the title."

How the Marriage Occurred.

Belle Bilton is one of two sisters, daughters of a highly respectable sergeant of artillery, formerly stationed at Woolwich. The sisters inherited tainted blood from their mother, and while still in their early teens caused a scandal in the garrison. They graduated to the London music halls, where they soon became great favorites with the pristocratic youth of Great Britain, at supper parties and the gayeties of midnight as well as behind the footlights.

Belle met young Dunlo at the Corinthian Club. At that time, just about two years ago, the individual who to-day became Earl of Clancarty was a beardless boy of 20. just out of college, and possessed of even less than the average of brains allotted to the present generation of England's nobility. Some time previous to her acquaintance with Dunlo, the actress became a mother, which fact has never been conccaled. It has been her boast, however, that her life has been all that could be desired. Indeed, the most strenuous efforts of the Clancarty family could not prove the contrary to the satisfaction of the jury in the recent divorce trial.

Playing in the Role of Venus

The new Countess has been playing in a burlesque company at Manchester, assuming the role of Venus in a costume which exhibited her charms to the best advantage. She has not appeared for a week or more, however, and it is understood that there is every prospect of another heir to the Clancarty estate being announced in the near future. The intentions of the young couple cannot be learned to-night, but there is no doubt that Belle Bilton will insist upon her rights to the fullest extent, and her hus band will hardly have the courage to oppose her, as he still seems madly infatuated. The new Countess is a beauty in the strongest sense of the word. Nor is there ""make up" about it. Her brows and

He, in fact, does hold Clearing House due bills issued by the Keystone Bank for this and about \$600,000 more of State money, but the due bills are worthless and undoubtedly fraudalent, for he is not credited on the books of the broken bank with a dollar of State funds. Not America, France and Brazil Will Prevent WASHINGTON, May 29 .- The State Department has not been officially informed of any intention on the part of the Chilean insurgents to bombard Valparaiso, as reported from Paris. There is no disposition on the part of this Government, so far as can be learned, to "intervene" in the Chilean contest, for the meaning of this term in diplomatic language is a siding with one faction or the other. Now certainly the Government of the United States is not throw their tools into the bottom of a wagon near the cemetery pump. Not knowing how many more men we might have to cope with we thought it just as well not to go any farther, but as they started their horse on a run we could discern the shape of a covered wagon in the shade of the trees. We then went back to the grave and found that they had started a hole about four feet long, which they had dug a foot deep out of the west side of the grave. The dark lantern, the rays of which we had seen, was lying on the upturned sods, having been either forgotten or dropped by the frightened sooundrels in their flight." Placed in the Hands of the Police. prepared at present to go to this length. As repeatedly stated, our Minister to Chile and the Ministers of France and Brazil stand ready to mediate between the factions, in the interest of peace; but this is a very different function from intervention. If the insurgents should attempt to bom-bard Valparaiso, it is more than probable that the foreign Ministers there would enter an energetic protest based on the fact that the foreign interests in that city are larger than the native Chilean interest. In view than the native Chilean interest. In view of this large interest it may be that the protest, if disregarded, may be enforced to the foreign fleets in Chilean waters, but their action would go no further than was necessary to protect the property and lives of foreign subjects and the Chileans would be left to fight their own battles.
