He said he lived in Ohio with his wife Catherina and four children. Prior to that it had been a happy household, but his wife began to drink and it became impossible to live longer with her. He took two of the children and fied to Minnesota, locating at a place called Anoka. A few months later his wife followed him and the unhappy life was resumed. Finally, Zwald says he be-came so exasperated at her drunkenness he concluded to put an end to it. He purchase he arsenic and put it in her whisky. countries of the world. It is less known in guide-book literature than any country in Europe and it is a land of wonders and a continuously changing kaleidoscope of strange things of both man and nature. We know very little of Mexico. Pres gave us a picture of the country in the time of the Montezumas. Passing travelers have written their impressions that came to them while looking out of express trains going at the rate of 40 miles an hour, and we have a hazy idea of the Republic as a sort of a tail to the United States. The truth is that the country is an empire in itself, and just what sort of an empire and how much it is worth, even its own citizens do not know. It is supposed that there are about 11,000,000 of people in the Republic, but they have never people in the Republic, out of the most of been accurately counted, and the most of them are of a character and race about. Disaster after disaster has overtaken the social arrangements, and in the highest quarters the season is being shorn of its charms through illness or death among all the best families. Fortunately, how ever, the signs of influenza are beginning to disappear, although it is not to be expected that we shall be wholly free from it, during what must, by courtesy, be called the summer months.

Cavendish's Death Deplored.

Lord Edward Cavendish, whose death is greatly deplored by everybody, and who, as will be remembered, succumbed to this complaint, was one of the most amiable and unpretentious of mortals and possessed singularly unassuming manners. He had a peculiarity, however, which was that of never carrying a stick or an umbrella in the streets of London. His death causes some delay in the long-predicted marriage between his brother, the Marquis of Hartington, and the Duchess of Manchester. Lord Victor Cavendish will become the ultimate heir presumptive to the Dakedom of Devonshire, should Lord Hartington, who is the next in succession (being the eldest son of the old Duke), marry the Duchess of Manchester, which is almost a certainty for him to do, and die without issue,

Sir George Stephen is the first colonist upon whom the dignity of a peerage has ever been conferred. He was the President of the Canadian Pacific Railroad until 1888. He married Miss Charlotte Annie Kane, the daughter of Benjamin Kane, and has a daughter, who is the wife of Sir Henry Stafford Northcote. The Duke and Duchess of Marlborough spent Whitsuntide at Blenheim Palace, where they entertained a large party. Miss Shaw, the daughter of Cantain Shaw, the popular chief of the metropolitan fire brigade, met with a serious accident on Tuesday night as she was driving home from a party. The horses bolted and the brougham in which she was scated was overturned.

The Movements of Americans.

Mr. Cornelius Vanderbilt, with his family, left London yesterday for Dresden by way of Brussels. Before his departure, Minister Robert T. Lincoln gave a large dinner, at which Mr. and Mrs. Vanderbilt and Mr. Clark E. Carr, the Minister to Den mark, were the chief guests. Covers were laid for 24, and the places were occupied by some of the leading Americans resident in London.

Made a Crusade on the Law. [BY DUNLAP'S CABLE COMPANY.] LONDON, May 30 .- Among the more serious matters which have attracted the attention of the country is the keen crusade which the Chamber of Commerce is going to wage against the America

copyright law. The number of trades affected by this law is greater than one would imagine in thinking of the matter at first, and includes compositors, proof-readers, pressmen, printing machine man-agers, printers, warehouse men, electrotypers, stereotypers, paper makers, type-founders, inkmakers, printing machine makers, bookbinders, photographers and

lithographers. Minnie Palmer's Heart Is Still Dead Set Against Yours Merrily.

[BY CABLE TO THE DISPATCH.] LONDON, May 30 .- Minnie Palmer is living in lonely grandeur at the Sevoy Hotel, and her heart is as hard as ever against her husband, John Rogers. Had she been disposed to forget the alleged knife incident, she can never forgive, she says, the subse-quent insults and cruelty which she has since had to suffer, chief among which, it eems, is selling out her home in New York. The People of Acapulco Thought Her Search-Lights Meant Destruction

ACAPULCO, VIA CITY OF MEXICO, May 30.—The people of Acapulco are very much relieved by the final departure of the Esmer-alda, after taking in 250 tons of coal paid for in San Francisco by Mr. Richard Turnbull. The Esmeralda will probably go to Panama, where she will attempt to procure more coal. The people here were greatly frightened by the use the Esmeralda made of her brilliant search-lights at night. Everybody thought the town was to be bombarded. It is believed that the Itata has gone to Melbourne, Australia, having secretly transferred her arms and ammunition to the Esmeralda on May 15, just off Acapulco. The Esmeralda is well provisioned. Before leaving one of the superior officers

of the Esmeralda stated that no complaint had been made against the Mexican authori-ties, who, he said, had acted in a perfectly justifiable manner. He repeated that the greater part of the coal received came for they, from the United States.
