A NEW MINERAL BELT

With Rich Gold-Bearing Ledges Discovered by Prespectors.

LARGE OPERATIONS IN IDAHO.

Profitable Gold Mines There That Are Attracting Attention.

A FAMOUS ARIZONA BULLION DISTRICT

(SPECIAL TELEGRAM TO THE DISPATCH.) NEW YORK, May 31.—The following reports from the leading mining centers of the

West have been received: SAN FRANCISCO-The Hogsback Mine on the Forest Hill divide placer, in which the channel Golden River was supposed to have been struck last December, has been closed, and it is said that no work will be done for a year. The mine is owned by a French mpany, which also owns several other drift mines and tunnels on the same divide. The reason for closing the Hogsback is not given. The company has had some bad luck in its American ventures, its first purchase being the Sucker Flat Mine, which had been worked out long before and then salted for the benefit of the Frenchmen. The experience with American promoters cost the Frenchmen about \$500,000.

The Kelty Mine, about 12 miles from So nora, was bonded some months ago by an English company, and the development has proved so satisfactory that the sale has been completed. The Pittsburg Mine produced \$12,000 worth of bullion last month, which left a balance of \$4,000 over working ex-

A Rich Gold Discovery.

VIRGINIA CITY-A two-foot vein on the fifth level of the Mt. Diablo Mine is yielding enough \$70 ore to keep the mill running steadily. Consolidated California and Virginia are heisting the usual amount of \$33 ore. In the northwest end of the Washington Mountains, which skirt one side of the ton Mountains, which skirt one side of the Paprump valley, a party, headed by George Montgomery, have discovered gold-hearing quartz. They located several leads, some of which contain galean and sil-ver-bearing ores, but all rich in gold. The ledges are from five to ten feet wide and the mineral belt in which the ledges are situated is at least six miles long and from one to two miles wide. A new district, named Montgomery, in honor of the discoverer, has been organized, and there are about 100 men and one woman in camp. Water is carried in bags packed on donkey's backs four miles from the nearest springs. Nut pine timber, good for fuel, is abundant within four or five miles of the mines, and white pine, suitable for timber, abounds about 20 miles from Montgomery. The nearest postoffice is Ivanpah, Cal., 80 miles away, but a postoffice will be established at Montgomery in a few weeks.

Some Profitable Gold Mines.

IDAHO CITY - The old belt on the west side of Boise basin is attracting the attention of capital this year, and the chances are that some sales will be made in chances are that some sales will be made in the course of a few weeks. Experts have been examining the mines of the Gold Hill Company, and the Belshazzer and Eben-ezer. The Gold Hill 25-stamp mill has run constantly on ore from the Gold Hill and Pierce Mines for 21 years and each year has been one of large profit. The Ebenezer and Belshazzer are locations west on the same belt, and the former has yielded argely; but, as transportation and eduction in a custom mill was expensive, no ore from it has been crushed during the mines be made, a mill will be erected on either Canen or Fall creek, and the ore con-veyed to it by trainway. Like the mines of grade, but found in immense bodies, and can be mined at a merely nominal cost.

Milling will also be cheap, as there is abundance of water and timber handy. This belt can supply sufficient ore to keep several large mills busy the year around. The Washington is opening up sloping ground on a lower level and increasing the force of miners. The mill will resume crushing in a week or 10 days. There is, abundance of rich ore in the ore houses.

Big Operations in Progress

William Sweet has the double compart ment shaft on a mine at the head of Big Muddy, this county, down to the depth of over 200 feet. He will sink it 400 feet further, in order to satisfy a company nego-tiating for the property that it is a good mine. Thirty stamps of the Elmore mill, at Rocky Bar, have commenced crushing, and the other 20 will drop in a few days. The 10-stamp mill belonging to the same company will start up in a few days. These mills have been idle for nearly a year to give the miners a chance to open the mine at a greater depth and place it in condition for the rapid extraction of ore. The Reeser mill, in the same district, will soon crush 100 tons of gold ore for the Ophir. This ore was extracted last winter by lessees. Some very rich mines have lately been discovered in a new district in Latan county, North Idaho, called Ruby, and for which a deputy recorder has been appointed. The ore is lead and carbonates, carrying a large percentage of silver. Within the last three weeks many rich lodes have been discovered and located. One of the claims, called the Silver King, which is rapidly developing, yields richer ore as depth is attained. At the depth of 30 fact drifts have been run 15 feet each way, with no signs of walls. The assays range from \$16 50 to \$15 68 per ton. Considerable platinum has also been discovered, and mining for this valuable metal will be carried on as soon as preparations for work can be A Home Refining Furnace.

SILVER CITY-A refining furnace is con structing at the Flagler works here, and will be in operation within 30 days. Although New Mexico has produced many million dollars' worth of metal, none of it has ever been refined in the Territory, and worth of the bean probled. most of it has been smelted in smelters out-A large part of the ore produced in the Territory is milling ore, but the concen-trates produced from treating this ore are, for the most part, shipped to El Paso or Colorado for reduction, and the mining industry of the Territory has been hampered for want of adequate facilities for handling ore. Shipments of ore from Deming are increasing and there is every indication that the mines in the southern part of the country are in better condition now than ever before. One firm at Deming shipped eight carloads of ore last week, all of which was high grade smelting ore. Although the American Mine, which was the largest producer at Hachita, has been closed down, there have been other discoveries made in that camp and at Apache, nine miles distant, which will keep up the production of that section.

Preparing for a Boom. The Carpenter district, near Georgetown, is receiving considerable attention just now and a town site has been located, in antici-pation of the coming boom. It is likely to become as important a camp as Kingston, which is situated on the other side of the range and but a few miles distant. Managers are having considerable difficulty in tring the teams to haul ore from Pinos ites to this place. As high as \$2 per ton is being paid for a haul of about nine miles. The Pacific Gold Company has been getting ore hauled until very recently for \$1 60 per ton, and the mine produces, on an average, 35 tens of ore per day. The searchy of teams is caused by the temporary employment of a large number by the con-tractors on the new railroad. The mills at Pinos Altos, which usually have to close down during a portion of the summer on account of scarcity of water, will have no occasion to do so this summer. There has been an unusually heavy fall of rain this occasion to do so this summer. There has been an unusually heavy fall of rain this year, and the mountains are full of water. Class bars.

Placer mining can be carried on advantage-ously, and it is quite likely that a much larger amount of dust will be produced at Pinos Altos this year than for many years

A Famous Bullion District.

TUCSON—The Yellow Jacket is a great mine. Ore is plentiful, and it takes only a few men to keep the mill in ore. The Oro Blance mining district will in the near future become famous for its production of bullion. The numerous ledges are being successfully developed. The Turquois is in a very healthy condition. Bryant has struck a breast of ore in his tunnel, and is in about 200 feet. He struck the ore about 100 feet a breast of ore in his tunnel, and is in about 200 feet. He struck the ore about 100 feet sooner than he expected. The assays show an increasing value as work progresses. The first assay showed eight ounces of silver, the next day 20 ounces and the day following 30

ounces of silver per ton.

Development work goes on only in the Silver Bell. At fair estimate, there are on the dumps at least 10,000 tons of 25-ounce ore, which will not pay to ship and must be worked on the ground. With reduction works in operation, Turquois will be one of the best camps on the Pacific coast. Work has entirely ceased in the Silver Bell, purchased last September by an English syndicate, owing to bad management. They had a fine prospect and every indication of a fine piece of property, but from the want of ounces of silver per ton. piece of property, but from the want of mining knowledge they worked out all in sight and then refused to spend any more

WRECKED ON THE ROCKS.

The 26 Sailors of a Stranded British Vessel Get Off Safely. SAN FRANCISCO, May 31.-The San Fran-

cisco Steamship Company's boat, Hengkong, brings fuller advices of the loss of the British steamer Holme Eden, Captain Prentice, which was lost on Luconna Rocks while on the way from Hongkong to Shanghai. The vessel was from Antwerp with a general cargo. She left Hongkong April 19.

On April 25. during a thick for the state of t cargo. She left Hougkong April 19.
On April 25, during a thick fog, she ran broadside on Luconna Rocks, and in half an hour the engine room and after part of the vessel were full of water. Two lifeboats were launched and the crew, 26 in number, put off safely, losing, however, all their effects. The boats stood by until the vessel keeled over, when the Captain gave orders to pull away. The boats became separated at night, but at noon next day the mate's boat was picked up by the steamer Myrmidon, and the Captain's boat by the Chinese gunboat Chaowe. The men suffered some from hunger and exposure. They were taken to Shanghai.

LEAVING THE PARTY

The Farmers' Alliance Swallowing the Democracy of Kansas.

DEMOCRATIC LEADERS CAST DOWN.

While the Republicans Peel Extremely Joyful Over the Prospect.

THEY ARE IN GOOD FIGHTING SHAPE

[SPECIAL TELEGRAM TO THE DISPATCH.] TOPEKA, May 31.-The Democratic eaders in this State who will look for favors in the event of the election of a Demperatic President in 1892 are discouraged and nonplussed. It was with difficulty that a Democratic organization was preserved in the Alliance landslide last fall, but with the organization of a National People's party, the Democratic masses are falling into the Alliance camp singly and by delegations. Within the past ten days more than 20 Democratic papers in the Alliance strongholds have left their party and announced them-The ex-office holders under Cleveland who have charge of the Democratic machinery have done everything in their power to stem the tide, and the Republicans who had their experience with the farmers last fall are enjoying the fun immensely.

By far the most influential Den paper in the State, the Salina Herald, edited by Dr. N. D. Toby, Democratic candidate for Congress in the Fifth district two years ago, announces this week that in the future it will battle for the success of the People's party. The Clay County Democrat, edited by W. J. A. Montgomery, Democratic candidate for State Auditor four years ago, has changed its name to the Oritic, and the News-Beacon, of Wichita, which, with the Salina Herald, was the strength, from a newspaper standpoint, of the Dumocratic party, is clamoring for a fusion. The only encouragenent which these papers receive is from the

Republican party.

The People's party leaders do not like it, because it places a club in the hands of the Republicans, and the old Alliance organs are advising their followers to go slow in receiving the new converts to fellowship. The most potent argument used by the Republican orators and papers last fall was the very proposition that the third party idea was a Democratic scheme.

The Democratic scheme.

The Democratic leaders who encouraged the third party idea until there was not enough following left them to effect an organization are now engaged in a desperate attempt to get their forces together. Governor Glick, Senator Carroll, Sam Riggs, of Lawrence, and W. C. Jones, Chairman of the Democratic Central Committee, have taken the initiative and are attempting to taken the initiative, and are attempting to show that those who remain by the show that those who remain by the party until 1892 will reap the reward for their fidelity. In the Fifth Congressional district there is not a Democratic paper of standing left. The same is true of the Sixth, and with but one exception, and that is in the city of Wichita, the Seventh district Democracy is represented by papers which advocate fusion. The Republican farmers who voted with the People's party last fall have been given the excuse which they have desired since the adjournment of the Legislature.

Nothing Left of Democracy. The refusal of the South to send delegater to Cincinnati, and the immediate desertion everywhere....A bridge gave way at Bed-ford with hundreds of people on it....Two Western towns were partly burned up.... a most telling effect. It is now certain that a most telling effect. It is now certain that there will be only two tickets in the field in this State in 1892. What there is left of the Democratic party now is confined to the

People's party through the Citizen's Alllaws in connection with the Robert and Minnie... Two milition bushels of coal moved from Charleston, W. Va., by boat in one day ... Dr. Fordyce Baker is dead... Dr. Brooks steps will be taken to establish a lodge in steps will be taken to establish a lodge in the State.

BLAINE TAKES AN OUTING.

He Will Go to Bar Harbor With His Health Almost Restored. New York, May 31.-Secretary Blaine

took two outings to-day, a drive through Central Park in the forenoon and one during the afternoon. Mr. Blaine was accom-panied by Mrs. Blaine and Mrs. Damrosch. All arrangements are now completed for the journey to Bar Harbor, but at what hour the party will leave or what route hour the party will leave or what route will be taken has not been announced. This evening it was stated at the house that Mr. Blaine was almost as well as ever.

Rich 24-Inch Black Grenadines, with handsome colored figures, \$1 a yard, just half the intended retail price when imported. Bought both the above lots last week at a great reduction or they would not be sold at such prices.

LARGE NEW LOTS BLACK SILK GRENADINES,

that are so desirable and so extensive a collection to choose from that if you are interested in grenadines we claim it's to your these before buying. We 50c, 75c, 85c, \$1, \$1 25 and \$1 50, advantage to see these before buying. We are sure we have the prices enough less that you'll save several dollars on a Grenadine Dress purchase.

BOGGS & BUHL.

It's easy enough -the Ball corset. That's because it has coils of fine wire springs in the sides. They clasp the figure closely, but yield to every motion.

They "give", but they come back. So does your money -if you've worn a Ball corset two or three weeks, and find that you don't like it. "

LOW CUT SHOES

Some one has said, "Keep your wrists and ankles cool, and your whole

body will be cool." We can't regulate the wrists, but when it comes to

LADIES, GENTS, MISSES AND CHILDREN.

keeping the ankles cool we're right in it. This is the time of year when we all desire to keep cool and comfortable, and low cut shoes are the only sensible kind to wear in summer.

We quote below a few of the prices in which we have this style of shoe. Remember that while others may quote our prices they will not give you the quality for the price that we do.
