Big Lot of True Bills.

YESTERDAY IN THE COUNTY COURTS

The three new Judges, John M. Kennedy, Samuel A. McClung and William D. Porter, were inducted into office yesterday morning and the new court of common pleas No. 3 was opened. Judge Stowe presided and all the other Judges of the county courts were present. All laymen were excluded from the room, their places being filled with some 150 attorneys. Judge Stowe instructed Crier Soffel to open court, after which Chief Clerk McQuilty, of the Prothonotary's office, read the commissions of the new Judges, as issued by the Governor. Judge Stowe then administered the eath to each of them, and ushered them to the bench. Judge Kennedy, as the President Judge, then made an order

heid in February, May, August and November of each year, and prescribing the same rule as to return day, issue writs, etc., as is in force in the other courts.

The attorneys present were then lined up at the bar, and with uplifted hand took the eath as prescribed by law for admission to practice. Judge Kennedy announced that the first session of the new court would be held to-morrow morning. The Judges then held a small levee for an hour, receiving the congratulations of those present, judges, attorneys and citizens who came in to witness the ceremony.

regulating the terms of court, which will be held in February, May, August and Novem-

ness the ceremony.

There were three suits entered in the new court shortly after it was instituted, the first by Willis F. McCook, who filed a precipe in assumpsit by M. B. Cushing against Frank McCann. The second was filed by R. A. and J. Balph, in a suit for debt by A. W. Boyd against C and Annie B. Horne, and the third by R. C. Duncan in a suit for trespass by A. Fatterson against the People's Natural Gas Commany.

Eye Strain.

Eye Strain.

This is the result of an action of the muscles of the eye to adjust the focus so as to give a perfect image on the retina, when the conditions of refraction are abnormal—as far sight, near sight, or mixed sight. Mixed sight causes the most severe strain, far sight next. In fixing the sight the muscles of the eye act in the same way that you would grasp a spring. The stronger the spring the stronger the effort necessary to compress it. The more imperfect the refraction and the weaker the muscles, the sooner you will realize you have weak sight. Natural or acquired muscular debility, excessive use of the eyes, bad light, indigestion, all make the weakness more prominent, the sight more imperfect, accompanied by pain or burning in the eyes, headache, depression of spirits, and forebodings of blindness. These cases are all curable by the proper means applied on scientific principles. With his 20 years of practical experience with all varieties of such cases, Dr. Sädler, 804 Penn avenue, has proved his ability to treat them with the most satisfactory results.

REVERSED THE ORDER. BAD ECZEMA ON LIMB

An Important Electrical Decision by Ohio's Supreme Court,

HAVING A FAR-REACHING EFFECT. Telephone Company Denied Exclusive

Control of the Earth FOR RETURN CIRCUIT OF ITS SYSTEM

(SPECIAL TELEGRAM TO THE DISPATCH.)
COLUMBUS, June 2.—The Supreme Court today rendered a decision, reversing the
lower court in the case of the Cincinnati Incline Plane Railroad Company vs. the City and Suburban Telegraph Company, brought up on error to the Superior Court of Cincin-nati. This involves the two great interests of telephone exchanges and electric street railways, and affects the city largely, as well

as others adopting the improved and advanced system of street railways.

The action was brought by the telegraph or The action was brought by the telegraph or telephone company to enjoin the Incline Plane Railway Company from constructing and running their electric railway by the use of the Sprague, which is the single trolley system, because the same interfered with the use of the telephone and almost destroyed their business; that one could not hear anything but the rumbling noise of the railway when using the telephone, and that the telephone and the railway using the earth for the return circuit, the current of the railway being much stronger than that of the telephone company, destroyed and deadened the circuit of the latter.

They Wanted the Earth.

They Wanted the Earth.

They Wanted the Earth.

It was also charged that the railway occupied the ground first, but changed from the horse-car system to the electric system, and the telephone company claimed the first right to the earth with the use of it for their return circuit. The matter could be remedied by one of two ways. First, by the railway putting in what is known as the double trolley system, by the use of which the telephone would not be interfered with. Second, by the telephone company, instead of using the earth for the return circuit, putting in a wire overhead for this purpose.

This particular telephone company was established as a telegraph company before the telephone was discovered and afterward went into the telephone business, so that its system of telephone is different from the regular one.

A Far-Reaching Case.

A Far-Reaching Case.

But this controversy and the rule of law established by this case is an important one to the telephones and the street railroads now fast adopting the use of electricity. Had the decision been adverse to the railway system, and give to the telephone exclusive control of the earth for return currents, it would in all probability have interfered to some extent with street lights and manufacturers.

some extent with streeting its price of turers.

The finding of the Court is, upholding the theory that the street is primarily intended for the use of the general public for the purpose of traveling and transporting goods, and the fact of motive power, which facilitates the object, being changed to something which might interfere with a subordinate use of the highway ought not to make any difference in that regard.

From Knee to Foot a Mass of Run Sores. Cured by Cuticura Reme-dies. Total Cost \$1.75.

I have been afflicted with a sore limb, which the doctors called eczems. My limb from the knee to the foot was one mass of running sores. The doctors bandaged it every day for a week, and every time the bandage was removed a large scab would come off, and the blood pour down. I got one bottle of CUTICURA RESOLVENT, one box CUTICURA, and one cake CUTICURA SOAP, and they cured me. I told a lady who was similarly afflicted to use it, and it cured her also. I gratefully acknowledge that it was CUTICURA that cured me.

HOME HINTS.

When disease stalks in and fells the father prostrates the mother, or seizes the children all becomes desolation. To make the home happy, keep the health secure. Poverty may come, but it can be endured if the health remains. No health was ever maintained without assistance. Health, like the body, must be supported. But do not make a mistake and do it foolishly.

The best way to sustain the health is to assist it, to stimulate it. The best way to healthily stimulate is by the use of pure, unadulterated medicinal whiskey. Doctors have declared this, scientists have confirmed it, and both have insisted that Duffy's Fure Matt Whiskey is the only strictly medicinal one in the market. Indeed, it has become, as it deserves, a household necessity.
