INTOLERABLE ECZEMA

Two of my boys were seriously affected with ecasems, so that it was intolerable to bear. I had tried all remedies by physicians, who falled to relieve us; but in one month from the time I began using CUTICURA REMEDIES, we were all well. One of my boys had it about five months. I would recommend them to all persons so afflicted.

It is hardly to be expected, however, that it will meet with any heavy demand outside of the large cities, as it takes at least one season to get a new thing started in the hat trade." OIL WORK IN BUTLER

The Drill Continues Active, but Not Many Dry Holes Are Found.

OPERATIONS IN THE OLD POOLS.

Several Wells Are Due to Get the Sand in the McCurdy Field.

THE PRICE OF CORDAGE IS REDUCED The oil operations in Butler county for the

first week in June have not been productive of anything of a bearish character. While the drill has been and is moderately active in spots, yet it has not developed anything of a startling nature. Very few dry holes are being completed, which is an indication the operator is not wildcatting with his usual avidity, but is content to hug the developed lives as closely as possible. The Cummings & Boland well on the John Kennedy farm west of Mars, came in the first of the month at 200-barrel rate, but has since clined to 75 barrels per day. It proved s stellar attraction on account of the sand (Snee) it was producing from. A number of rigs are going up in this neighborhood.
